

# instructions

- 1 Install the discharge needle and turn the discharge needle clockwise until tightened
- 2 Connect the power supply to the host, insert the power plug into the socket, and turn on the switch
- 3 Turn on your phone's Bluetooth and search for the (Tesla Coil 1) pairing connection
- 4 Player search square wave music, (mobile phone volume needs to be adjusted to the maximum) appropriate power knob can be adjusted. Note: Ordinary music is not effective, there will be noise, square wave music is the Tesla coil special drive signal.

**Note:** Before playing music on your iPhone, you need the following [Settings]--[Sound]--[Earphone Audio]-- Turn off the [Lower High volume] option! Other models of mobile phones need to turn off the suggestion that the volume affects the hearing, the mobile phone volume is adjusted to the normal maximum to operate normally, otherwise there is no discharge or noise!

Small light bulb: It glows when near lightning

Lead pin: Hold the end of the lead pin and touch the lightning

## ⚠ Announcements

- ◆ Keep away from inflammable and explosive materials at work.
- ◆ Avoid arc striking other electronic equipment;
- ◆ Be careful not to be poked by the discharge needle;
- ◆ Do not let the arc hit sensitive areas;
- ◆ Minors please use under adult supervision;
- ◆ Do not place any conductive items above the main panel to avoid burning out the shell;
- ◆ The sound came from lightning and was loud;
- ◆ Lightning has a certain temperature, lightning mode direct touch generally feel a certain temperature, music mode frequency is higher, direct touch will have obvious pain. Recommended for viewing only;

- ◆ **The machine has high temperature protection, long time high power operation temperature will stop discharge;**
- ◆ **Do not disassemble yourself !!**

## parameter:

Input power: 60W  
Lightning length: 0~10 cm  
Discharge frequency: 5~50hz (lightning mode)  
Input voltage: 48V (AC110V~240V)

## ⚠ FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
