

- 50.00 mm

Model	B17
Battery capacity	10000mAh
Input and output	Type-C: 5V2.4A,9V2A,12V1.5A
Charging time	About 3.5hours
Net weight about	About 195 g
Total weight about	About 230 g
Product size	4.25* 2.75* 0.71inch (108*70*18.2mm)
Package size	6.06*3.38 *0.78inch (156*87 *19mm)

1. Must follow the instructions to use the device.
2. Do not disassemble, open, cut, or pierce the product with metal.
3. Please turn off the power and discontinue use immediately if you notice sparks, smoke or odour during use.
4. Please do not expose the product to a heat source or flame, do not immerse it in water or fire, and avoid prolonged exposure to sunlight.

1. When the button is pressed, the 1-2-3-4 light hole blue light displays the power.
2. After the Type-C adapter is fully charged, the output will be turned off and the battery indicator will be turned off. Please use PD or QC series 18W or higher power fast charging adapters, low power adapters will extend charging time. 3. Support wireless charging while charging, and wireless charging while charging is preferred to maintain fast charging.
4. When using computer USB charging, the charging time will be increased by 2 times or more and the charging time will be longer. Please use PD or QC series Fast charging adapters with 18W or higher power for a better user experience.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a typical installation. This equipment generates uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is closer than 0 cm from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
