FAQ

Q1: The keyboard and mouse cannot be connected.

A1: Please switch on the keyboard, press “Esc” + “C” , the LED indicator light will flash quickly.Plug the 2.4GHz USB receiver into the computer. Within 10 seconds, put the keyboard within 10 cm of the receiver for pairing. When the light turns off, the keyboard pairing is successful.Turn on the power switch at the bottom of the mouse. Please hold down the left and right mouse buttons as well as the scroll wheel button simultaneously. The light at the bottom of the mouse will light up. Insert the USB receiver into the computer and place the mouse within 10 cm of the receiver for pairing.

Q2: What should I do if the keyboard gets delayed or stuck?

A2: Please check there is no 2.4GHz device (e.g., router) nearby to interfere with the connection. Please check there is no full metal case that may block the signal.

Q3: USB Receiver Location

Solution:

Initial Position:

Located in the keyboard’s bottom compartment inside the packaging box (please inspect carefully when unboxing).

Replacement for Lost Receiver:

Contact us for a free replacement (product serial number verification required).

The multimedia keys are compatible with Windows 8 and Windows 10. On other systems, some shortcut functions may not work properly.
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment causes harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.Changes or modifications not expressly approved by the party responsible for compliance could void the 's user's authority to operate the equipment.
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference.
(2) This device must accept any interference received, including interference that may cause undesired operation.
