RECHARGEABLE WALL LAMP

User Manual

(NOTE):

Wireless receiver: Located on the lamp body, this remote control transmits the wireless control signal and executes the command after receiving it.

The wireless communication between the lamp body remote controllers adopts a short-range wireless communication method based on FSK modulation.

The buttons on the remote controller have functions such as dimming and adjusting brightness. Additionally, there are control keys for timing. The lamp body itself receives the carrier and receives the information to execute the instructions.

Warning:

For your safety, keep it out of power supply.

FCC STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:(1)This device may not cause harmful interference, and(2)This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
