

Product Instruction

1. Appearance and Function Introduction

Product Parameters

- Wireless Protocol: Bluetooth 5.4
- Dimensions: Diameter 57.3mm x Thickness 5.8mm
- Net Weight: Approximately 32g
- Charging Port: Type-C
- Charging Function: Supports Type-C charging.

- It takes about 2 hours to fully charge the device using a regular charger (4.2V 60mA).

(**Note: Using a high-power fast charger is not recommended.**)

Indicator Light

- Sleep/Standby Mode: Indicator light is off.
- Bluetooth Not Connected: Green light flashes.
- Charging: Red light is on.
- Fully Charged: The green light is on.

Voice Control Button

- When the device is connected: Press and hold this button to use the voice translation and voice-to-text functions.
- When the device is in sleep mode: Press this button to wake up the device.
- Cross-App Translation: When using cross-app translation, this button can be used to copy and paste in the input boxes of various chat applications.

Reset Button

- To restart the device, insert the SIM ejector pin into the reset button and press and hold the reset button for 2 seconds.
- Once the device has restarted successfully, access the Bluetooth settings on your mobile phone. Locate the paired entry of this device in the list of Bluetooth devices, then select the option to delete the pairing information. After that, enable the device's Bluetooth discovery mode, search for available Bluetooth devices and select this device to re-establish the pairing and connection.

Important Reminders

- Unconnected State: If no operation is performed within 2 minutes, the device will automatically shut down.
- Connected State: You can set the device's sleep time through the mobile phone app. If no operation is performed within the set time, the device will enter standby

mode.

- **Easy Wake-Up:** Simply press the voice control button, and the device will instantly wake up and automatically reconnect to your phone.

2. How to Connect and Use

Step 1: Awaken your exclusive companion

- **Operation:** Press the voice control button on the device.
- **Indicator:** The green light flashes, indicating that the device is on and entered pairing mode.

Step 2: Open the " InnAIO " APP and click the "Connect" button.

Step 3: Connect via Bluetooth

Find the Bluetooth device name starting with “InnAIO” in the Bluetooth list and click to connect.

Step 4: Confirm the Connection

Return to the " InnAIO " App and ensure the "Device Not Connected" has disappeared. You can now start using the device.

3. Carrying Method

This product features a magnetic design, allowing it to be directly attached to the back of the device for easy portability.

If your device lacks magnetic functionality or the presence of a phone case affects the magnetic attraction, you can use the included magnetic ring to enhance the adsorption effect.

One side of the magnetic ring has a sticker, which is the adhesive side, while the other side is the magnetic side. Peel off the sticker, attach the adhesive side to the back of the device first, and then attach the translator to the magnetic side.

FCC Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
