

A photograph of a disassembled orange handheld electronic device, likely a GPS or surveying instrument, laid out on a blue surface. The device is split into two main parts: the front casing on the left and the back casing on the right. The front casing shows a white internal frame with a gold-colored flex cable and a black keypad area. The back casing reveals a green printed circuit board (PCB) with various electronic components, including a microcontroller, capacitors, and a battery connector. A black rectangular display screen is placed below the front casing. A blue and black battery pack with red, white, and blue wires is positioned below the back casing. A metal ruler is placed horizontally at the bottom of the image for scale, showing measurements in centimeters and inches.
