

Smart Li-Polymer Battery Pack

Thank you for choosing this Smart Li-Polymer Battery Pack.
This product is designed for DC5V heating devices.

Explain:

- 01.** Power switch/mode selection.
- 02.** Battery indicator light (it will bright with one indicating 25% battery, two indicating 50% battery, three indicating 75% battery, and four indicating 100% battery).
- 03.** Heating indicator light, when fully lit, the maximum gear is heated, the one that is lit is the minimum gear is heated, and when fully lit and flashing at the same time, it is the fast heating mode.
- 04.** TYPE-C charging port.
- 05.** DC output

Specifications:

Smart Li-Polymer Battery Pack
Model: PG-5000A
1INP12/48/62
Capacity: 5000mAh/3.7V/18.5Wh
DC Output: 5V=2A
Type-C Input: 5V=2.2A
Made in China
Dongguan Pinguan Sports Technology Co., Ltd.

Operating instruction:

- 1. Type-C Input is 5V and DC output is 5V.
- 2. The DC port and USB-A port cannot be used at the same time. When the Type-C port is charging, all other ports will not function.
- 3. The green LED at the top illuminates when the DC port is active

Safety notes:

- 1. Do not put the power bank in the water, fire or expose to high temperature that may cause combustion explosion or release toxic gas.
- 2. Do not use the power bank when there is any leakage, deformation or peculiar smell occurs.
- 3. Do not use the power bank when it is under charging.
- 4. Please check the input voltage before get it charged.
- 5. Do not use non-neutral chemicals to clean this product.

Care and Maintenance:

- *Get the product fully charged and discharged every three months to ensure the battery is in the best condition.
 - *If the power bank is not used for a long time, please conduct the following procedures every six months to maintain its normal performance: first fully charge it, then use some kind of external device to discharge it, and then get it 50% charged, then store in a cool and dry place.
- Store in a cool, dry place away from direct sunlight and heat sources.
- Recommended storage temperature: -20°C to 35°C (-4°F to 95°F).
- Keep out of reach of children.
- *Do not get the cable connected to any power supply when the power bank is not in use.

Disposal of Secondary Cells or Batteries:

When disposing of secondary cells or batteries, keep cells or batteries of different electrochemical systems separate from each other. Do not mix lithium-ion cells with other battery types (e.g., alkaline or Ni-MH) to prevent short circuits or chemical reactions. Please follow local regulations for recycling.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
