02 Camera Introduction

Step 1: Turning on the Camera

Power up using the Type-C power cable included in the box

Note: The camera must be plugged in to a power supply and turned on before it can connect to the network.

To ensure the two-way audio works properly, please remove the protective film from the lens.

Step 2: Resetting the device

Please press and hold the reset button for **8-10 seconds** before connecting the camera, wait a few seconds for the voice prompt.

TF Card: It is recommended to use a genuine TF card with a capacity of 32-128GB, Class 10, 32FAT format, which is suitable for camera use.

Note: Please reset the device before each reconnection. It is recommended to place the device near the router for the initial connection.

03 Set up the Camera -Plan A (Bluetooth)

First, please turn on the Bluetooth function on your phone.

Android

iOS

Then run the "**AJCloud**" APP to connect to the camera.

Please place the device and phone next to the router when connecting for the first time.

After turning on the phone's Bluetooth, it will automatically search for nearby devices.

If the bluetooth cannot find the device, pls reset the camera and try to search for it again.

You can also use "Plan B" to add the camera. Refer to page 8.

Note: this camera only supports 2.4G Wi-Fi connection.

The WiFi password should not be too long or contain too much special characters.

If the connection fails, pls reset the device and reconnect, and check if your WiFi password is correct.

* For detailed connection methods of Plan B, please refer to page 8.

04 Set up the Camera - Plan B (Soft-AP/Hotspot connection)

Select the Device's Hotspot.(Start with AJCxxx)

If you cannot find the device's hotspot, pls reset the device and try again.

*You can also scan the QR code below to watch the connection video or contact customer service.

05 Test the Signal and All Set-up

*If you would like to know more detailed product information, please visit our official website to download the detailed user manual.

06 Install the Camera

Choose a location with a clear, unblocked field of view and with a good wireless signal to the camera. Please keep the following tips in mind:

- * **Remove the protective film from the lens.**
- * Make sure the wall is strong enough to withstand three times the weight of the camera.
- * Installation height: Less than 6.6 ft(2 m) above the ground.
- * Recommended installation angle: Tilt down 15 degrees.
- * It is recommended to set detection sensitivity on AJCloud app when selecting location. Thus you can verify if motion can be detected in the camera's placement and adjust the sensitivity based on the size and distance of detected object.

07 Introduction to basic functions

① Adjust motion detection sensitivity.

If the alarm is frequent, you can adjust the motion detection sensitivity appropriately.

② Set alarm time period and alarm notification form.

If you don't want to miss any message notifications, please enable "Push all alerts without recognition".

08 FAQ

(1) The camera cannot connect to WiFi:

1. Make sure the camera is powered on properly. (If there is an indicator light on the camera).
2. When connecting for the first time, it's recommended to press and hold the camera reset button 8s-10s to reset.
3. An overly long WiFi password or one that includes special symbols may prevent the app from properly recognizing the password.

Warm reminder: The camera only support 2.4GHz WiFi and do not support 5GHz WiFi.

(2) The camera disconnected while in use:

1. The camera is too far from the router, causing poor WiFi signal reception. Pls take the camera to the router for resetting and re-adding, and check if the WiFi signal value is stable.
2. There are other interference between the camera and the router, such as walls, glass, and other electronic products.
3. The camera is not powered on properly. Please replace the power supply and try again.

09 Warranty Activation

We offer you 12 months free warranty. You can activate your warranty by choosing one of the following methods!

Method 1:

(1) Scan the QR code below to submit a warranty activation application.

Free Warranty

Method 2:

- (1) Send us an email with the subject line "Warranty Activation".
- (2) Include your order number and order date in the email content.

Note:

- 1. Please make sure your order number and email are correct so that we can activate the warranty for you successfully.
- 2. We will notify you of the result of warranty activation within 12 hours.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
