Northlight_4G

Contents:Product Profile/Getting Started/Safety Precautions

Thank you for purchasing the innovative Northlight_4G.The Specifications in this document are subject to change without prior notice.

■ Product Profile

1 Receiver	2 LCD	3 Front Camera	4 Volume Key
5 Power Key	6 Speaker	7 MIC	8 Rear Camera
9 Flash Light	10 SIM2	11 SIM1	12 SD Card
13 Audio Jack	14 USB-C Charging		

■ Getting Started

Insert SIM Card

(1) This product can only use Nano-SIM(SIM1) and micro SIM(SIM2), inserting non-standard cards may cause damage to the SIM card socket.

(2) Before inserting the card, please power off the phone first, pay attention to the gap direction, and keep the card level when inserting the card.

Charge Your Battery Before First Use

Your phone is powered by a rechargeable battery. If your phone displays a“low battery”message,please charge the battery completely before the first use to extend the life of the battery.

Notice:

When charging, the charger should be kept close to the electrical outlet and easy to plug in and out.

■ Safety Precautions

(1) Mobile phones are suitable for working in an environment where the temperature is between 0°C and 35°C, and the storage temperature should be between -20°C and 45°C. Under too high or too low temperature will affect the use of mobile phones, and even cause damage to mobile phones and batteries. And as far as possible away from ordinary telephone, television, radio and office automation device to use the mobile phone, so as not to affect the use of these devices and mobile phones.

(2) Please charge under the conditions above 5°C and below 35°C to avoid deterioration of battery performance and reduction of standby time.

(3) Do not place mobile phones or batteries near or inside heating equipment, cooking equipment, high-pressure containers, etc. (such as microwave oven, induction cooker, electric oven, electric heater, pressure cooker, water heater, gas cooker, etc.)

to prevent the battery from overheating and exploding.

(4) The original charger, data cable and battery must be used. The use of charger, data cable or battery without manufacturer's certification or non-matching model may cause electric shock, fire, explosion or other dangers.

(5) To prevent hearing damage that may occur when using headphones, do not use high sound pressure and high volume for a long time.

Warning:

The following behaviors may cause potential battery safety problems, resulting in safety problems during normal use of the mobile phone.

(1) Squeeze or prick the phone

(2) Go to an unprofessional repair station to repair your phone

(3) Use non-factory trademark charger and data cable

(4) Don't put your phone near a microwave, fire or other heat source.

Standby Tips:

(1) The higher the brightness of the screen, the greater the power consumption.

(2) Long-term open WiFi, Bluetooth, program background running, etc., will increase the power consumption of the phone, it is recommended to turn off these functions when you do not use them.

15.19 Labeling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

15.21 Information to user.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Absorption Rate (SAR) information:

This Device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. This device was tested for typical body-worn operations with the back of the handset kept 1.0cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.0cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 1.0 cm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

IC Caution:

English:

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

1. This device may not cause interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.

French:

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

1. L'appareil ne doit pas produire de brouillage;
2. L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

SAR Statement:

This Device has been tested and meets applicable limits for radio frequency (RF) exposure. Specific Absorption Rate (SAR) refers to the rate at which the body absorbs RF energy. The SAR limit is 1.6 watts per kilogram in Canada that set the limit averaged over 1 gram of tissue. During testing, Model:IV_4G_1 (IC: 34346-IV4G) radios are set to their highest transmission levels and placed in positions that simulate uses against the head, with no separation, and when worn or carried against the torso of the body, with 10mm separation. To reduce exposure to RF energy, use a hands-free option, such as the builtin speakerphone, the supplied headphones, or other similar accessories. Cases with metal parts may change the RF performance of the device, including its compliance with RF exposure guidelines, in a manner that has not been tested or certified. Although this device has been tested to determine SAR in each band of operation, not all bands are available in all areas. Bands are dependent on your service provider's wireless and roaming networks.
