Preamble

We are very appreciated for you choosing and purchasing our car radio. To help you use this unit properly, we sincerely suggest you read the manual carefully. We will not inform you the specification or design update thanks to the technology improvement. After you get this unit, please read all the information attached with it. This user manual we provide for you is mainly aimed at introducing all the functions of the unit, which can help you facilitate the process easier. With this user manual, you can obtain more detailed information about this unit's introduction and operation methods to ensure the operation is much smoother, faster and easier. The display picture of this user manual may be a little different from the actual picture, and the display contents of this manual may be a little different from the actual content as well.

Before installing this product

1. Use this unit with a 12-volt battery and negative grounding only . Failure to do so May result in a fire or malfunction.
2. To avoid shorts in the electrical system , be sure to disconnect the (-) battery cable before installation.

Important Safety Information

1. Do not attempt to install this product by yourself or having this product installed by persons without training and experience in electronic equipment and automotive accessories may be dangerous and could expose you to the risk of electric shock , injury or other hazards.
2. Do not allow this product to come into contact with liquids . Electrical shock could result . Besides , damage to the product , smoke and overheating could result from contact with liquids.
3. If liquid or foreign matter should get inside this product , please park your vehicle in a safe place . turn the ignition switch off (ACC OFF) immediately and consult your dealer or do not use this product in this condition because doing so may result in a fire , electric shock or other failure.
4. If you notice smoke , a strange noise or odor from this product , or any other abnormal sign on the screen . please turn off the power immediately and consult your dealer . Using this product in this condition may result in permanent damage to the system.
5. Do not disassemble or modify this product , as there are high-voltage components inside which may cause an electric shock . Be sure to consult your dealer for internal inspection , adjustments or repairs.

Important Safety Information

1. Do not operate this product , any applications , or the rearview camera option (if purchased) . if doing so , it will divert your attention in any way from the safe operation of your vehicle . Please do always observe safe driving rules and follow all existing traffic regulations . If you experience difficulty in operating this product or reading the display , please park your vehicle in a safe location and apply the parking brake before making the necessary adjustments.

2. Never set the volume of this product so high that you cannot hear outside traffic and emergency vehicles
3. To promote safety , certain functions are disabled unless the vehicle is stopped or the parking brake is applied.
4. Keep this manual handy as a reference for operating procedures and safety information.
5. Do not install this unit where it may (i) obstruct the driver's vision , (ii) impair the performance of any of the vehicle's operating systems or safety features , including airbags or hazard lamp buttons or (iii) impair the driver's ability to safely operate the vehicle.
6. Please remember to fasten your seat belt at all times while operating your vehicle. If you are ever in an accident , your injuries can be considerably more severe if your seat belt is not properly buckled.

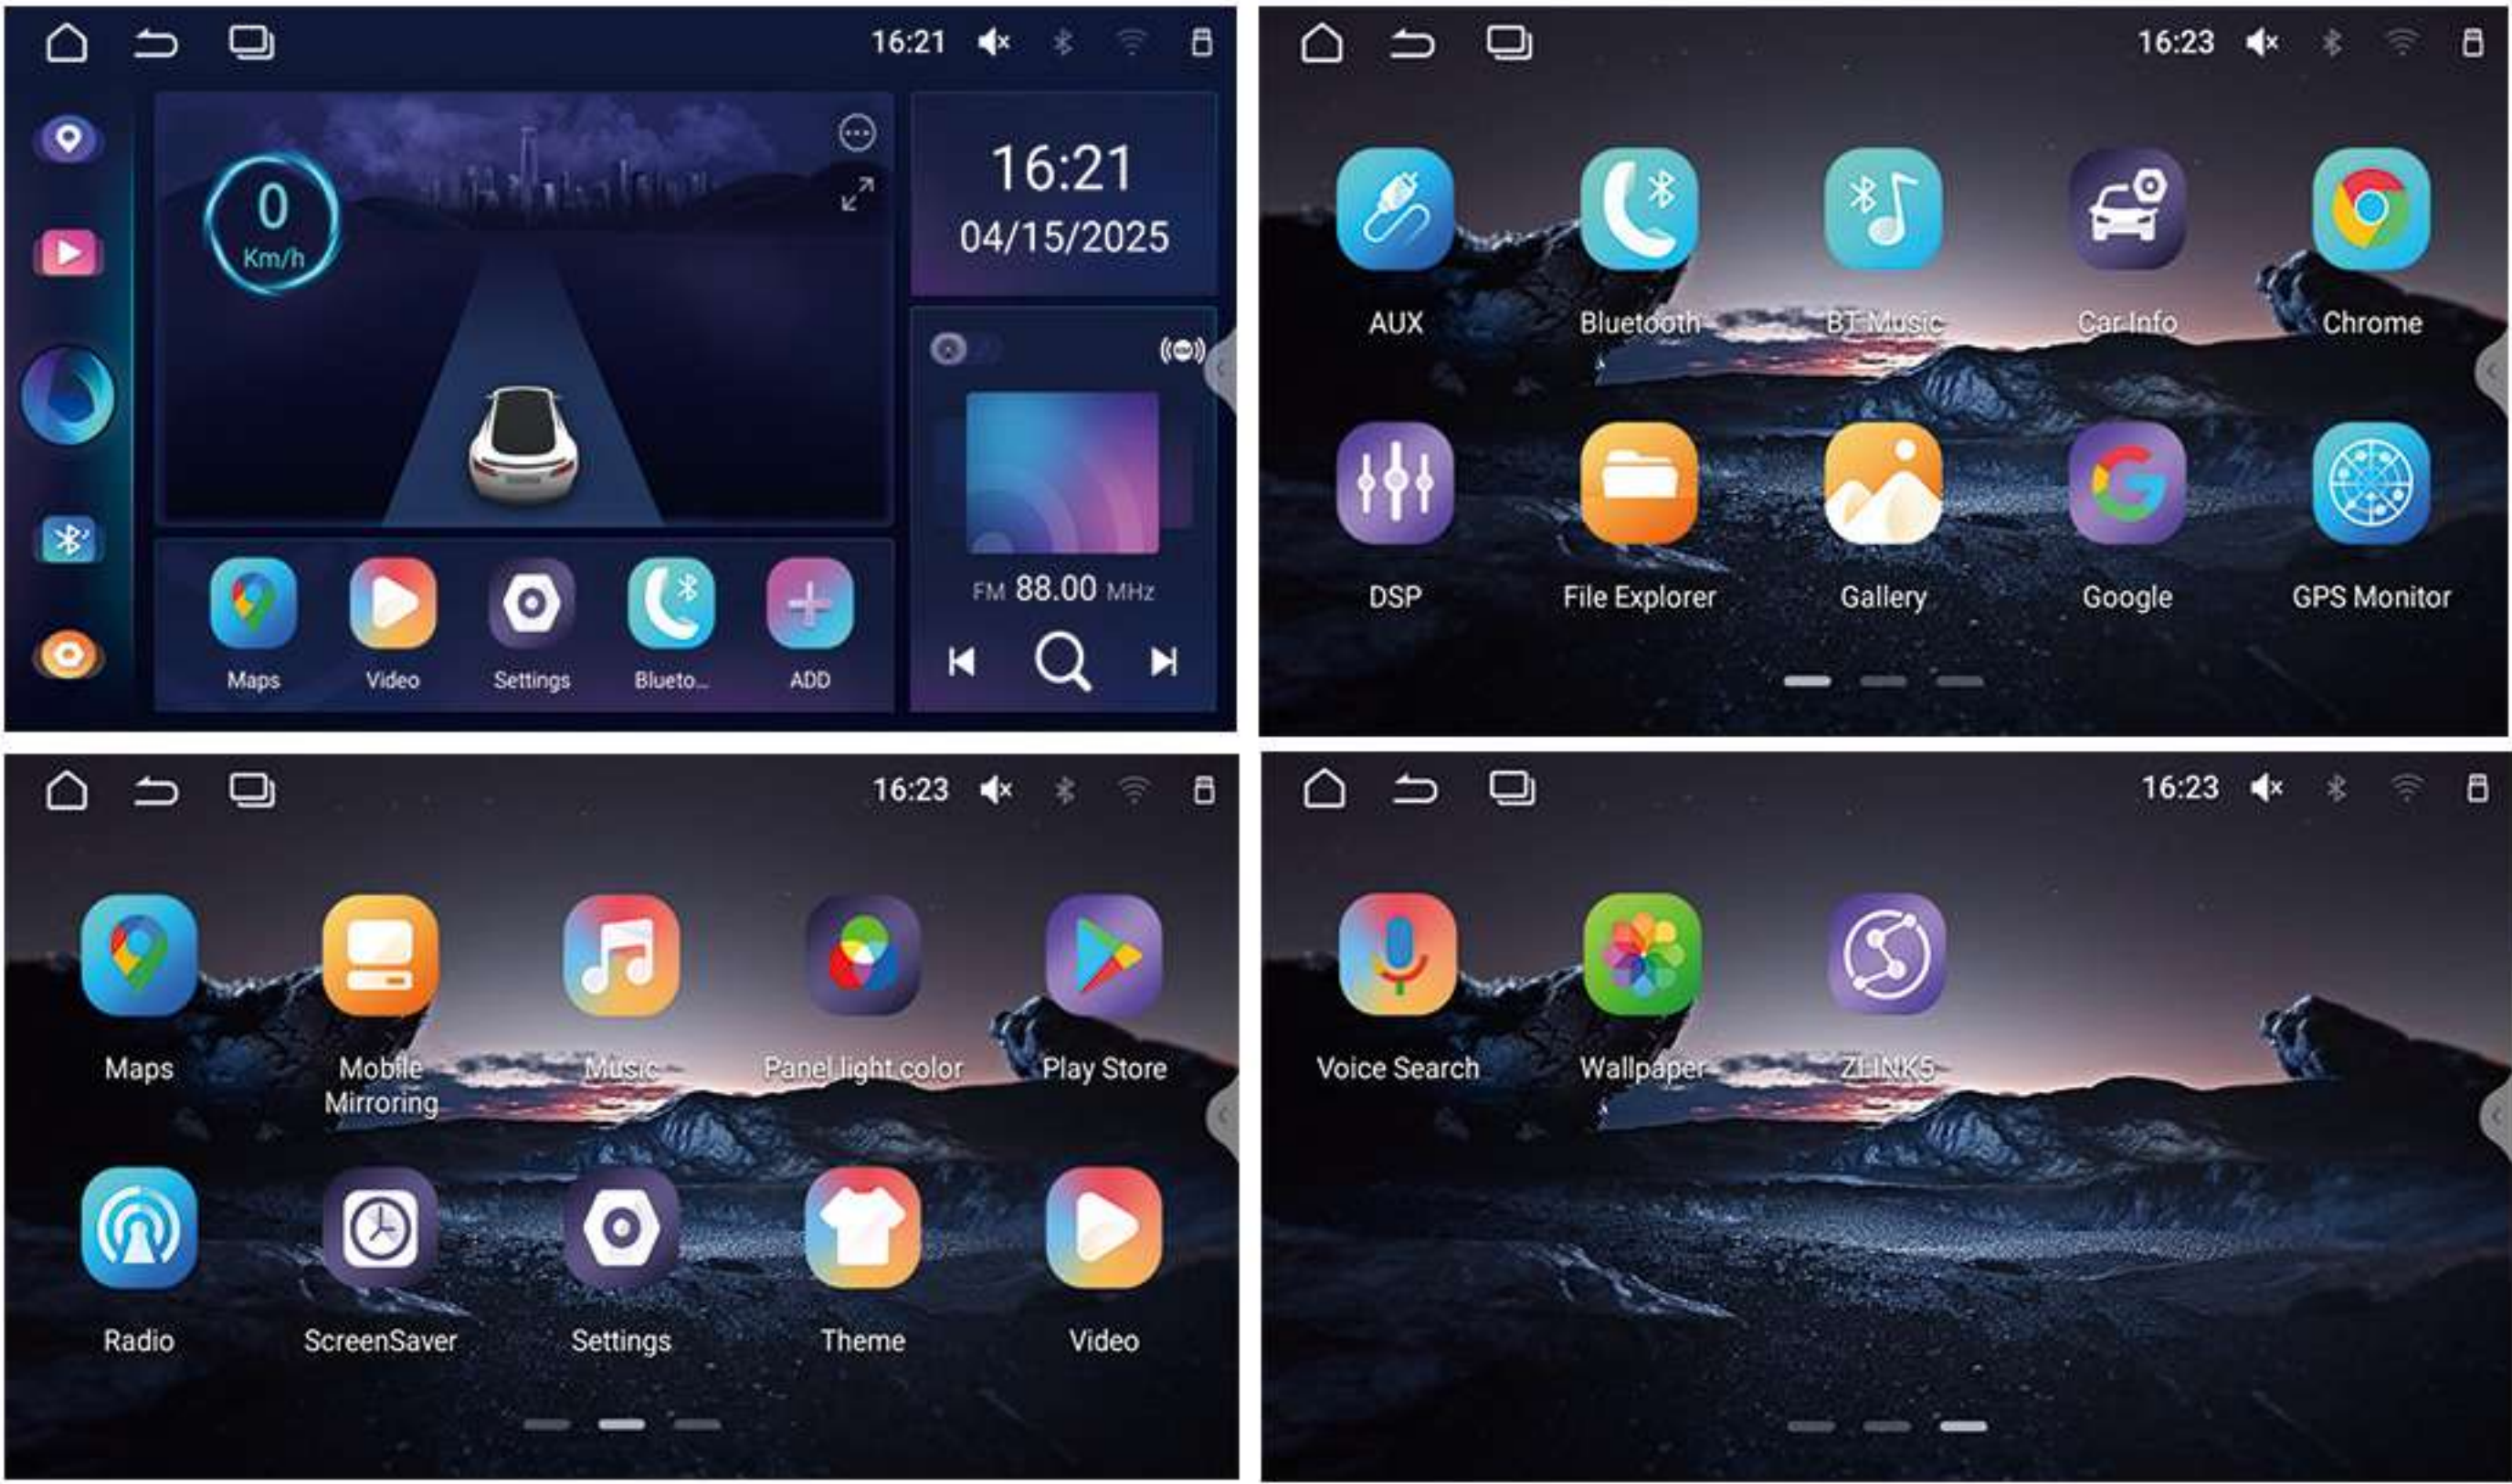

TO Ensure Safe Driving

1. Light green lead at power connector is designed to detect parked status and must be connected to the power supply side of the parking brake switch . Improper connection or use of this lead may violate applicable law and may result in serious injury or damage.
2. Do not take any steps to tamper with or disable the parking brake interlock system which is in place for your protection . Tampering with or disabling the parking brake interlock system could result in serious injury or death.
3. To avoid the risk of damage and injury and the potential violation of applicable laws , this product is not for use with a video image that is visible to the driver.
4. In some countries , the viewing of video image on a display inside a vehicle even by persons other than the driver may be illegal . Please pay attention to where such regulations are applied and obey them.
5. If you attempt to watch video image while driving , the warning " Viewing of front seat video source while driving is strictly prohibited . will appear on the screen To watch video image on this display , please stop the vehicle in a safe place and apply the parking brake Besides , please keep the brake pedal pushed down before releasing the parking brake.

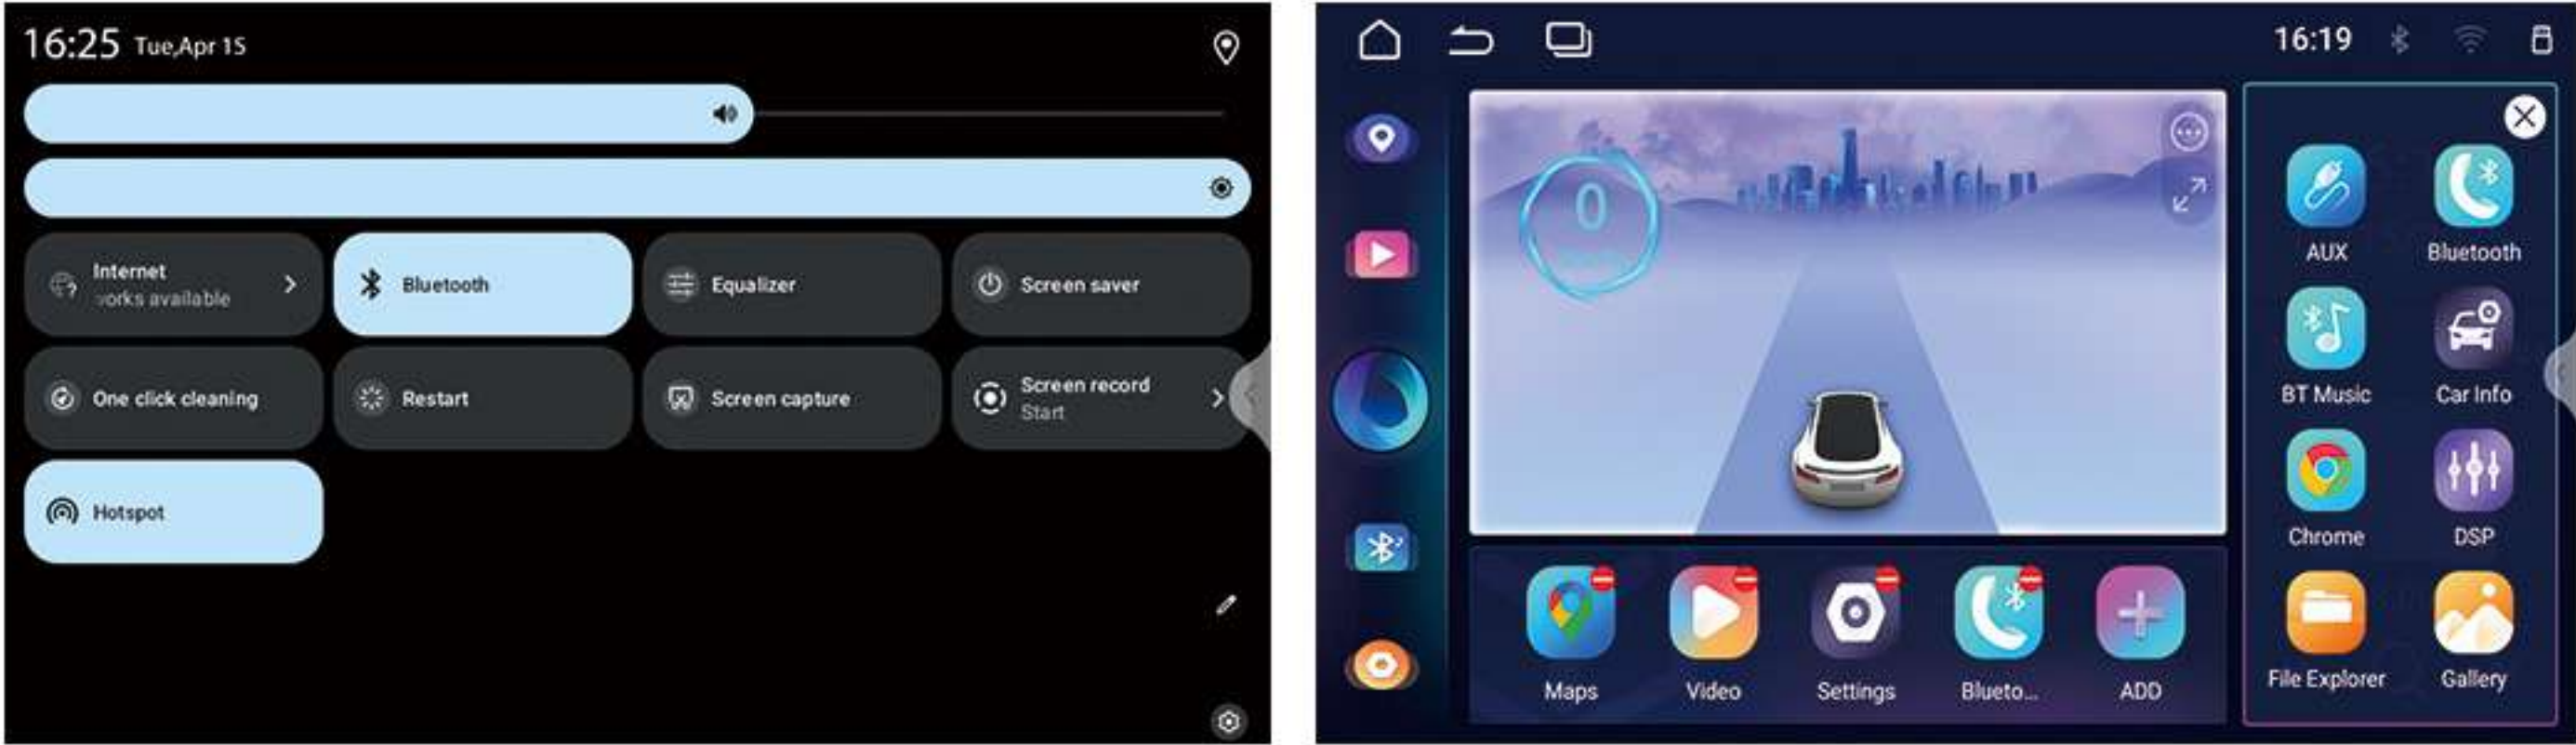

To Avoid Battery Exhaustion

1. Be sure to run the vehicle engine while using this product . Using this product without running engine can drain the battery.
2. Do not install this product in a vehicle that does not have an ACC wire or circuitry available .

[1] Main interface

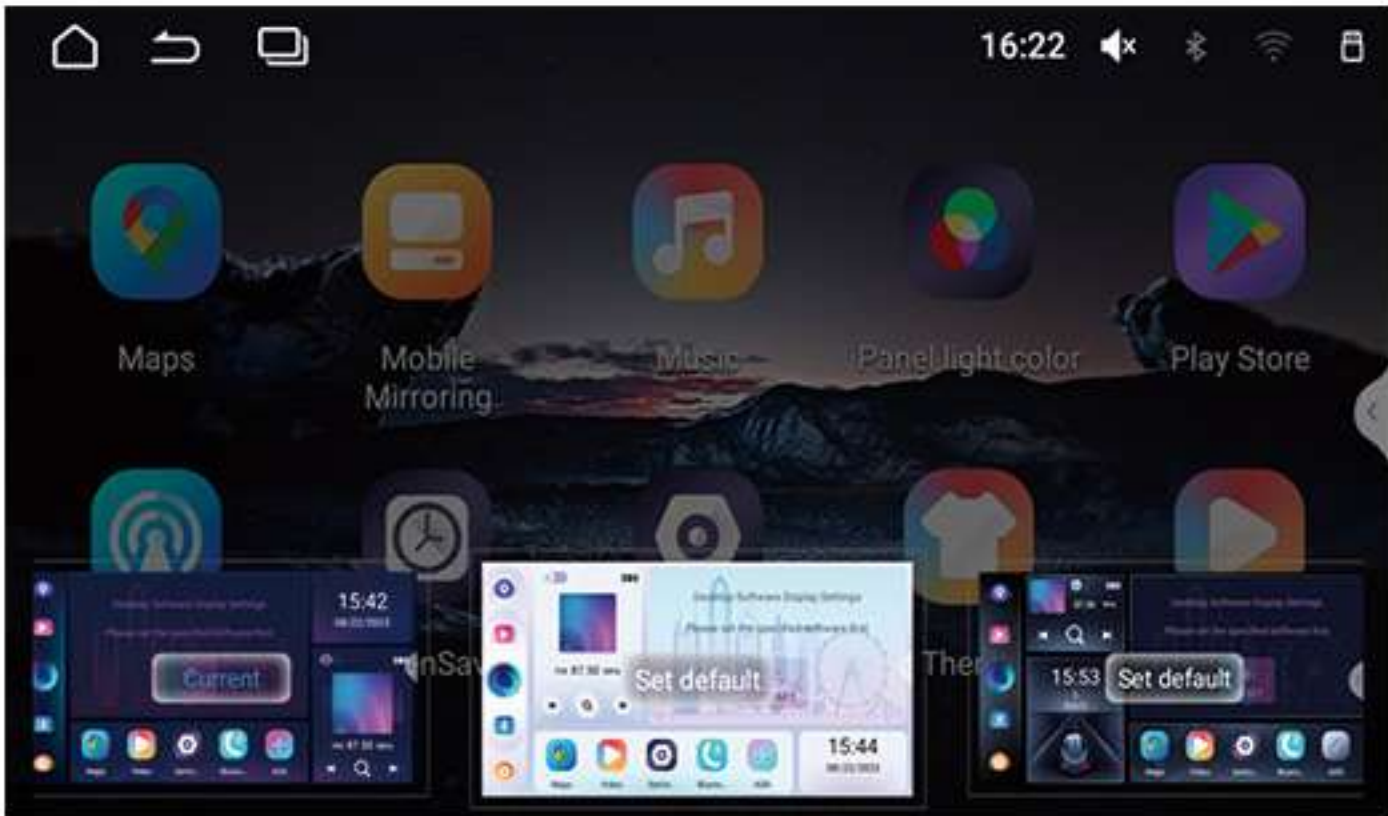

Pull down from the top to view the dropdown shortcut menu; Click on the right side to enter the shortcut application, as shown in the left image; Long press the bottom shortcut application to change other shortcut applications, as shown in the image on the right.

[2] UI Theme

Click  to enter the theme settings

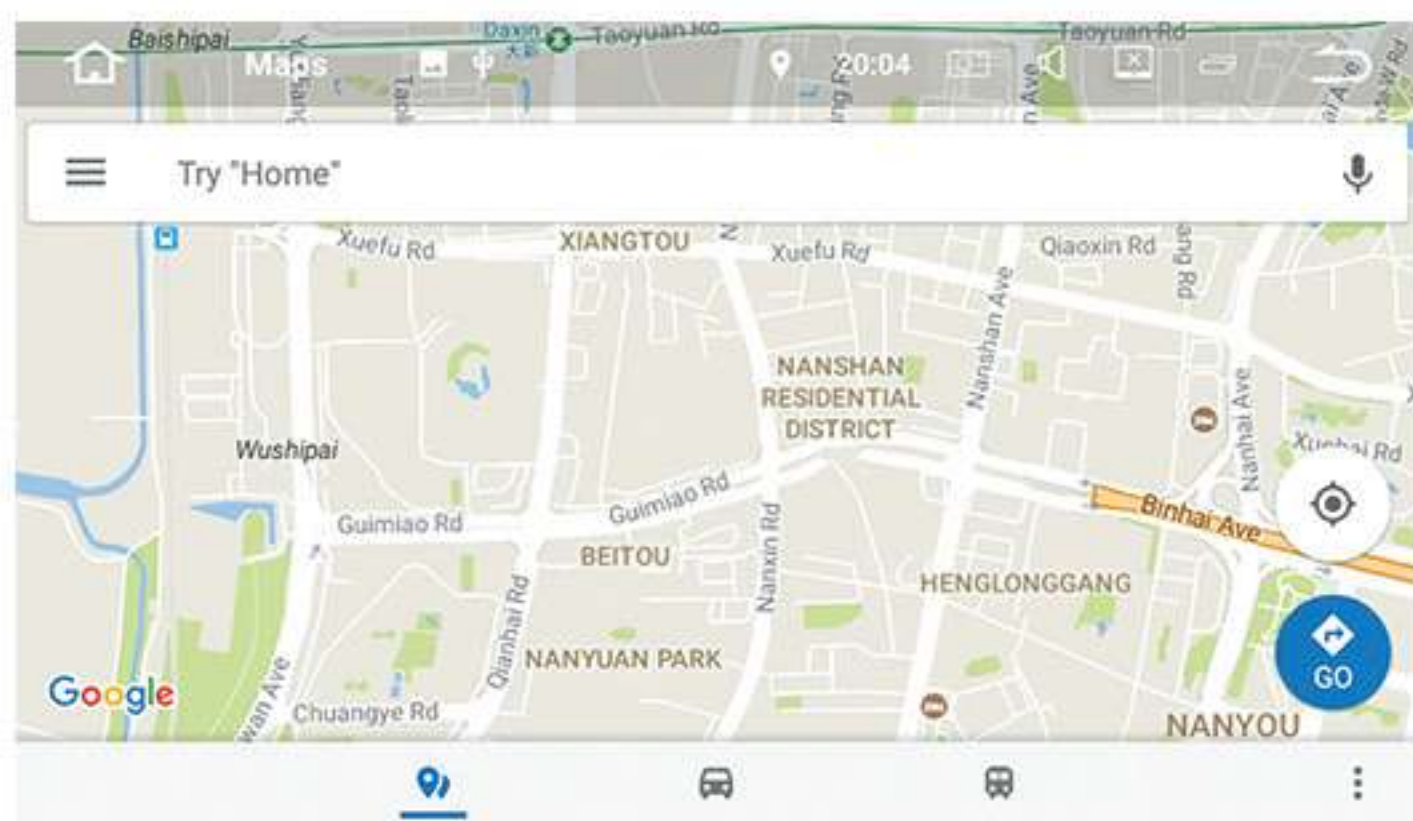

This contains 3 sets of UI theme designs

[3] Map Navigation

You can set the destination you need to reach in the software, start searching, and start planning the route

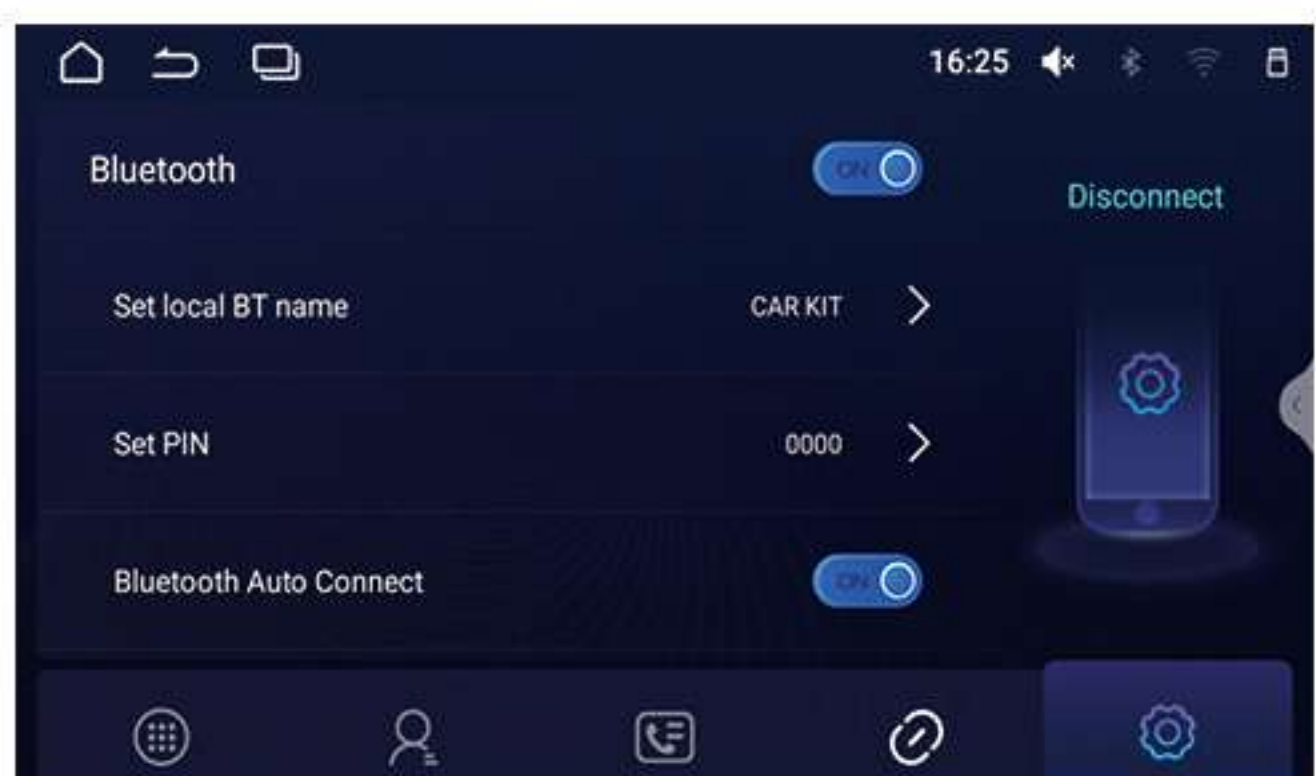

Google Map

i GO

[4] Bluetooth

Click  to enter the application, you can make a call here, operate the address book and set the Bluetooth name and password after you use the mobile phone to connect

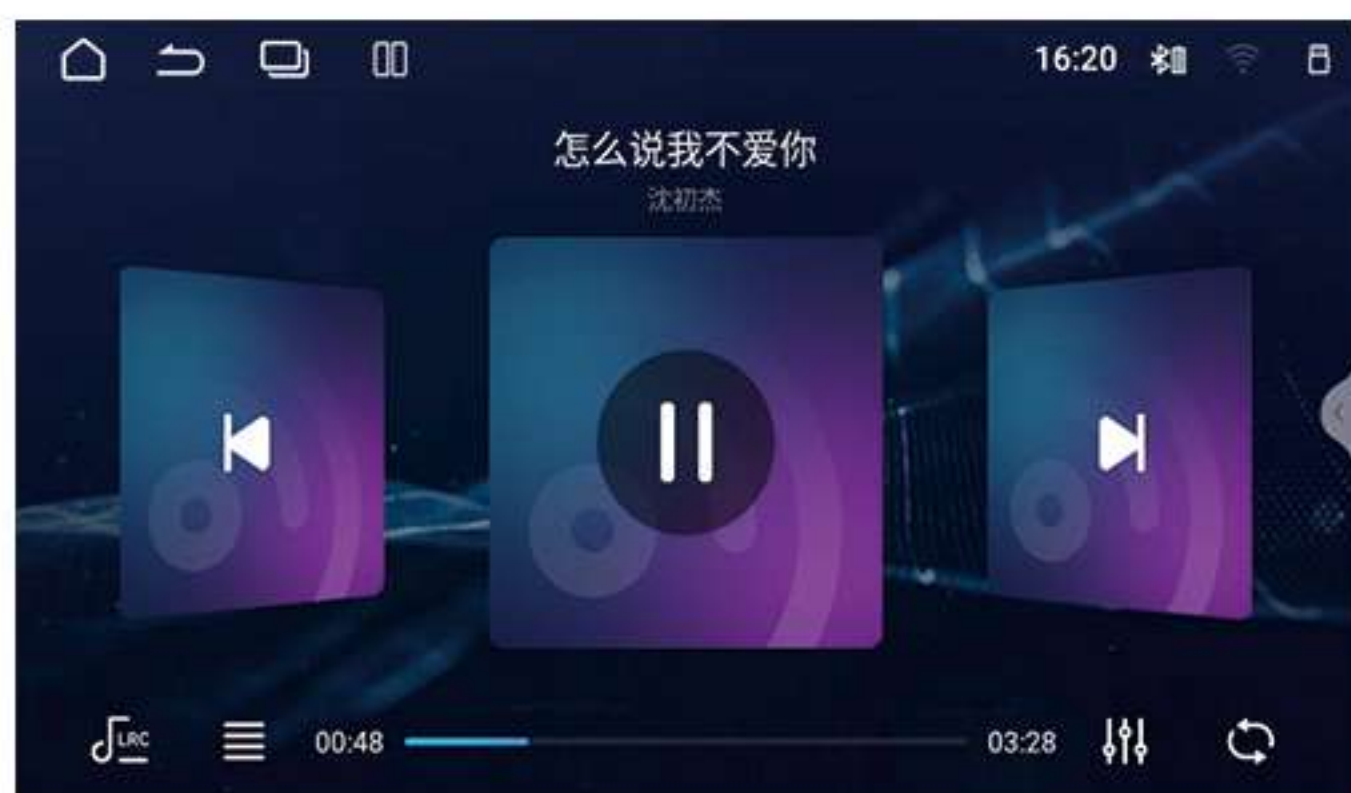

Click  to enter the application, where you can play music from your phone through the car radio

[5] Local Music

Click  to enter the application, You can use the U disk to connect the USB cable to read and play the local music you downloaded

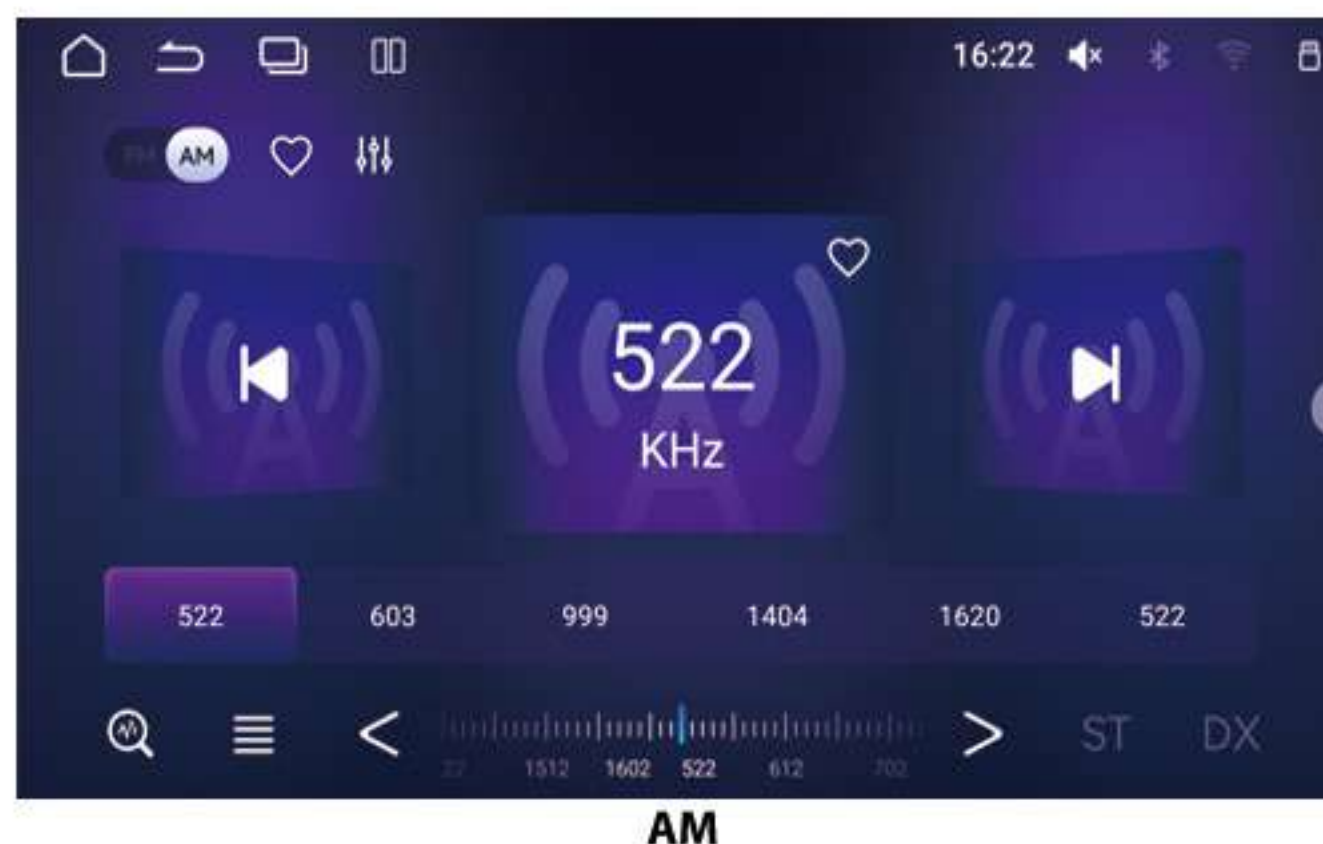

[6] Local Video

Click  to enter the application, You can use the U disk to connect the USB cable to read and play the local video you downloaded

[7] Radio

Click  to enter the application, then click  to search for any frequency band, click  to save

[8] DSP

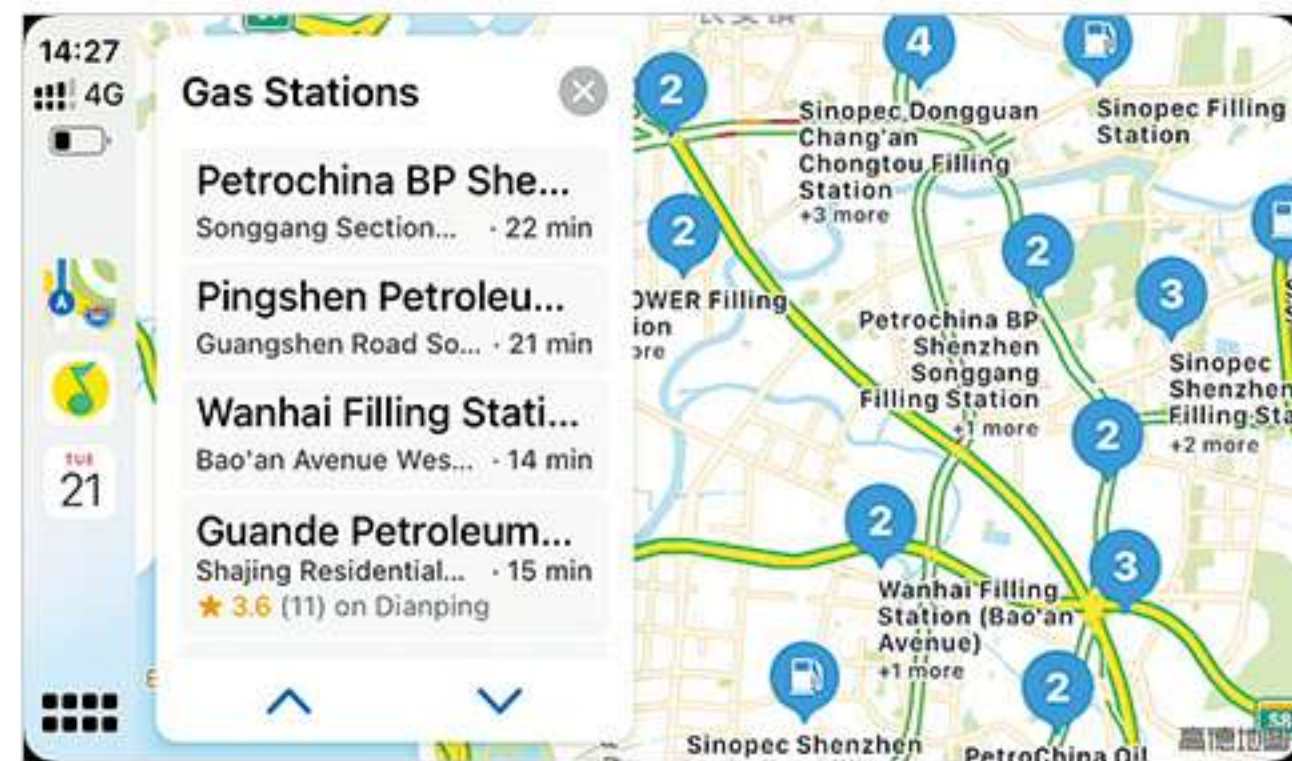

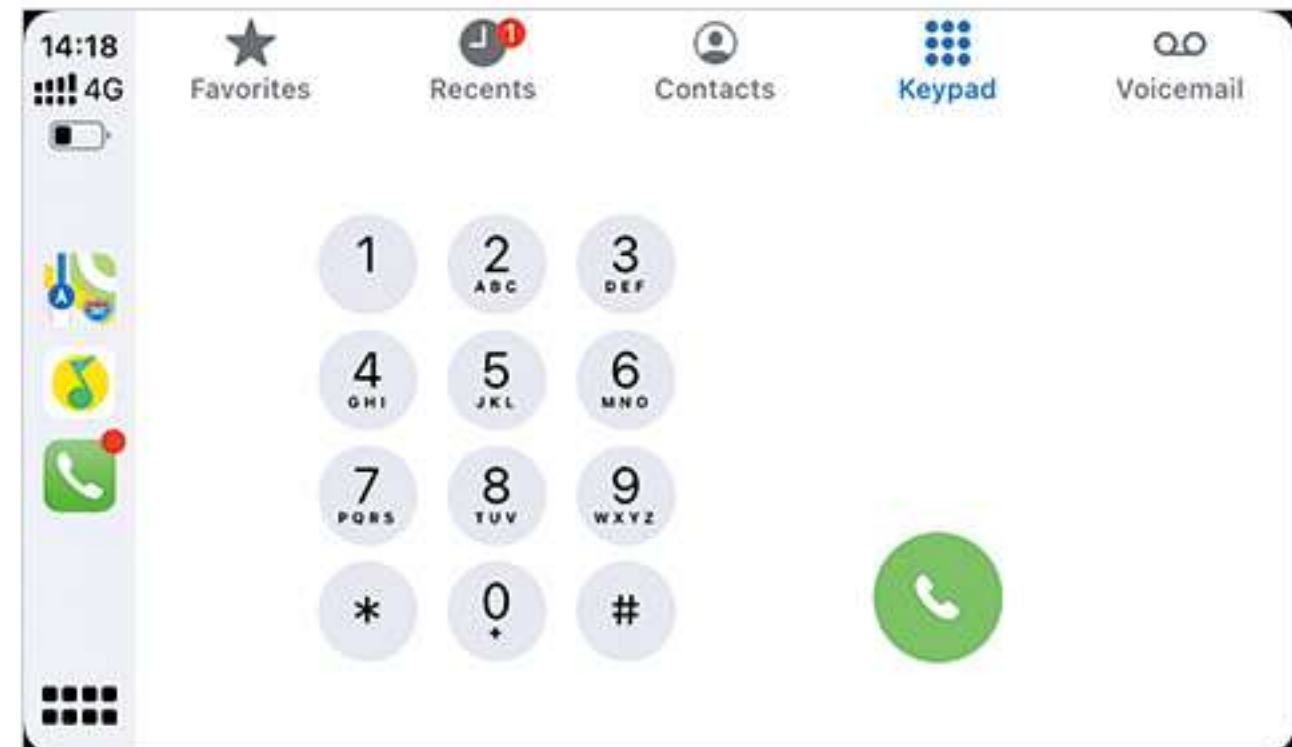

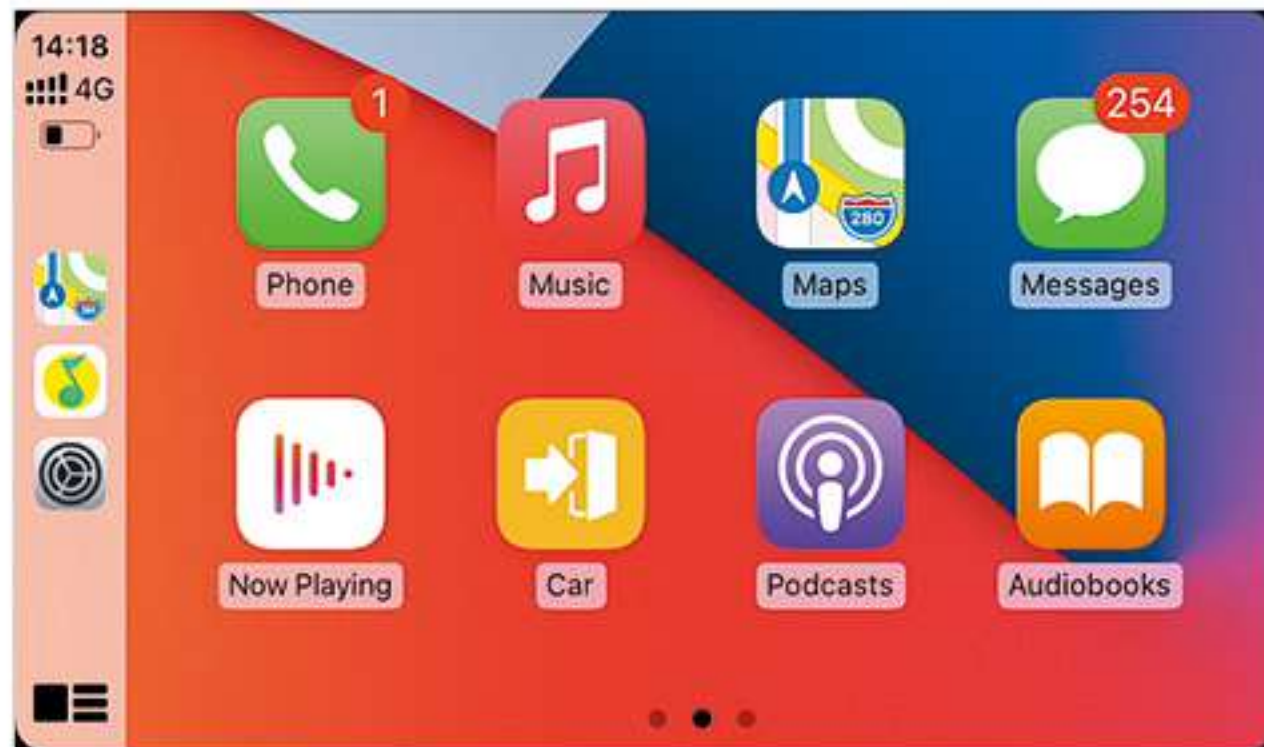

Click  to enter the application, where you can set the volume, distance and preferred style of the car horn according to your preferences

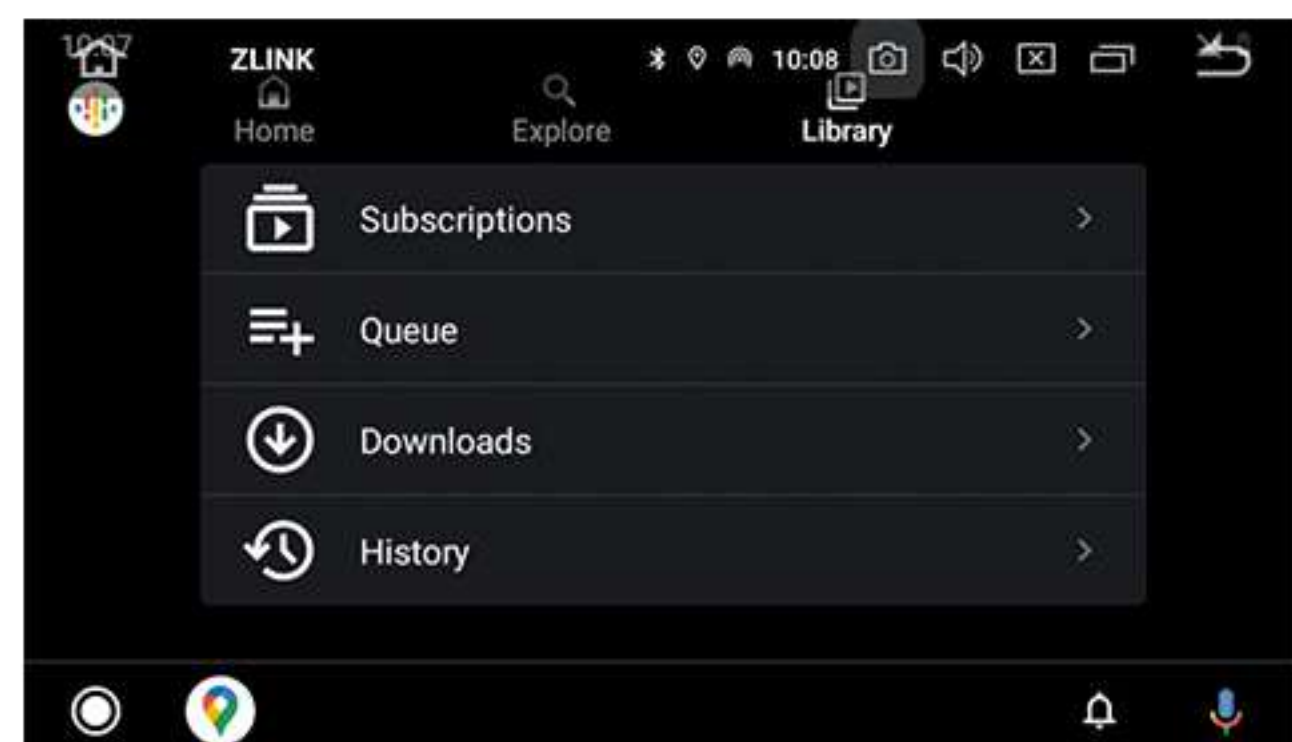

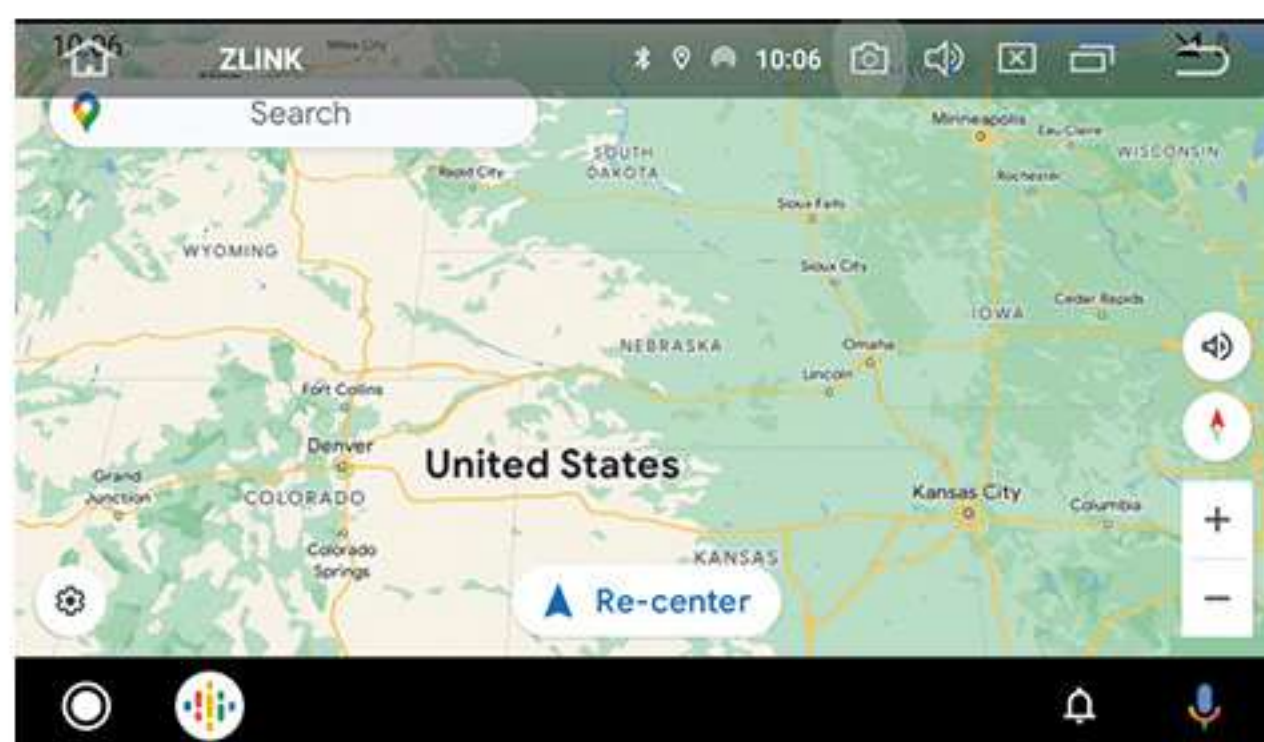

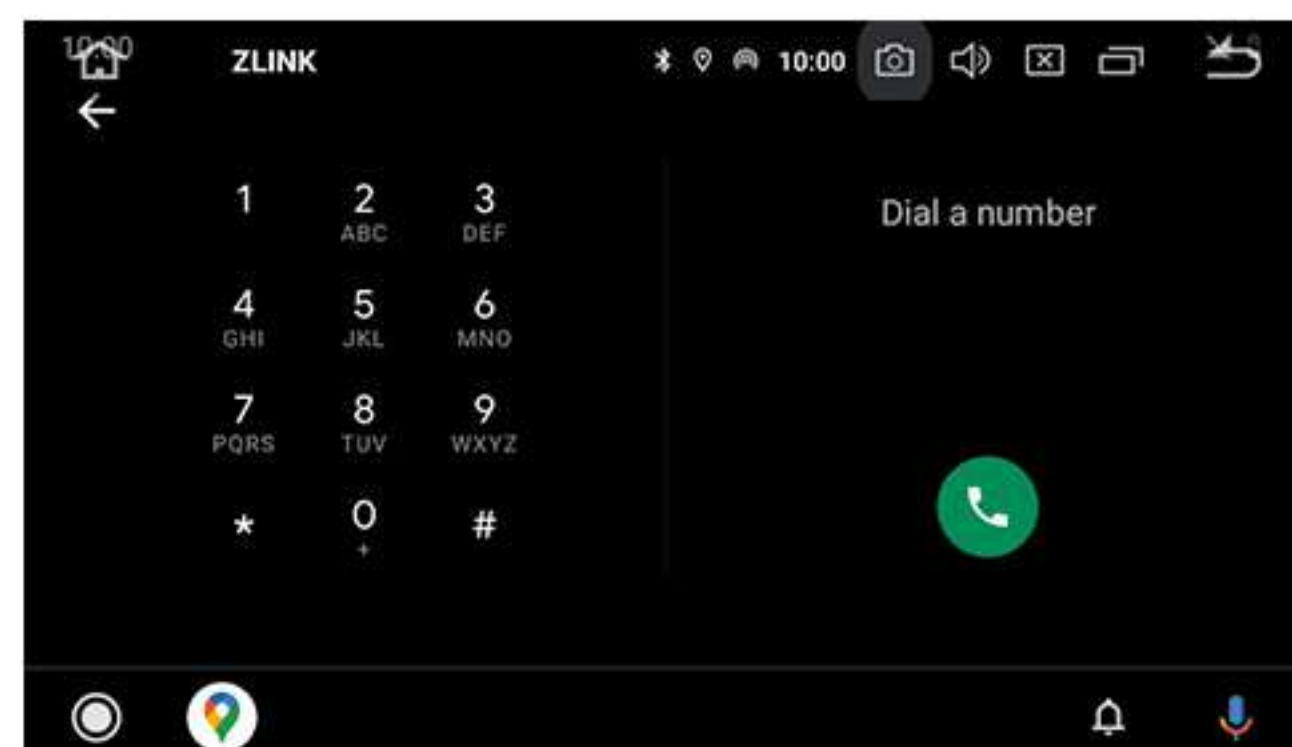

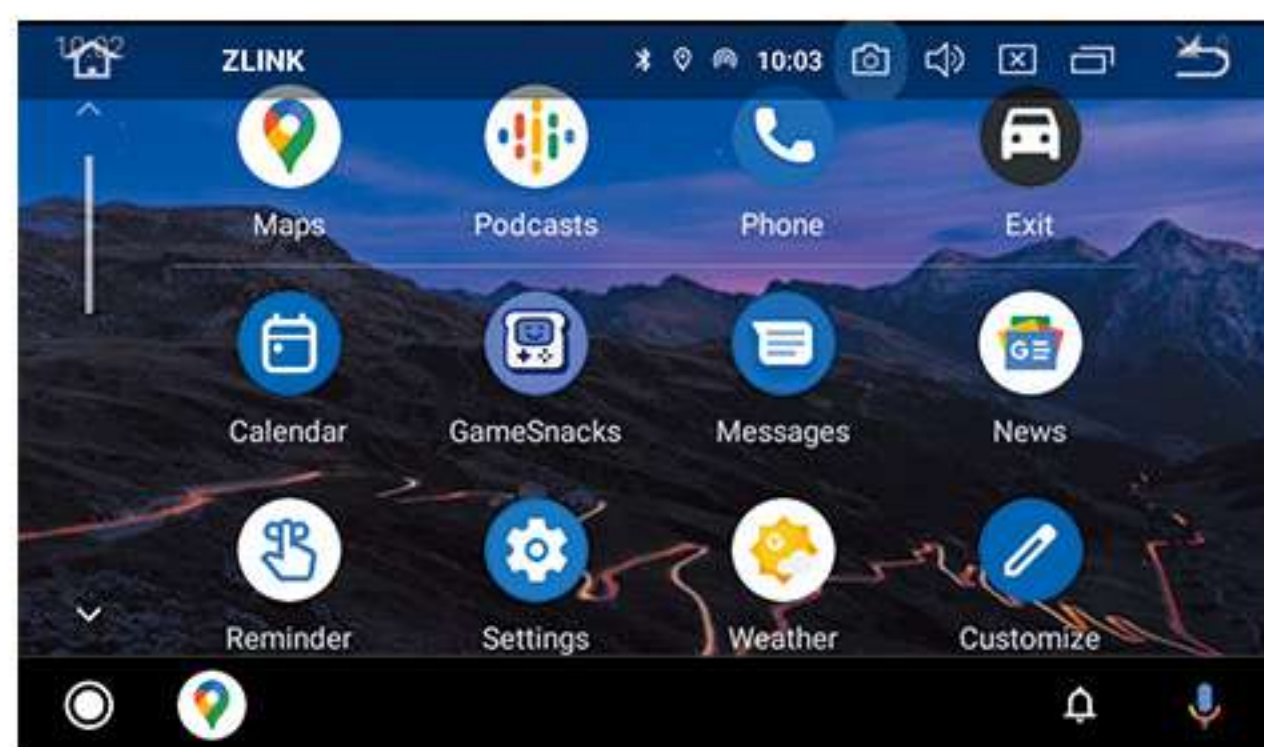

[9] Carplay/Android Auto

Click  to enter the application, use IOS or Android mobile phone to connect with the car radio Bluetooth, you can use the voice assistant in the software, make and answer calls, listen to music, use map navigation, etc.

ios system:

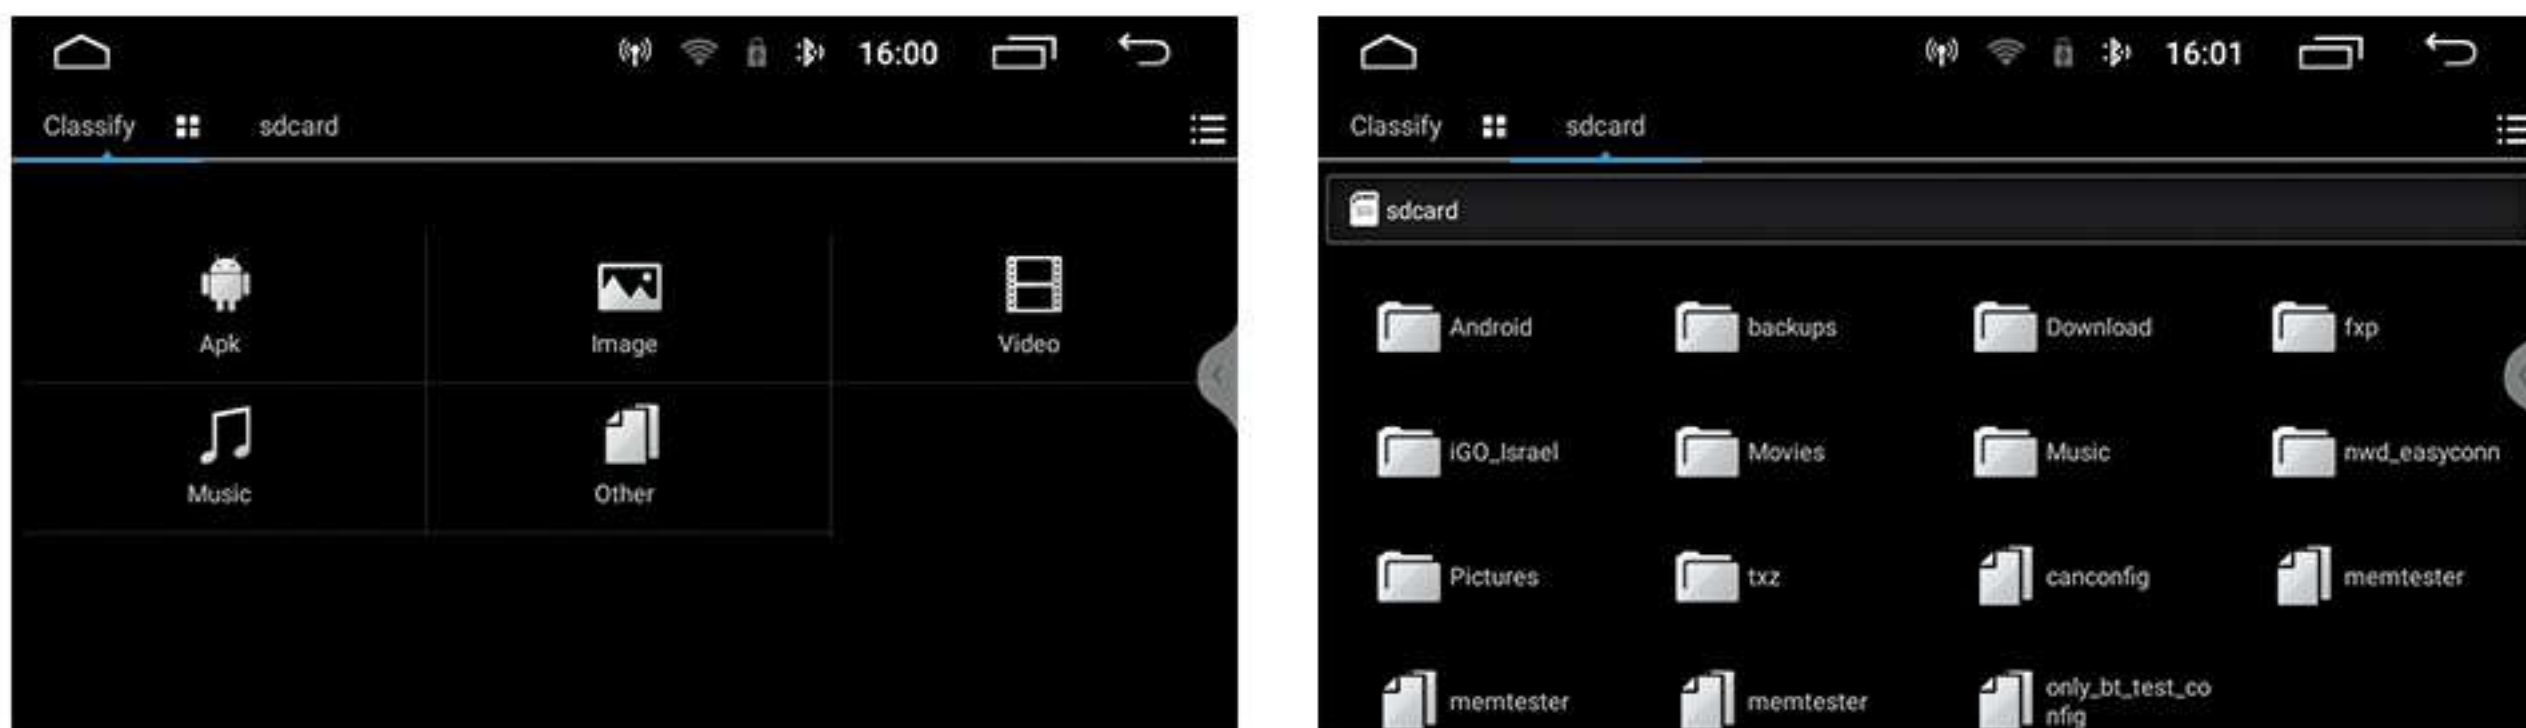

Android system:

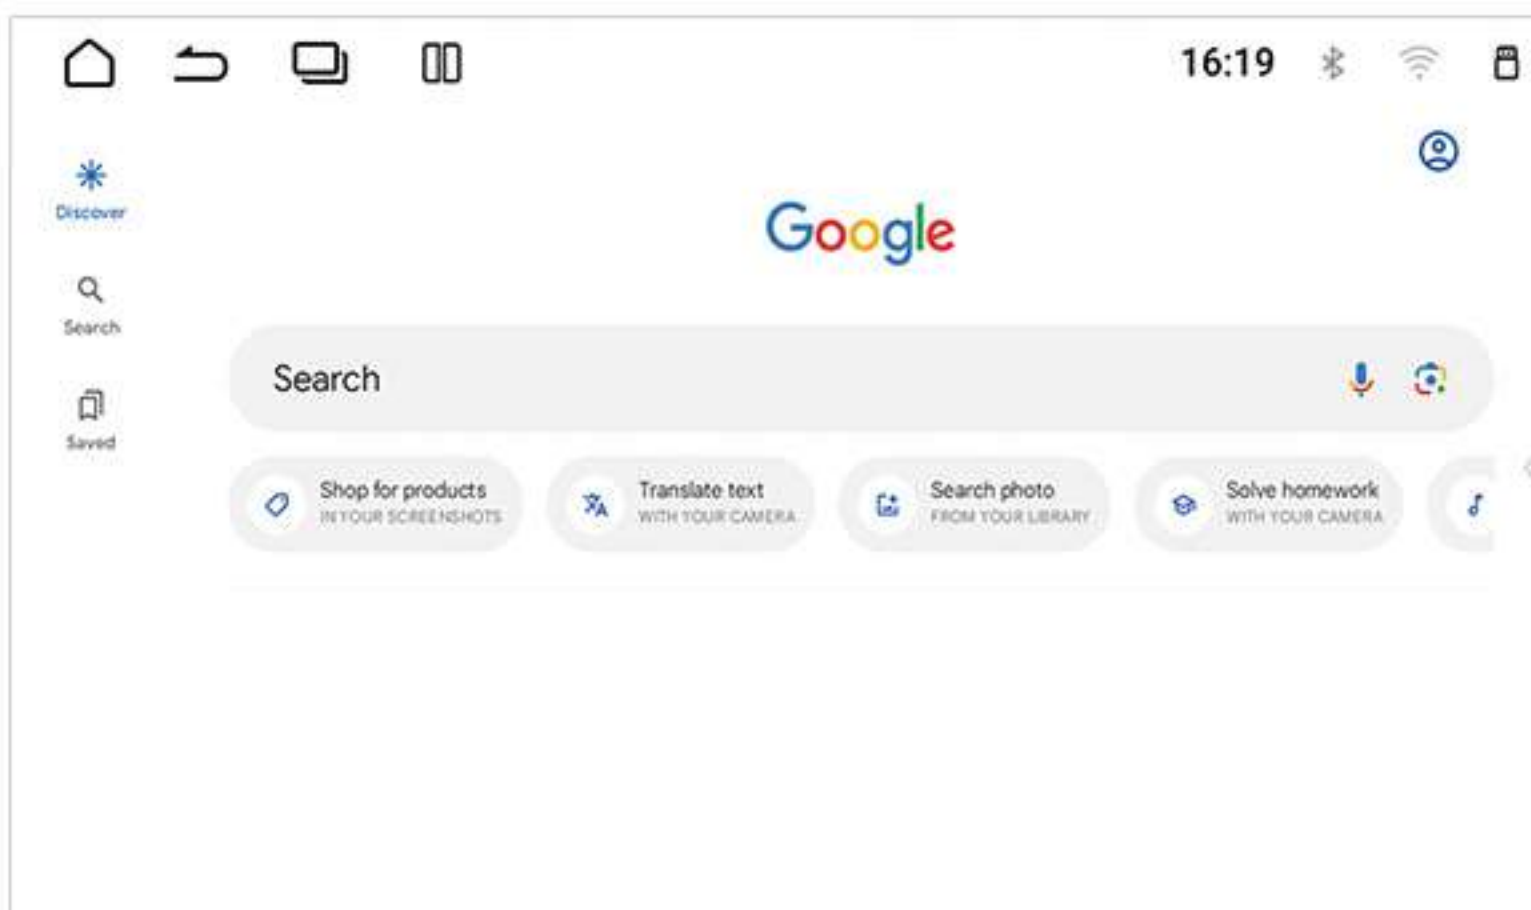

[10] File Management

Click  to enter the application, and here you can view APK, images, music, video playback and other files

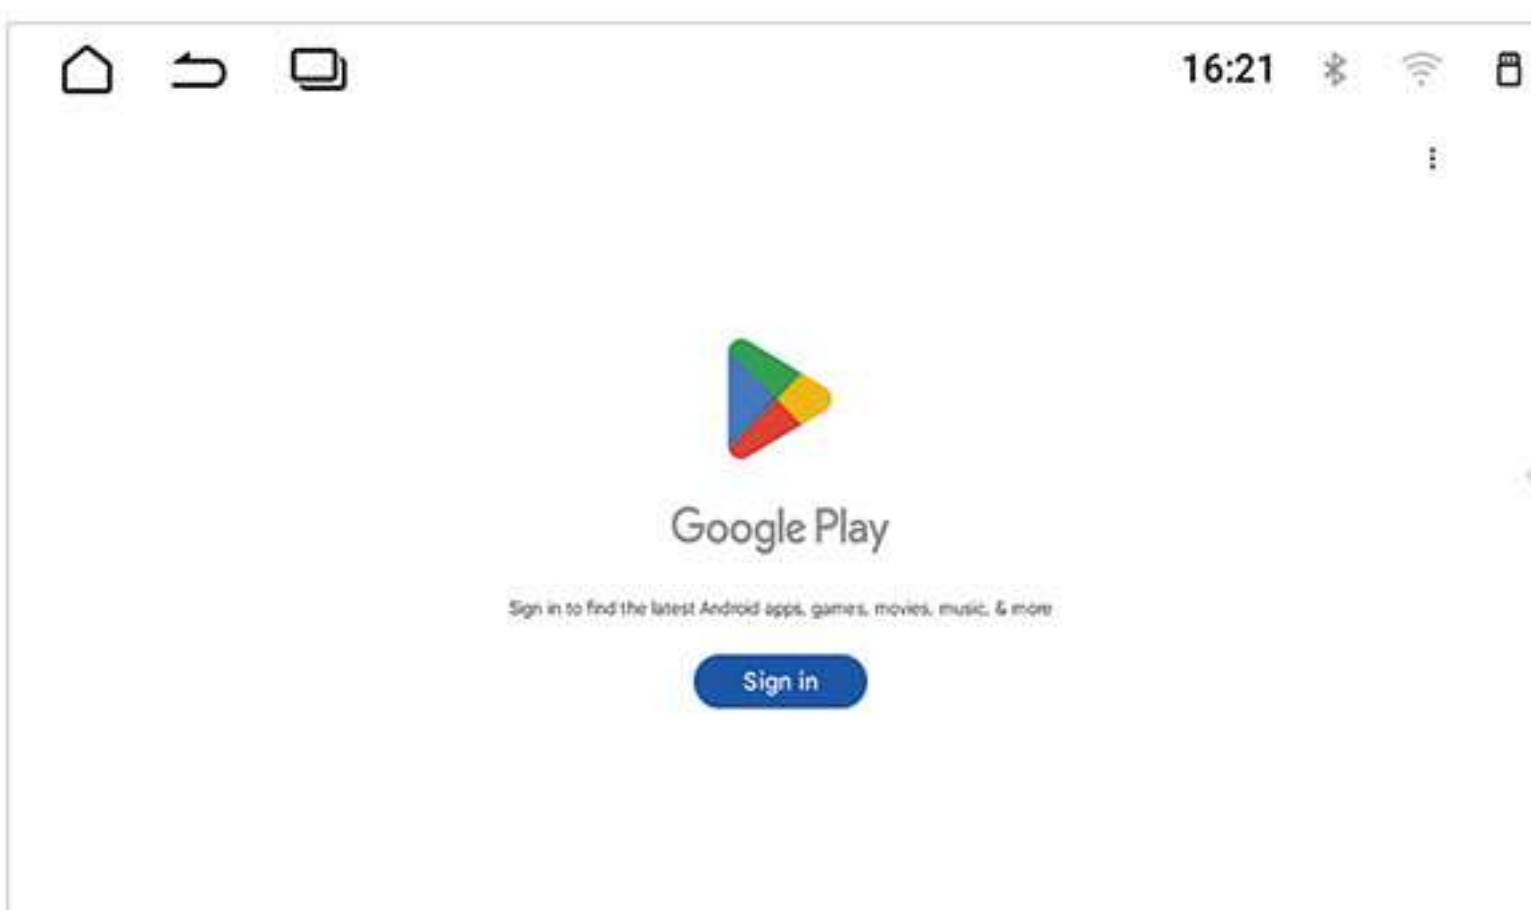

[11] Browser

Click  to enter the application, after connecting to the network, you can search for any online content here, such as news, audio-visual entertainment, etc.

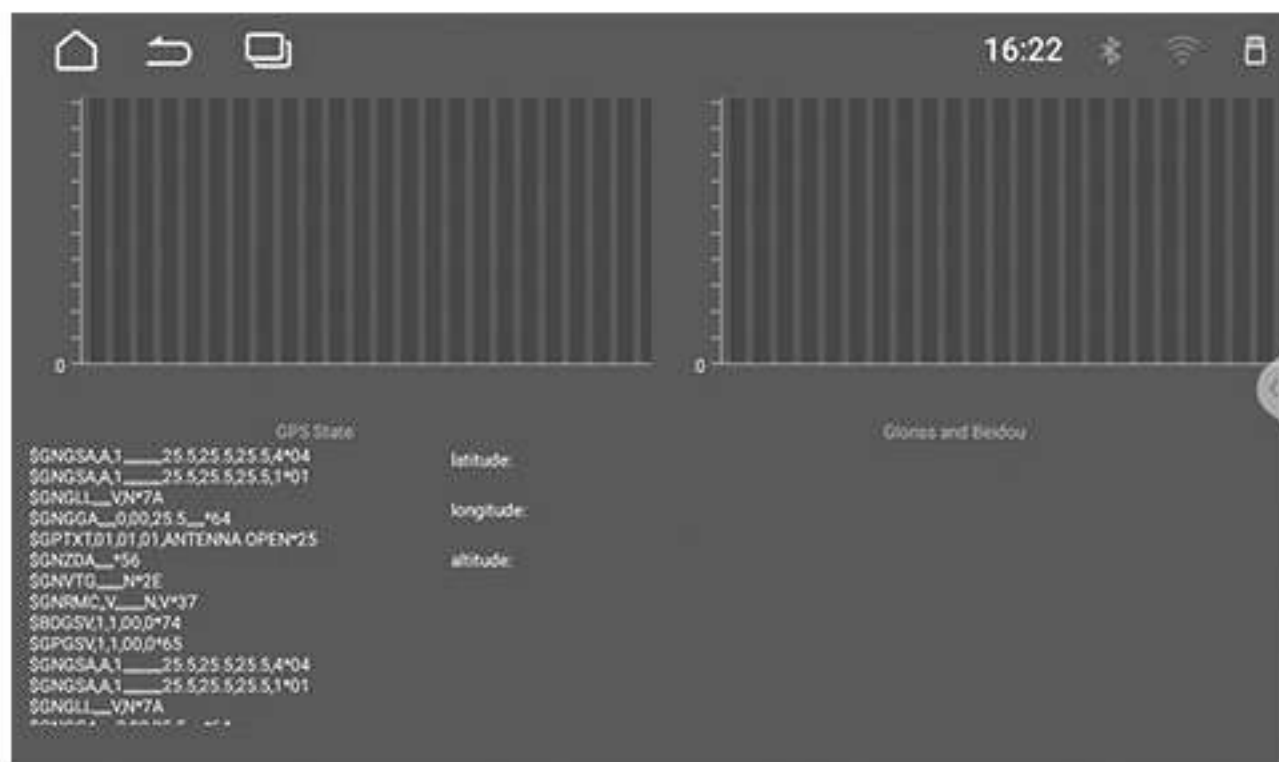

[12] Google store

Click  to enter the application, where you can download the application you need.

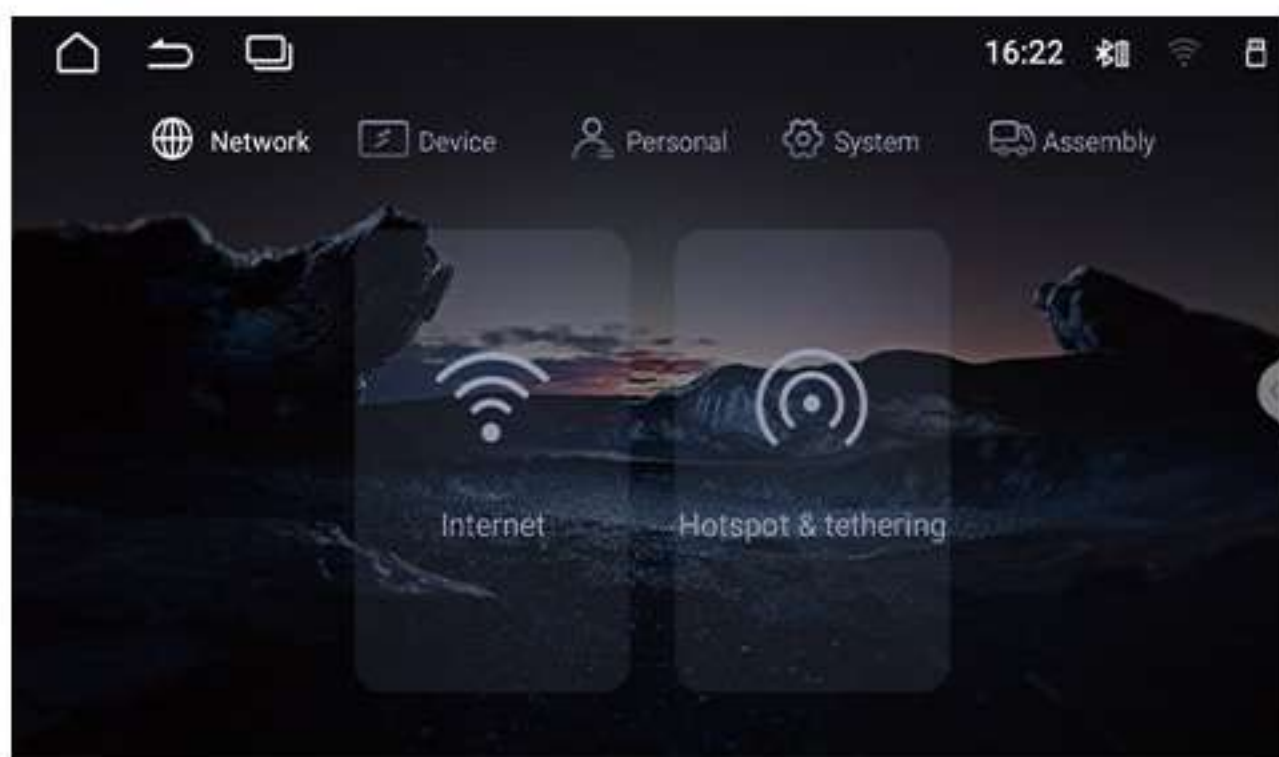

[13] GPS Monitor

Click  to enter the application.

[14] Setting

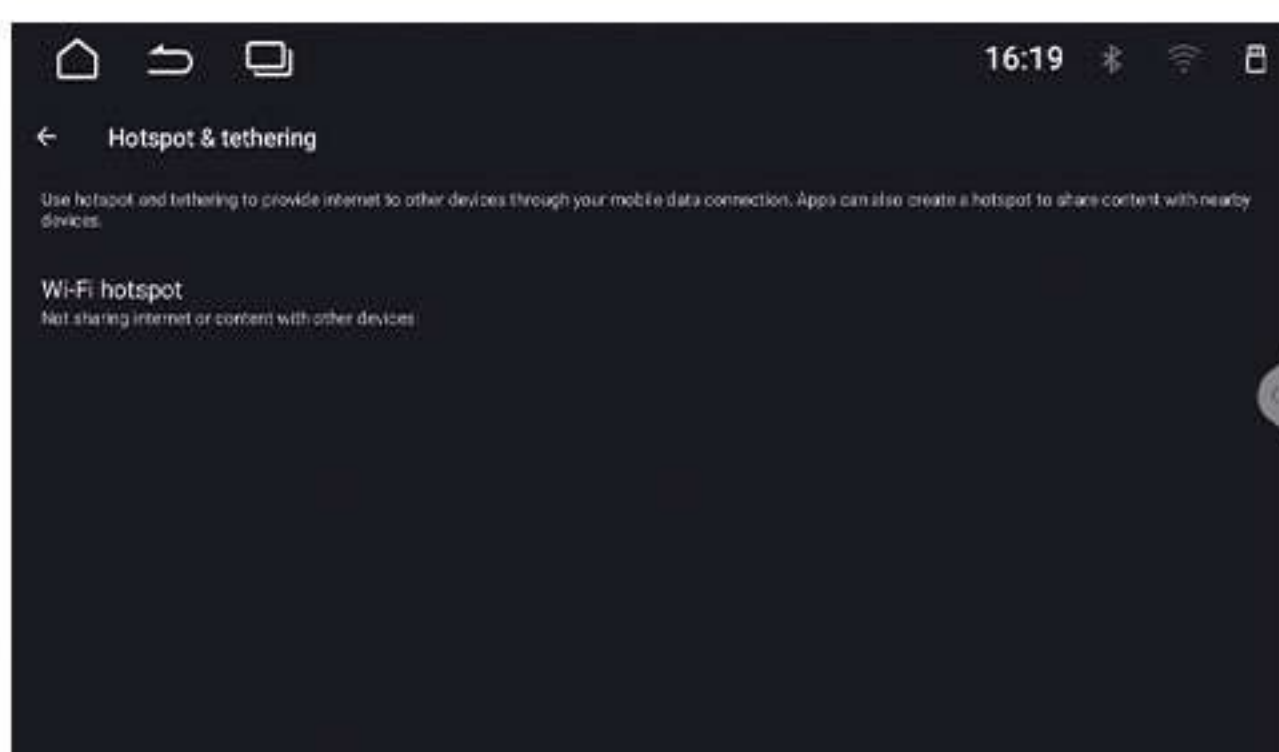

1. Click  to enter the application

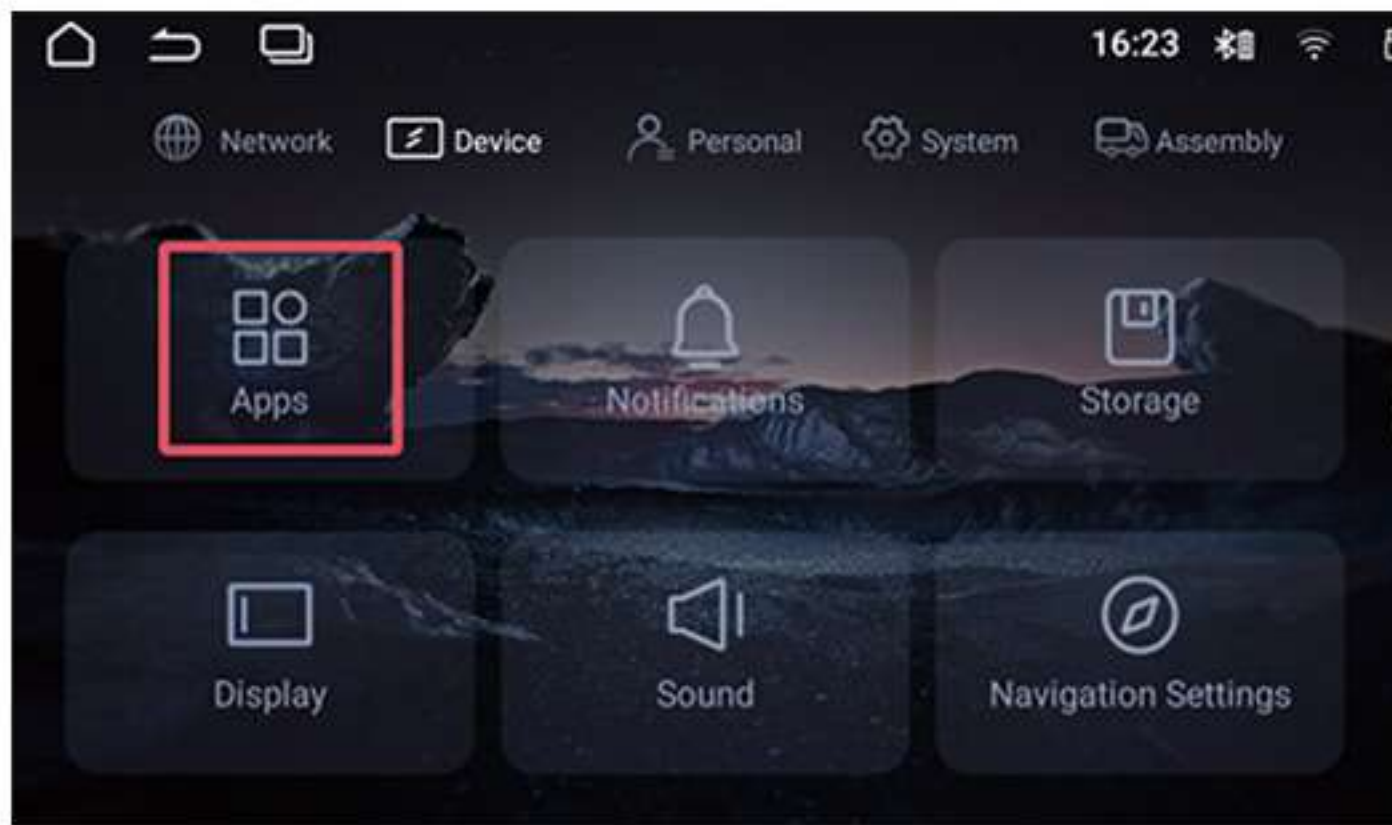

1.1 WLAN Settings :On the settings page, touch the [Network internet] icon to access the following content ;
Open Wi Fi and select network: If you are surrounded by WLAN networks, simply select one of the listed networks and enter your password when asked.

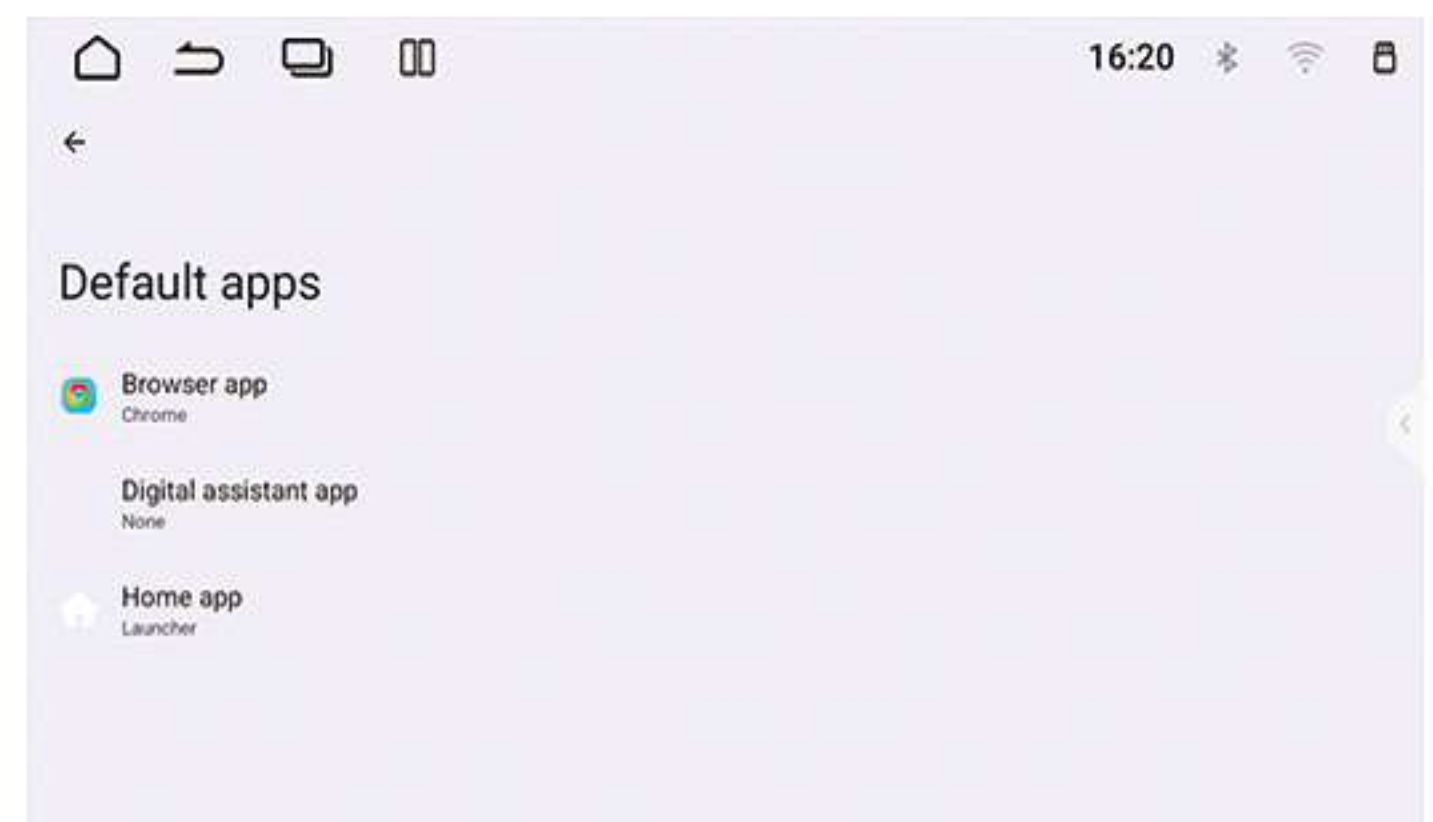

1.2 Hotspot:On the internet page, touch the [Wi-fi hotspot] icon to access the following content ;
You can set up portable Wi-fi hotspot or VPN.

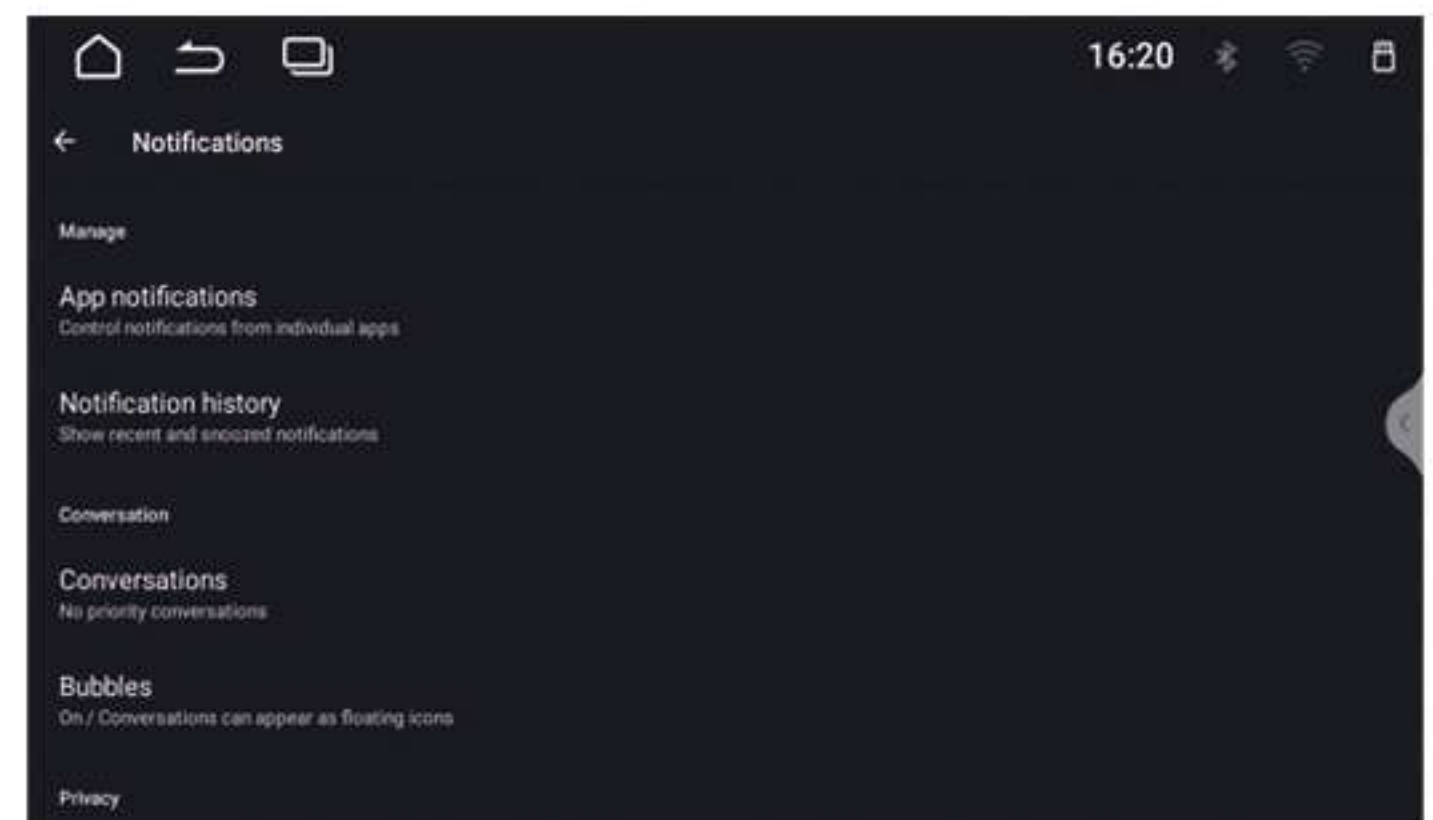

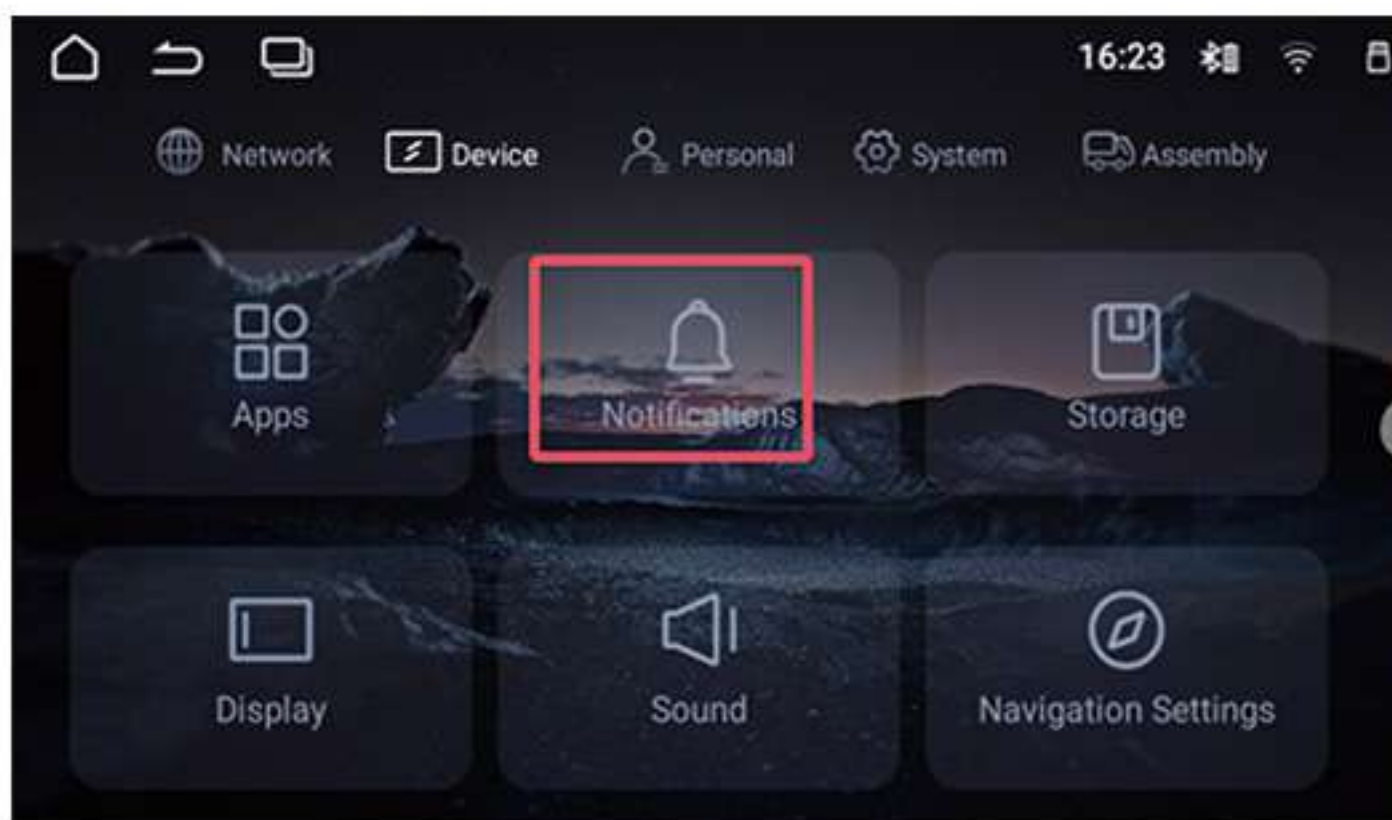

2.1 Manage all the apps downloaded on the unit or on an SD memory card

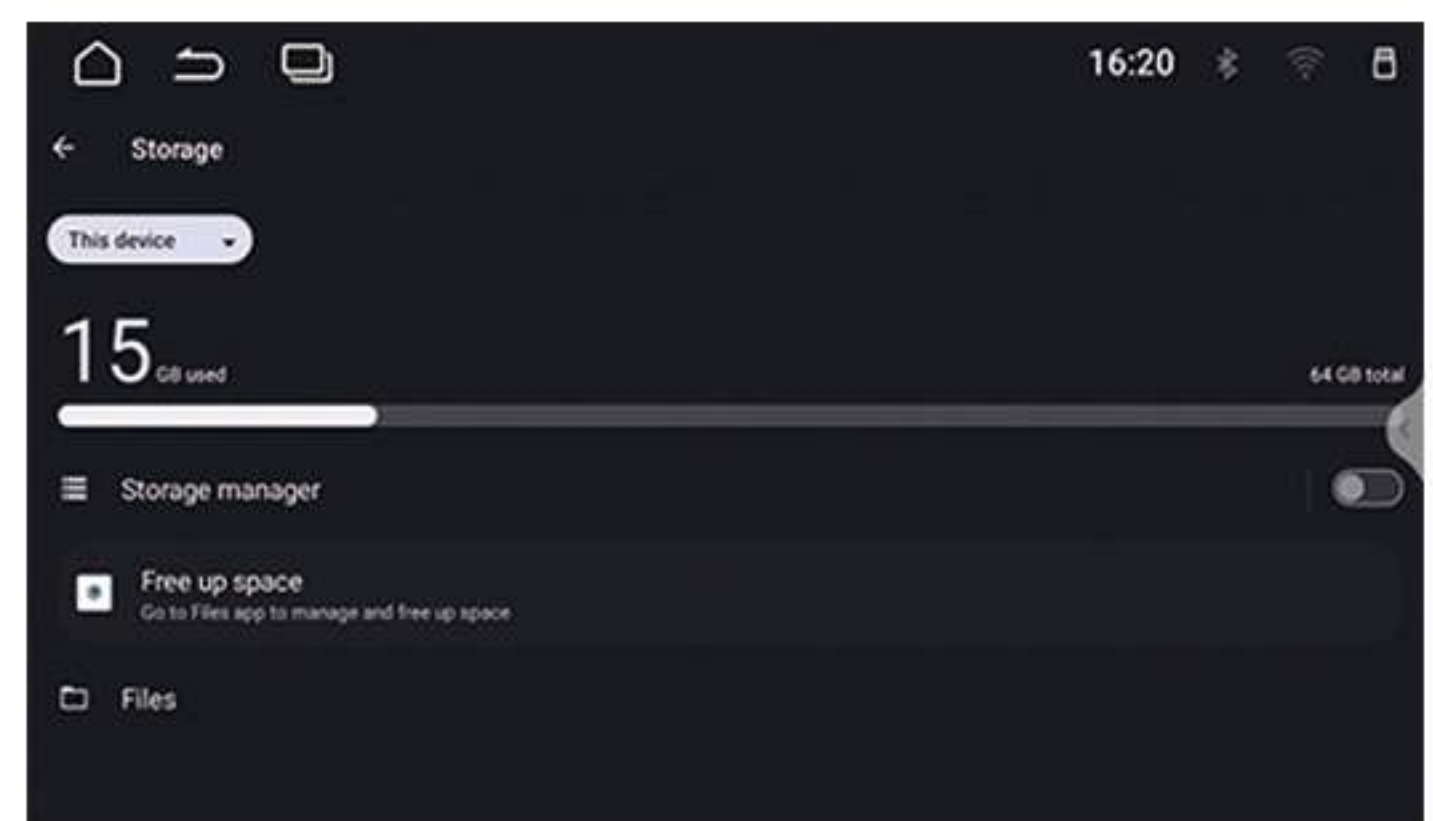

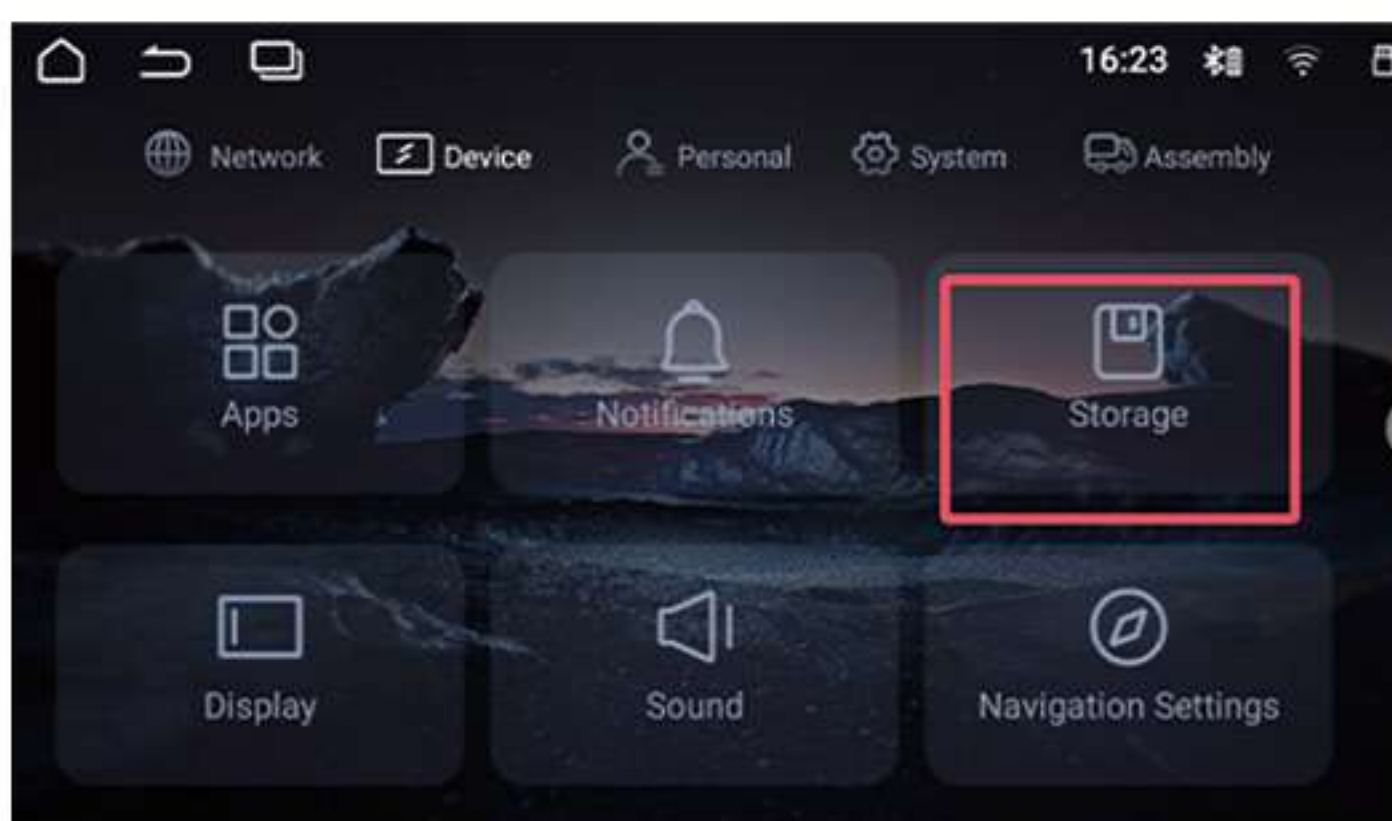

Default apps: On the all apps page, touch the [Default apps] icon to access the following content.

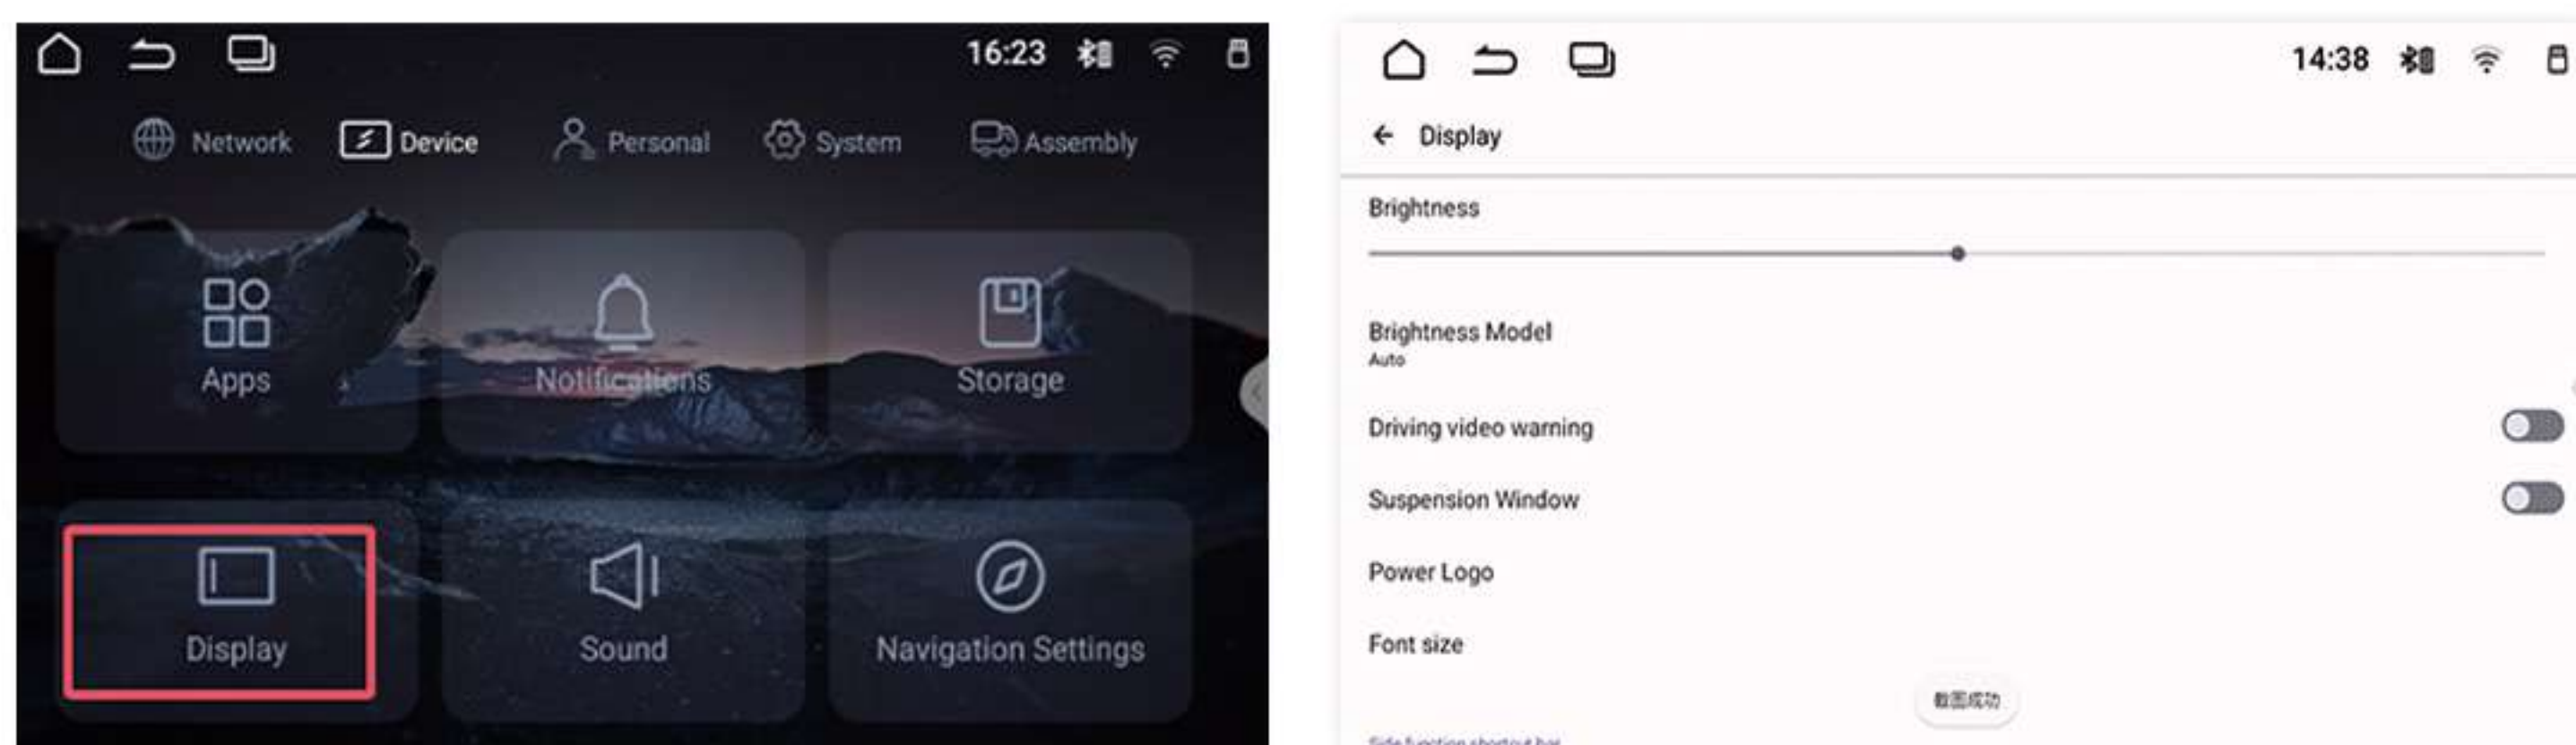

2.2 Notifications: On the Device page, touch the [Notifications] icon to access the following content.

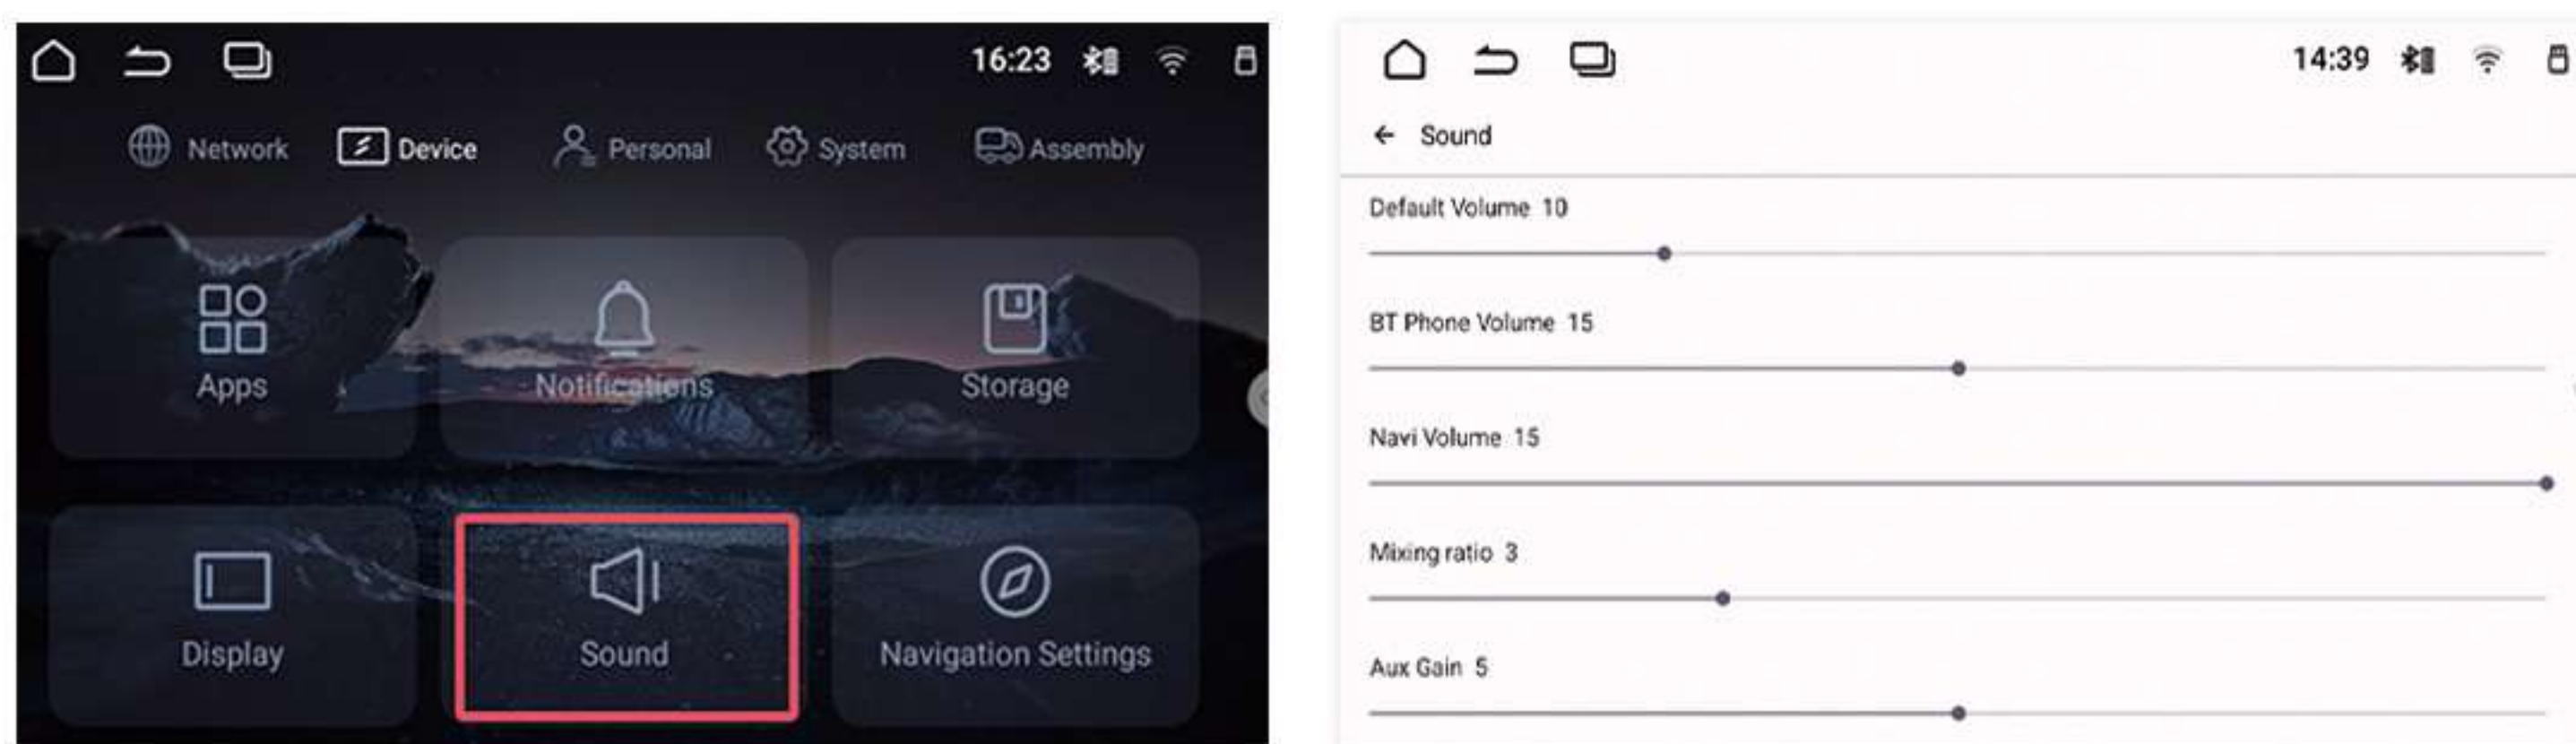

2.3 Storage: On the settings page, touch the [Storage] icon to access the following content. You can view the internal storage and USB storage.

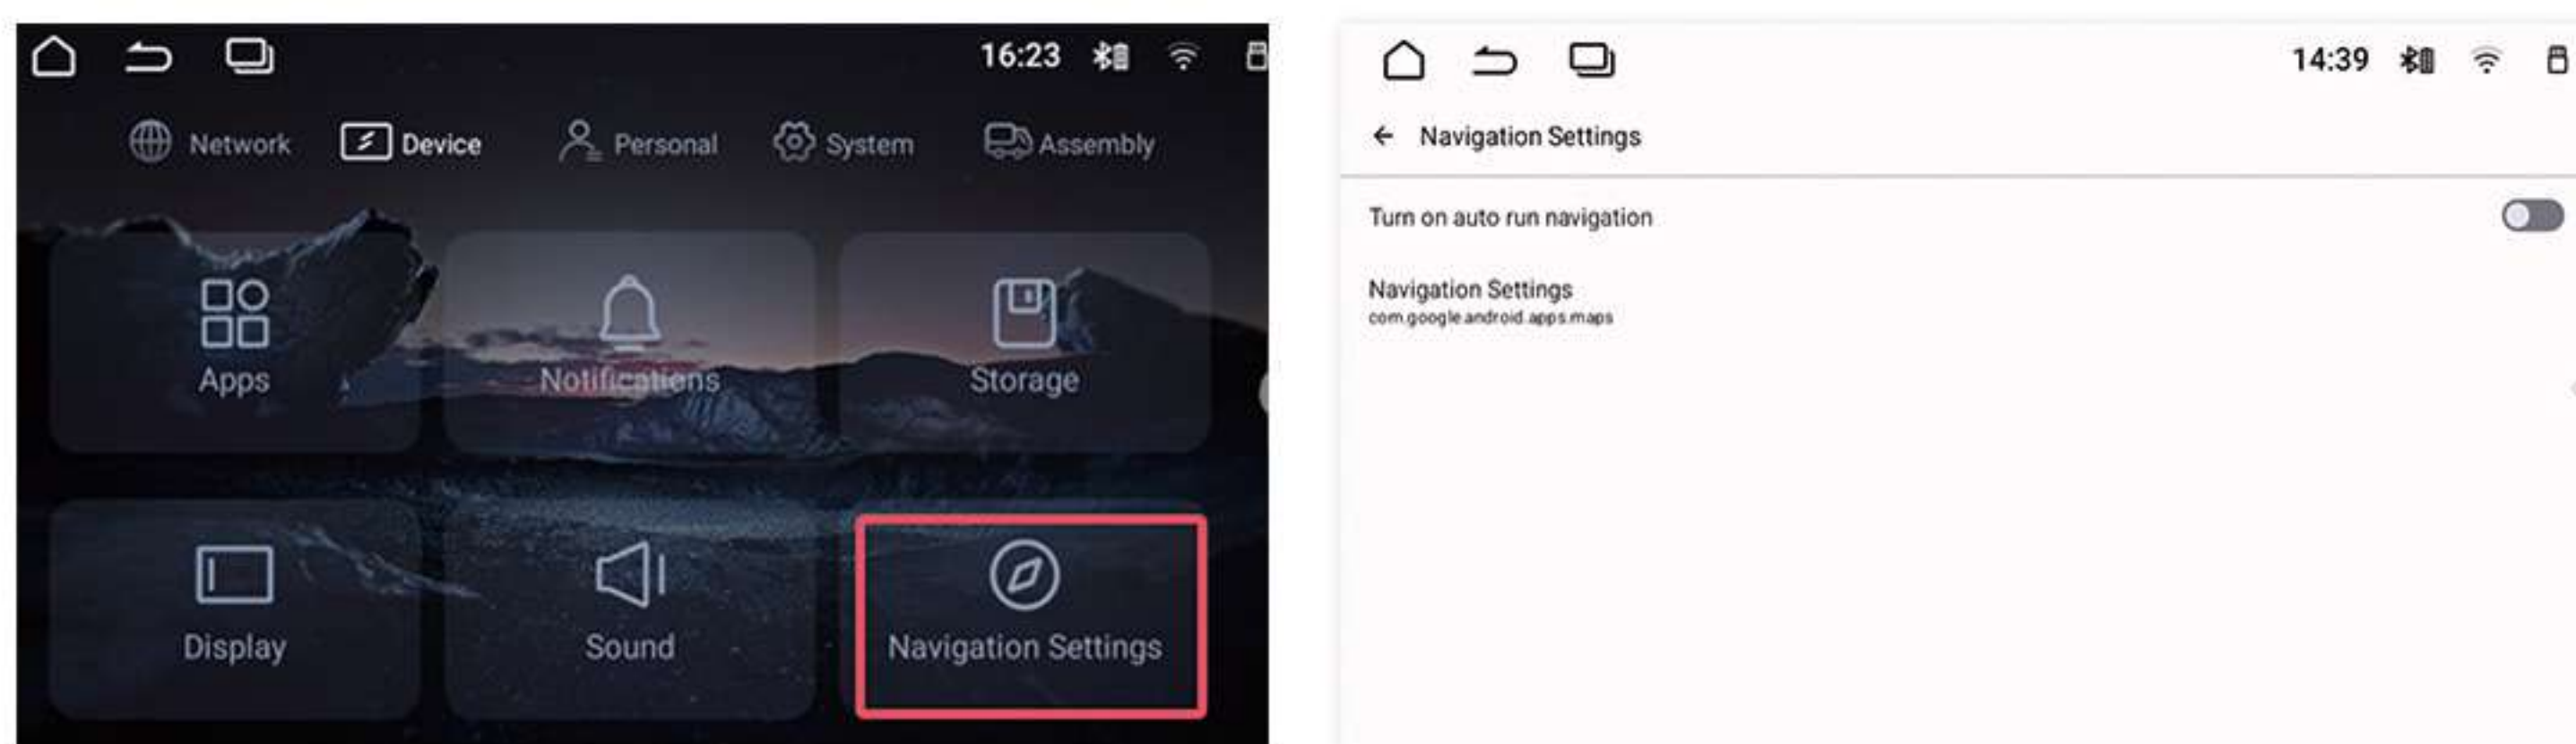

2.4 Display :On the Device page, touch the [Display] icon to access the following content;

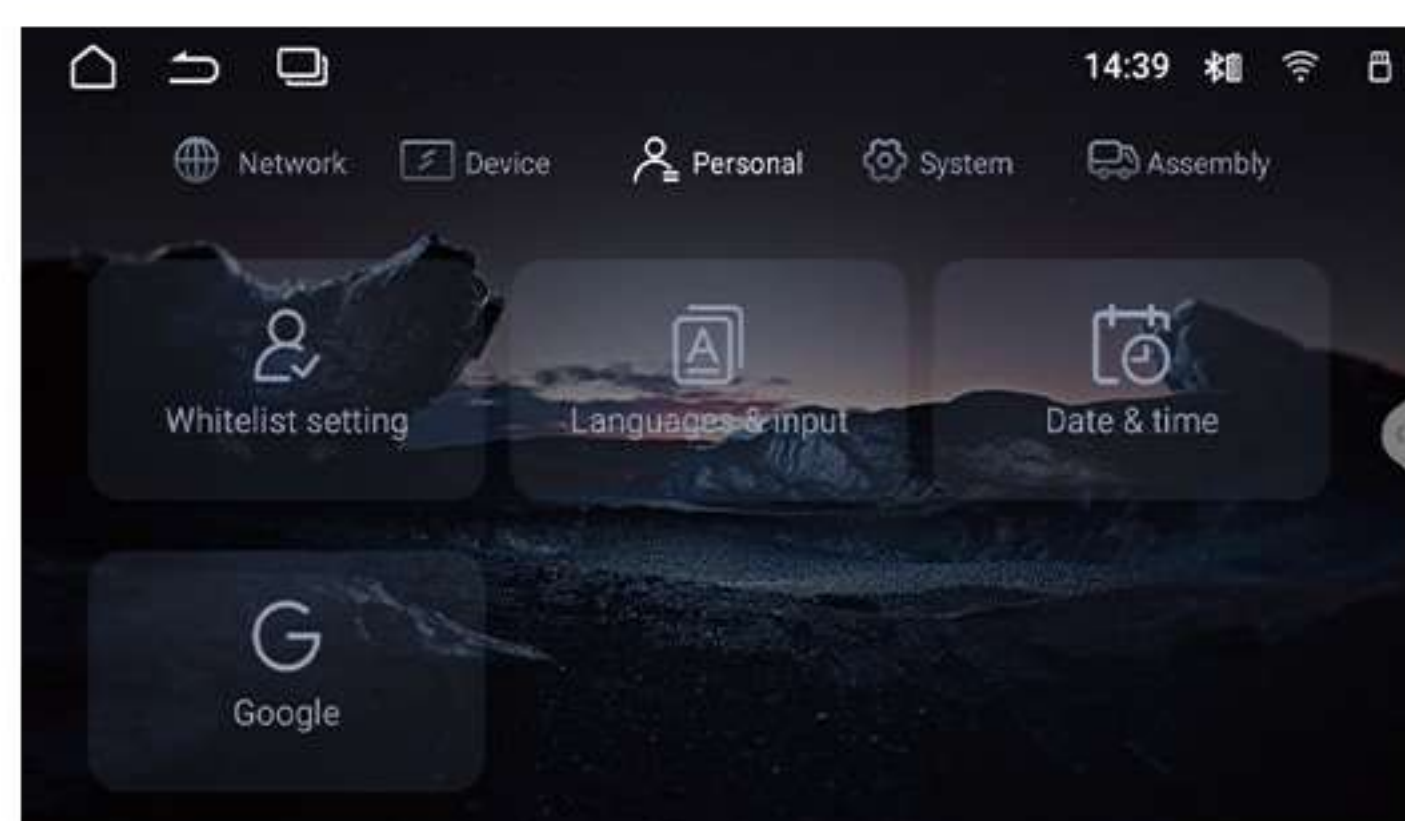

2.5 Sound:On the Device page, touch the [Sound] icon to access the following content;

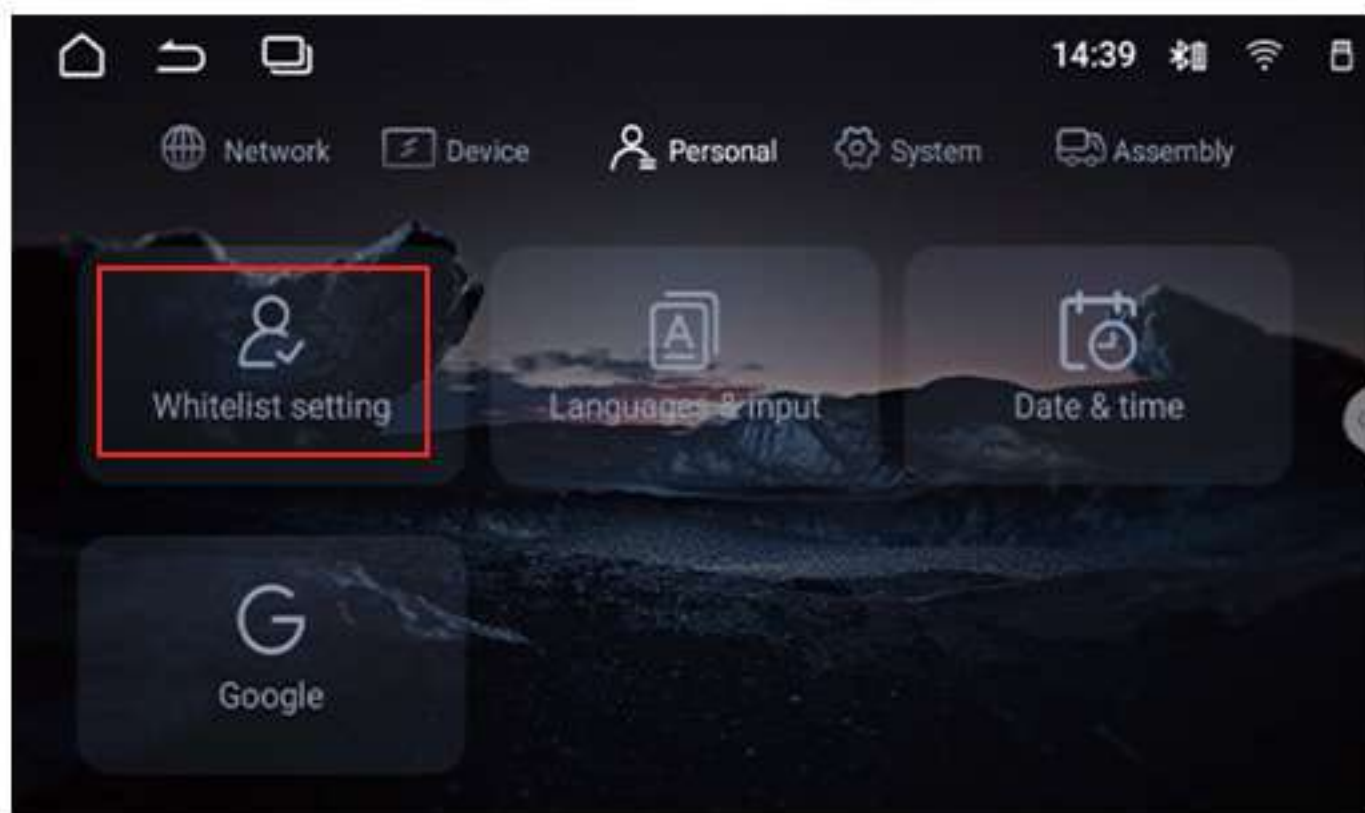

2.6 Navigation Settings:On the Settings page, touch the [Navigation Settings] icon to access the following content, You can set your default map software;

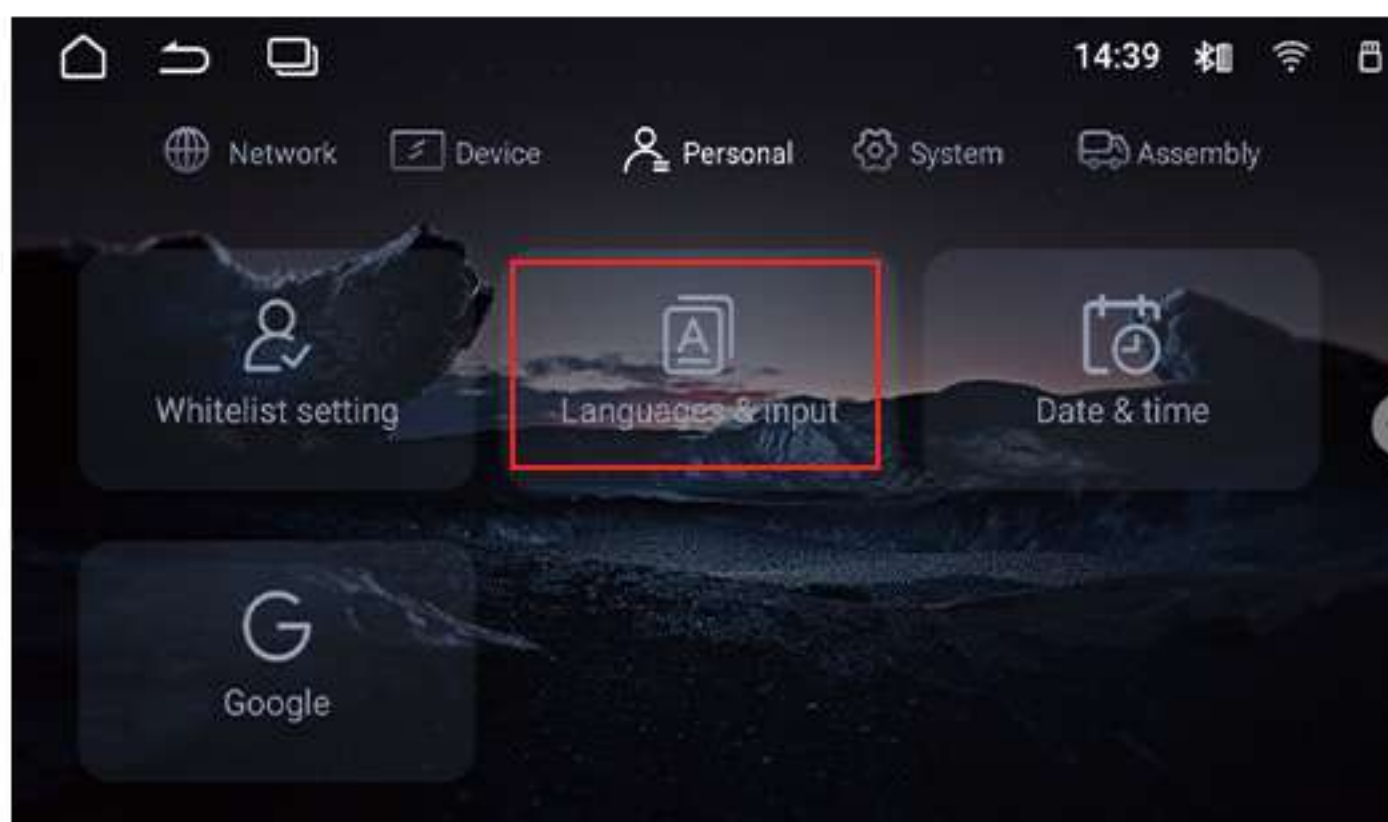

3. Personal :On the Setting page, touch the [Personal] icon to access the following content;

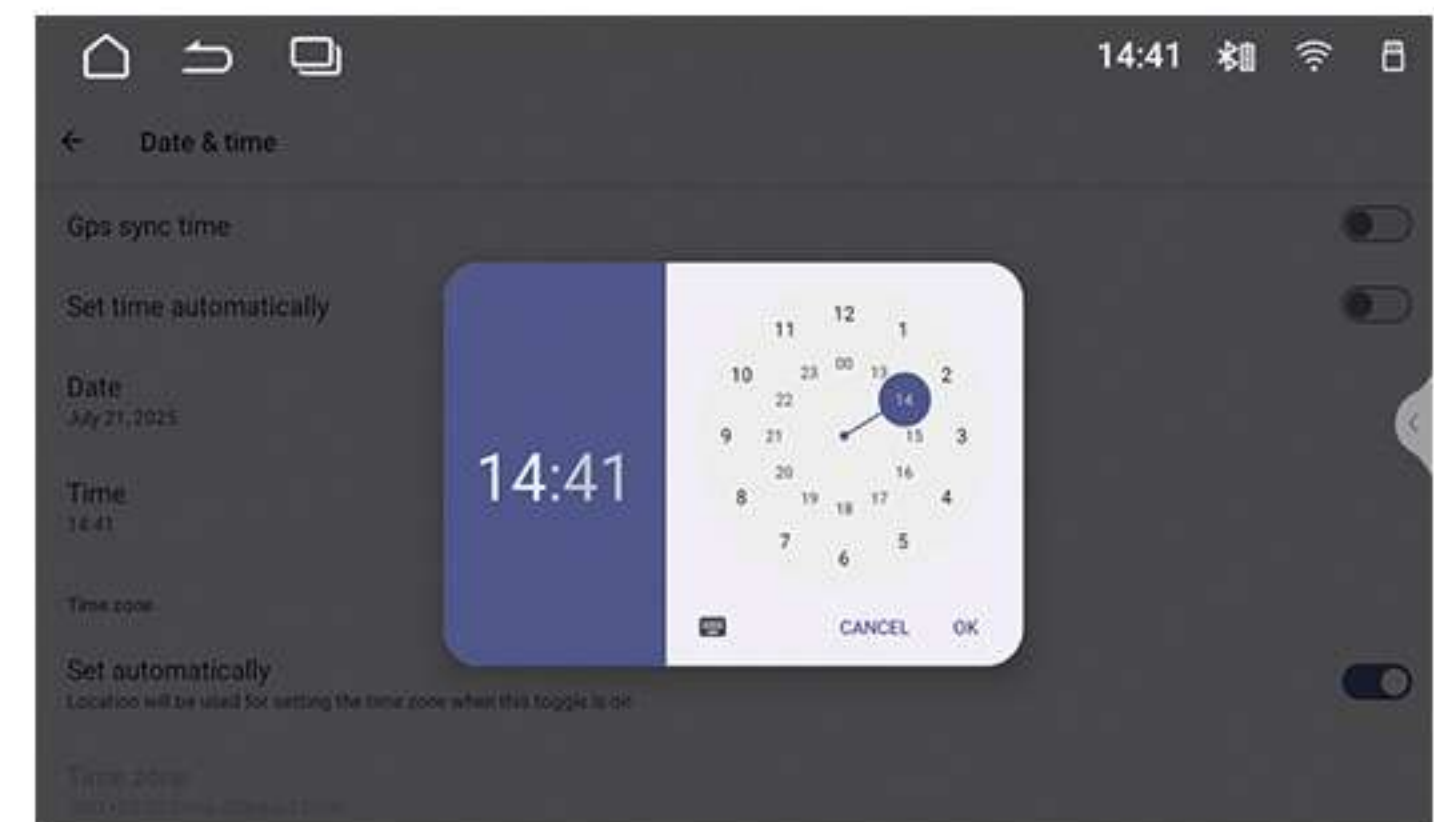

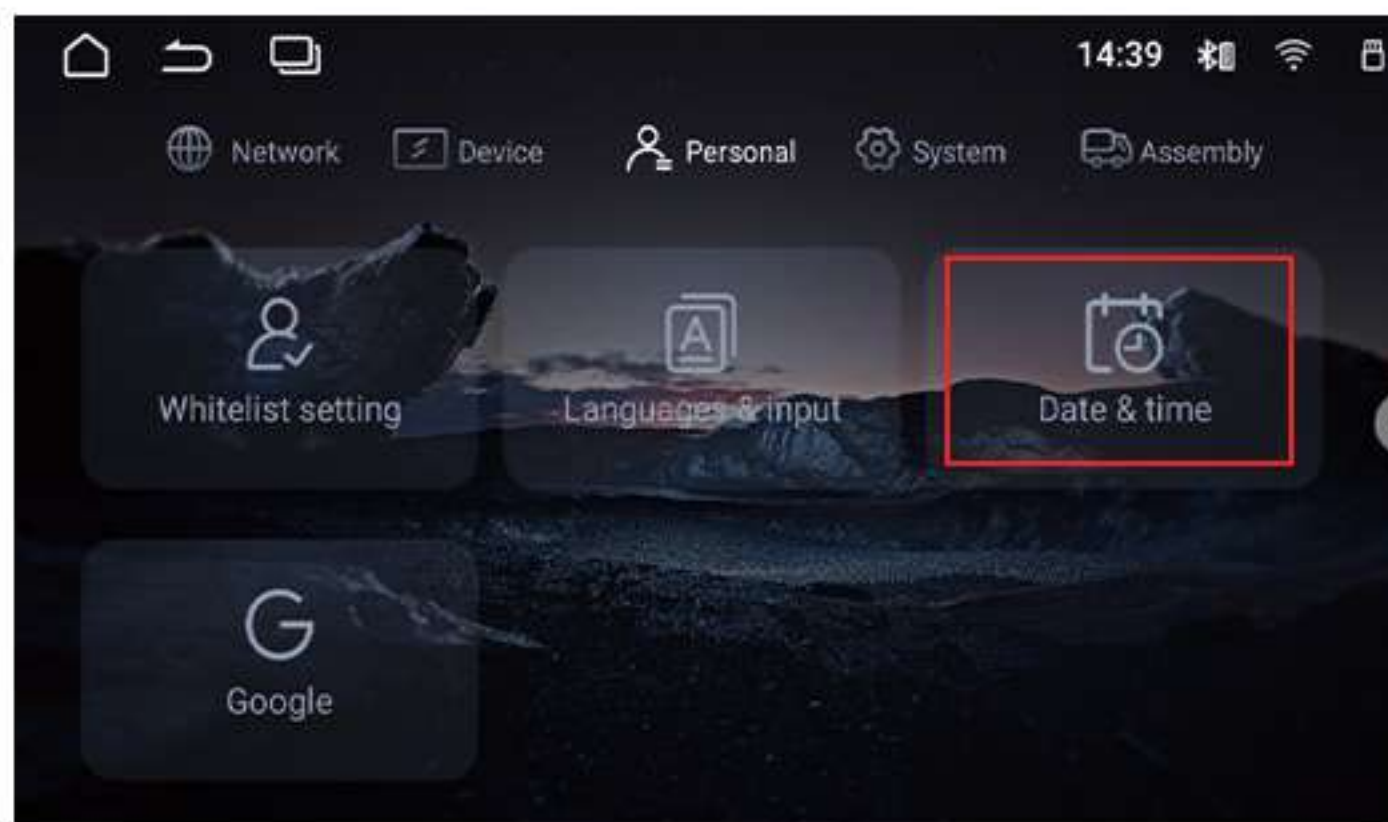

3.1 Whitelist setting :On the Personal page, touch the [Easy Connection] icon to access the following content;

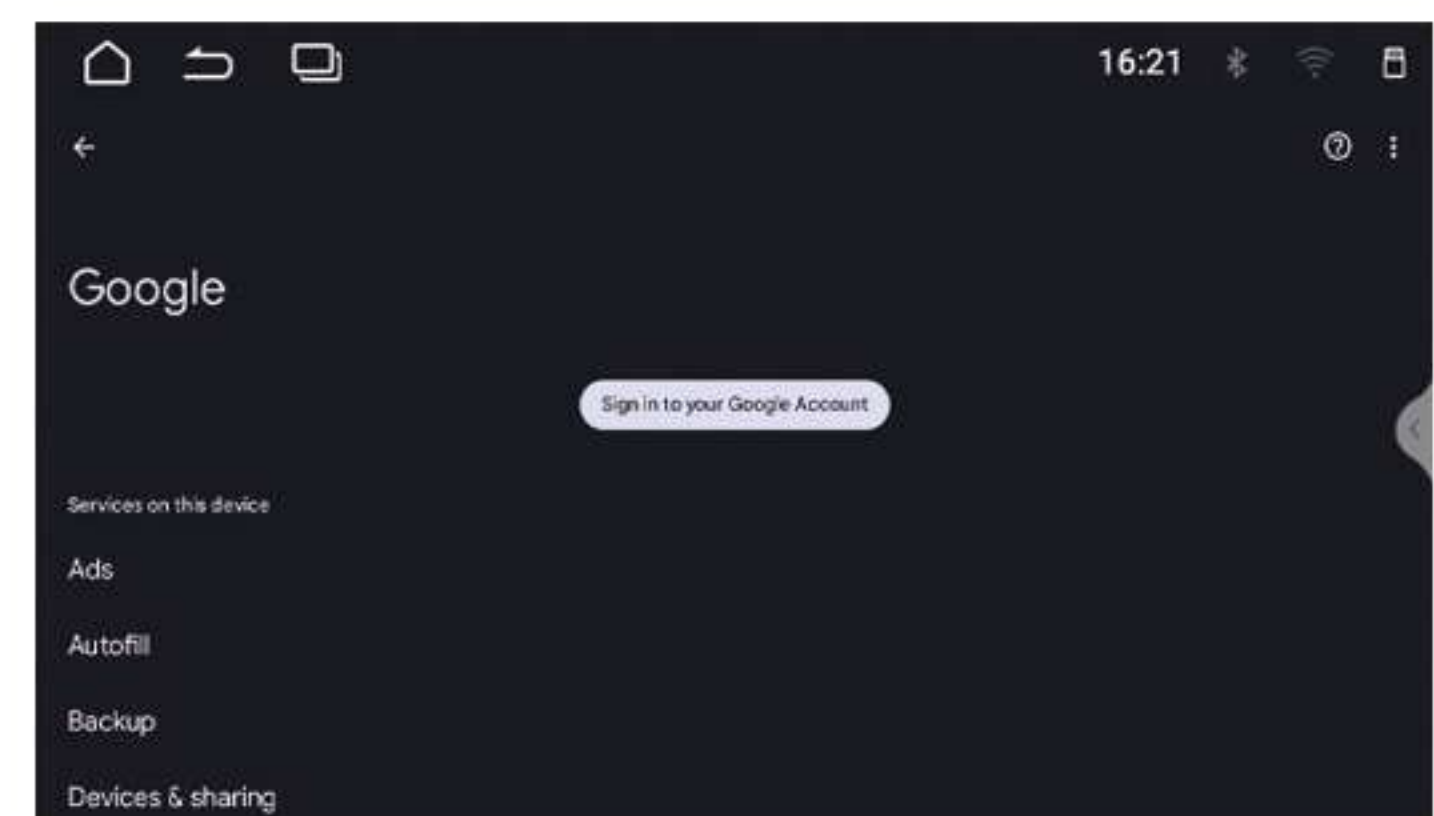

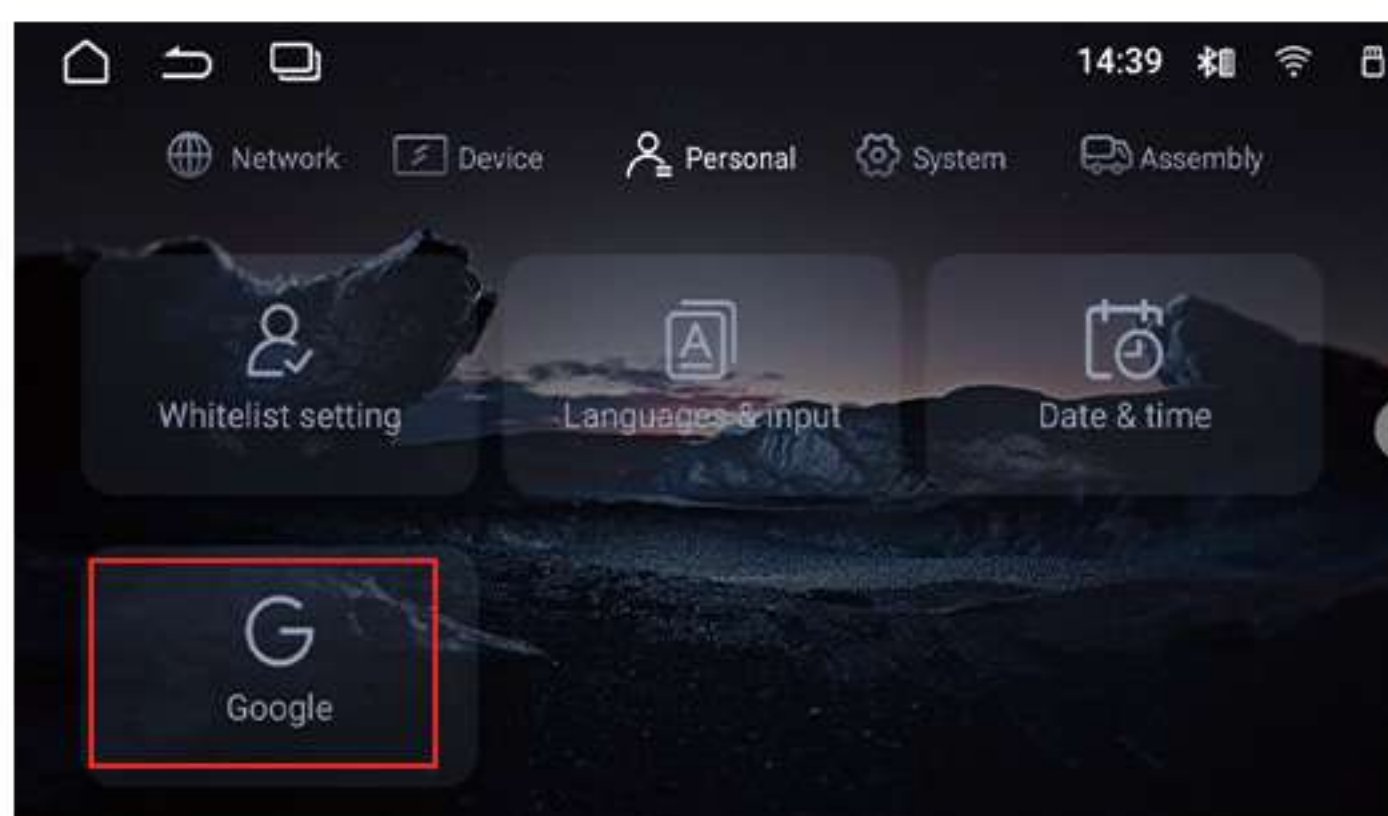

3.2 Language settings:On the System page, touch the [Languages & input] icon to access the following content Interface: The "Language Settings" page includes language selection, keyboard, and input method settings

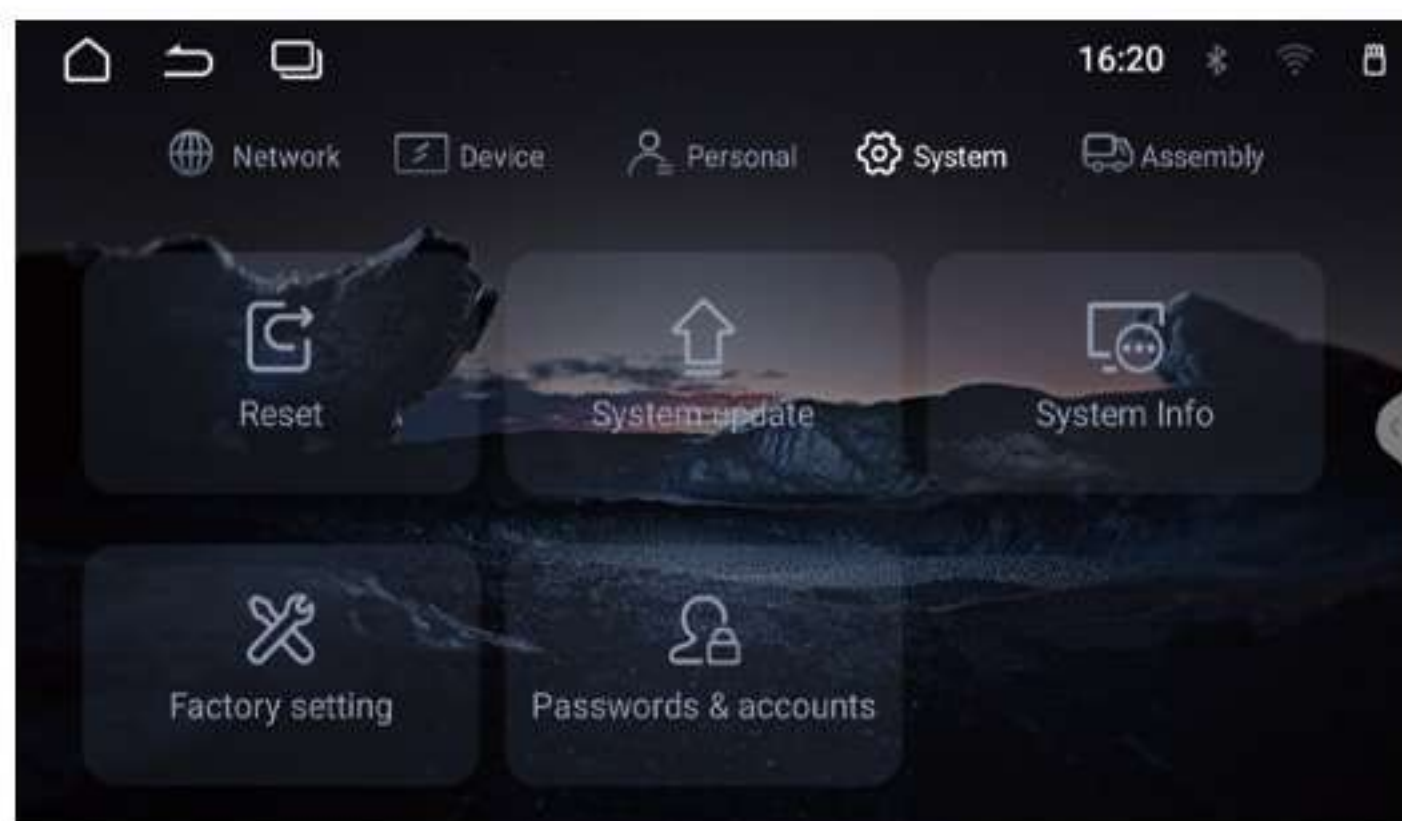

3.3 Date and Time Settings:On the System page, touch the [Date time] icon to access the following content; Interface: You can set the date, time, and time zone.

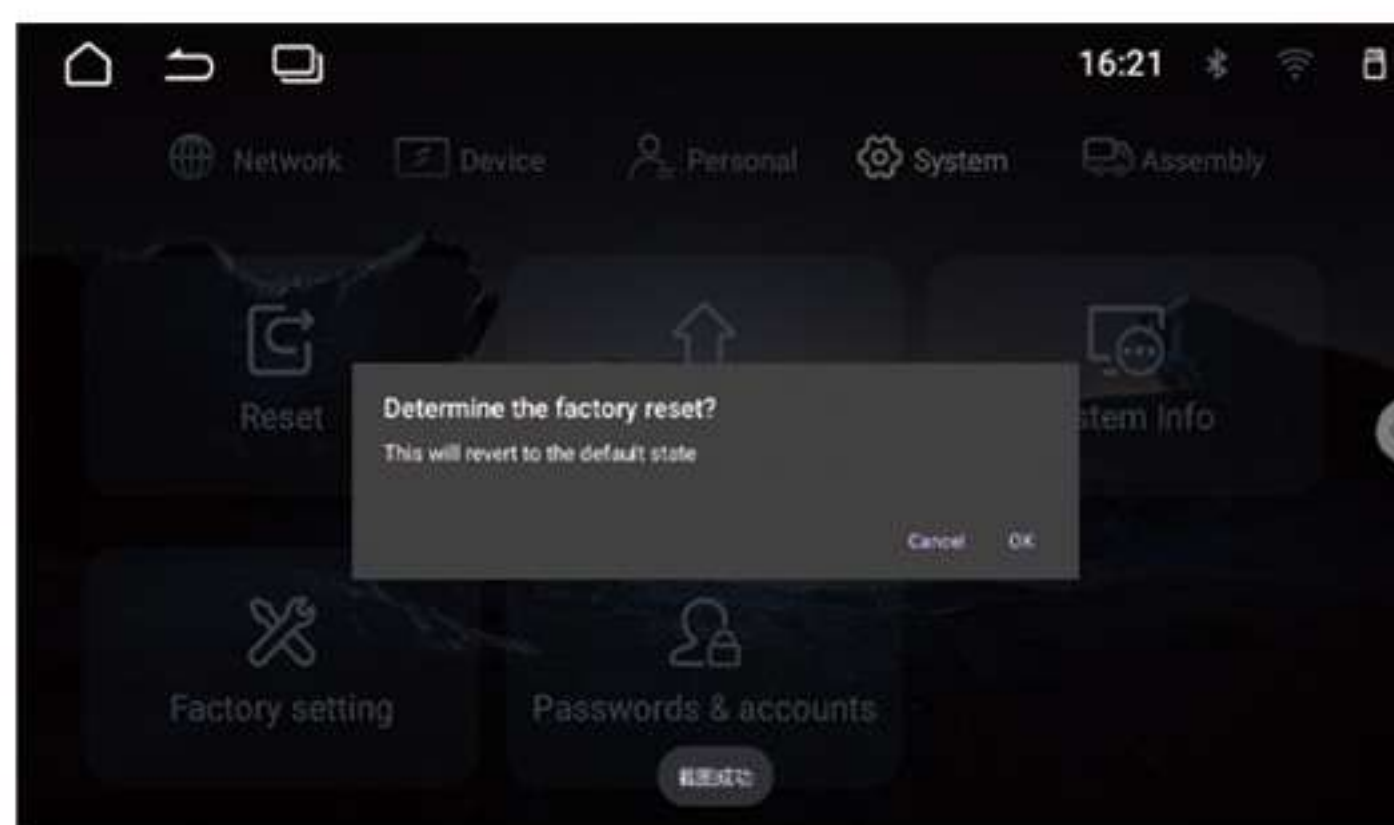

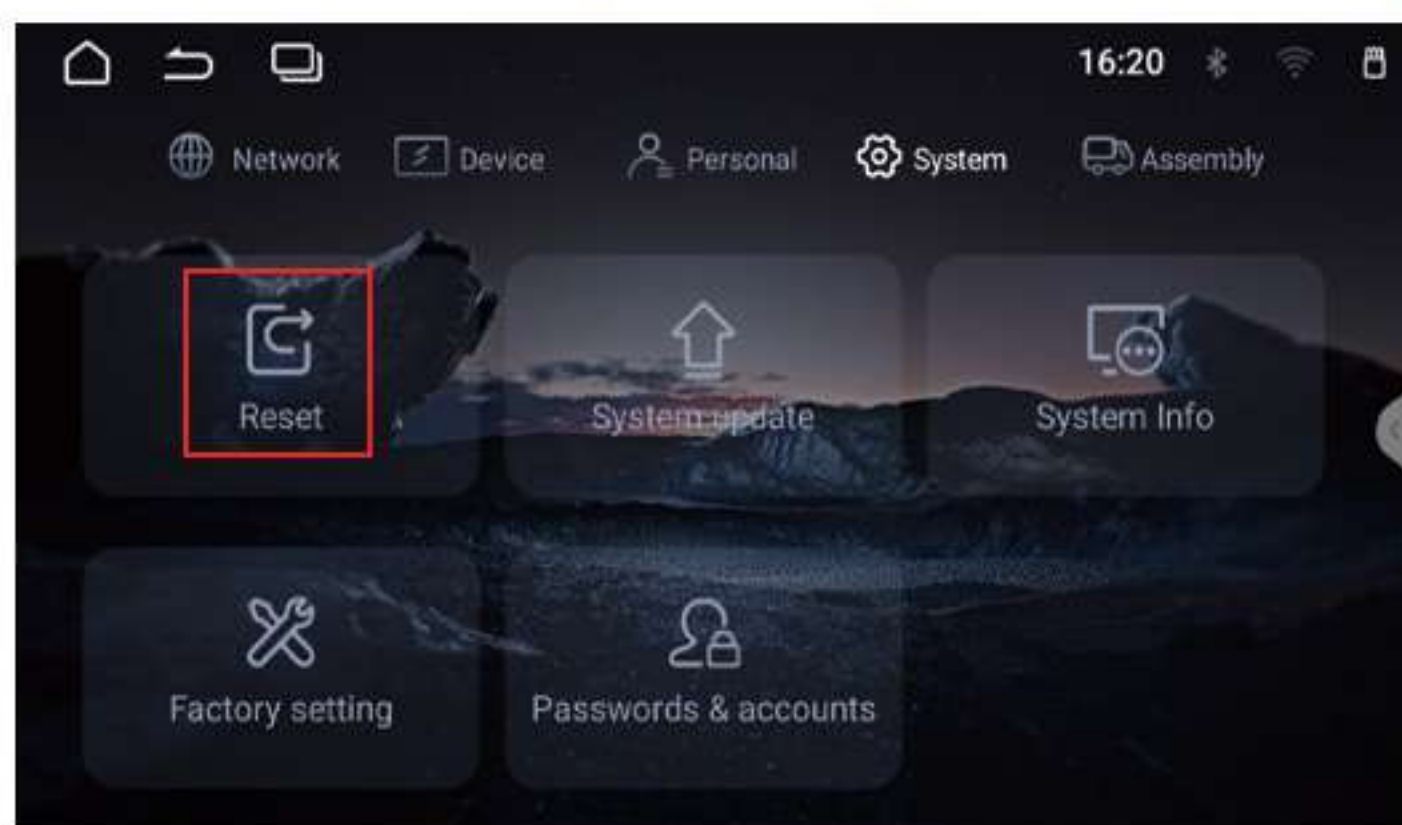

3.4 Google:On the Personal page, touch the [Google] icon to access the following content;

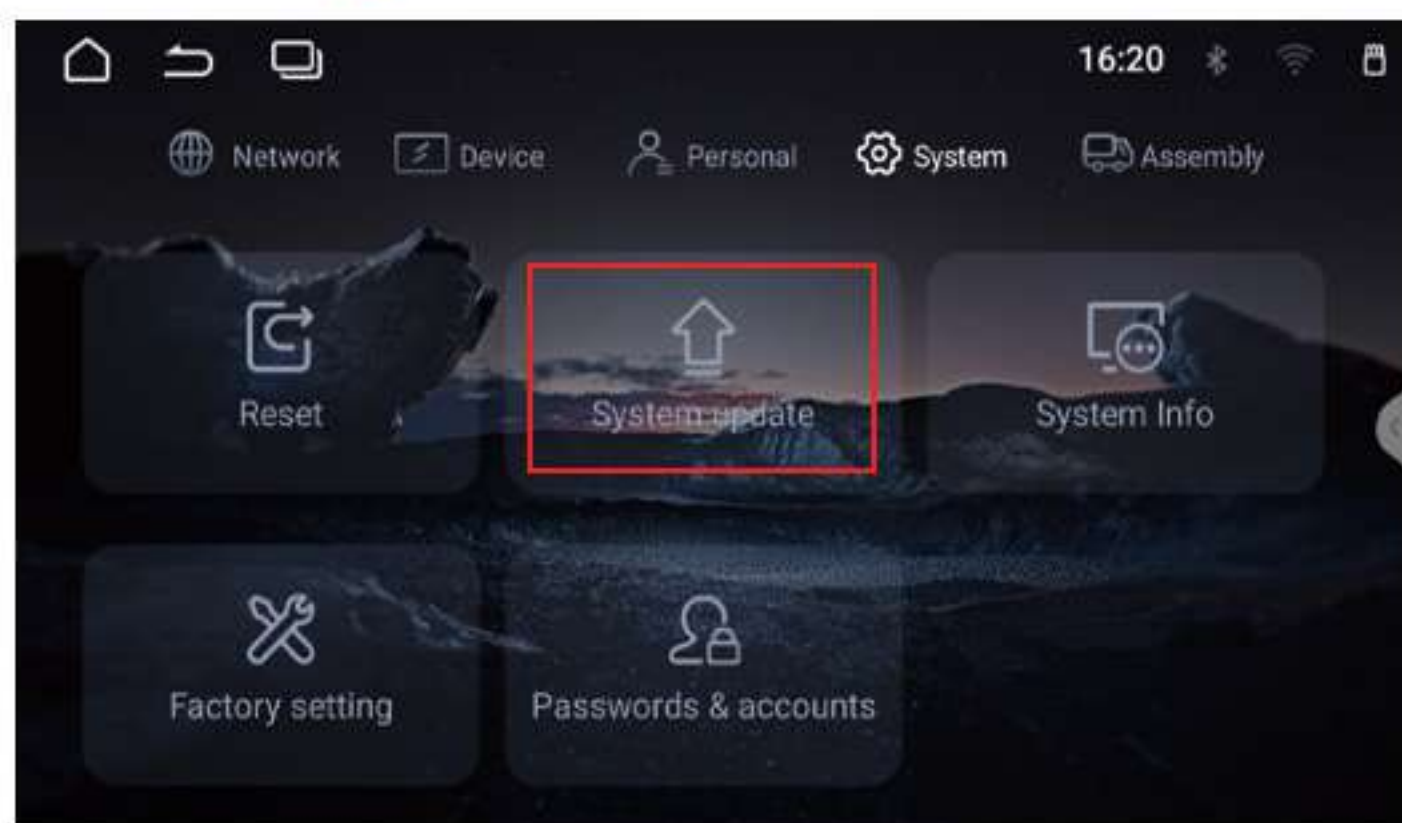

4. System:On the Settings page, touch the [System] icon to access the following content;

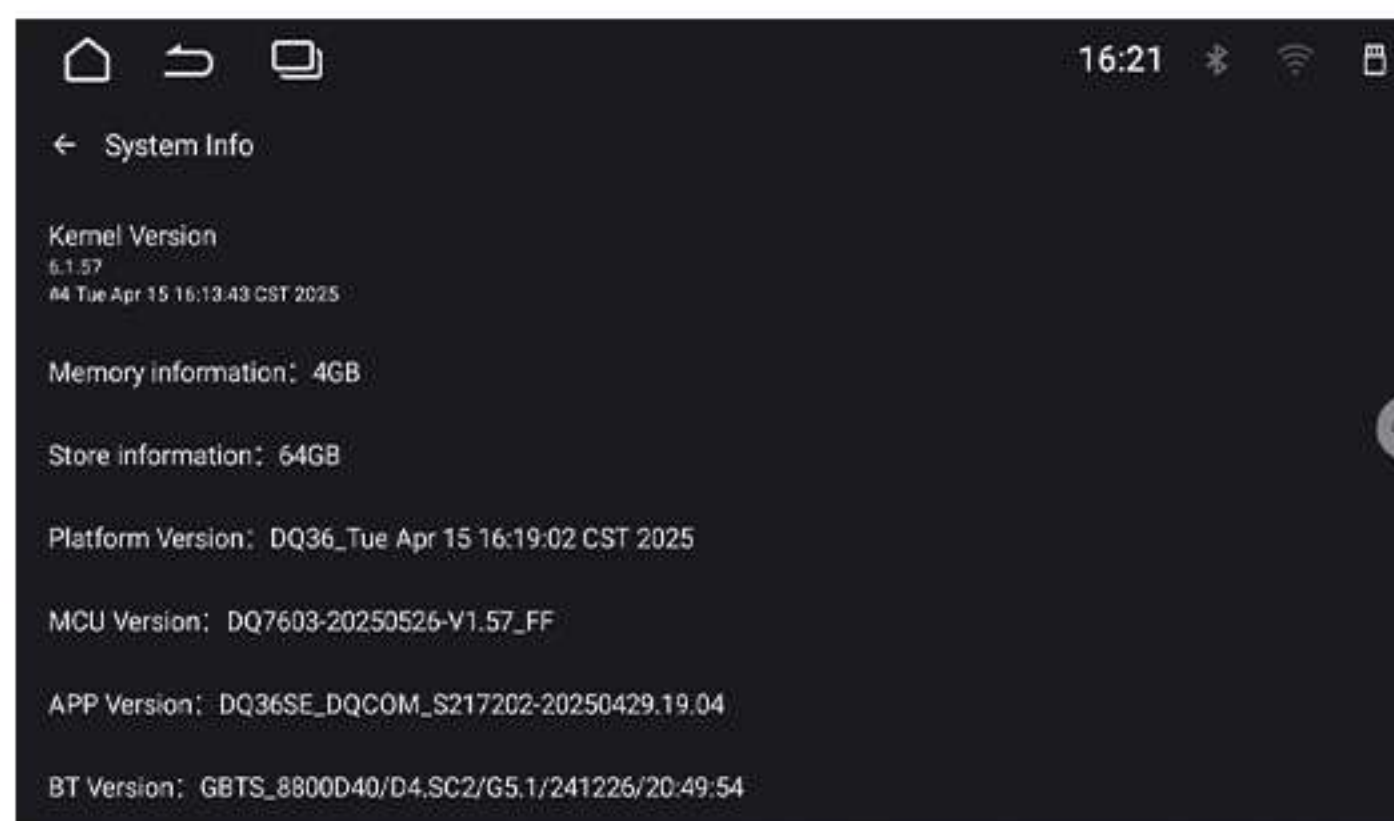

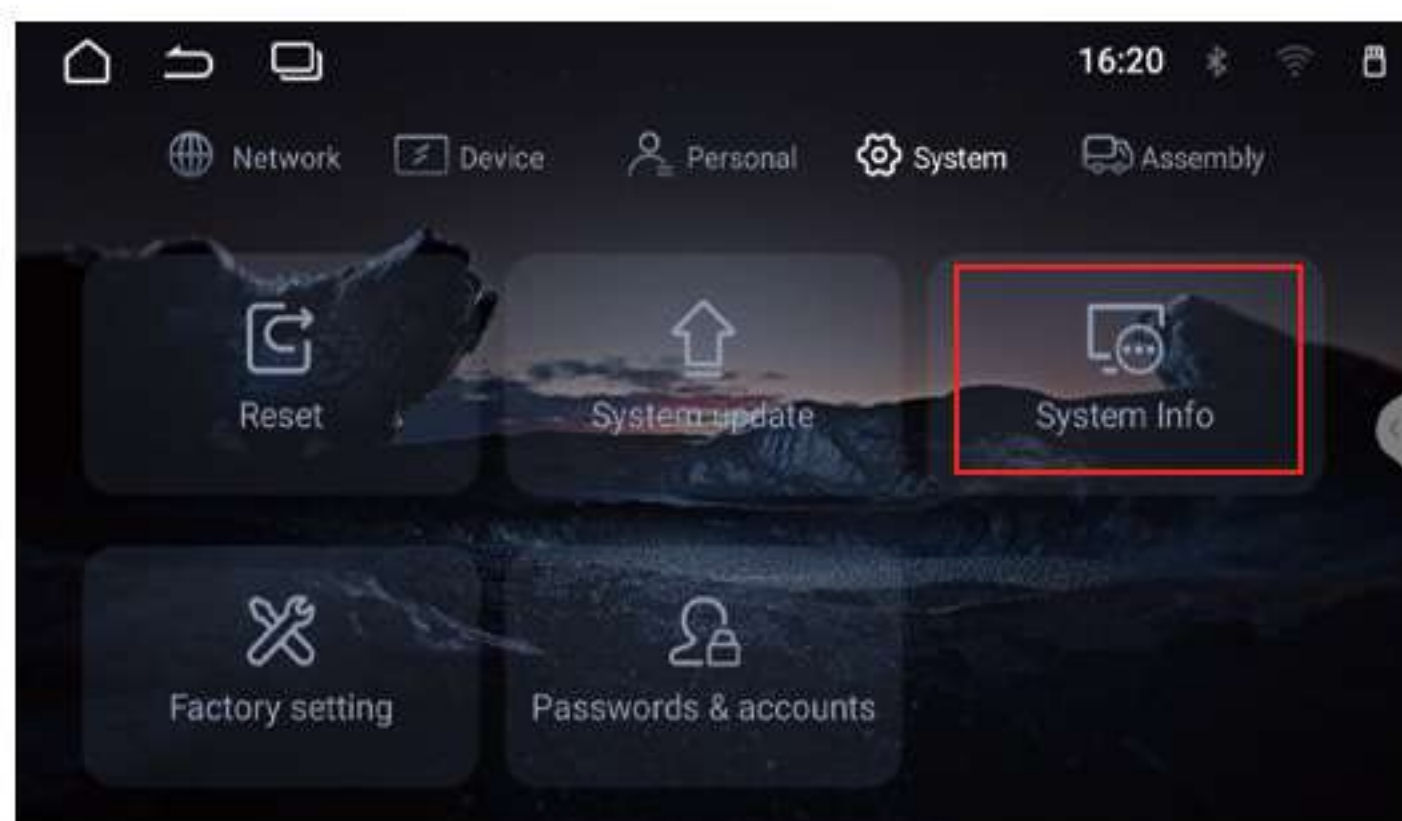

4.1 Reset:On the car settings page, touch the [Reset] icon to access the following content;**Note: Please back up your data before restoring. Restoring will clear all settings**

4.2 System update:On the car settings page, touch the [System update] icon to access the following content;
Note: If you want to upgrade, please contact the technical personnel to see if there is an upgrade package available. The upgrade file needs to be installed, otherwise it will be invalid

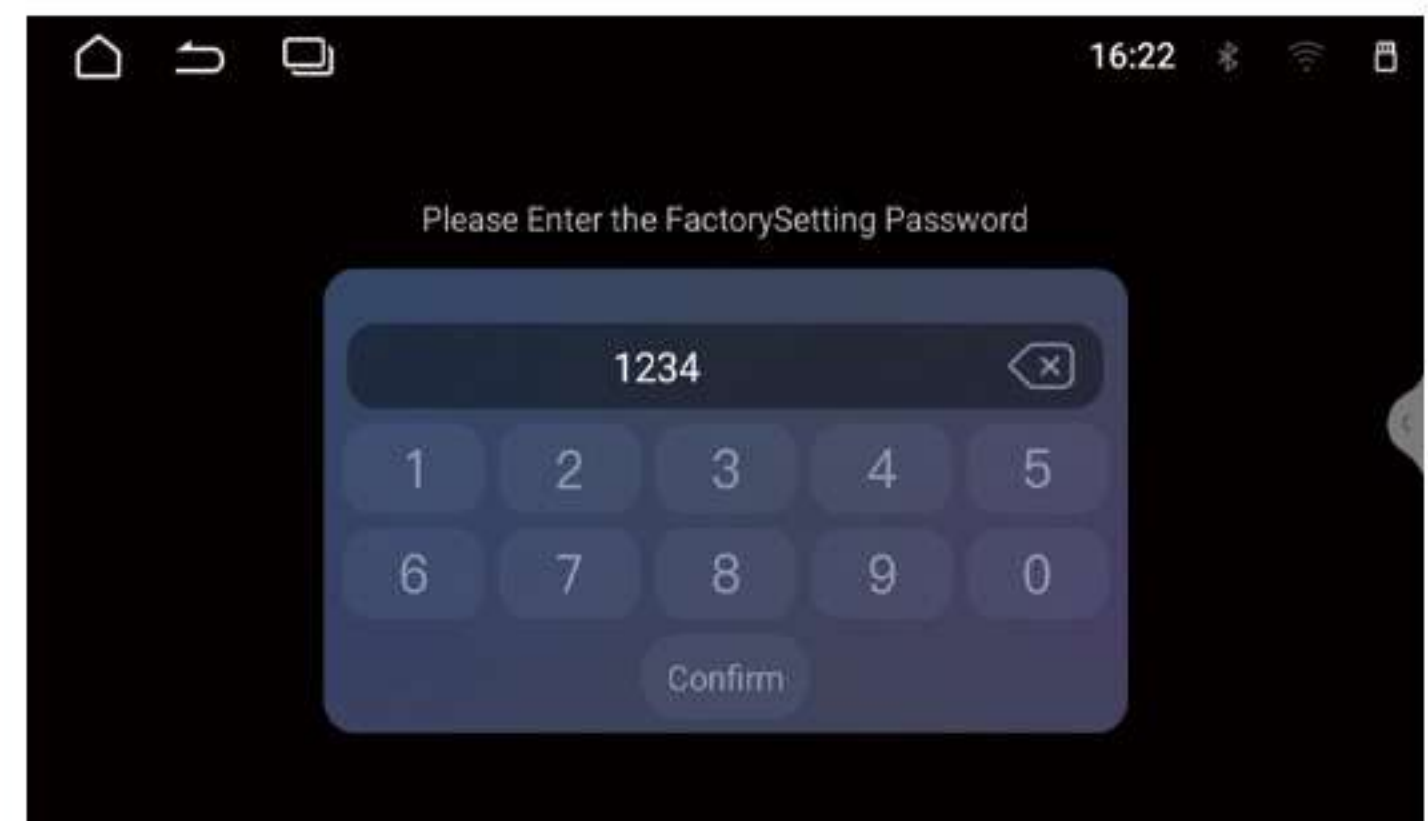

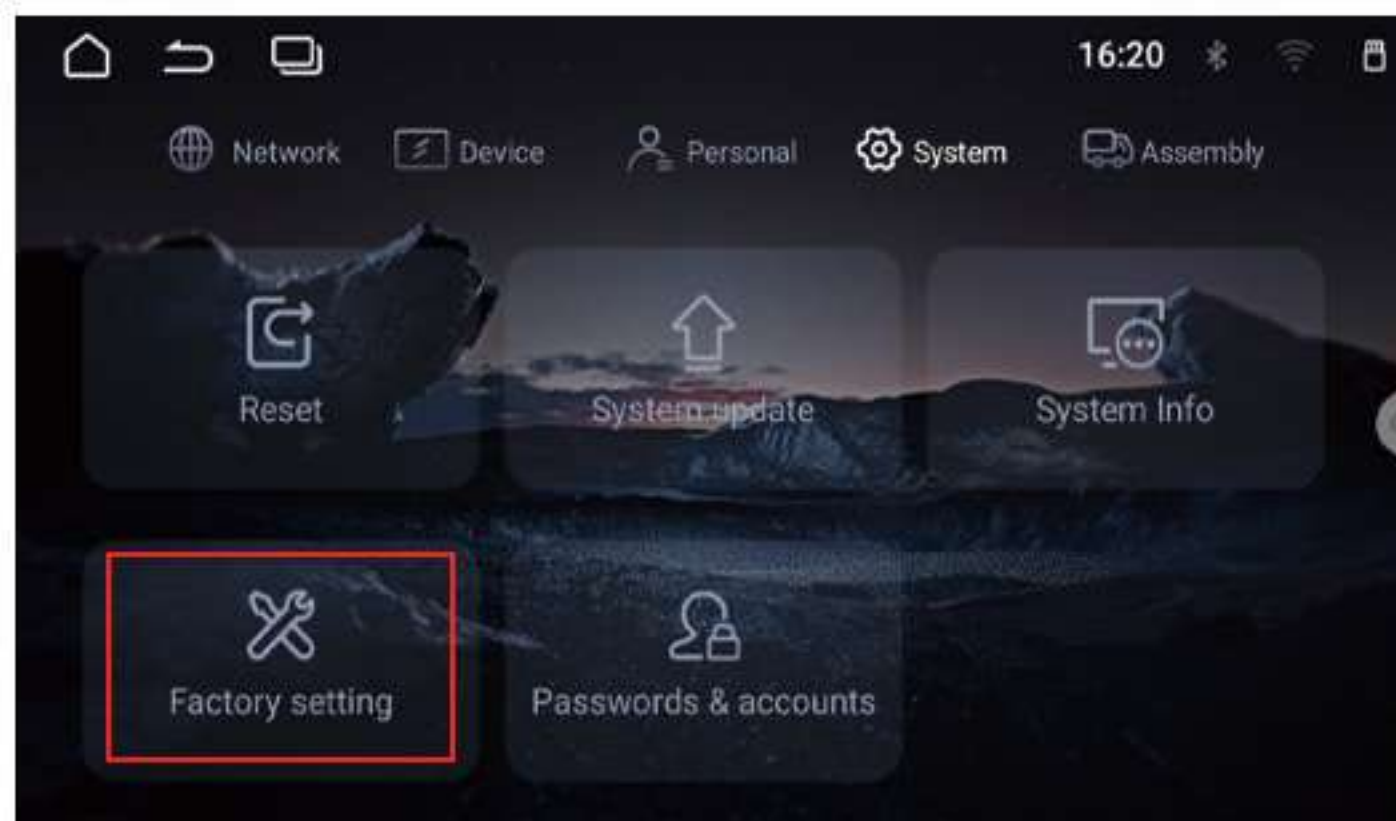

4.3 System Info:On the System page, touch the [System info] icon to access the following content;
Interface:You can view the model, Android version, memory capacity, and storage capacity.

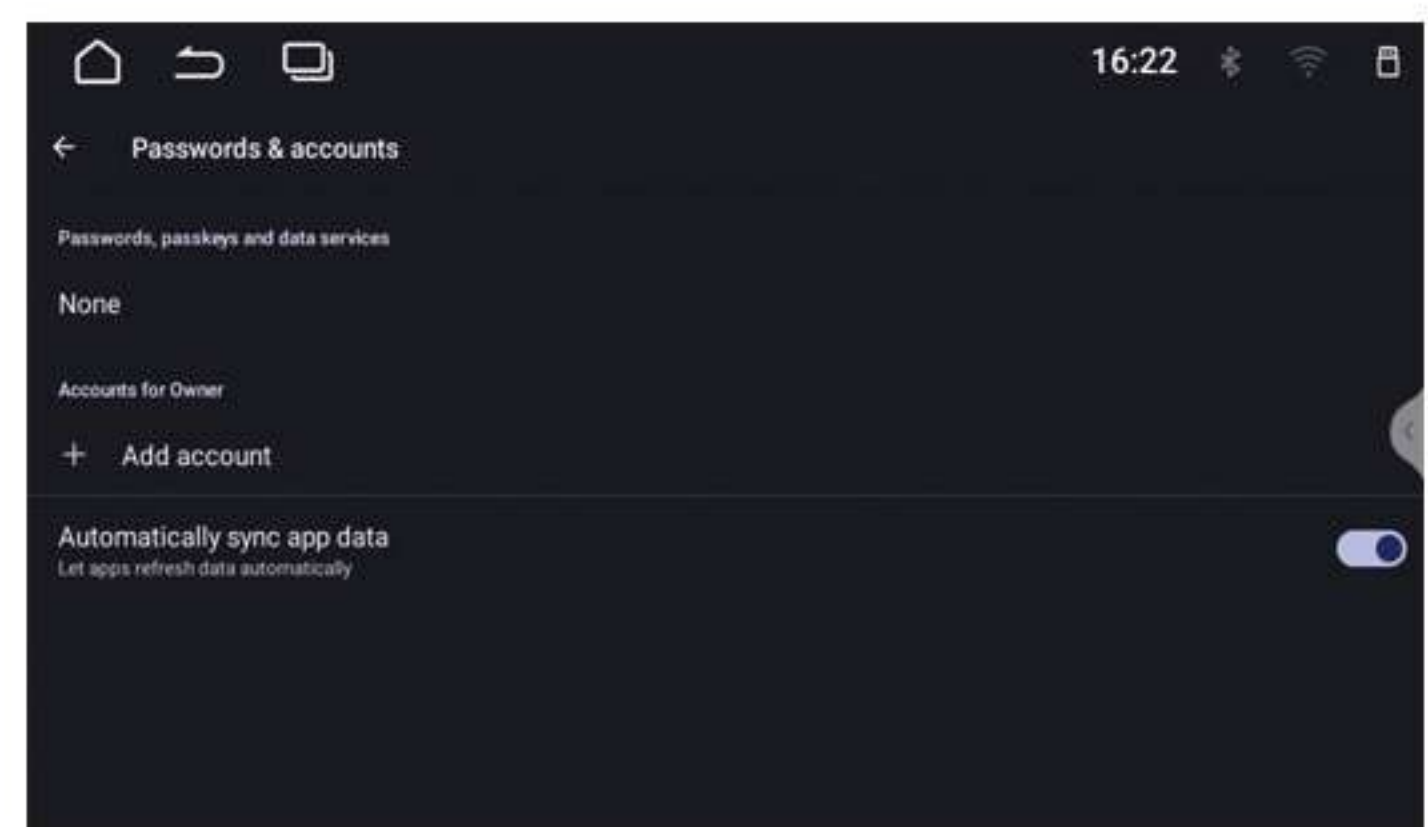

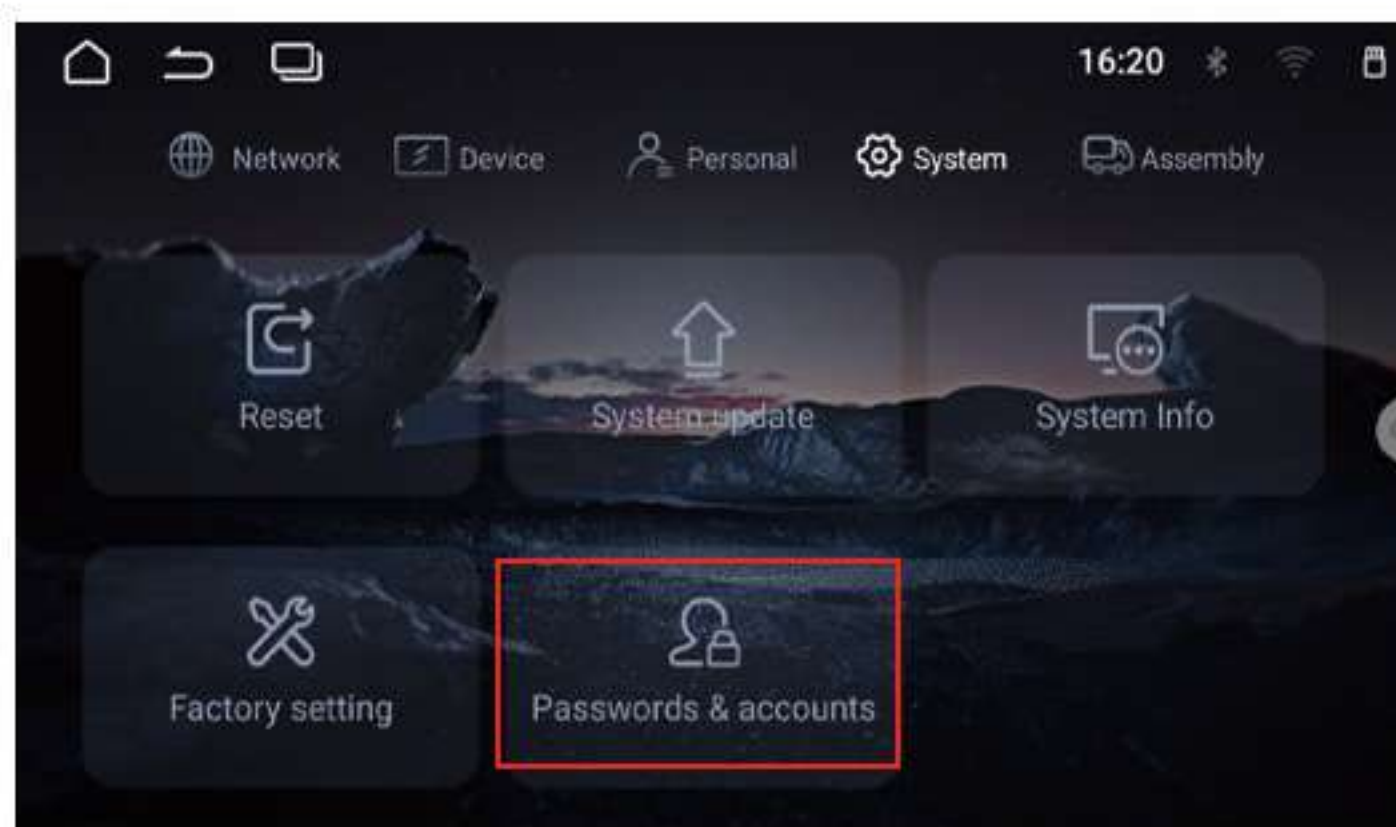

4.4 Factory settings:On the System page, touch the [Factory settings] icon to access the following content;
Interface:The factory password is "1234". You can set it according to your needs.

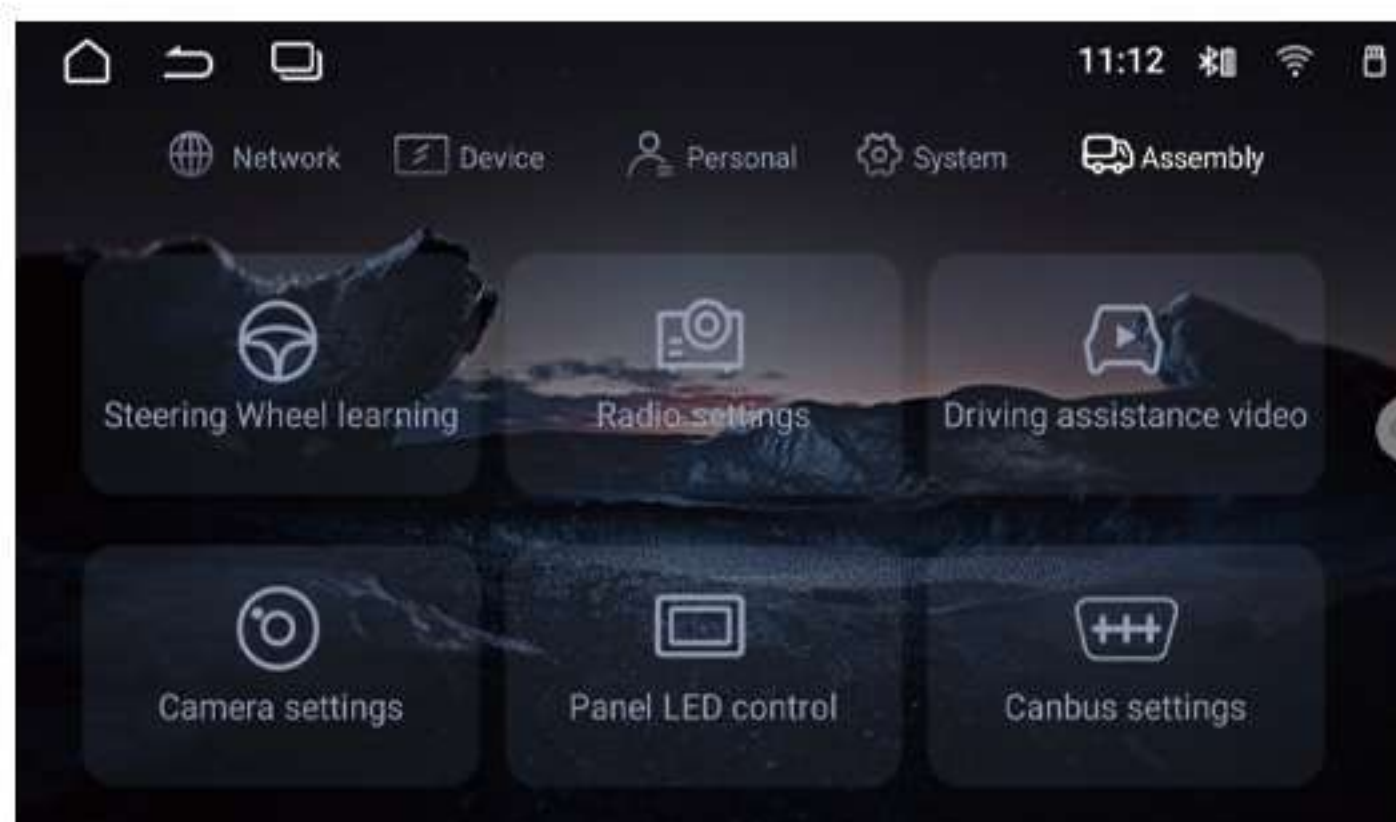

Note: Changing it at will may cause the car radio to malfunction

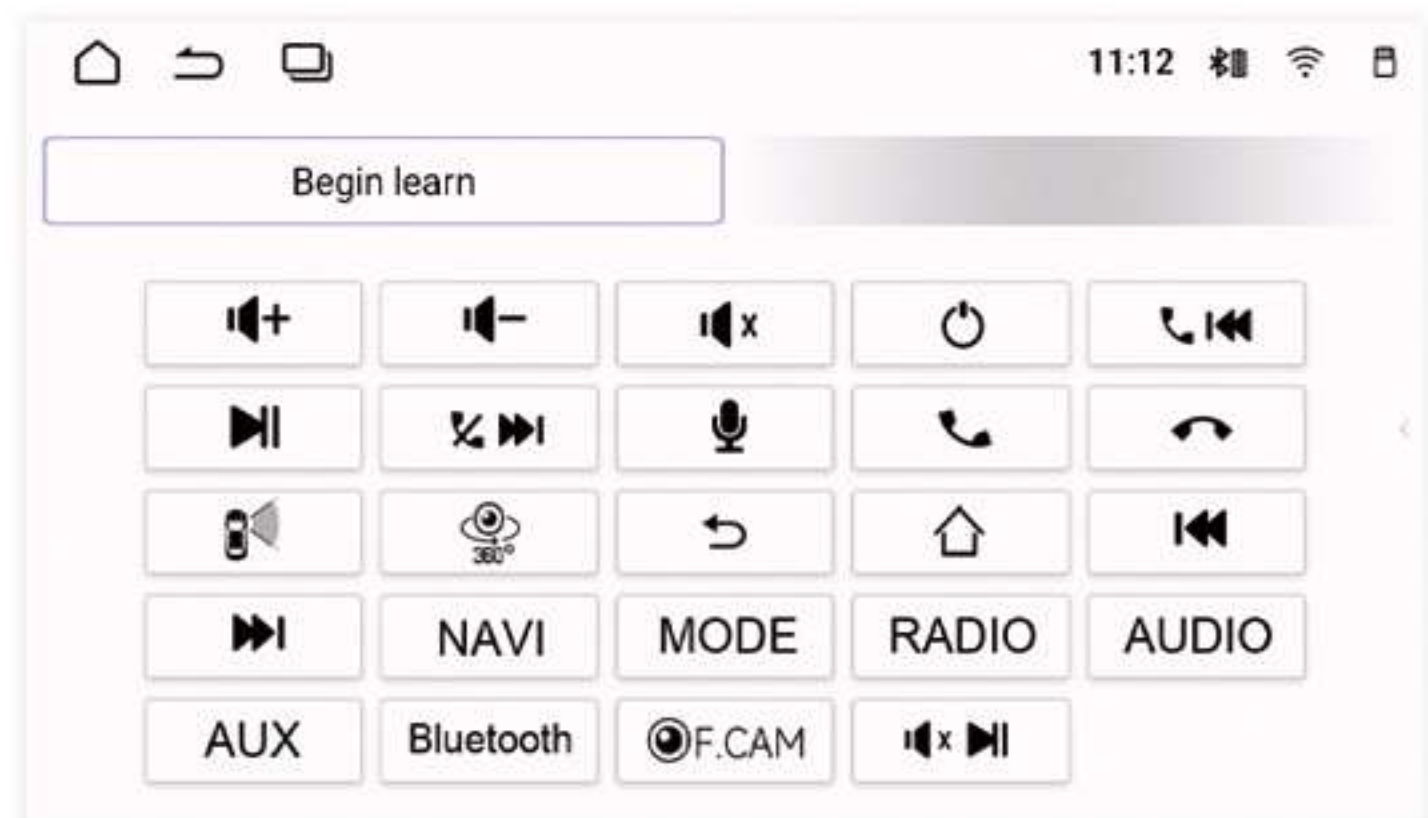

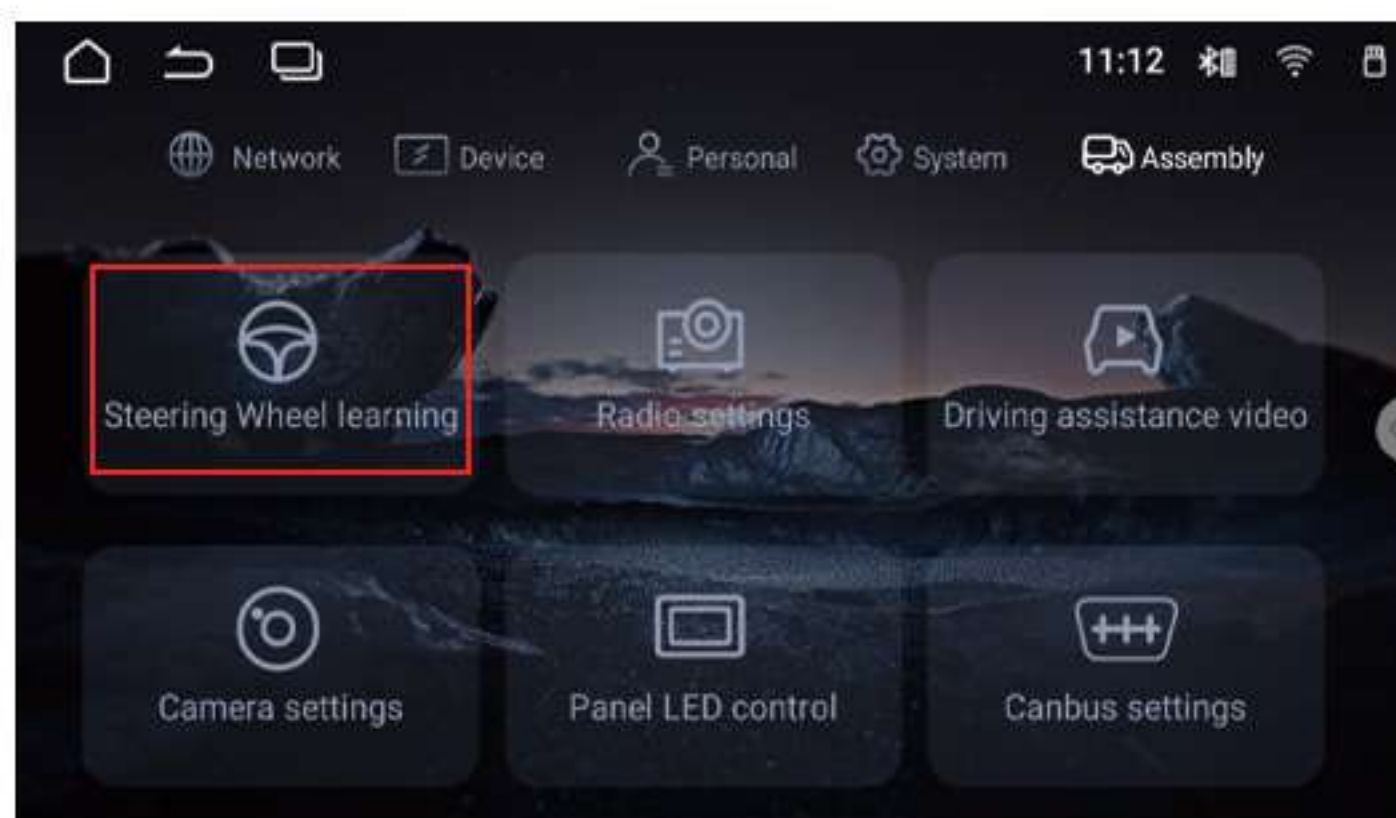

4.5 Passwords & accounts:On the System page, touch the [Passwords & accounts] icon to access the following content; Add a Google account or other accounts.

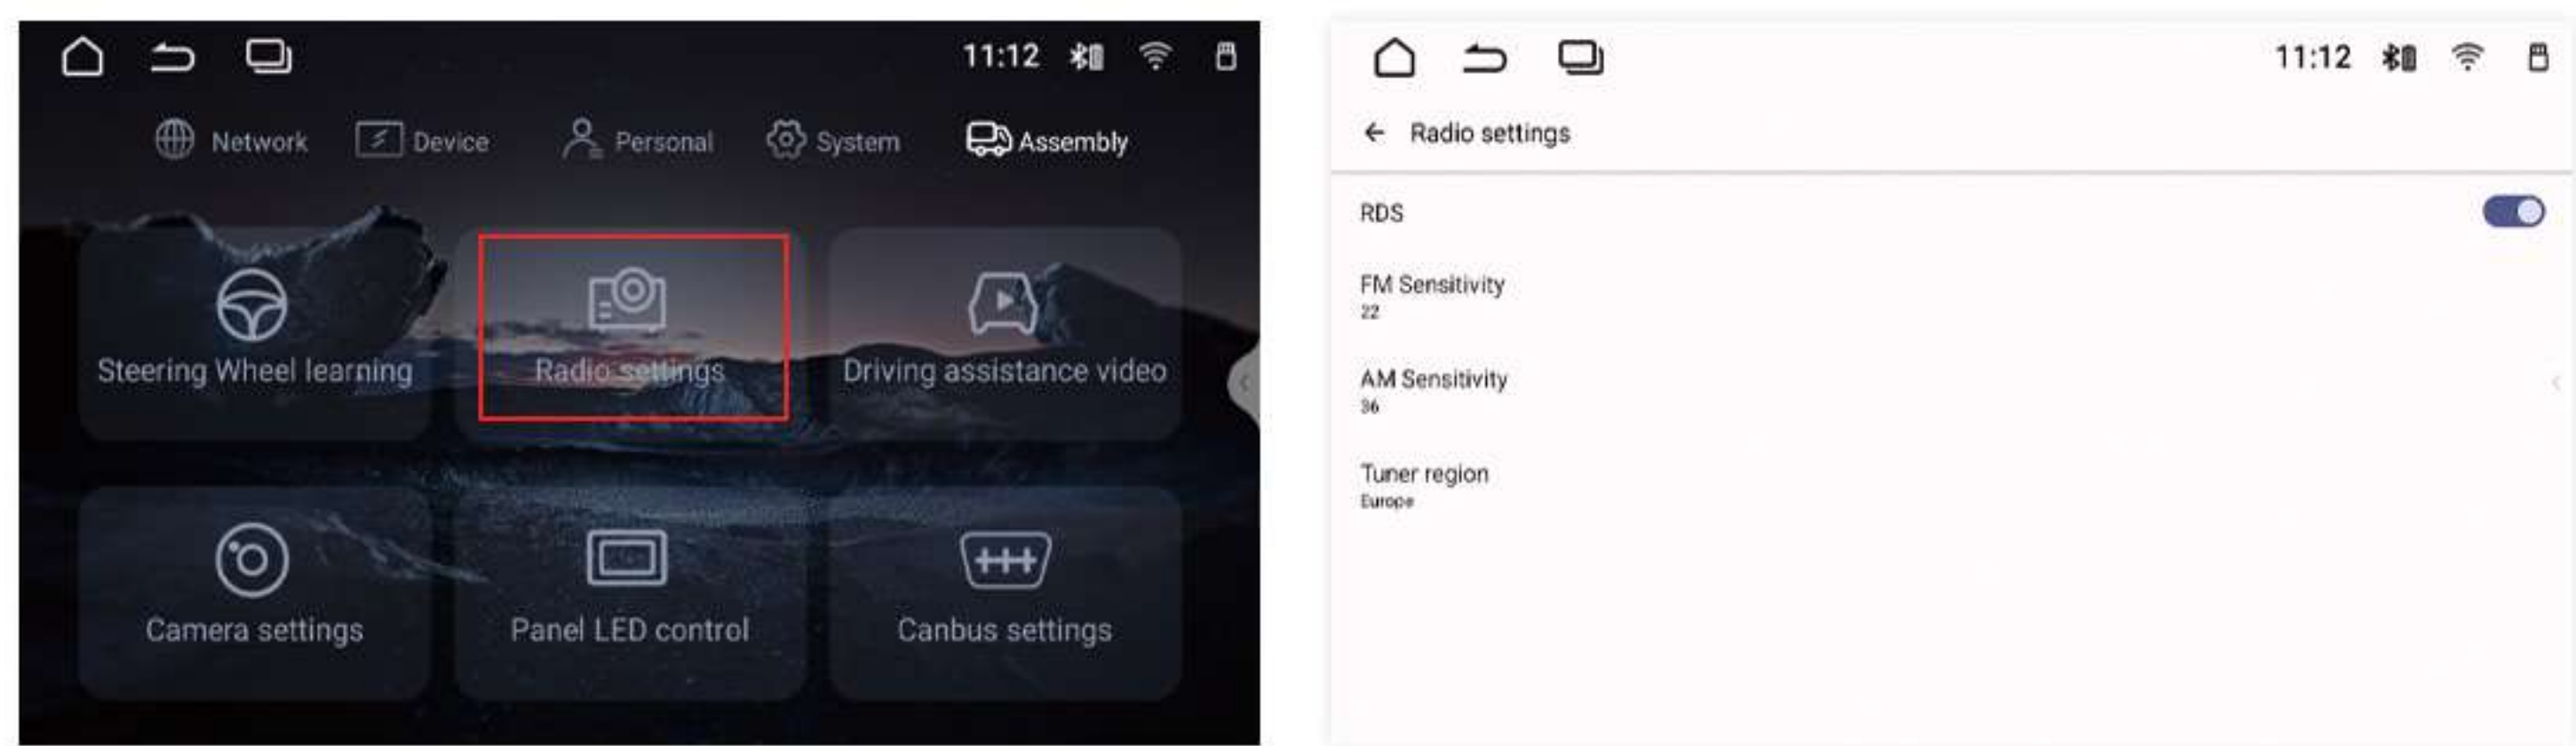

5. Assembly:On the Settings page, touch the [Assembly] icon to access the following content;

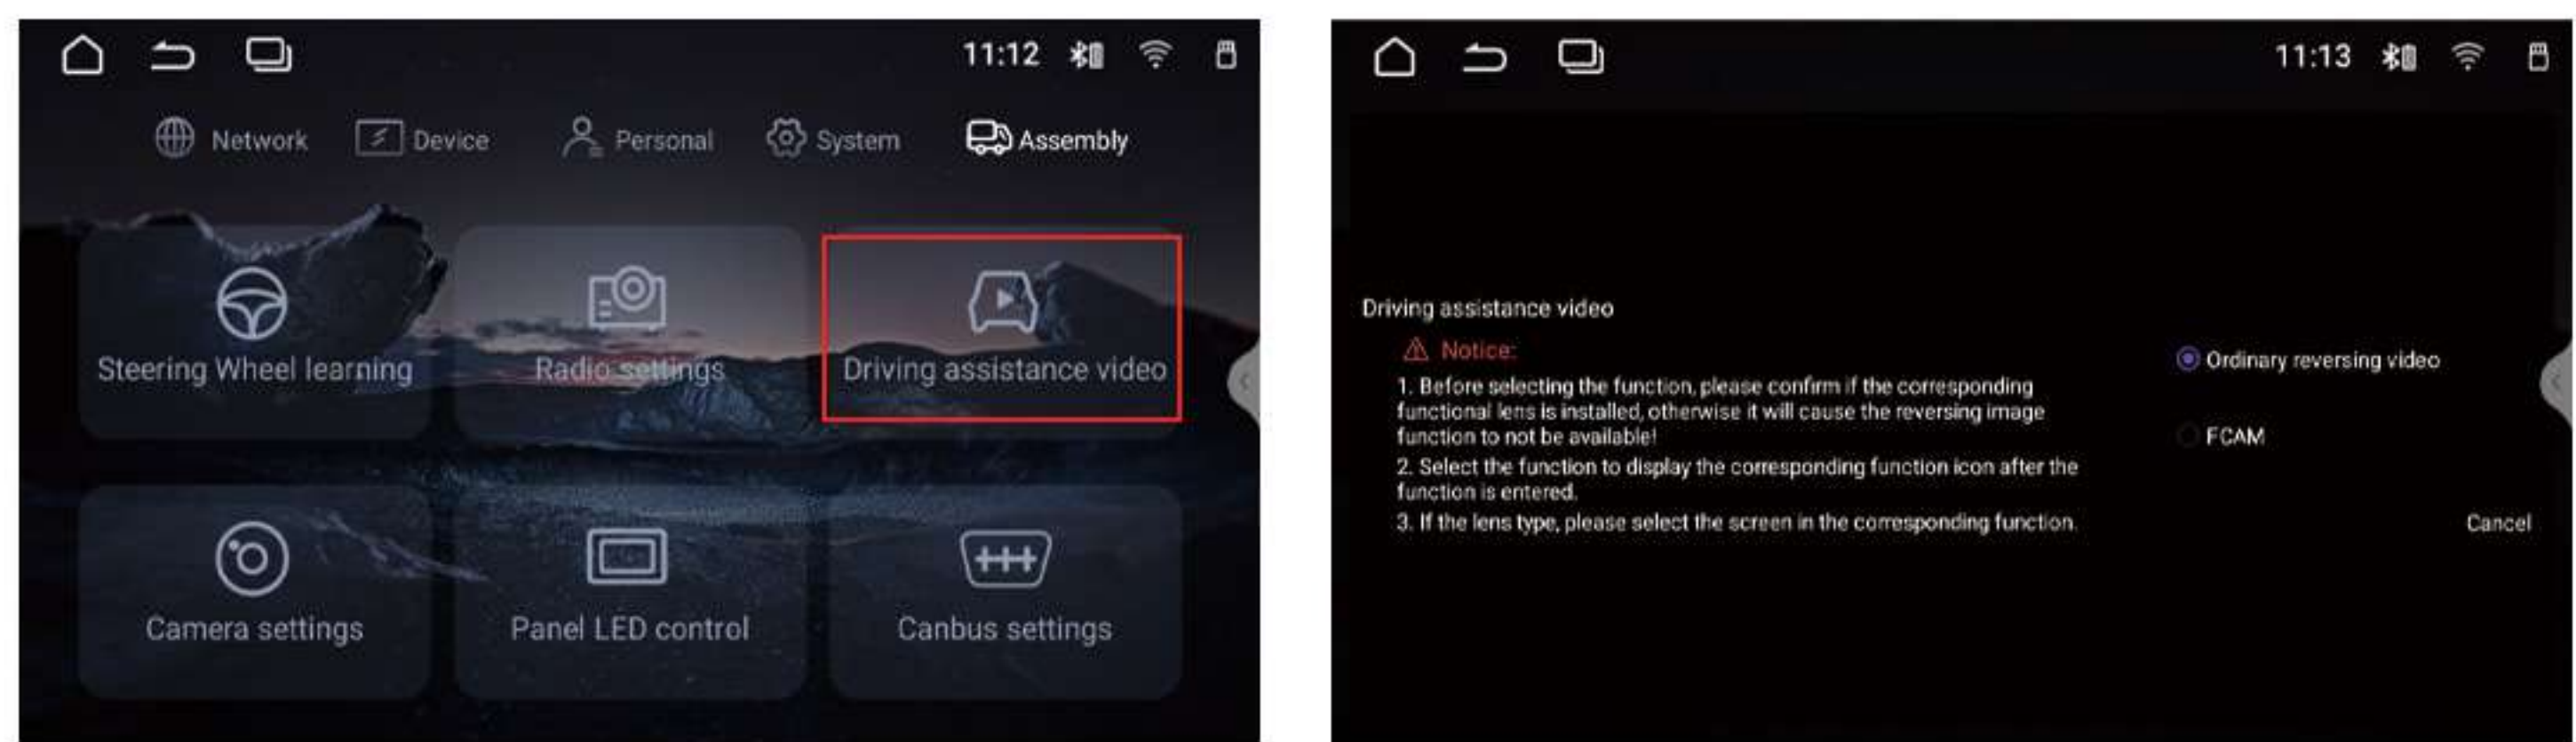

5.1 Steering Wheel learning:On the Assembly page, touch the [Steering Wheel learning] icon to access the following content;After learning, you can control some functions through the steering wheel buttons of the original car

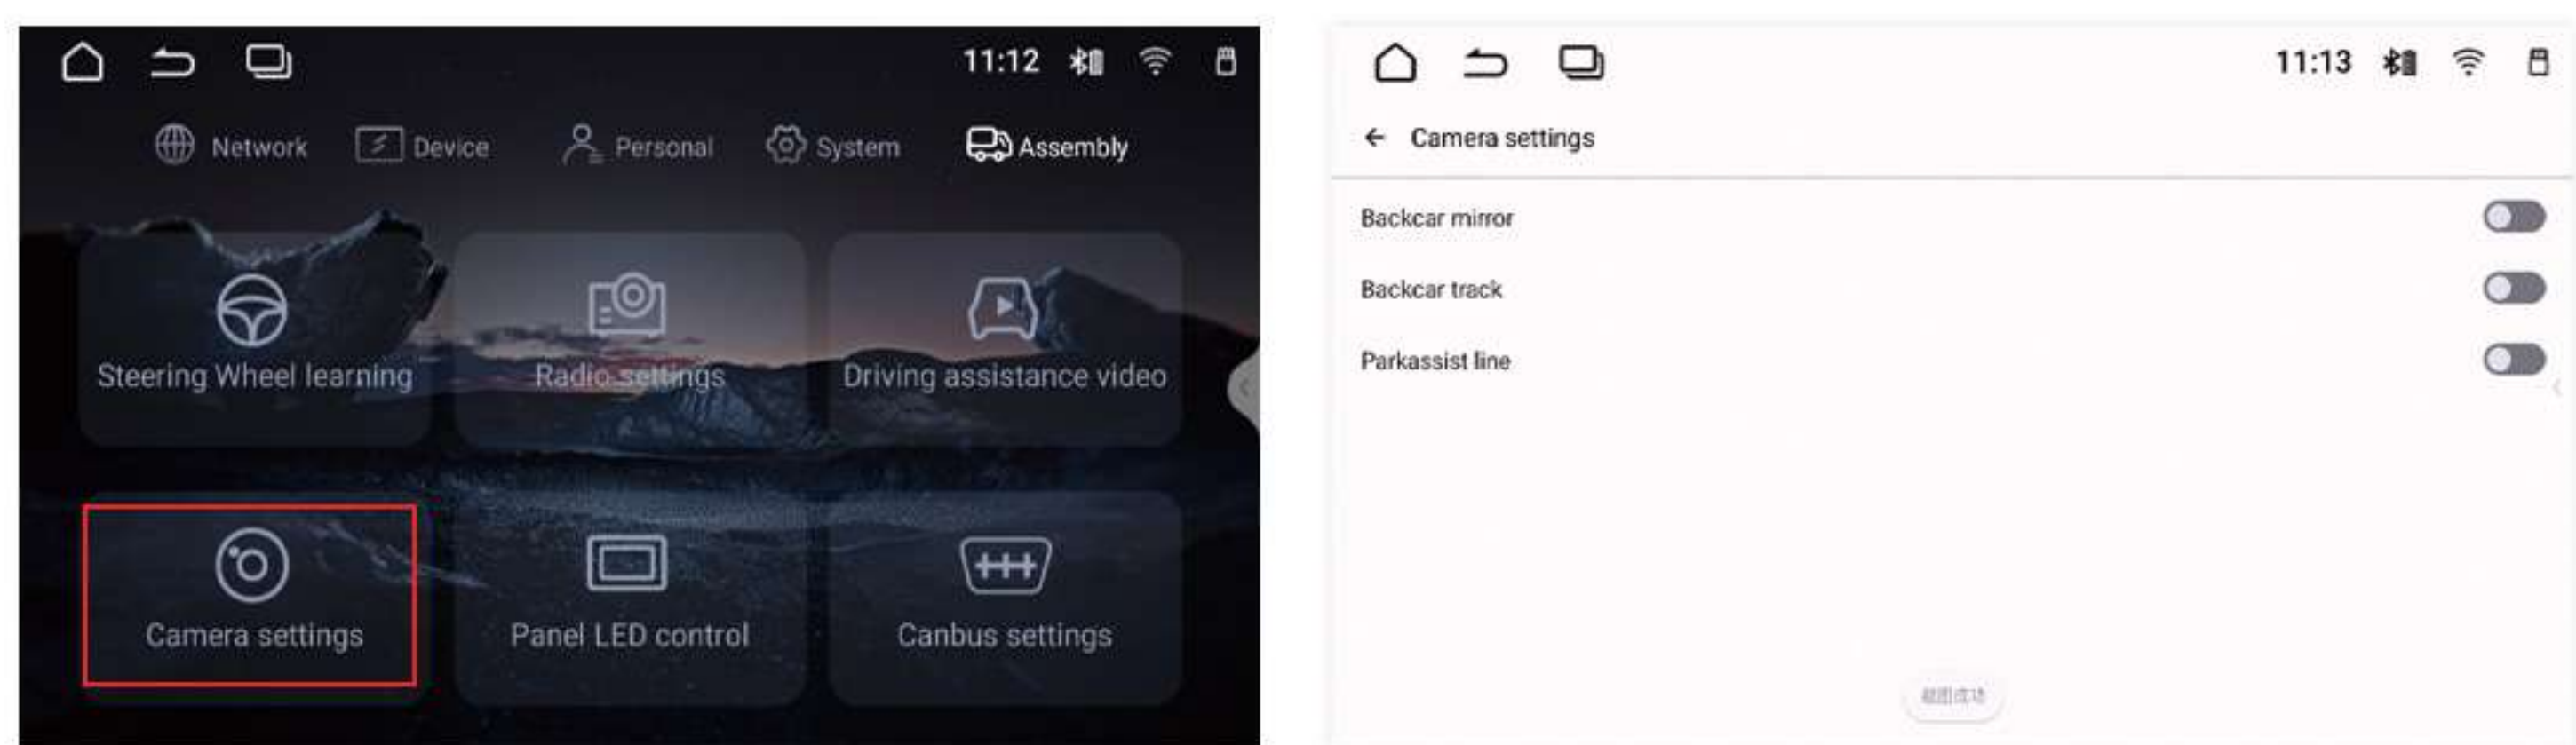

5.2 Radio settings:On the System page, touch the [Radio settings] icon to access the following content;

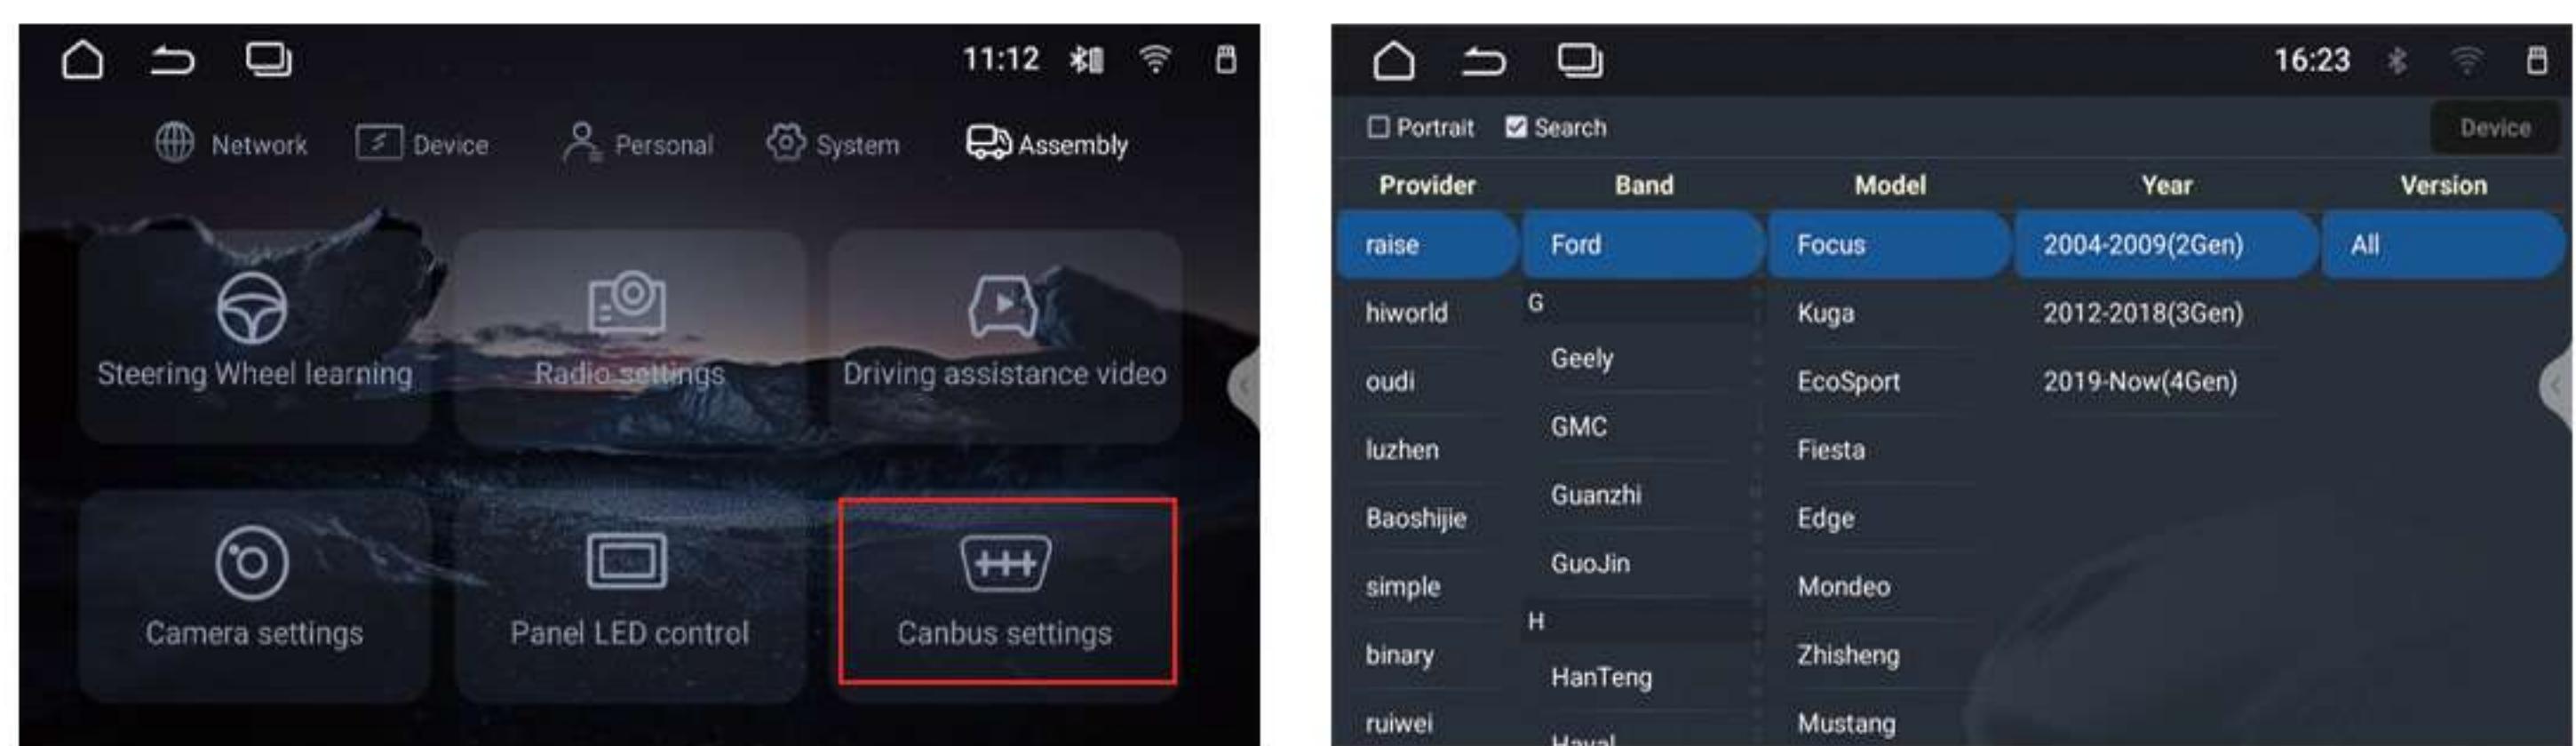

5.3 Driving assistance video:On the System page, touch the [Driving assistance video] icon to access the following content;

5.4 Camera settings:On the Assembly page, touch the [Camera settings] icon to access the following content;

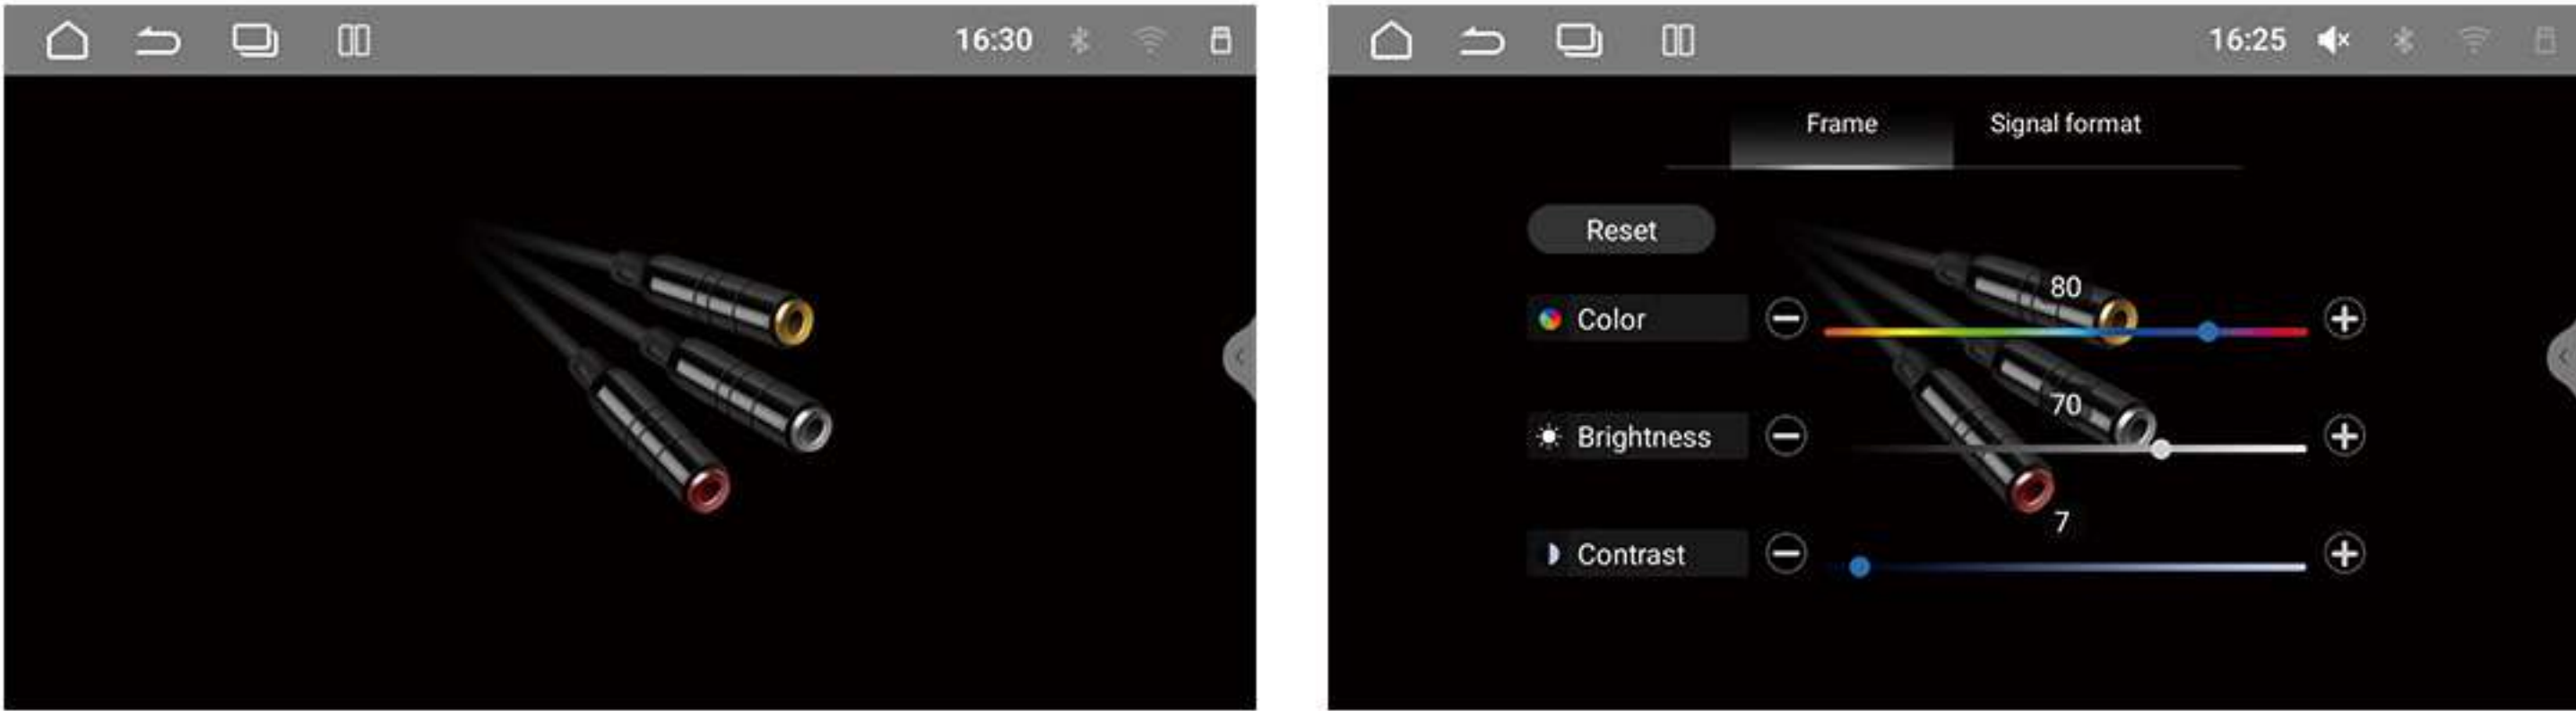

5.5 Canbus settings:On the Assembly page, touch the [Canbus settings] icon to access the following content; You can set Canbus according to your model year, please use it under the guidance of installing technicians, otherwise it may cause the function to useexception!

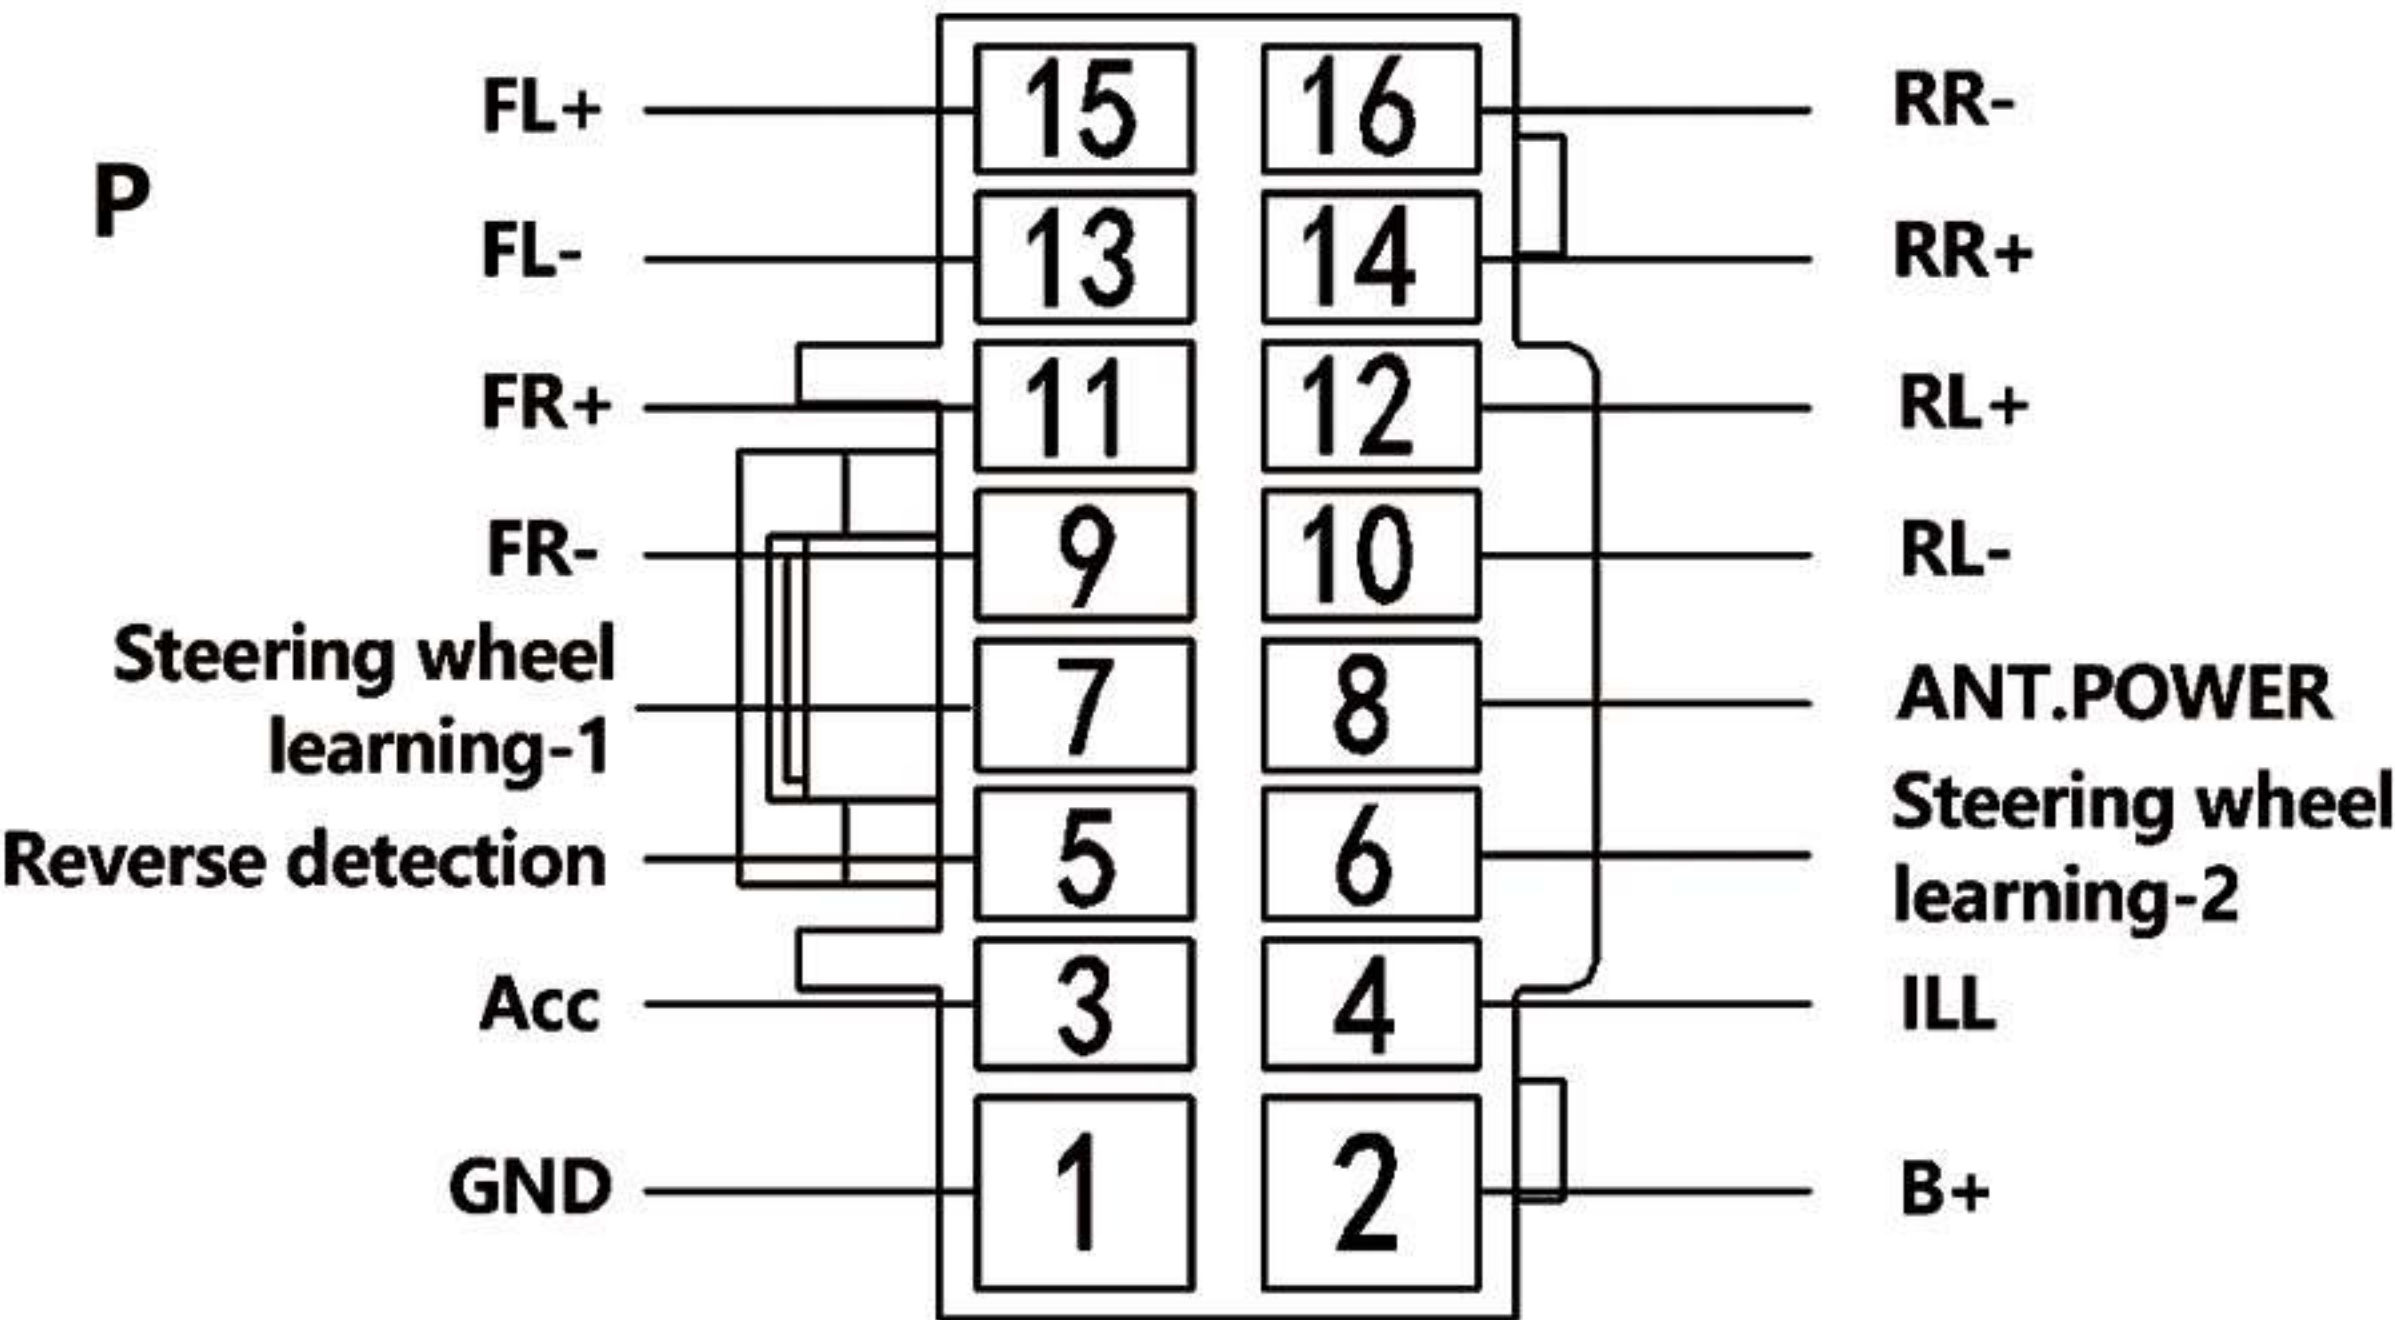

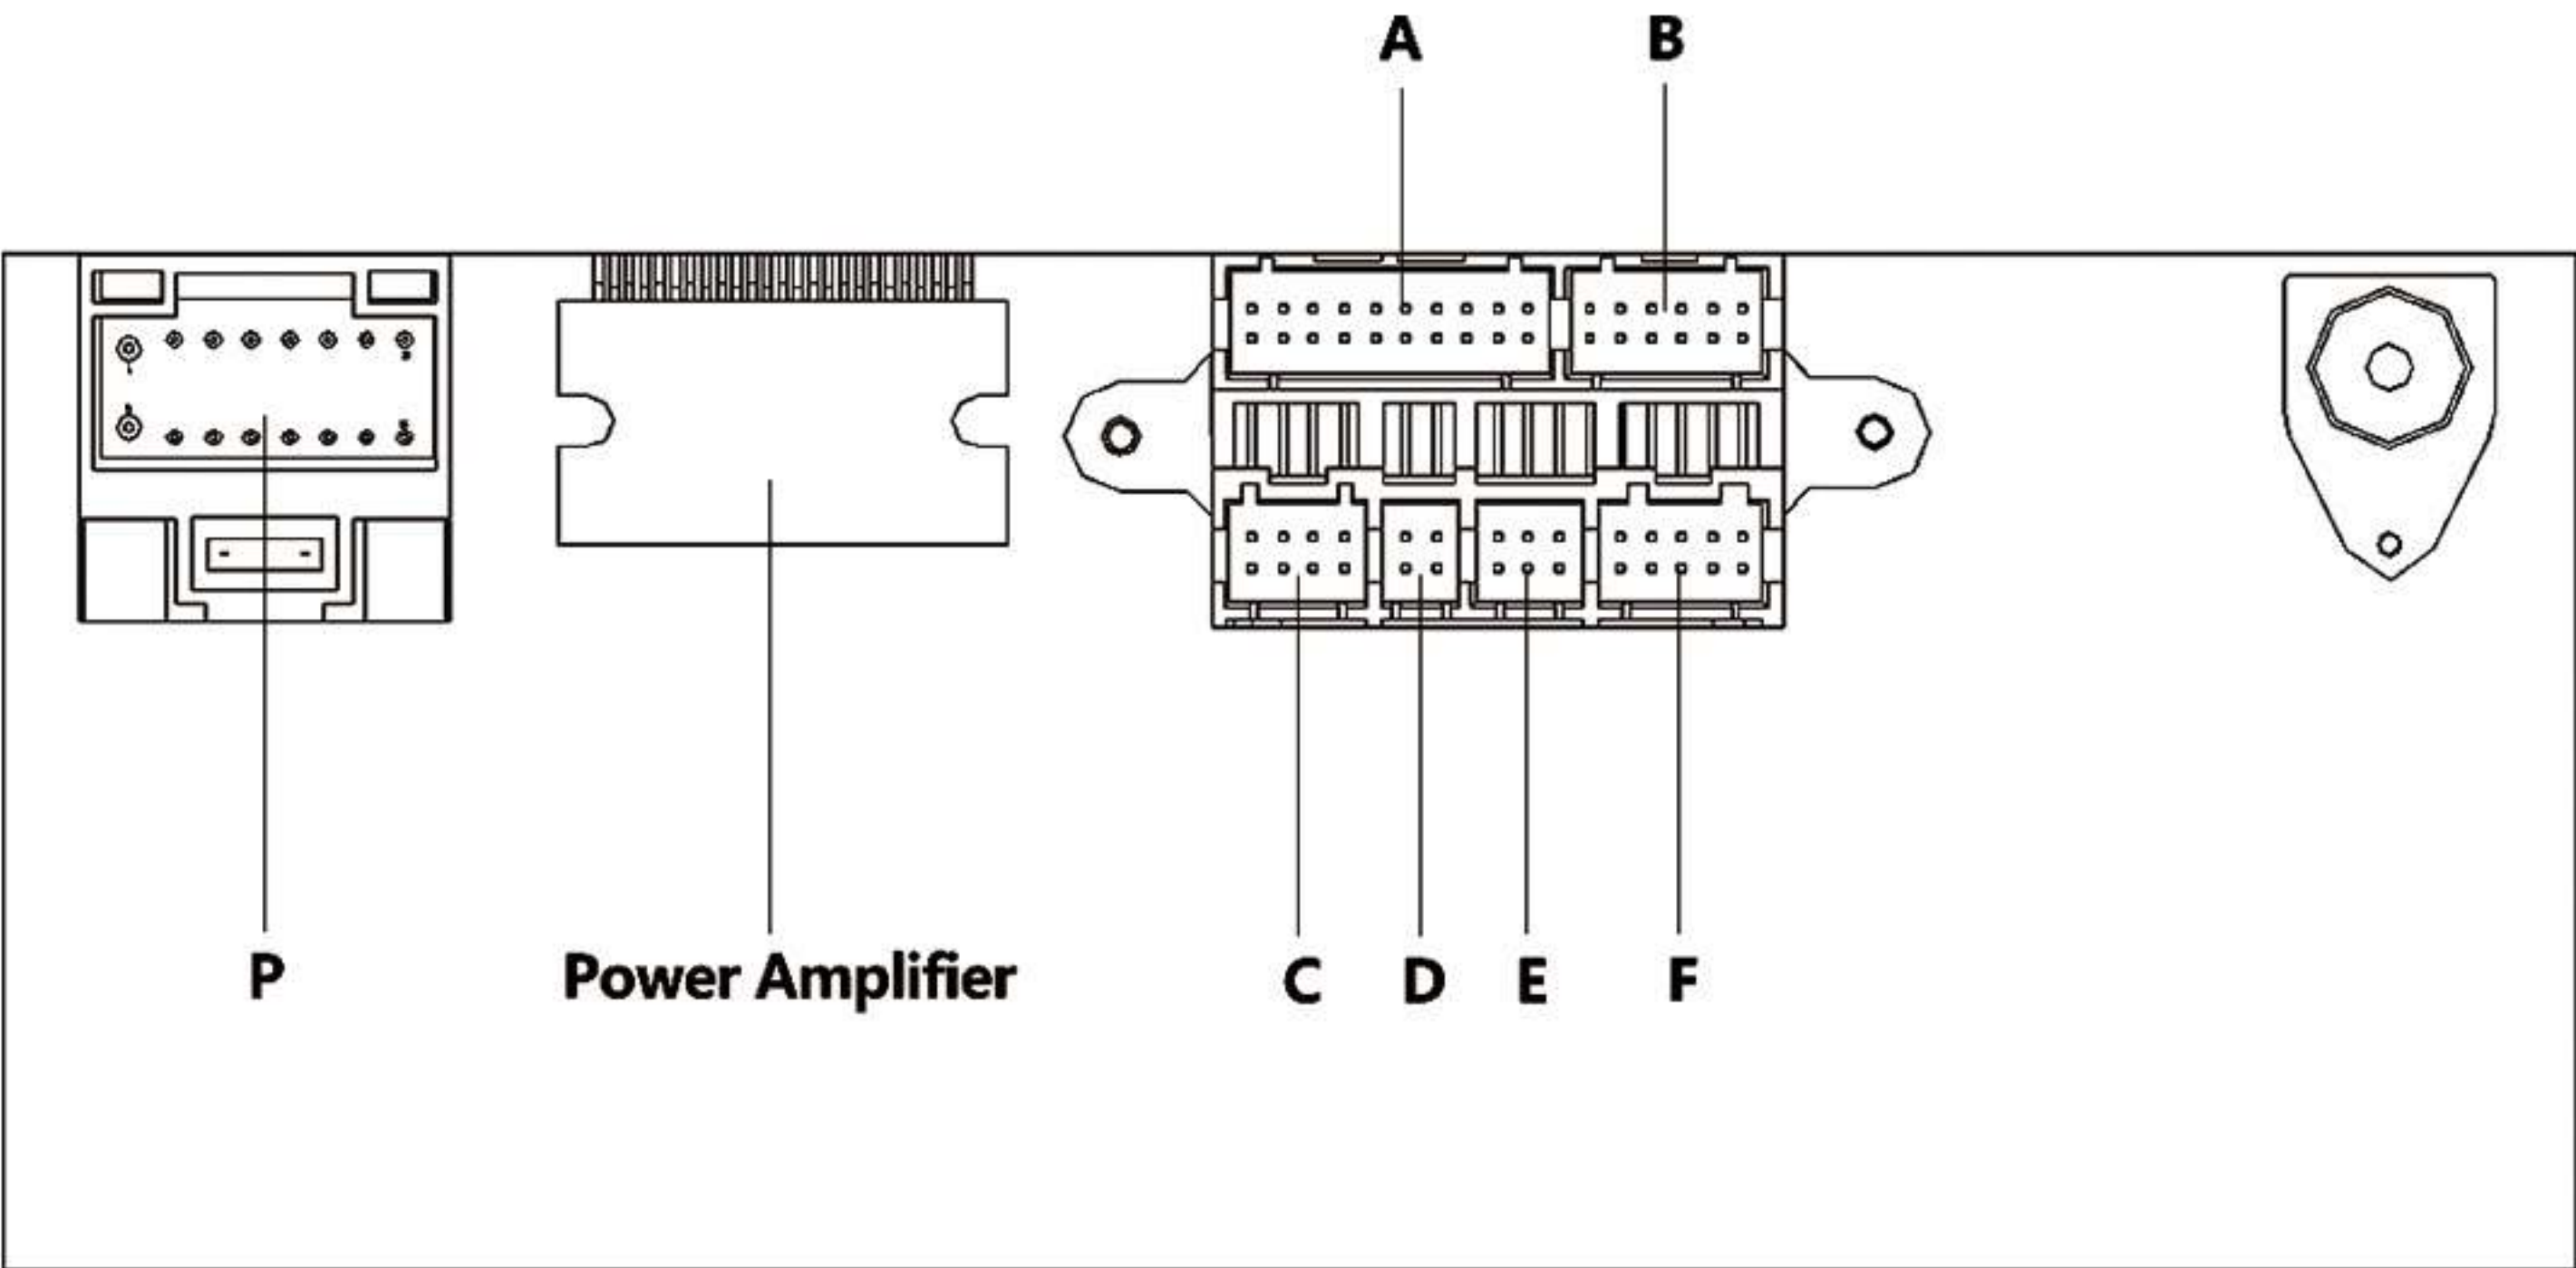

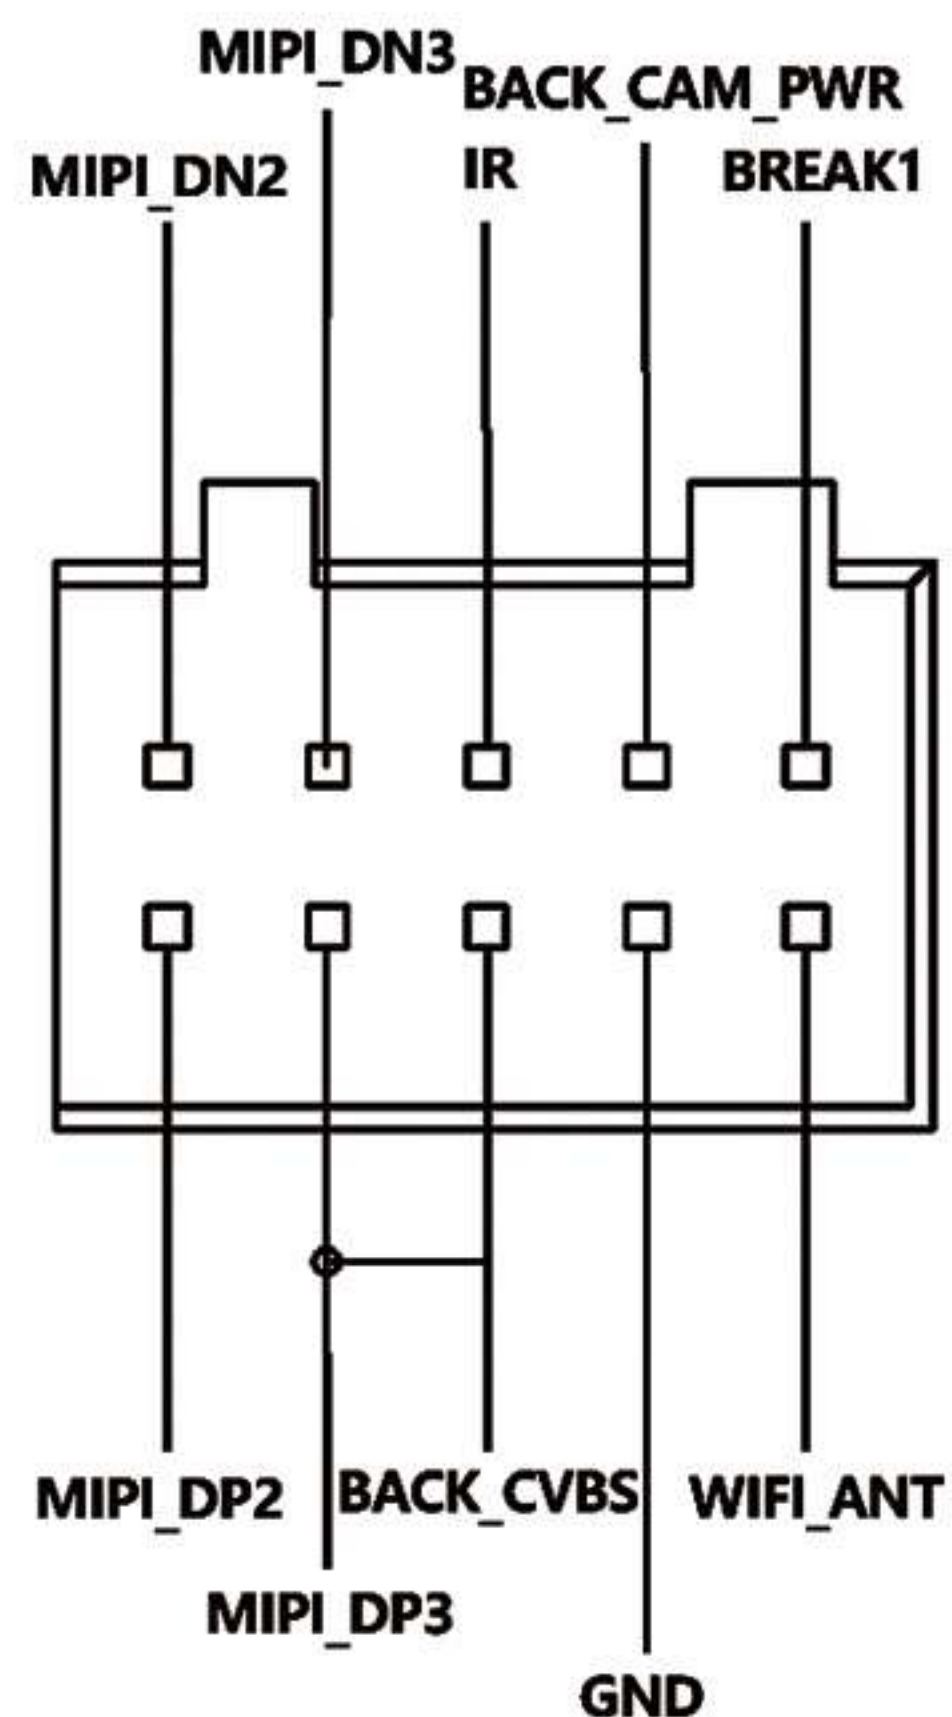

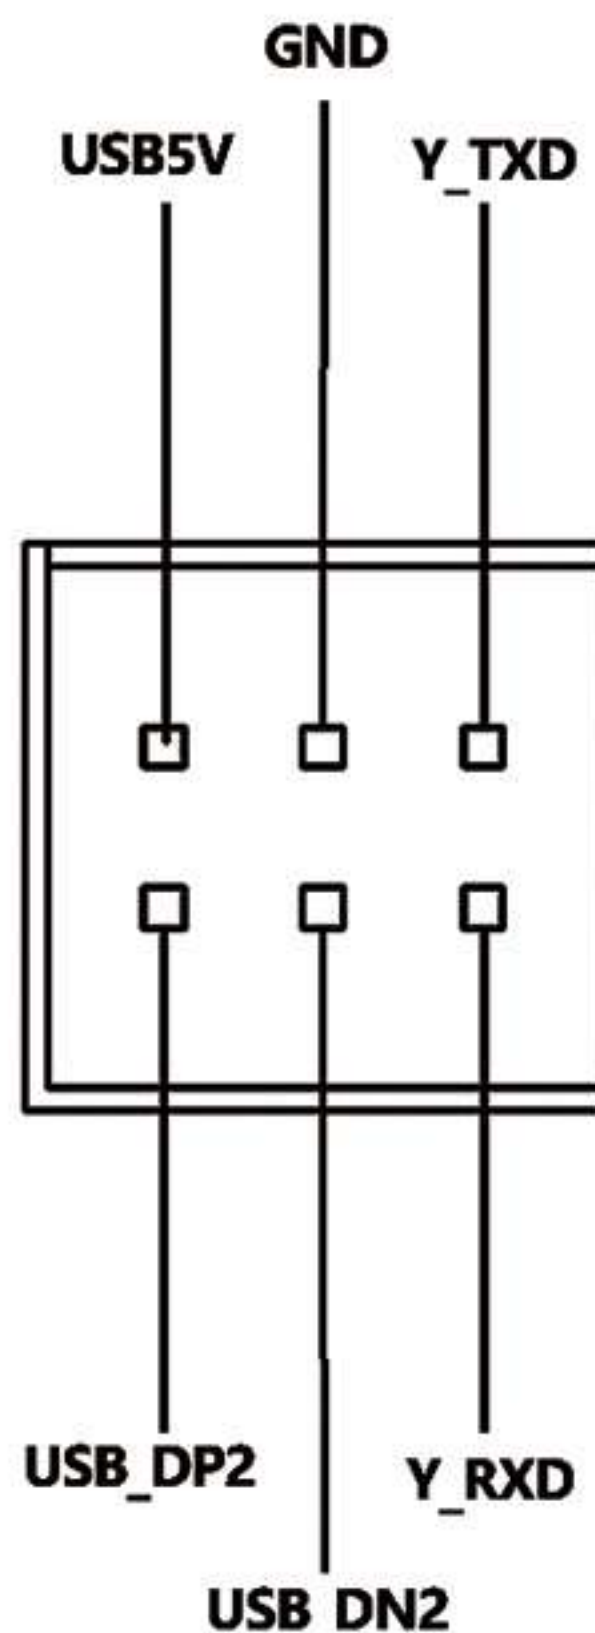

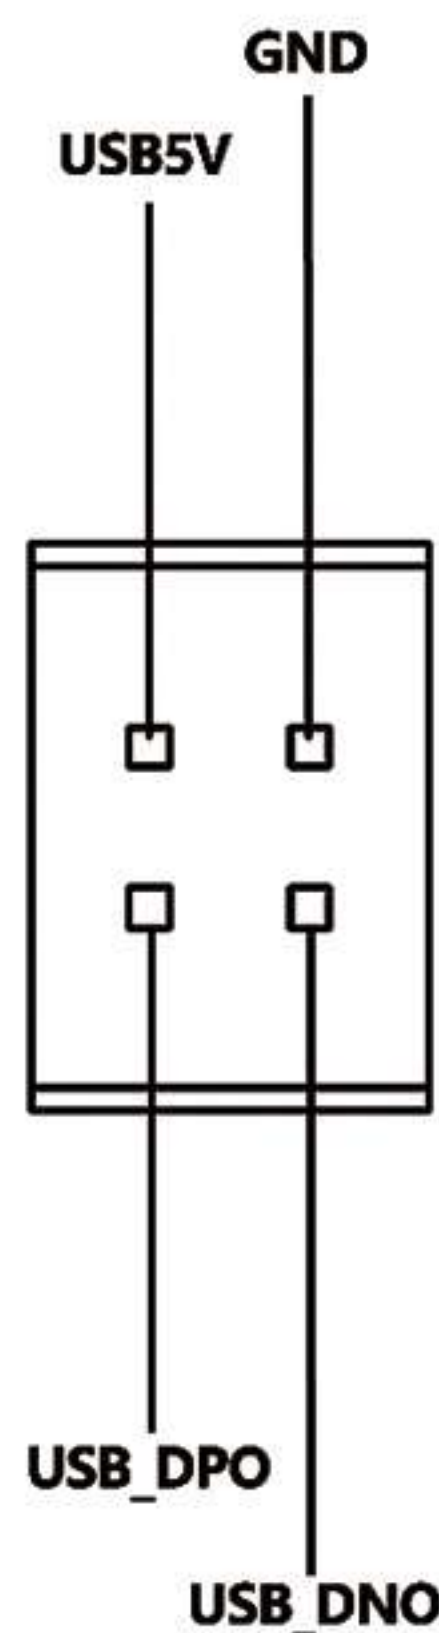

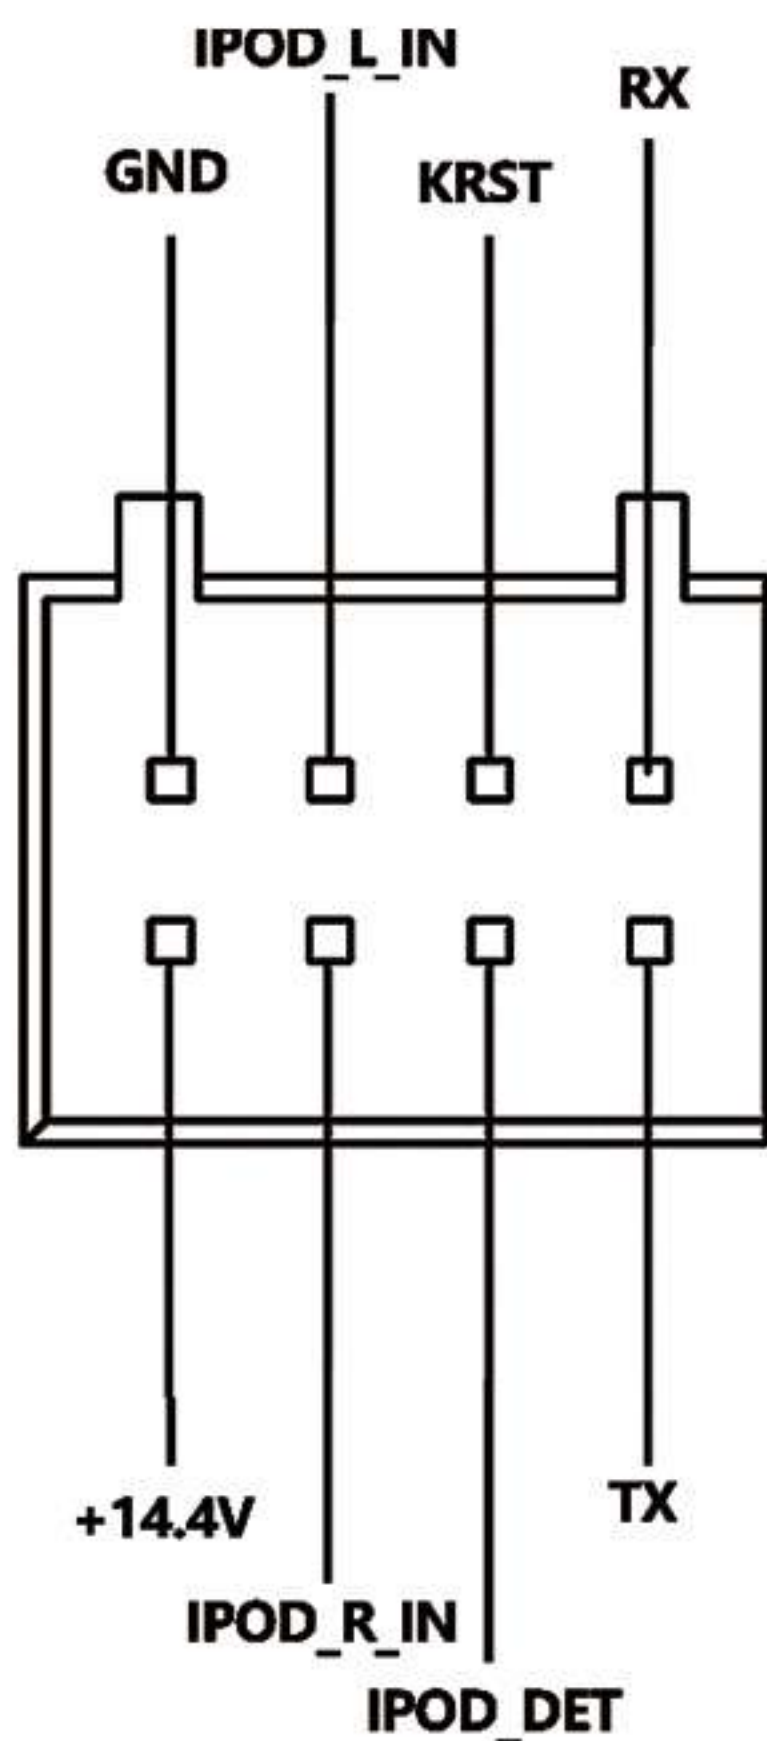

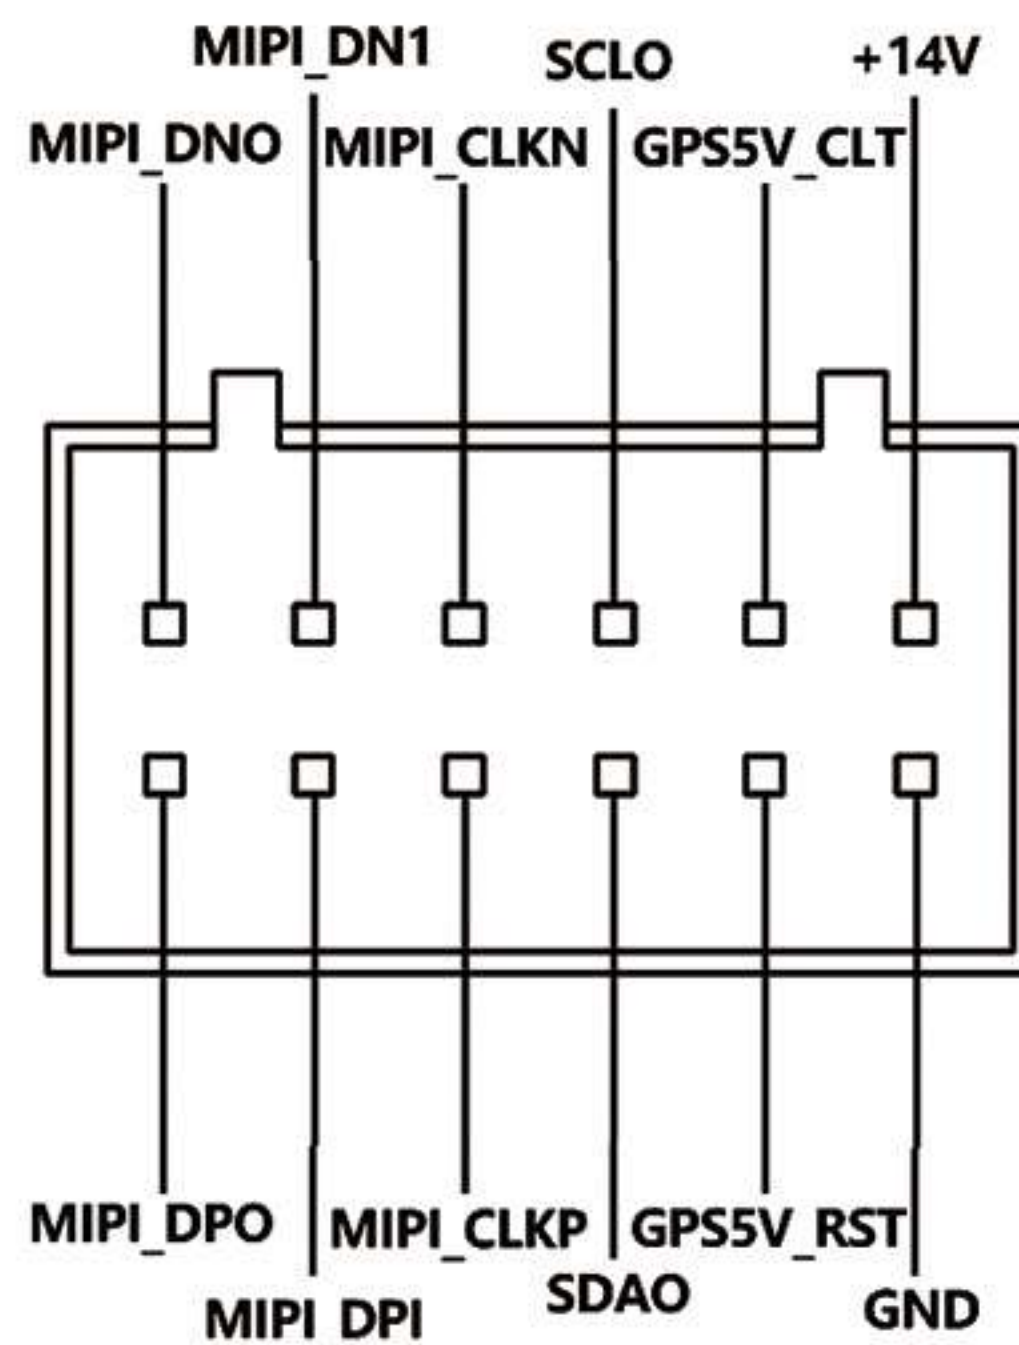

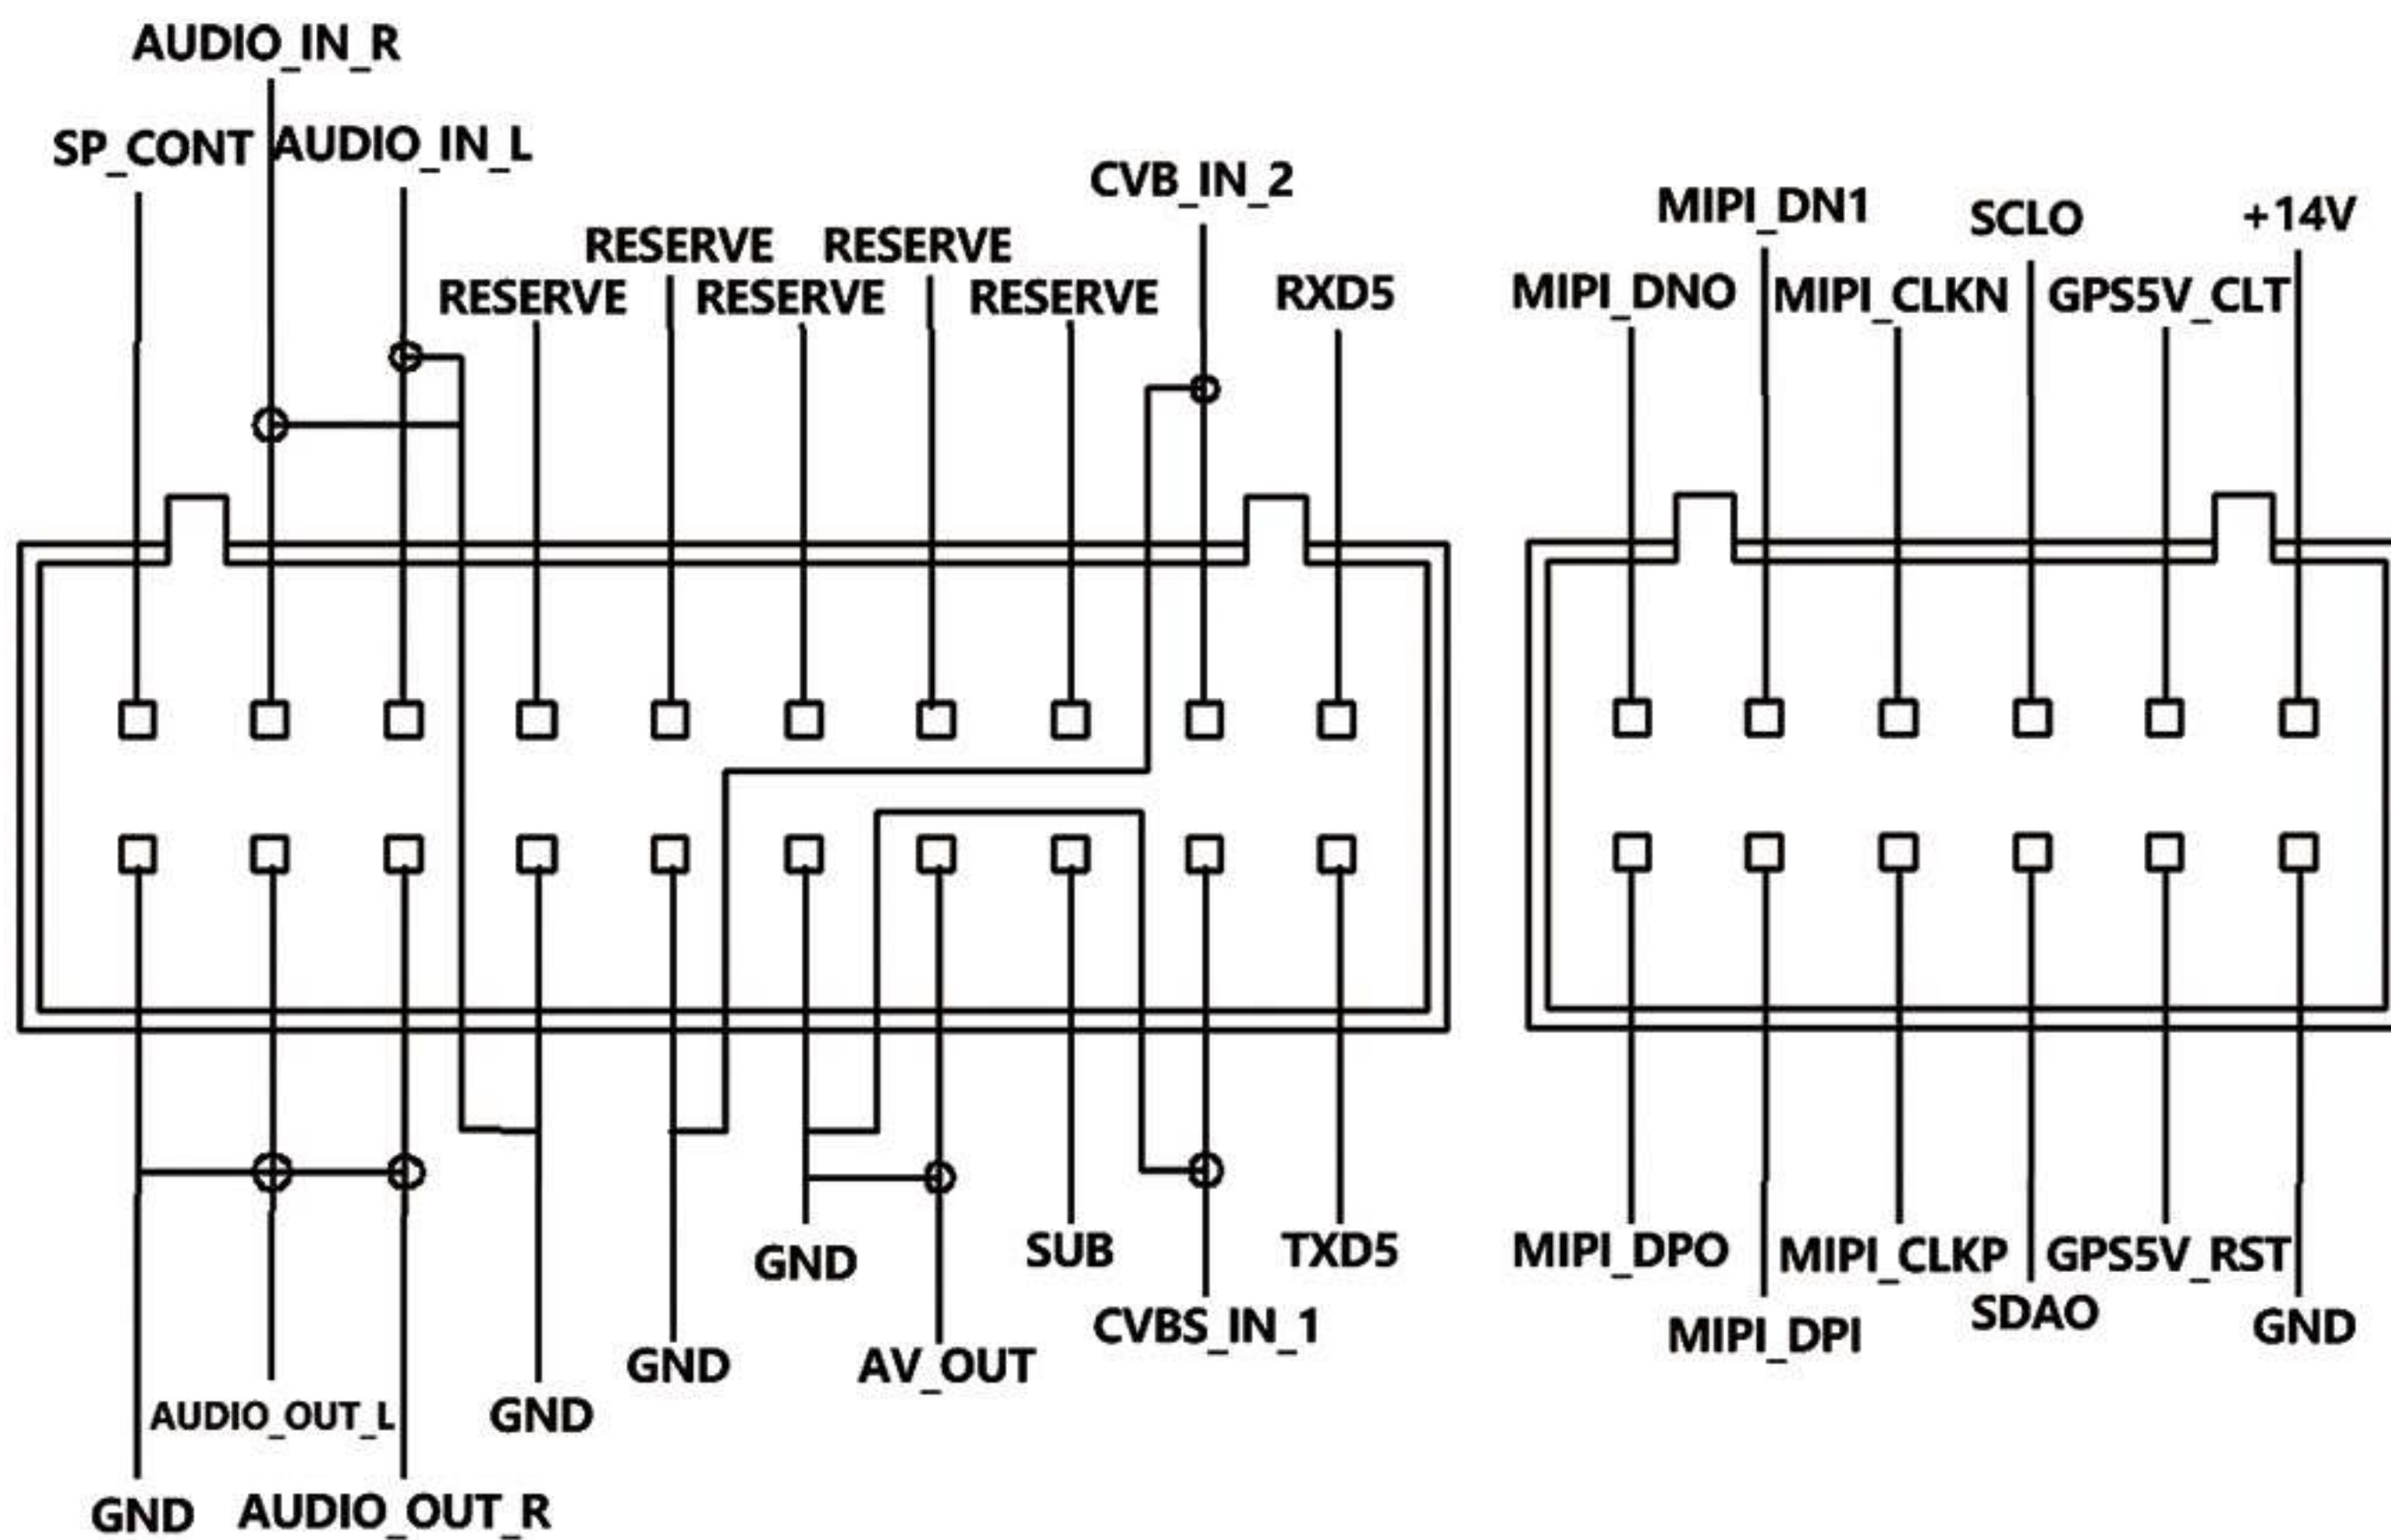

[15] AUX (optional)

Insert the video input jack into the input video input jack, and insert the audio input jack into the input audio input jack

[16] Unit Socket Sketch Map

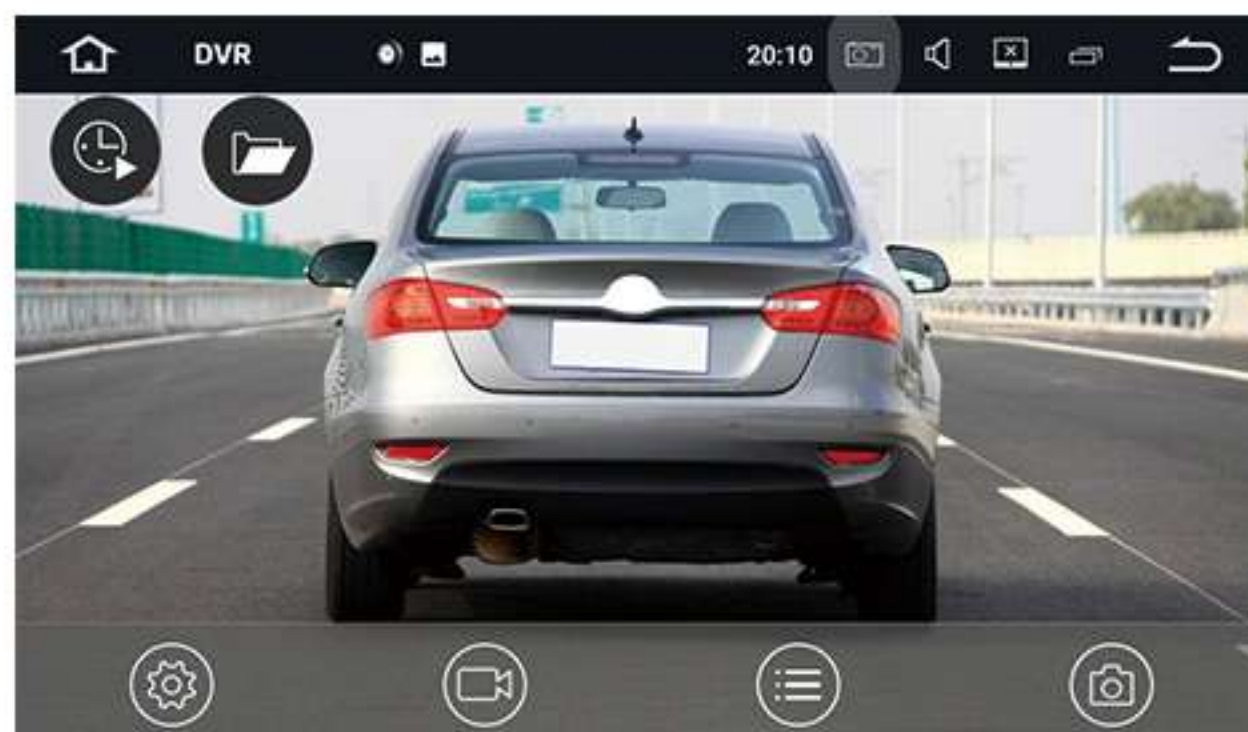

[17] Optional

OBD: This device can support OBD (On Board Diagnosis) automotive diagnosis. This device has OBD function, allowing you to retrieve real-time data and fault codes from the vehicle computer. All data of your vehicle will be displayed to you. (OBD Wifi on-board diagnostic scanner tool sold separately)

The OBD II scanning tool should be correctly inserted into the

DVR: You can control the onboard DVR camera on this unit (sold separately) and use it to record all events during the journey. It is used to record the entire process of traffic accidents, take photos of the front of the vehicle, and store videos in real-time while driving. Insert the USB cable of the DVR into the USB port of the car radio. After installing dvr, click  to enter dvr.

DAB+: By using DAB dongles (sold separately), DAB+(digital audio broadcasting) tuners allow you to enjoy the convenience of digital broadcasting, while automatic DAB+tuning ensures less signal interruption. DAB+digital broadcasting brings you high detail, digital quality sound, a large number of programs, program information, and more. The DAB antenna (sold separately) needs to be placed on the vehicle's windshield. On the application menu screen, click DAB+, then click  to automatically search for all available services. Insert the USB cable of DAB+dongle into the USB port of the car radio and click  to enter DAB+

Rearview camera: This product has added a rear view camera, which can automatically switch to the parking image when reversing, effectively ensuring your parking safety (the rear view camera is sold separately).

To add a rearview camera to your car, you should:

- Remove the car radio's plug cable.
- Make sure the car radio's power cord is connected.
- Insert the AV input cable into the reversing jack of the car radio.
- Connect the AV input cable to the rear of your car.
- Take 12V power from the car reverse taillight to supply for the car rearview camera.
- Ensure the insulation of the cable.
- Hide cables along the car door.
- Make the car rearview camera cable connects to the video extension cord.
- Hang up the reverse gear, you will see the signal automatically switches, and then the installation is completed.

10P Reverse line

- 1 Connect the reverse wire of car radio
- 2 Connect back wire of car radio
- 3 Connect +12V of reverse light
- 4 Connect GND of reverse light
- 6 Camera
- 5 Pressure Reductor

TPMS: This unit can support TPMS (Tire Pressure Monitoring System). An ideal tire pressure monitoring system (TPMS) can monitor tire gradual air leakage, quick air leakage, low or high tire temperature, low or high tire pressure, real-time alarm once the tire is abnormal. It can also prevent puncture effectively as well. With regular tire check-ups provided by this TPMS, you can greatly save time, effort and money to efficiently discover and solve many current automotive safety problems, (TPMS is sold separately)

To apply the TPMS in your car, you should know:

- a. Install the TPMS app (pre-installed) on your navigation.
- b. Connect the receiver to the USB port of the car radio.
- c. Install the sensors to the tires one by one.
- d. Fix the receiver.
- e. The app can alarm automatically when the tire has any abnormal situation, so you don't need to always pay attention to the APP which shows in real time.
- f. You can adjust the pressure/ temperature alarm limit valve through the menu of the TPMS app.
- g. If you don't need the alarm sound, you can close it according to your requirement.

Need to
download app

click  into TPMS interface

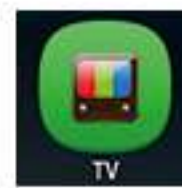

Digital TV: This unit can support digital television receivers in three standards: ATSC, DVB-T, and ISDB.

This product receives stunning digital TV signals, allowing you to choose from a variety of exciting TV programs to enrich your driving experience. (Digital TV receivers sold separately)

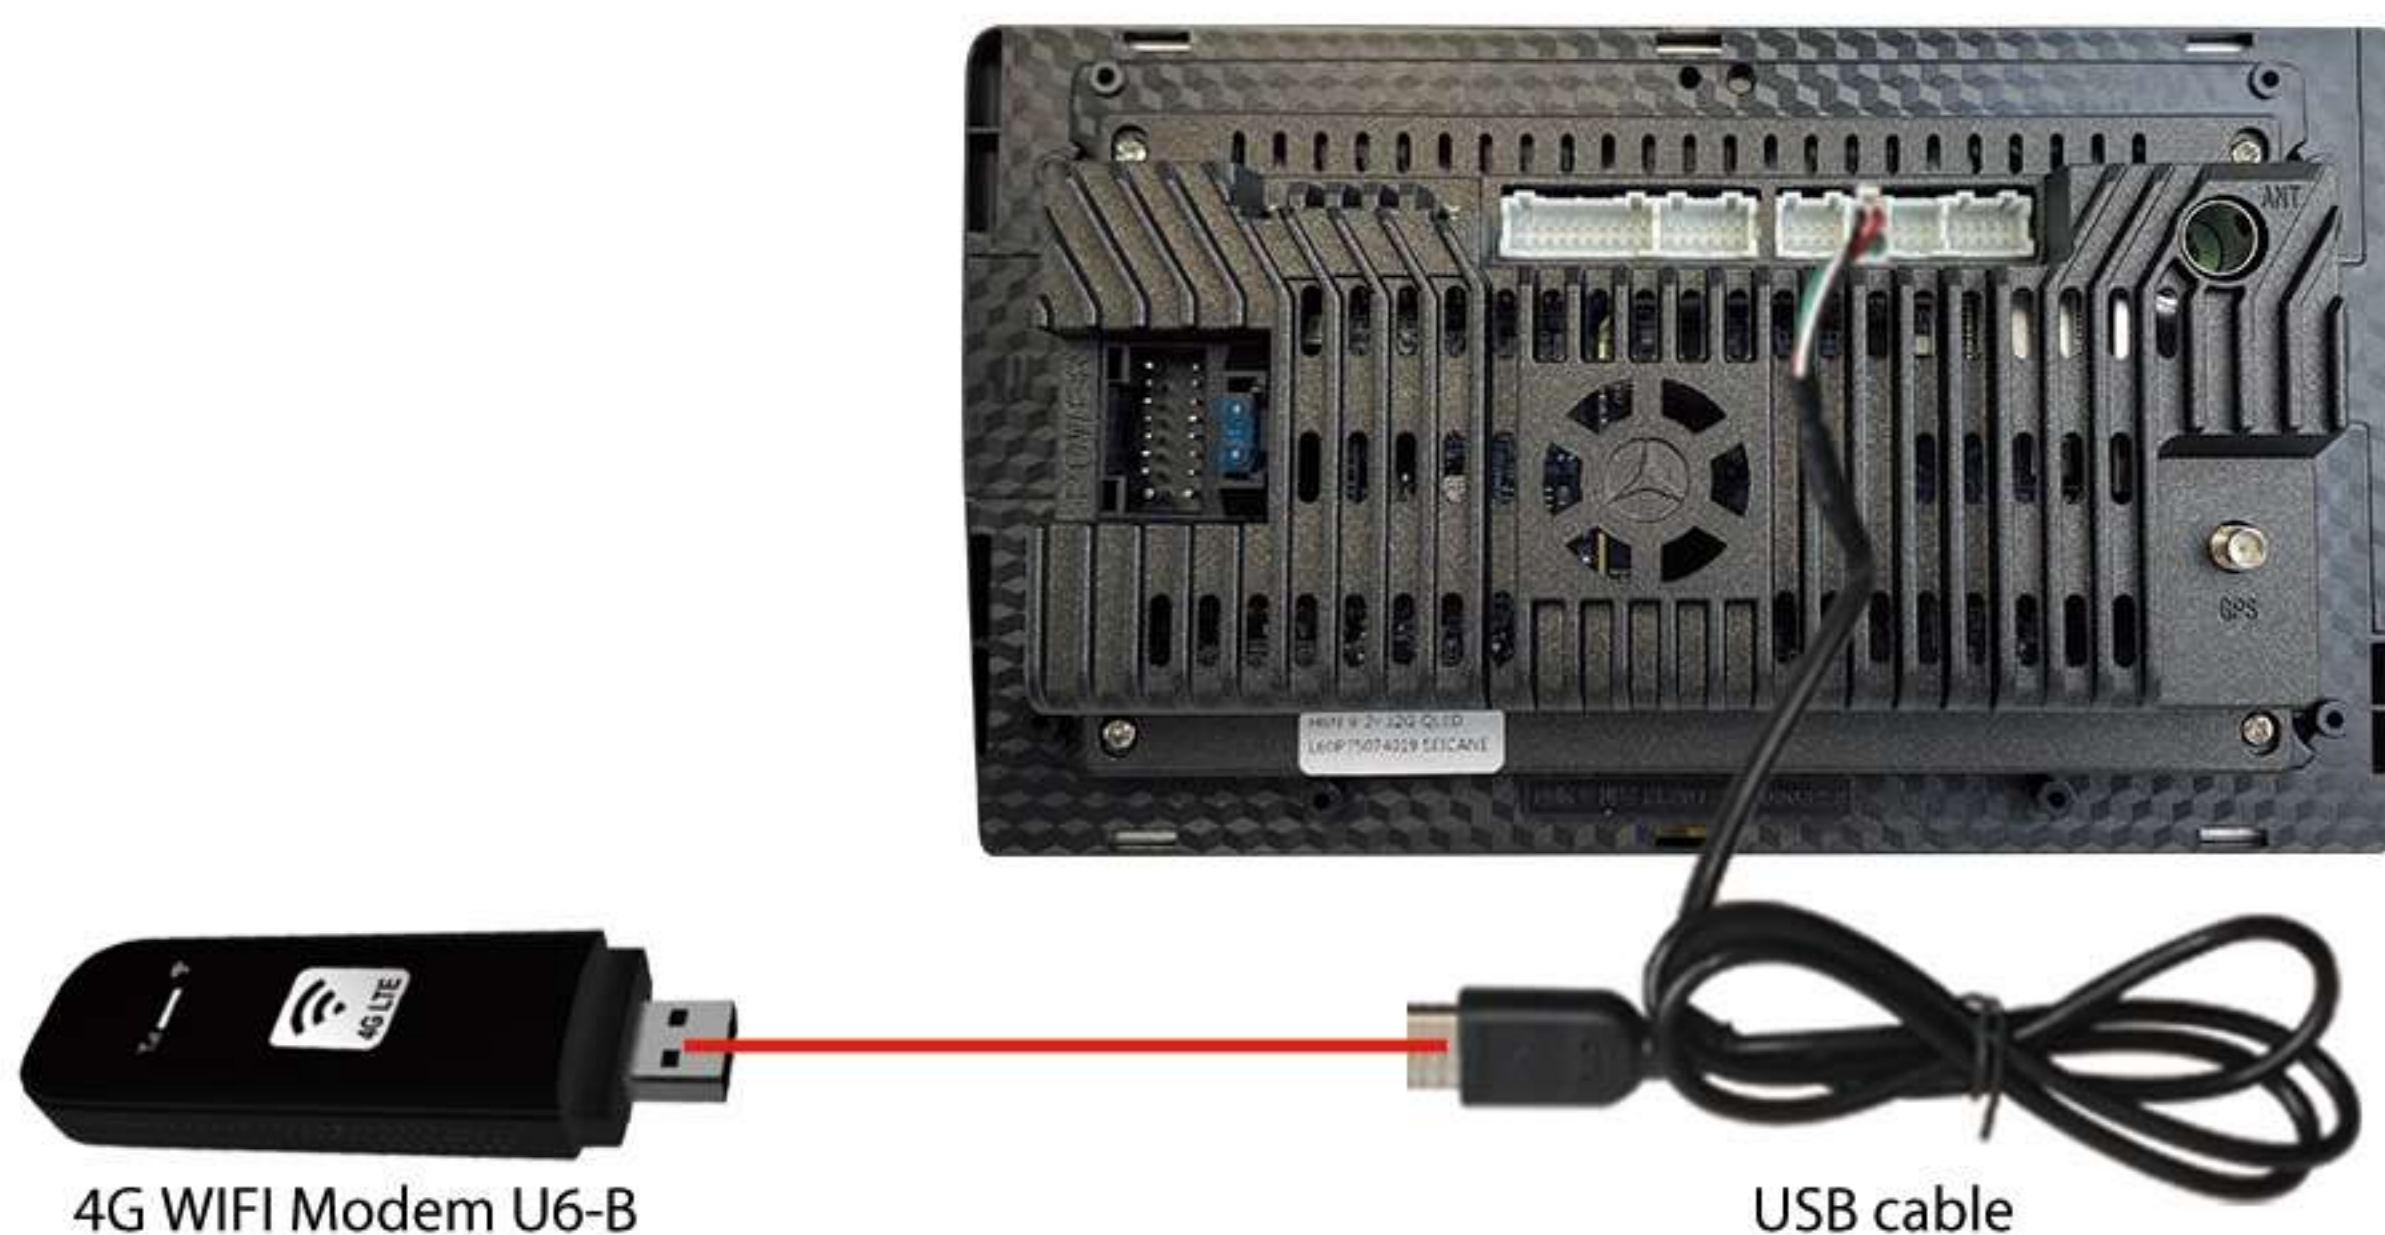

After installing atsc, dvb-t, and ISDB, you can click

on TV. This is the screen shot after installing Atsc

External 3G/4G Module: With an external 4G module (also equipped with USB dongle function), you can insert a SIM card, connect it to this product, and then successfully connect to the 4G internet.

(External 3G/4G Module sold separately)

[18] FQA

1. How to operate if the Android radio cannot be turned on?

1.1 Please check if all wires are connected properly, such as the 8P serial port cable and the Canbus box

1.2 Please check the voltage of the Android radio: 12V.

1.3 When testing this Android radio, you can combine the red and yellow wires and connect them to the positive pole of the power supply. This red ACC and the yellow wire B+ both have a voltage of 12V, and the black wire is 0V. Check the fuse of the power interface of the device to see if it is normal.

Attention: Please be sure to use our power cord to connect the car radio. It is not possible to directly plug the original car plug into our device.

2. When reversing, the Android radio will display "no signal"? How to operate?

2.1 Please check if the camera's wiring is correctly connected to the car radio. Attention: The video port of the rear camera must be plugged into the "CAM-IN" port of the car radio.

2.2 Please confirm if the reverse detection line has 12V voltage.

3. When using USB to watch videos, the camera displays "!" and "cannot watch videos while driving"? How to operate?

3.1 Please turn off the "Video Warning" function in the settings and everything will be normal.

4. How to deal with Android radio FM and AM not working?

4.1 Please check if the radio antenna is inserted. Please insert the antenna multiple times to ensure good contact.

4.2 Your location signal is not good. Please go to a better place to retest.

4.3 The radio antenna in the car is damaged/ineffective; Please replace the radio antenna and retest.

5. Can't connect to Android radio Bluetooth? How to operate?

5.1 Open the phone settings interface, enable Bluetooth in the Bluetooth function, search for Bluetooth devices, find the Bluetooth model of android radio for pairing; If a pairing code is required, enter 0000; If not, you can try 1234 or 123456.

5.2 Please try using another phone to test this feature.

All methods are correct, but Bluetooth still cannot be used. Please unplug the plug on the back of the player and reinsert it after 3 minutes.

6. What should I do if there is no sound after installing the Android radio?

6.1 Check if all plugs are connected properly.

6.2 If there is AUX-LIN and AUX-RIN on the power harness, are they properly connected to AUX-LOUT and AUX-ROUT on the RCA wire.

6.3 If the modification method of original car radio is to retain the original car radio host, the sound needs to be switched to AUX on the multimedia interface of the original car radio host.

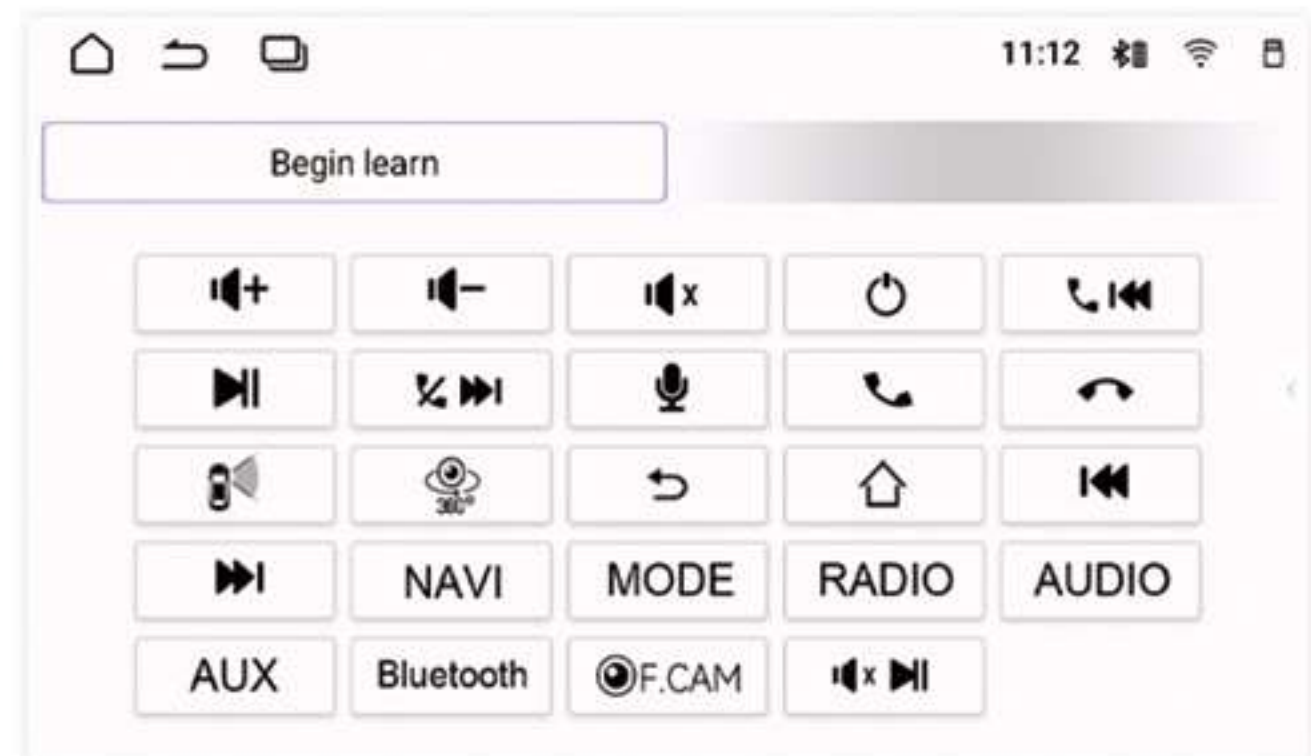

6.4 Whether the car with the original amplifier has turned on the amplifier switch by pulling it up from the top of the Android radio main interface.

6.5 If the original car is equipped with an amplifier and has an amplifier control wire, check if the amplifier control wire is connected properly, And there is a signal.

7. What should I do if the steering wheel control of the Android radio does not work after installation?

7.1 Please check if all wires are connected properly, such as whether the 8Pin serial port cable is connected and whether the Canbus box is connected.

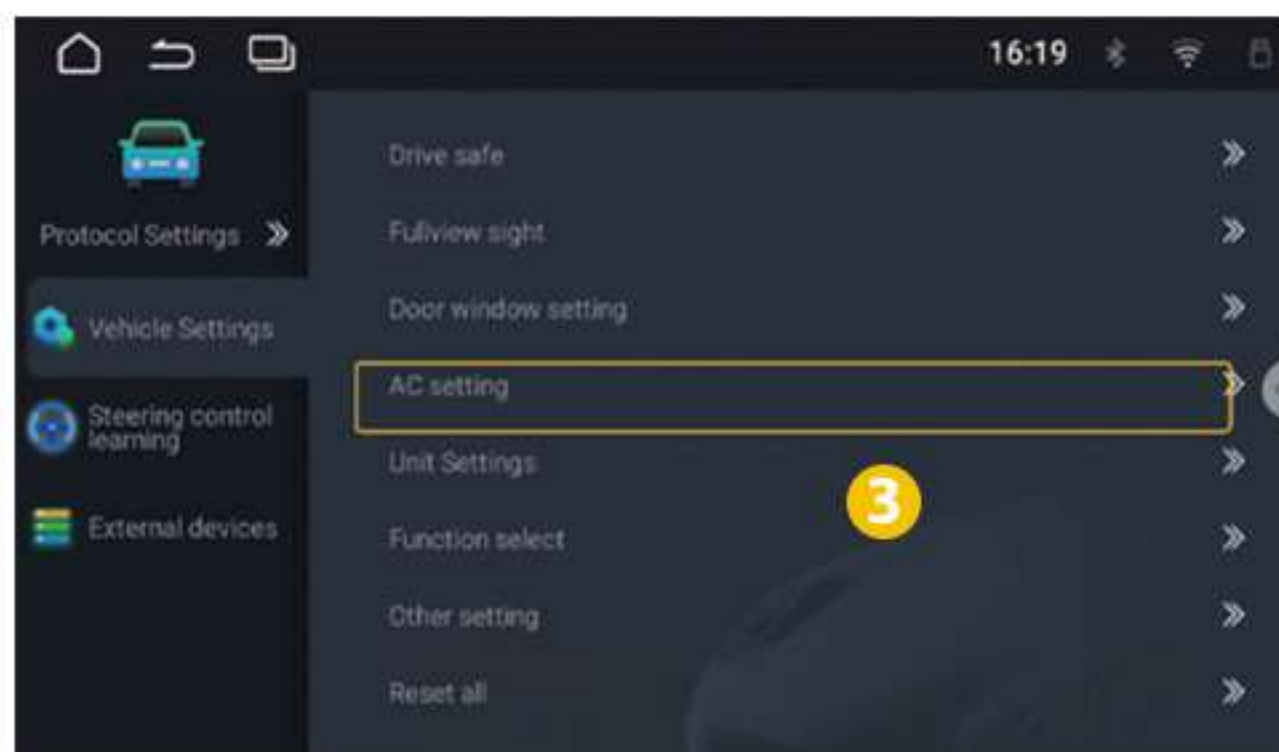

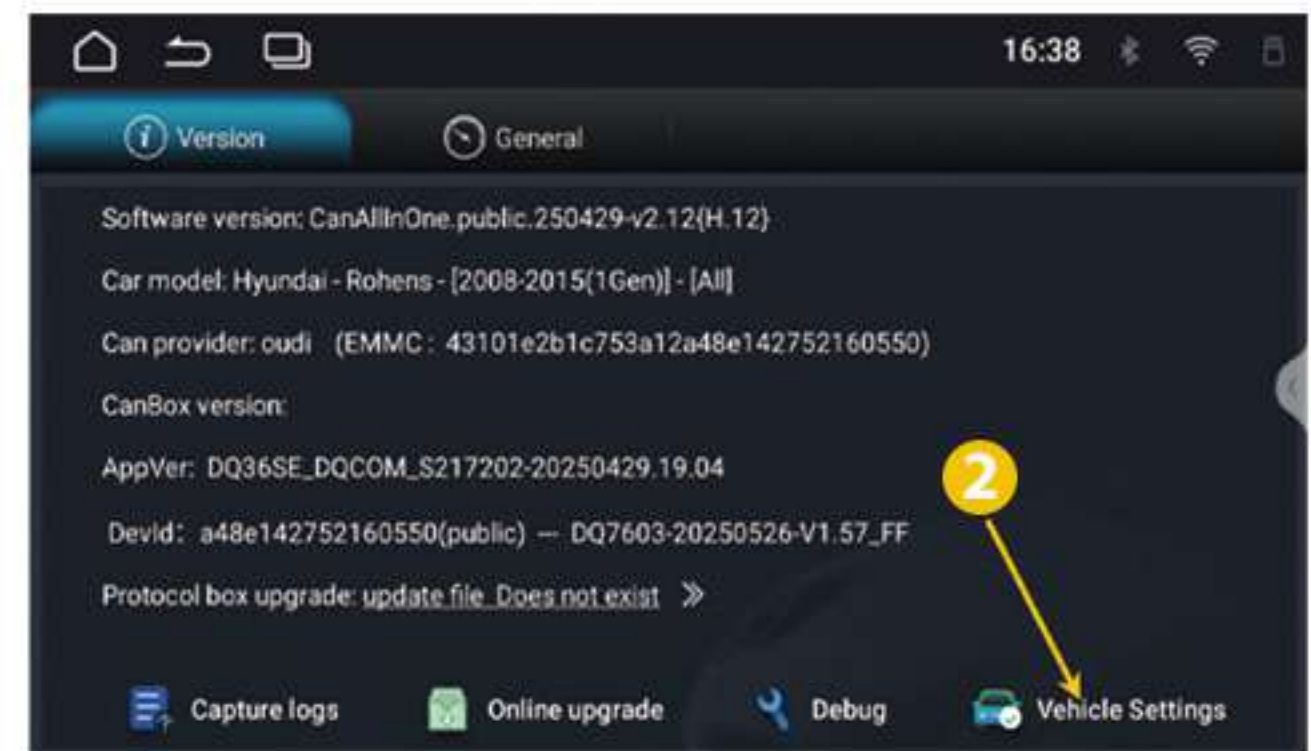

7.2 If your car supports steering wheel control learning, Please Enter [Settings - Assembly - Steering Wheel Control] Learning steering wheel control.

7.3 The above operations still do not work. Please contact our customer service at aftersales@seicane.com

8. How to change the temperature display of the air conditioner from Celsius to Fahrenheit?

8.1 The setting method is as follows:

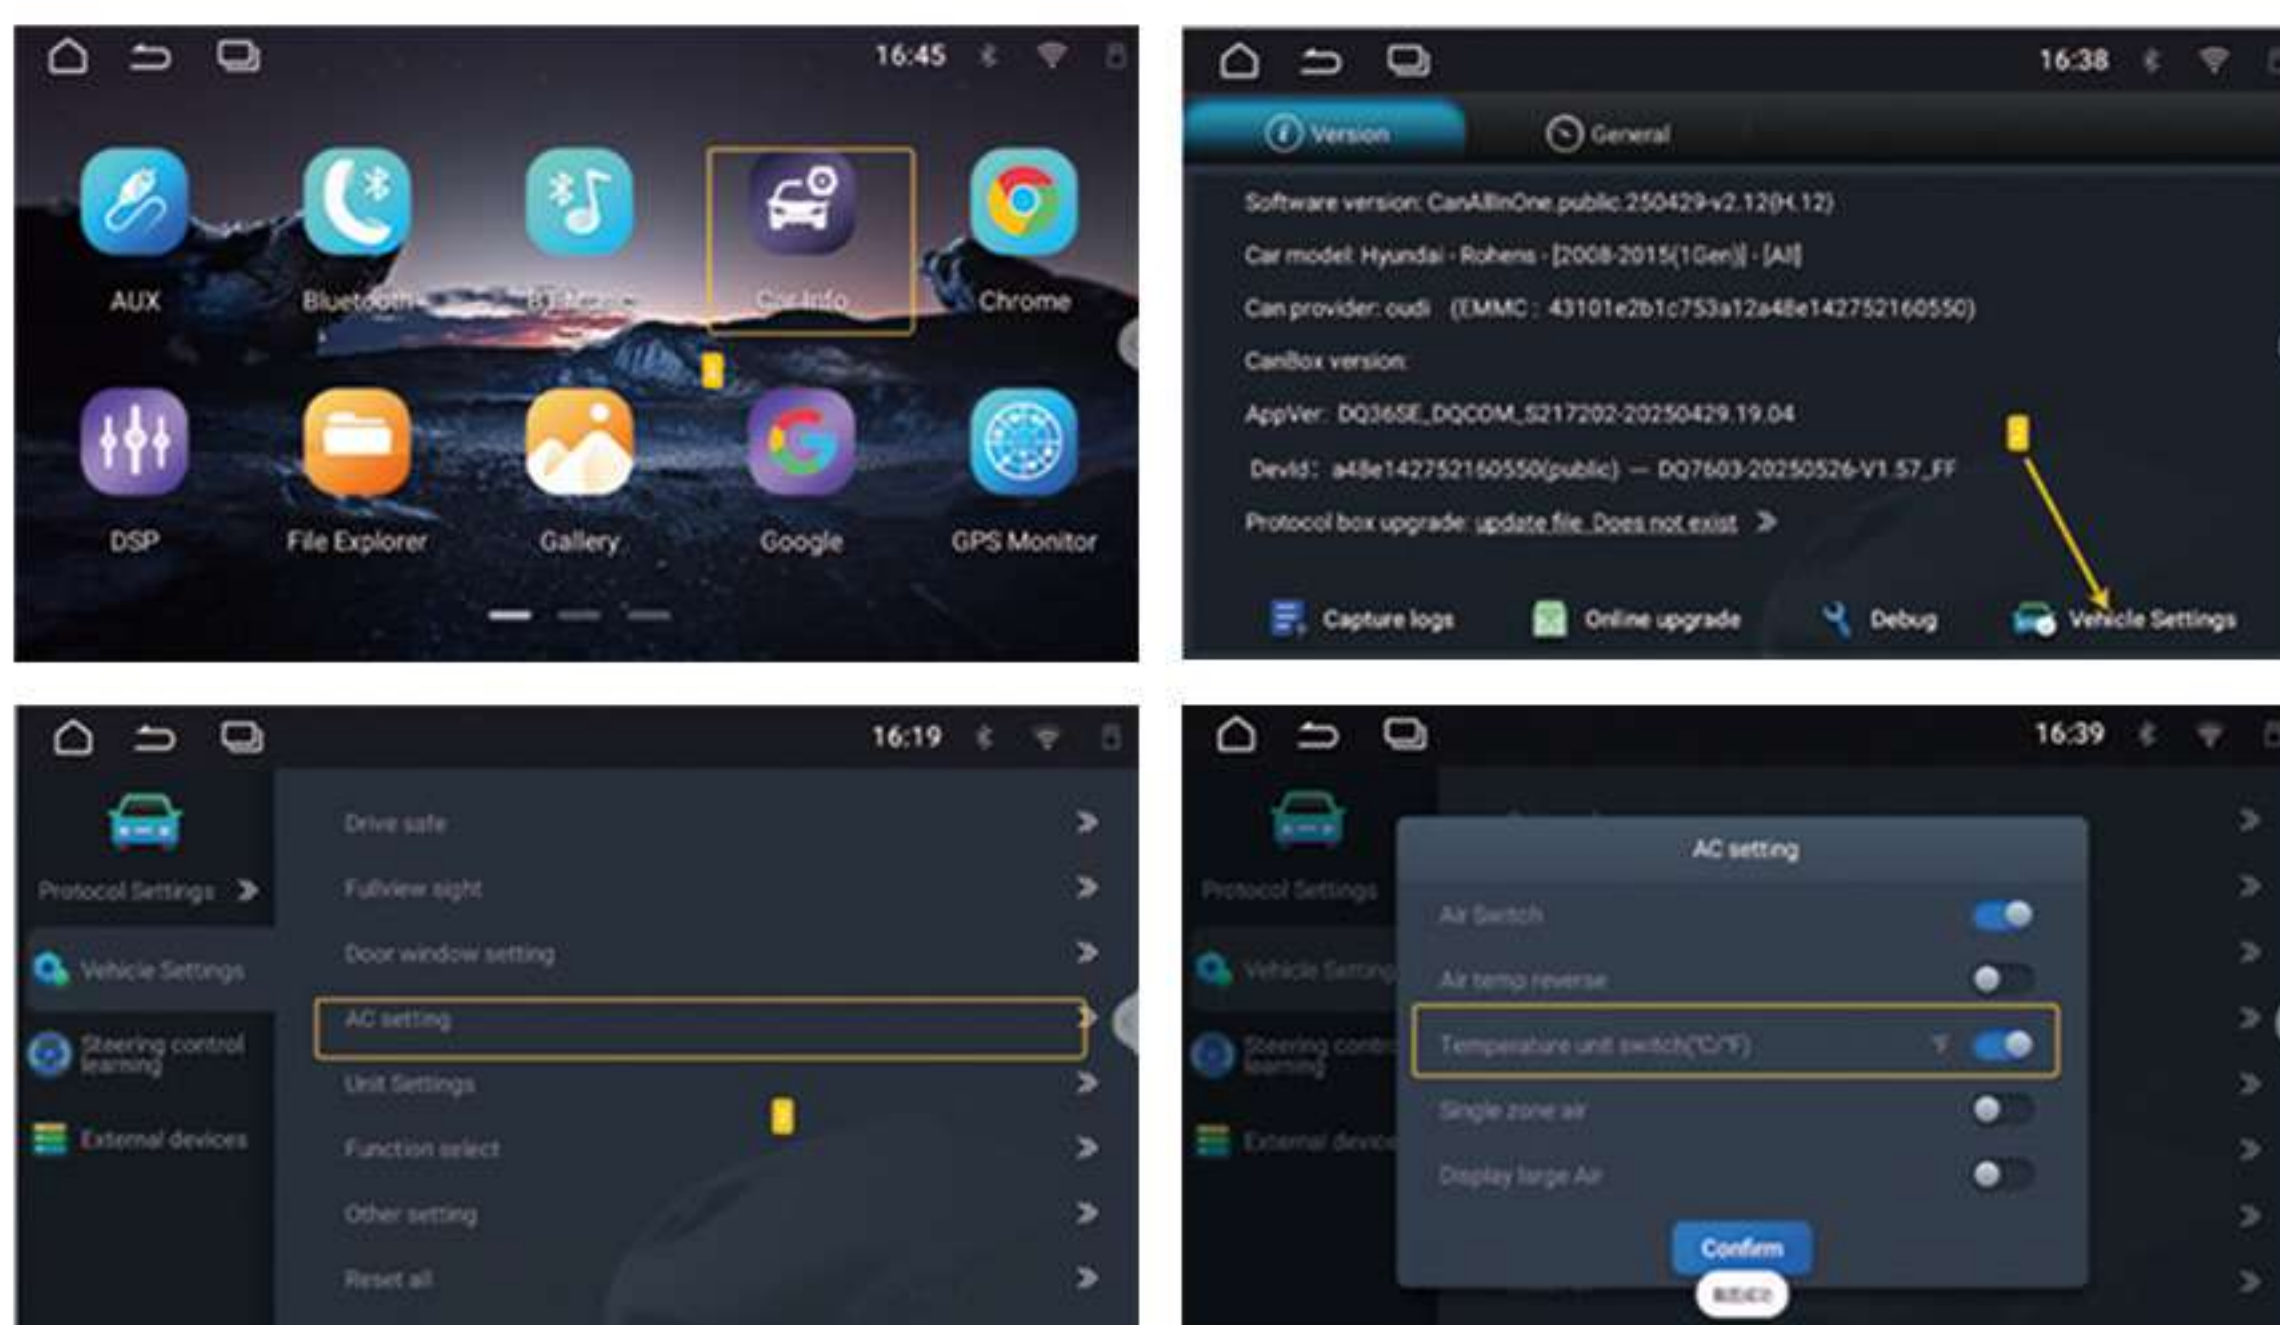

9. How to switch speed units?

9.1 The main interface is shown in the figure. Long press the red circle position to switch between KM * H/MRH.

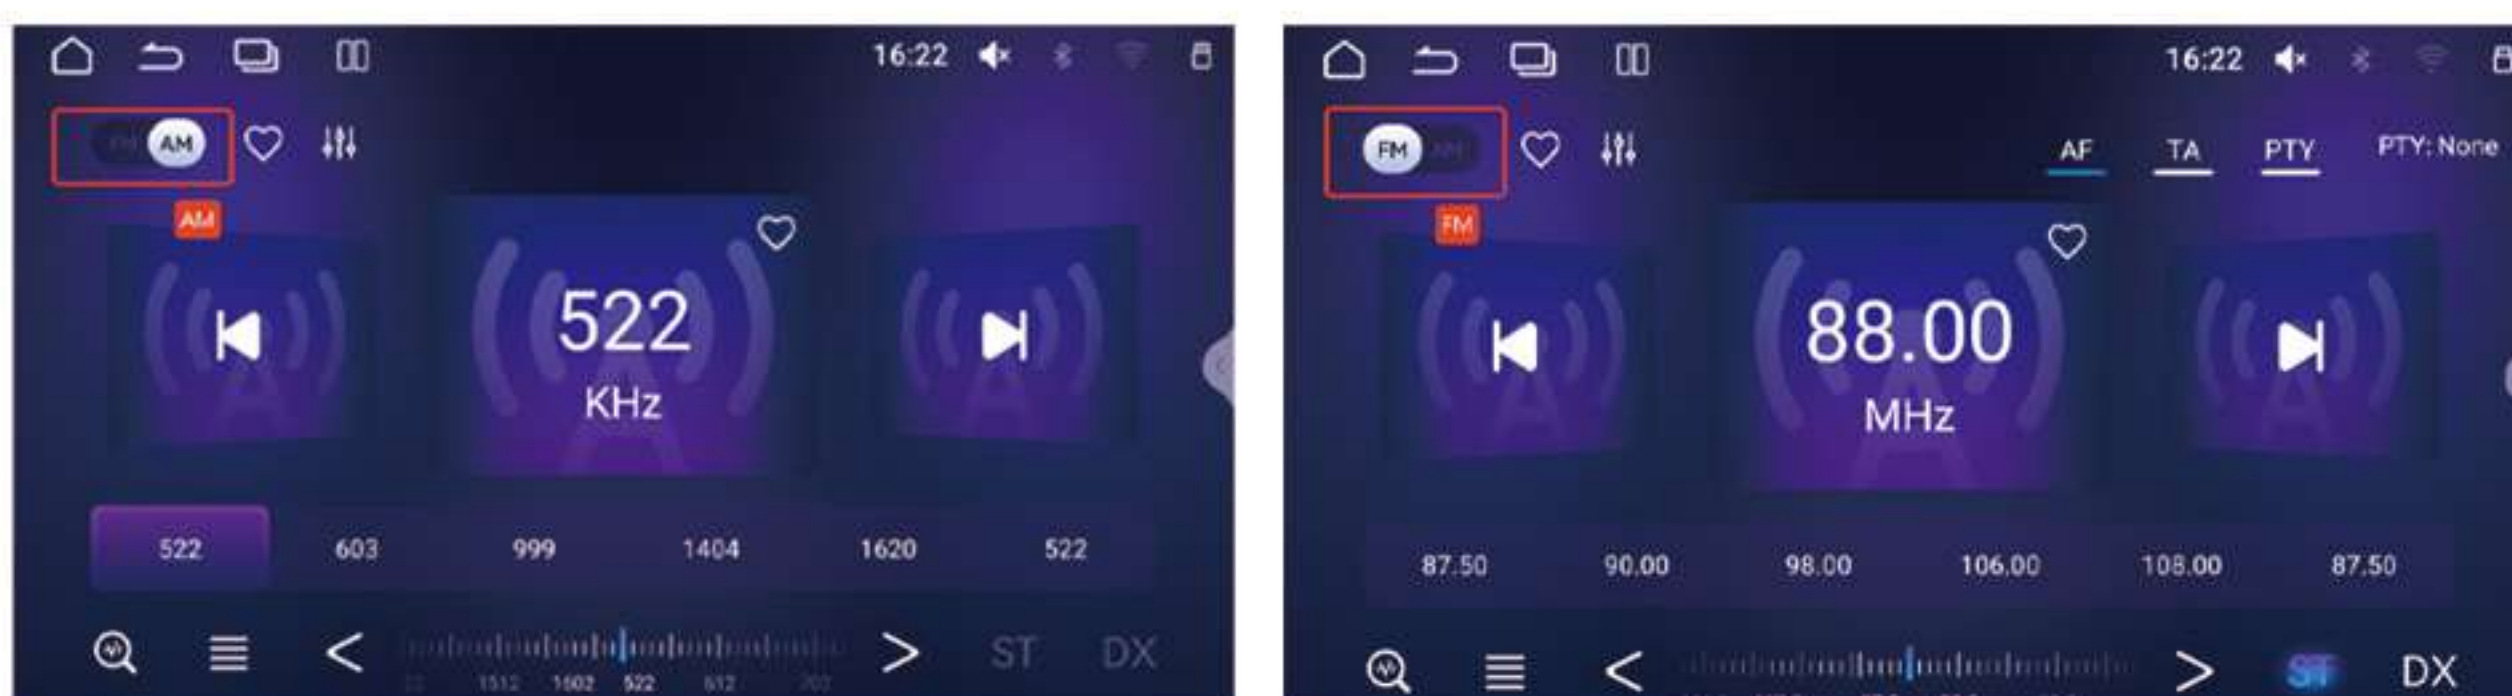

Q: How to change the temperature display of the air conditioner from Celsius to Fahrenheit?

A: The setting method is as follows:

Q: How to switch FM/AM radio?

A: Enter the application radio interface, swipe left and right in the upper left corner to switch, as shown below:

If all operations above 8 have been checked and still cannot be resolved, please contact our customer service at aftersales@seicane.com

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
