

User Manual

10000mAh Power bank

Description

- 1.buckle
- 2.Wireless charger
- 3.TFT screen display
- 4.Power Button on/off
- 5.USB-C input/output
- 6.Cable-1
- 7.Cable-2
- 8.Cable-3
- 9.Cable-4

Specifications

Item No.: PB191 Battery Cell: Li-Polymer battery
Capacity: 3.85V 10000mAh 38.5Wh
Rated Capacity: 5V 5900mAh 31.9Wh
USB-C input/output: 5V=3A, 9V=2.22A, 12V=1.67A
Cable-1 Input: 5V=2A
Cable-2 Input/Output: 5V=3A, 9V=2.22A, 12V=1.67A
Cable-3/Cable-4 Output: 5V=2.4A
Wireless charger: 5W
Max Output: 5V=3A(shared) FCC ID:

Operation Instructions

To turn on/ off the power bank

- 1.Button operation: Press the button once to power on and output wireless charger. Double click the button to turn off.
- 2.Automatic power on: Automatically power on and output when the charging port or cable are loaded.
- 3.Automatic shutdown: It will automatically shut down after a light load of about 10 minutes.

TFT screen display control

Press the power button once to turn on the power bank, and the screen will display the startup animation before entering the main page.

On the left side of the main interface, there is a circular battery indicator. while on the right side, there are input/output symbols accompanied by corresponding cartoon character graphics.

When the power bank's temperature becomes too high or too low, it enters a protective mode, during which it ceases input/output operations and displays the corresponding warning message.

When the power button is double-clicked or the power bank is lightly loaded until it shuts down, the screen displays a shutdown animation.

FCC Statement

This device complies with Part 15 of the FCC Rules.
Operation is subject to the following two conditions.

- (1)this device may not cause hammful interference,and
- (2)this device must accept any interference received,including interference that may cause undesired operation

Note:This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed andused in accordance with the instructions,may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipmentand receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC RF Exposure statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Do not disposed the lithium battery with general waste.
Please returnit to battery recycling collection point.
