Assembly Instructions

Only use the screws provided with the product for installation.
WARNING: When the installation for the first time, remove the wings and attach the parts by following the steps below.

1 Find a suitable wall to install your heater. Do not install the heater over a power outlet.

2 Loosen the screws on the backing plate then slide it out of the wall.

3 Hold the bracket firmly, and slide it downward to connect it to the wall.

4 Place the bracket against the wall and ensure it is level with a bubble level.

5 Mark the positions for the wall anchors and drill the holes.

6 Insert the lower hole of the bracket into the lower slot of the heater.

7 Slide the backing plate into the slot, then tighten the screw to secure the heater to the bracket.

WARNING

- To reduce the risk of fire, do not store or use gasoline or other flammable vapors and liquids in the vicinity of the heater.
- CAUTION:** Do not place anything on the heater. Do not touch the heater when it is hot. Do not touch the heater when it is hot.
- Fire hazard:** Operate the heater in the upright position only. Any other position can cause damage to the heater and even a fire hazard.

Heater Safety: Do's & Don'ts

Do

- Plug into a 15A 120V wall outlet only.
- Check the plug and outlet regularly and keep them clean.
- Check the plug regularly and contact DREO Customer Service if it's bent or damaged.
- Ask a qualified electrician to fix the outlet if it's loose.

Don't

- Share a power strip / power strip extension cord and/or a daisy plug can cause overheating and result in a short circuit, fire or electric shock.
- Don't share the outlet with other appliances.
- Don't plug into a loose outlet.
- Don't use a bent or damaged plug.
- Don't use a power strip / power strip extension cord.
