03 Pairing SOS Button

Before leaving the factory, you need to test whether the SOS button is effective. The SOS button has been paired and can be used directly. If triggering the SOS button does not work, please pair it.

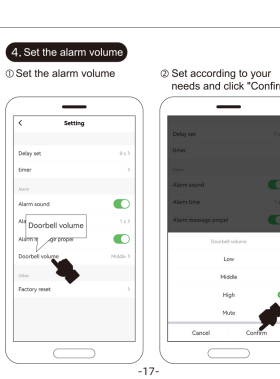

1. How to pair?
Press the side setup button (see blue indicator light flashing)

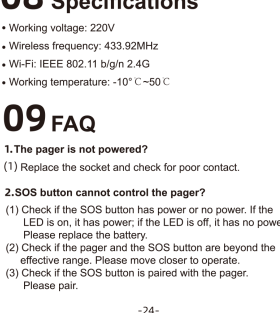

2. Test whether the pairing is successful?

3. Can't connect to your phone?

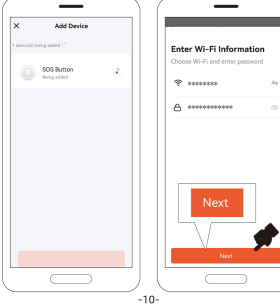

4. The mobile APP cannot be operated or is offline?

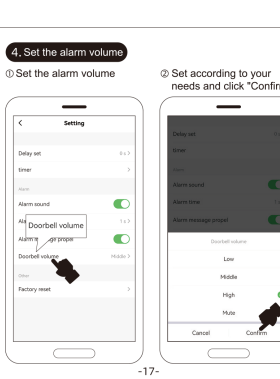

5. The pager is not powered?

6. SOS button cannot control the pager?

7. Replace the SOS button battery

8. Replace the SOS button battery
