

THANK YOU FOR CHOOSING OUR

IRRIGATION SENSOR

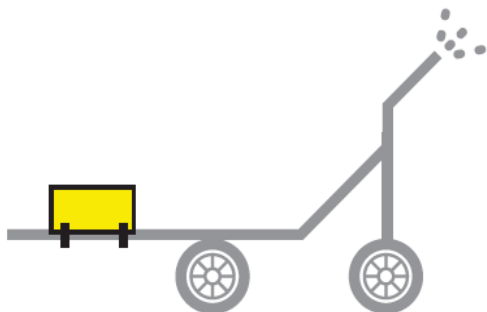

INITIAL SETUP

Insert the battery and securely fasten the lid using the provided screws.

Affix the provided 7sense bands to the mounts situated beneath the box.

Attach the sensor to the irrigation trolley, as shown in the illustration

User portal: www.portal.7sense.no

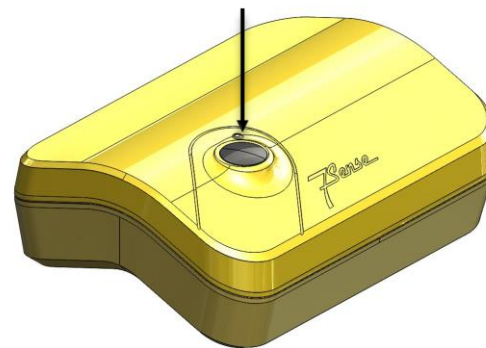

QUICK GUIDE

Upon installation of the battery, the sensor will appear in the portal.

Press the button to initiate Irrigation mode once the trolley has been positioned in the field.

When the sensor enters irrigation mode, the light blinks and an audible signal confirms the sensor's startup.

It is now possible to view both the position and status in the portal.
