7. Precautions.

Care and Recommendations

The following information is intended to help you get the best performance and a long life from your laptop. If you need answers to technical questions or require more specialized information, please visit the following link: <https://www.damascovzla.com/>.

If you choose to keep your laptop on while not actively using it, it is recommended that you enable screen saver options as well as power-saving features.

If a power cable becomes damaged, disconnect it immediately. Disconnect the power cables if your device has been exposed to rain or excessive moisture.

Disconnect the power cables if the device has been dropped or has received a strong impact. Disconnect the power cables whenever you clean the device or perform maintenance on it.

Cleaning Suggestions

Before any cleaning operation, your device must be turned off and preferably unplugged. Do not use aerosol liquids, solvents, or abrasives that may damage the finish of your laptop. Try not to spill liquids on your keyboard, as it can be damaged by anything that leaves sticky residues.

Recommended Environment

Your laptop can tolerate roughly the same temperature that you consider comfortable, but do not expose it to direct sunlight, rain, or excessive humidity. Proper ventilation is very important to extend the life of your laptop. Make sure there are clearances of 10 to 15 cm on both the sides and the back of your device.

Transporting the Computer

You may need to transport the device, whether for a warranty claim, relocation, or resale. In these cases, it is recommended to use the original packaging, as it provides the best protection for your device.

****FCC Statement****

This device has been tested, and it has been determined that it complies with the limits for a Class B digital device, in accordance with Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference within a residential installation. This equipment generates, utilizes, and may emit radio frequency energy; if it is not installed or used in accordance with the instructions, it may cause harmful interference to radio communications. However, there is no guarantee that no interference will occur in a specific installation. If this equipment causes harmful 1 implementing one or more of the following measures:
Reorient or relocate the receiving antenna.
Increase the separation between the transmitter and the receiver.
Connect the device to a power outlet in a circuit different from the one to which the receiver is connected.
Consult the distributor or an experienced radio/TV technician for assistance.

Caution: Any change or modification to this device that has not been expressly approved by the manufacturer could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Its operation is subject to the following two conditions:(1) This device cannot cause harmful interference, and(2) This device must tolerate any received interference, including interference that may cause undesired operation.

QUICK GUIDE

Information on the Specific Absorption Rate (SAR):

This device meets government requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to ensure the safety of all persons, regardless of age or health condition.

FCC RF exposure information and statement:

The US (FCC) SAR limit is 1.6 W/kg averaged over one gram of tissue. Device types: This device has also been tested against this SAR limit. This device was tested for typical body-worn operations, keeping the back of the device 0 mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a separation distance of 0 mm between the user's body and the back of the device. The use of belt clips, holsters, and similar accessories should not contain metallic components in their assembly. The use of accessories that do not meet these requirements may not comply with FCC RF exposure requirements and should be avoided.
