FEDERAL COMMUNICATIONS COMMISSION
Authorization and Evaluation Division 7435 Oakland
Mills Road
Columbia, MD 21046

Dear Sir or Madam:

The chip WL2400 installed in our product Base Station (model name: R102. FCC ID: 2BOZY-R102), only activate 2.4G SRD: 2405-2480 MHz, There are two WL2400 chips in total, One only supports receiving and the other only supports transmitting(U3:For transmit function; U11: For receive function). Whether it is used for TX or RX is achieved through software configuration, the other frequency is disabled by using the software and the end users cannot activate it.

The chip TLSR8253F512ET32 installed in our product Base Station (model name: R102. FCC ID: 2BOZY-R102), only activate BLE(1 Mbps & 2 Mbps): 2402-2480 MHz, the other frequency is disabled by using the software and the end users cannot activate it.

Please contact me if there is need for any additional clarification or information.

Sincerely,

Signature:
