Warranty description

Thank you for your support and use of this product, in accordance with the national quality supervision and inspection of the "three guaranteed" service relevant responsibility provisions to provide you with a one-year quality guarantee service commitment.

These Terms and conditions apply to consumers who purchase the product from the Company or its approved distributors.

Return, replacement and free maintenance services shall be handled with a valid product invoice and a valid three-package certificate.

Product Statement and precautions

- Please read the contents of this manual carefully to ensure that you can use this product correctly and safely.
 - Some functions of this product can only be used normally when the network is in good condition.
 - Please do not disassemble this product and accessories without permission. The company will not be responsible for any loss caused by this.
 - This product does not deliver the power adapter, if you need to buy, please buy the CCC certification and meet the requirements of the 5V1A power adapter;
 - Do not expose the device to high temperature or around heating equipment, such as sunshine, heaters, microwave ovens, ovens, water heaters, etc.
- ¹ The company reserves the right to improve the product, product specifications and design are subject to change without prior notice!

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
