

Creating Your Profile

You will need to download the free SWAN mobile app in order to create your user profile. The mobile app syncs to your SWAN mirror and can be used as an on-the-go companion.

- Use the QR code below to link directly to the App Store / Google Play.
- Create your SWAN user profile in the mobile app.
- Once your profile is complete it's time to activate your mirror.

Activating Your Mirror

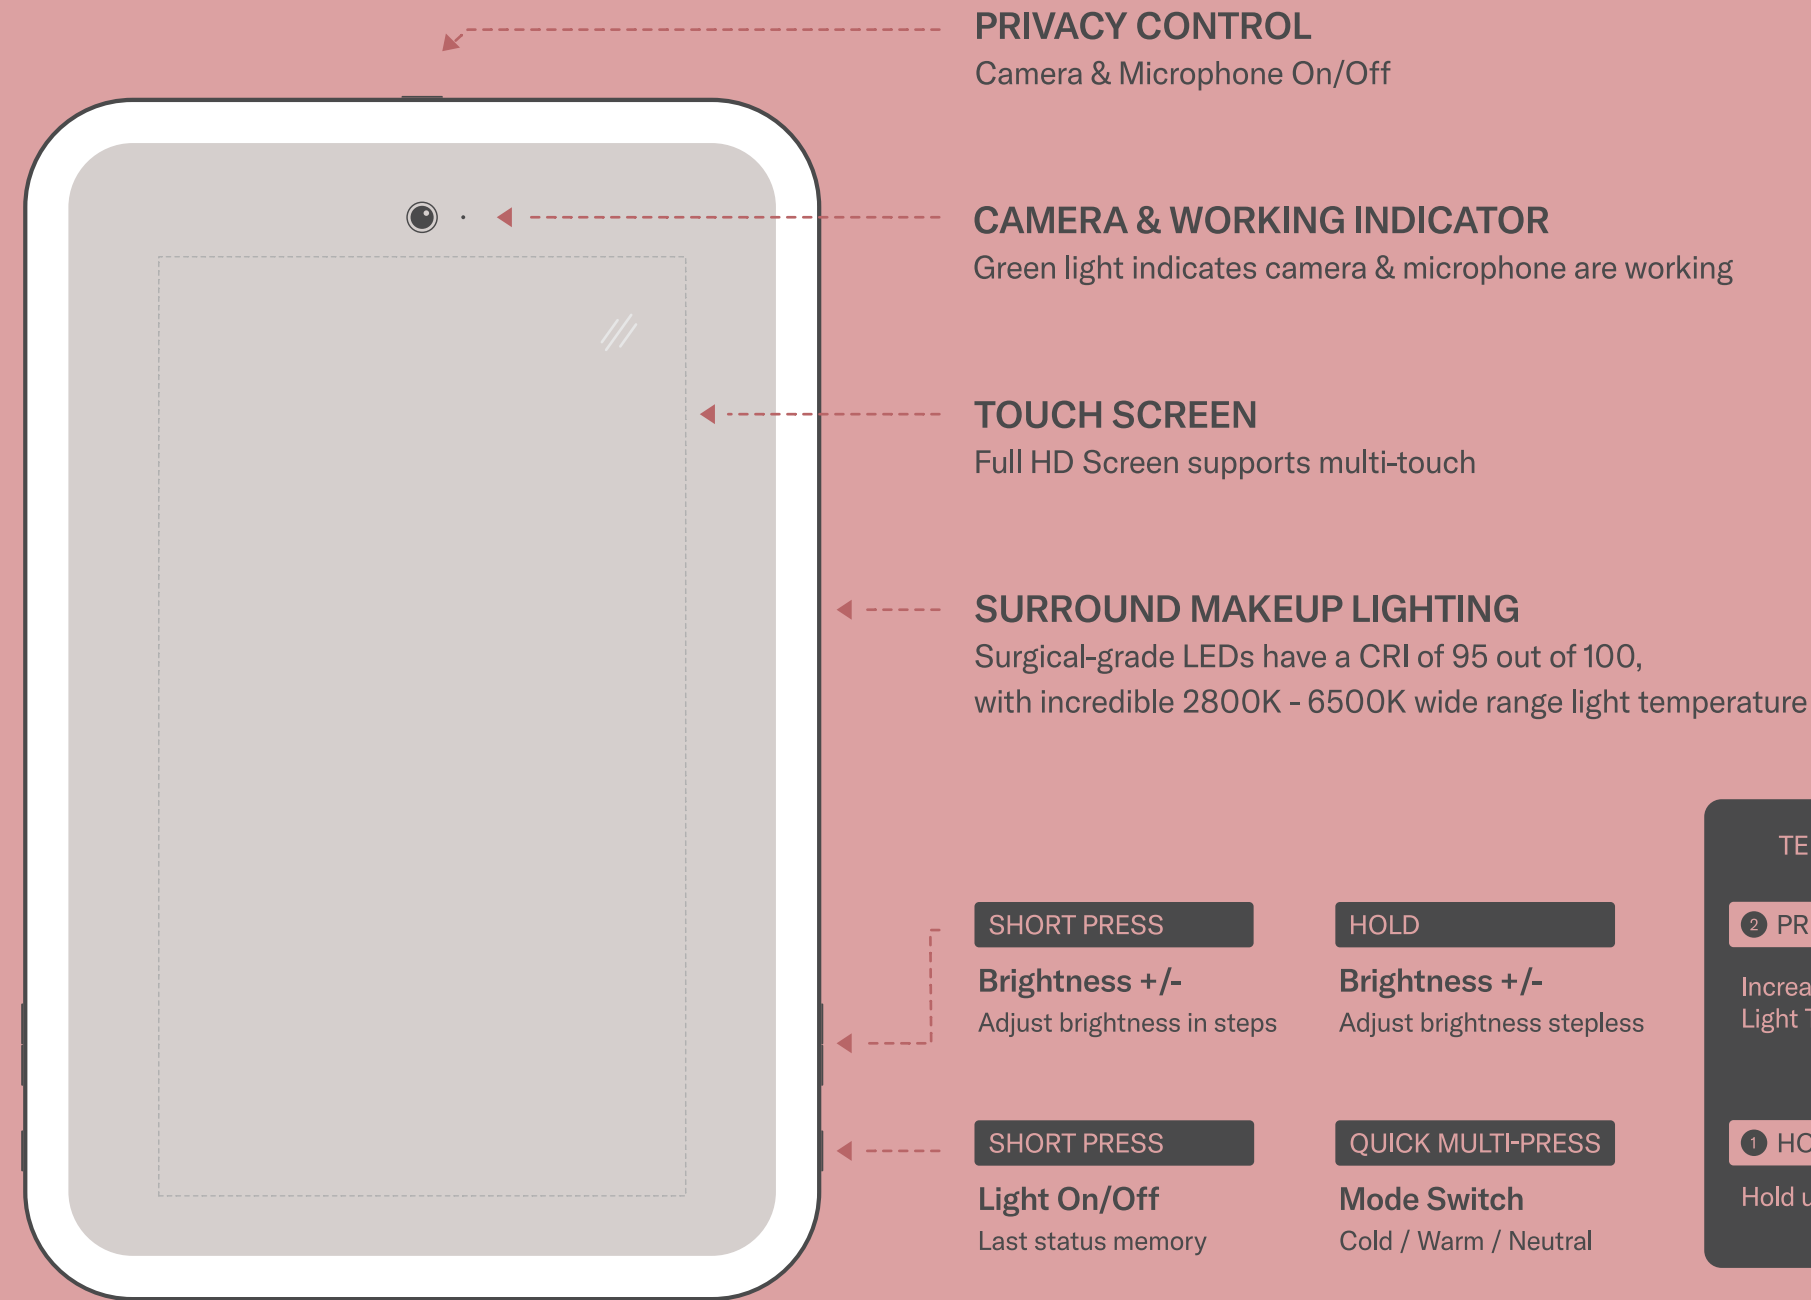

- 1 Make sure your SWAN mirror is standing securely on a flat surface.
- 2 Remove the power cord from the mirror's cradle.
- 3 Attach the power cord to the mirror on the bottom edge of the rear panel.
- 4 Plug the other end into a nearby power source (cable is 6 feet long).
- 5 Press the on/off button on the lower left-hand edge to power up your SWAN mirror.
- 6 Follow the instructions that appear on the home screen to complete set-up.

Wall Mount

Your SWAN mirror can be wall-mounted as well as set on a flat surface. For easy hanging use this side as a template. The two markings with the cross in the middle serve as a guide to correctly mark the drill holes in the wall.

Environmental Conditions

Operating Temperature: 0 - 40°C
Operating Humidity: ≤80%RH, non-condensing

Storage Temperature: -20 - 50°C
Storage Humidity: ≤80%RH, non-condensing

Safety Instructions

SWAN devices are designed and built to meet international safety guidelines. To keep yourself safe, please pay close attention to the instructions below, as well as any warnings on the device itself and on the screen. Only use official SWAN accessories or accessories recommended by SWAN. Make sure all cables and connections to the device are in good condition. Make sure the charge cable is not in danger of being stepped on and damaged.

Keep the power supply away from moisture. Be extra careful with the device's connections, making sure plugs fit correctly into sockets, and checking any extension cords. Double-check that the power supply's voltage rating matches your outlet's voltage. Only authorized technicians should open the device; otherwise, the warranty will be invalid. If the device isn't working right or is making strange noises, unplug it from the power outlet right away and contact SWAN customer service by email at support@swanbeauty.com.

CAUTION!

Be careful not to drop the device. When cleaning, don't use rough sponges or cleaning products with solvents; stick to soft microfiber cloths, like the one we included in the box. If you choose to wall mount the device, make sure to use a solid wall to prevent injuries and damage to the device. As a precaution unplug during thunderstorms. It's also a good idea to unplug it if you're not going to use it for a while. Always keep the device away from open flames and water! Working with any electrical device can be risky, so always handle it with extreme care. Keep the device out of reach of young children.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF warning

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
