WiFi Electronic eyepiece S86011

CE.SS86011.2505.HTN

When using a charging cable to charge the built-in lithium battery of the electronic eyepiece, it is recommended to use slow charging. The red light stays on when the battery is fully charged.

Download and install the Tele Fi application from the official website or app store.

Press and hold the power button for more than 3 seconds to turn on the electronic eyepiece. The red light will flash, indicating that the WiFi signal is being emitted.

Remove the dust cover of the electronic eyepiece, insert it into the telescope's eyepiece interface and secure it.

Turn on the WiFi of the smart terminal and connect to WiFi-xxxX.

Launch the Tele Fi application, adjust the telescope to point at the target to be photographed, and focus until a clear image is displayed.

Click the video recording icon to start recording, and click it again to stop recording.

Click the album icon to browse the captured images and recorded videos, and you can also delete the saved files.

Click the settings icon in the upper right corner to set the shooting resolution and interface language.

If manual adjustment of exposure parameters is required, click the adjustment icon, adjust the brightness via the slider, and click the icon again to close the adjustment interface.

FCC Requirement

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
