

Instruction Manual

Product number: T70M

Foreword

This product is a high-end high-definition sports camping product launched in response to market demand. The product has industry-leading digital video recording, camera, slow photography, video display and other functions. It is your outdoor sports, home security, deep waterproof and other functions. Meet your shooting anytime, anywhere.

Operation notes

1. This product is a high-precision product, please do not drop or hit it
2. Do not put the camera close to objects with strong magnetism, such as magnets and motors. Also, avoid placing the product near objects that emit strong radio waves. Strong magnetic fields may cause product failure or damage images and sound.
3. Please select a brand of Micro SD card. Ordinary cards cannot be guaranteed for normal use.
4. Do not store the Micro SD card in or near a strong magnetic place to avoid losing the data stored in the Micro SD card.
5. During the charging process, if there is overheating, smoke or odor, please immediately pull out the power and stop charging to avoid fire.

6. When charging, please keep the product out of the reach of children. The power cord may cause children to accidentally suffocate or get an electric shock.
7. Please place the product in a cool, dry and dust-free place.

Product Features

>The waterproof shell with waterproof function is convenient for you to shoot wonderful water sports, the waterproof shell can be deeply waterproof

>Video resolution up to 4608x2592

Dimensions	68.5*32*37.1mm

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
