Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) with various electronic components. Two black cables with gold-colored connectors are plugged into the board. The board is placed on a blue textured surface.
Solder Board-Component View 4	 A photograph of a black printed circuit board (PCB) with various electronic components. The board is placed on a blue textured surface. Two metal rulers are positioned next to the board for scale. The ruler on the left is marked in centimeters (1 to 8) and millimeters (0.5mm, 1mm). The ruler on the right is marked in millimeters (0.5mm, 1mm) and centimeters (1 to 8).

Solder Board-Component View 5	 A photograph of a small, square, black printed circuit board (PCB) component. The board is populated with numerous surface-mount components, including resistors, capacitors, and integrated circuits. It features four gold-plated mounting holes at the corners. The component is placed on a blue fabric surface next to a metal ruler with millimeter markings for scale.
Solder Board-Component View 6	 A photograph of the same PCB component from a different angle. This view shows the underside of the board, revealing the solder joints and the components on the opposite side. The four gold-plated mounting holes are visible. The component is placed on a blue fabric surface next to a metal ruler with millimeter markings for scale.

Solder Board-Component View 7	 A photograph of a rectangular printed circuit board (PCB) populated with various electronic components, including integrated circuits, resistors, and capacitors. The board is positioned next to a metal ruler for scale. The ruler has markings in millimeters (0.5mm and 1mm) and centimeters (1 to 8). The PCB is approximately 4.5 cm wide and 3.5 cm high. The components are densely packed on the board.
Solder Board-Component View 8	 A photograph of a circular printed circuit board (PCB) populated with various electronic components, including integrated circuits, resistors, and capacitors. The board is positioned next to a metal ruler for scale. The ruler has markings in millimeters (0.5mm and 1mm) and centimeters (1 to 5). The PCB is approximately 2.5 cm in diameter. The components are densely packed on the board.

Solder Board-Component View 9	 A photograph of a gold-colored, circular solder board component with a central hole and a small square feature on the left. It is placed on a blue background next to a metal ruler with millimeter markings. The ruler shows the component is approximately 10mm in diameter.
Solder Board-Component View 10	 A photograph of a black solder board component with a central square feature and four small circular features. It is placed on a blue background next to a metal ruler with millimeter markings. The ruler shows the component is approximately 10mm in diameter. The component has the text "PP002397.06" and "SL2403.11" printed on it.

Solder Board-Component View 11	 A photograph showing a small, circular electronic component with a black PCB and gold-plated contacts. The component is placed on a blue surface next to a metal ruler with millimeter markings. The ruler shows the component is approximately 10mm in diameter.
Antenna View	 A photograph showing a green printed circuit board (PCB) with various electronic components. Three antennas are connected to the board via thin black wires. The antennas are labeled with red boxes and lines pointing to them: 'AP6275S BT+WIFI Antenna 0' (top left), 'AP6275S WIFI Antenna 1' (bottom left), and 'USB6111 WIFI Antenna' (bottom right). The board is placed on a blue surface.
