

Solder Board-Component View 12	 A photograph of a circular, dark-colored solder board component with a central hole. The component is placed on a blue textured surface. To its left is a vertical ruler with markings from 1 to 6 mm. Below the component is a horizontal ruler with markings from 1 to 5 mm. The component's diameter is approximately 4.5 mm.
Solder Board-Component View 13	 A photograph of a circular, gold-colored solder board component with a central hole. The component is placed on a blue textured surface. To its left is a vertical ruler with markings from 1 to 6 mm. Below the component is a horizontal ruler with markings from 1 to 5 mm. The component's diameter is approximately 4.5 mm.

Solder Board-Component View 16	 A photograph of a small green printed circuit board (PCB) component, labeled 'WTX25X03058738R2W001/001/002/003/004/005', placed on a blue surface. The component is rectangular and features several surface-mounted components, including a central integrated circuit (IC) and various passive components. It is positioned next to a black ruler with white markings, which shows the component's dimensions. The ruler is oriented vertically, with the component's length corresponding to the 0 to 100 mm scale.
Solder Board-Component View 17	 A photograph of the same green PCB component, labeled 'WTX25X03058738R2W001/001/002/003/004/005', placed on a blue surface. The component is rectangular and features several surface-mounted components, including a central integrated circuit (IC) and various passive components. It is positioned next to a black ruler with white markings, which shows the component's dimensions. The ruler is oriented horizontally, with the component's width corresponding to the 0 to 100 mm scale.

Solder Board-Component View 18	 A small, circular electronic component, likely a microcontroller or sensor module, is shown. It has a black printed circuit board (PCB) with several integrated circuits (chips) and surface-mount components. The component is mounted on a blue fabric surface. A metal ruler with millimeter markings is placed next to it for scale. The ruler shows markings from 1 to 5 mm.
Solder Board-Component View 19	 A rectangular electronic component, possibly a battery or a power supply module, is shown. It has a black printed circuit board (PCB) and a black strap or cable attached to one side. The component is placed on a light-colored surface. A metal ruler with millimeter markings is placed next to it for scale. The ruler shows markings from 1 to 10 cm.

Solder Board-Component View 20	Rechargeable Lithium-Ion Battery Model: BP2000-16 IFpR41/137/[2P16S]E/-20+60/90 Battery Capacity : 51.2 VDC, 40 Ah, 2048 Wh Manufacturer : FJ Dynamics Technology (Fujian) Co., Ltd.  Li-ion
