Maintenance and Care

Do not use chemicals or corrosive agents to clean this product. Use a soft dry cloth to wipe it.

Battery Usage and Maintenance:

If the product will not be used for an extended period, it is recommended to perform a full charge-discharge cycle on the battery every three months to prevent damage from over-discharge and to extend the battery's lifespan.

Storage Capacity

The built-in system software occupies a portion of the storage space. Therefore, the actual available capacity will be slightly less than the total capacity indicated in the product specifications.

1. The product contains strong magnets. Keep it away from items susceptible to magnetic interference, such as magnetic cards, implantable medical devices (e.g., pacemakers), hard drives, and RAM chips.
2. The product is not waterproof. Strictly avoid contact with any liquids. If water enters the product, it may cause internal corrosion, potentially leading to battery self-ignition or even explosion.
3. Use the product within an ambient temperature range of -10°C to 45°C. Excessively high temperatures may cause the battery to catch fire or explode. Excessively low temperatures will reduce battery performance. Do not place the product near heat sources, such as inside a vehicle exposed to direct sunlight.
4. Never store the battery for extended periods after it has been fully discharged, as over-discharge can permanently damage the battery, rendering it unusable.
5. The product contains small parts. Take care to prevent children from swallowing them accidentally.
