- 4.The pop-up"Use Carplay with"F800-xxXX"will pop up on your iPhone,please click"Tun on WLAN &Use Carplay",and then car stereo will automatically enter into carplay interface.

ADDITIONALEXPLANATION

How It Works:

Wireless CarPlay initially connects via Bluetooth,then switches to for operation After Bluetooth pairs,your phone links to the car system and Bluetooth disconnects. The car stereo try to reconnect with the last paired phone when turned on.

Key Points:

Using wireless CarPlay/Android Auto occupies your phone's ,so other use is not possible at the time.If there's a conflict,you may need to disconnect other networks. Keep your phone's Bluetooth on for the car stereo's auto-connection feature,and set the car stereo's to "Auto-Join."After Bluetooth pairs,it disconnects,which might cause your phone to connect to other Bluetooth devices.If this affects the car stereo's mic or sound,you may need to disconnect other Bluetooth connections or turn off Bluetooth.Remember to turn Bluetooth back on before using the car stereo again for automatic pairing.

(2)Android Auto

Android auto is same as Carplay used in Android phone

(3.1)iPhone-Mirror

iPhone MirrorLink can be used when some features of CarPlay cannot be directly displayed on the screen. You can use MirrorLink's functions, such as watching videos on YouTube, etc. However, if you want to directly watch videos on Netflix or Peacock, you will need to purchase our store's AI BOX (since these apps have not been authorized for CarPlay).

(3.2)Android-Mirror

Android mirror is same as iphone mirror used in Android phone

Important Note:

Once you've hooked up your phone to the car's screen, if you don't pick one of the four audio output options above, the sound will keep coming from your phone. You'll have to manually select the audio output channel.

Details are as follows:

1. BT Music: (your phone bluetooth → your car radio bluetooth)

After you click this one, the screen will pop up a notification saying: Please use your phone to connect to the car Bluetooth, in this way the sound will come out from your car speaker.

3. AVIN: (Carplay → your car radio) Choose this option and just use the included AUX cable to connect this carplay screen to your car's aux port.

4. Local horn: (Carplay horn) Choose this option and unplug the AUX cable and then the sound will be coming out from built-in speaker of this unit.

5. BT Music: (your phone → carplay)

This feature is used when the your phone is not utilizing CarPlay or Android Auto.

6.Rear Camera

Test normal use and adjust the camera's functions of the rear Camera

7.DVR

Dash camera capture, recording, audio recording, and playback.

8. Troubleshooting

Item	Problem	Solution
1	Unable to turn on the car player	①Check whether the DC head of the cigarette lighter power cord is damaged or aging. ②Check whether the fuse of the power plug is disconnected or burned.
2	Touch screen is not responding	①Please reset the unit to factory mode and try again ②Please contact seller for a replacement.
3	The rear view camera has no image	①Make sure you have connected it right. ②Whether the AVIN interface is inserted to the bottom. ③Check if the camera format matches. Make sure the camera is CVBS signal and plug into the AVIN port.
4	Machine getting hot after some time use	①Avoid direct sunlight or exposure to sunlight during use. The normal operating temperature of this car player is -4~149 ° F. After disconnecting the power supply, the temperature of this car player will be lower than 149F and work normally.
5	Carplay cannot connect	①The first connection takes a little longer. ②Only iPhone supports Carplay. ③Check that the iOS and Bluetooth functions of the mobile phone are normal. ④Enter Settings-General-Carplay vehicle, delete all records and reconnect. ⑤Restart the iPhone and reconnect it.
6	Android Auto cannot connect	①Only Android phones are supported ②Update Auto and related applications on mobile phones to the latest version ③Do not enable VPN on the mobile phone. ④Check that the Wi-Fi and Bluetooth functions of the mobile phone are normal. ⑤Restart the Android phone and connect it again.
7	The Bluetooth music	①Please set the screen casting mode to Bluetooth music. Other modes do not support Bluetooth music.

9. Product Parameters

FAQ

Car stereo doesn't have sound

- 1.Please confirm if your audio output has selected the corresponding option
- 2.Please check if you set the volume to zero, or mute the radio.

Wireless Android Auto function cannot be used

- 1.Make sure your Android phone has downloaded the Mirroring app as mentioned.
- 2.Please confirm whether the has been correctly named as "car".

Cannot mirror link

if you want to use mirrorlink from carplay, you need to first turn off the phone's bluetooth → turn off the , → restart the phone, and then operate as the

Cannot watch Netflix

Phone MirrorLink can be used when some features of CarPlay cannot be directly displayed on the screen. You can use MirrorLink's functions, such as watching videos on YouTube, etc.

However, if you want to directly watch videos on Netflix or Peacock, you will need to purchase our store's AI BOX (since these apps have not been authorized for CarPlay).

Cannot see the Bluetooth of the device or I cannot connect to the Bluetooth successfully.

- 1.Please found the factory reset on the Basic reset

The volume of the built-in speaker is not sufficient.

If you think built-in speaker isn't loud enough. Please choose other 3 audio output channels. Check details on the fourth icon on the main menu.

Screen get stuck I cannot do anything or click on anything.

If the unit crashes and screen get stuck, please you can simply cut off the power and turn on the unit to try again.

How to change the boot up logo

- 1.Prepare an empty TF card and create a folder named 'update' in the root directory.
- 2.Prepare your own car logo picture with a size of 1024x600 pixels, name it: stalogo.jpg, and put it in the update folder.
- 3.Insert the prepared TF card into the multimedia car player after the unit is powered on. It will automatically update the new boot logo.
- 4.Disconnect the power supply, and then connect the power supply again. The screen will display a new custom logo, indicating that the setting is successful.

The player cannot turn off by itself

Kindly note this is not the issue of the CarPlay screen. It has something related to your

car. Some cars still provide power to the cigarette lighter after turning off the key. In this case, you may need to turn off the carplay screen manually or buy a 12V battery saver.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct

the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
