

2.4G Frequency Racing Remote Control Car

1. Know Your Remote Control

- ① Antenna
- ② Turn Left/Turn Right
- ③ Indicator Light
- ④ Power Switch
- ⑤ Forward/Backward
- ⑥ Battery Compartment

2. Instructions For Remote Controller and RC Car Installation

The remote controller uses 2x1.5V AA batteries (Not Included)

CAR (Battery Included)

Notes: Please take out the battery if not in use for a long period of time.

USB CHARGING INSTRUCTIONS

1. The battery must be fully charged for the first time to ensure sufficient power. If the battery is not used for a long time, it will get over-discharged. Overcharging could also shorten the battery's life.
2. Users should check the wires, plugs, housings and related components regularly. If they are damaged, please contact the seller for replacement.
3. Use the correct adapter for charging: input 100-240V~50/60Hz 0.2A Output: 5.0V==500MA 0.5-1.5A. Do not use quick charger.
4. Charging instructions: Connect the battery to the intelligent USB charging cable. Intelligent USB charging cable can be connected to power source with USB socket to charge the battery.

3. Remote Control Driving

***Please read this manual carefully before operation and keep it properly for future reference.**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
