

In-car wireless charging – USER MANUAL

Package Contents

1. Main Unit
2. Hook-Type Mount
3. Air Vent (Claw-Type) Mount
4. C-to-C Cable
5. Cable Organizer Clip (3P)

Product Features

- Supports Qi2-certified fast wireless charging with a maximum output of 15W.
- Provides stable charging even on bumpy roads when used with the 10-point silicone surface.
- Strong neodymium magnets securely hold the smartphone.
- A high-quality silicone pad protects the device from scratches.

Product Overview – Front View

- Ambient Light Ring
- Silicone Pad
- Wireless Charging Area
- Cable Connection Port

Product Overview – Rear View

- LED Button
- Magnetic Ball Joint
- Adjustable Mounting Hole

Ambient Light Usage Instructions

- Ten ambient colors are available to match your vehicle interior.
- Press the LED button once to change the color.
- Press the LED button twice continuously to adjust brightness (3 levels).
- Long-press the LED button to turn the light ON/OFF.

Air Vent Mount Usage Instructions

1. Insert the ball joint into the holder/head, then tighten the nut to secure it.
2. Attach the clip onto the air vent blade and rotate the knob to tighten.

Note: Excessive tightening may damage thin air vent blades depending on the vehicle.

Hook-Type Mount Usage Instructions

- Cable Management Holder
- Mount Locking Lever
- Length Adjustment Dial
- 360° Rotation Lock Pin
- Lower Stabilizing Support

Ultime (Claw-Type) Mount Usage Instructions

- Locking Clip
- Length Adjustment Dial
- Lower Stabilizing Support

Cable Connection Precautions

- For fast charging, use a vehicle charger or power adapter capable of supplying at least 30W.

Safety Precautions

- This product operates only with smartphones that support wireless charging.
- Connect the cable to the charger before use.
- Use a vehicle charger or adapter capable of 30W or higher for fast charging.
- Do not use non-Qi wireless charging pads. Use only Qi-certified equipment.
- Avoid using in high-temperature environments or direct sunlight.
- Do not place coins or metal objects on the charging surface.
- Avoid exposure to moisture or liquids.
- Do not charge in environments below -10°C or above 60°C.
- Do not disassemble, repair, or modify the product.
- Keep out of reach of children.

- If charging performance decreases, replace the cable or charger.
- Do not insert fingers into the vent or moving parts.
- If the internal temperature exceeds 50°C, charging may slow down or stop automatically for safety.
- If the device does not support wireless charging, purchase a MagSafe or magnetic-compatible case separately.

Product Specifications

Product Name: In-car wireless charging

Model Number: MT83254 / MT83255/ MT83604

Input: 5V-2A, 9V-2A, 12V-1.5A

Wireless Charging Output: 15W Max

Dimensions: 70 × 70 × 40 mm

Materials: ABS + PC + Silicone

KC Certification: R-Rn-m31-MT83254

Manufacturer: (주)메이튼

Customer Support: 1544-7306

Address: 404, Annam-ro, Bupyeong-gu, Incheon, Republic of Korea

Made in China

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
