

MSECard Manual

Quick instructions

1. Turn on the device

Press and hold the button for 5 seconds, the device will beep and turn on.

2. Pair the device

- Open the Find My app.
- Hold the device close to your iPhone, tap the items tab, tap '+' and then 'Add Other Item'.
- Tap 'Connect'.
- Type a name for your device, select an emoji.
- Tap 'Agree' to confirm that this item will be linked to your Apple ID.
- Tap 'Finish'.

3. Enable Lost Mode

- Open the Find My app, tap the items tab, then tap your item.
- Under lost mode, tap enable.
- Read the instructions, tap continue and enter a phone number or email address.
- Confirm the information, customize the lost message, and tap activate to complete the setup.

4. Remove the device

- Open the Find My app, tap the items tab, then tap your item.
- Tap remove item and then tap remove to complete the operation.

Note: After removing the device in the app, the device will beep and the light will flash. It will not shut down but enter pairing mode. If no re-pairing occurs within 10 minutes, the device will exit pairing mode. Should you need to pair the device again, click the device button once. The device will beep and the light will flash once, indicating it has re-entered pairing mode and can be paired with the app.

Main Functions

1. Locate your item

If your missing item isn't nearby, the Find My app can still help you track it

down using the Find My network- hundreds of millions of iPhone, iPad, and Mac devices around the world. Nearby devices can detect the location of your missing device via Bluetooth signals and securely transmit this information to iCloud.

2. Play sound

- Open the Find My app, tap the items tab, then tap your item.
- Click play sound, and the device will beep, so you can find the item easily.

Instructions for device button

6	Power Off	Long press the button for 3 seconds, after the prompt tone, the device powers off.	D	

FAQ:

1. When can the device be located?

When an item is separated from its owner for a certain period of time, it can be found by other Apple devices that are part of the Find My network. The owner can then start to receive the location of the device.

2. How to confirm whether the device has been turned on?

Double-click the device button. The device will beep, and the light will flash three times, indicating that the device is working. If the device does not ring, it's off. Long press the button for five seconds to turn it on.

3. How is the device designed to discourage unwanted tracking?

If any Find My network accessory separated from its owner is detected moving with you a period of time, you'll be notified in one of two ways:

1. If you have an iPhone, iPad, or iPod touch, Find My will send a notification to your Apple device. This feature is available on iOS or iPadOS 14.5 or later.
2. If you don't have an iOS device or a smartphone, a Find My network accessory that isn't with its owner for a period of time will emit a sound when it's moved. These features were created specifically to deter people from attempting to track you without your knowledge.

4. How is my privacy protected?

Only you can see where your item is. Your location data and history are never stored on the item itself. Devices that relay the location of your item also remain anonymous, and that location data is encrypted throughout the entire process. Thus, not even Apple or Nutale can access the location of your device or the identity of the device that helps locate it.

5. What is the Find My network? And how does it work?

The Apple find My network provides an easy, secure way to locate compatible personal items on a map using the Find My app on your iPhone, iPad, iPod touch, Mac, or the Find Items app on Apple Watch. Simply pair your compatible product with the Apple Find My app to view it right alongside your Apple devices. If your item ever goes missing, you can activate Lost Mode to display a message and contact information to anyone who might find it. The Find My network is encrypted and anonymous, ensuring that no one else, not even Apple or Nutale, can view its location.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1)This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. This equipment complies with FCC's RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna(s) must not be co-located or conjunction with any other antenna or transmitter.

Product Specifications

Product Name: MSEBENT Card Finder

Brand: MSEBENT

Model: MSECard

Material: ABS

Battery Specifications: 3.7V Li-Po 100mAh / 0.37Wh (CX 084545)

Size: 2.13x3.35x0.11 in (54x85x2.8 mm)

Charging: Wireless Charging

Weight: 16 g

Quantity: 1 pcs

Color: Black

Country of Origin: China

FCC ID: 2BQ6S-BFM06
