Manual Product 10000W Solar-powered street light

Product Introduction:

Waterproof grade: IP 67

Battery capacity: 3000 mAh

Lamp beads: 1680

modes: constant, induction

Light bead model: 5730

Installation height: 16.4-19.7ft (5-6m)

Material: ABS engineering plastic+PC CC

Exposure area: 2152-2691sq.ft/(200-300m²)

Charging time: 6-8 hours (under sufficient sunlight)

Full power lighting: 10-15 hours(under sufficient sunlight)

Product function: radar body sensing+light control+remote control

Product Description: remote control can be used to setting the light

13.39in(34cm)

36.22in(92cm)

Installation instructions:

1. Please use nuts to connect and fix the street lamp and the street lamp pole
2. Please drill the electric drill into the wall and fix the expansion screw
3. Please tighten the nut with a wrench

Functions:

- Auto charge at daytime
 - Automatic turns on at night and off in the morning
 - Turn off the lights during the day.
 - When someone enters the sensing range, lights will turn on with 100% brightness.
- Brightness Adjustable:** Change the brightness from 25%-100%
- Radar Mode:** Keeps the light on at 25% Brightness, it will come to 100% brightness when detected motion
- Timing Mode:** You can set it to 2/3/5/6/8H steady on mode, and switch to radar mode after 2/3/5/6/8H

Remote control with memory

1. Always-on mode
2. Auto light up at night [not light up in daytime]
(light 2596 in the first night and light in the second night to save electricity)
3. Light off key
4. Radar Induction [not light up in daytime]
(people come all height, people walk sightly braht)
5. 25%-100% brightness adjustable
6. Steady on - timing 2 hours
(Turns to radar induction mode after 2 hrs steady on lighting every night)
7. Steady on - timing 3 hours
(Turns to radar induction mode after 3 hrs steady on lighting every night)
8. Steady on - timing 5 hours
(Turns to radar induction mode after 5 hrs steady on lighting every night)
9. Steady on - timing 6 hours
(Turns to radar induction mode after 6 hrs steady on lighting every night)
10. Steady on - timing 8 hours
(Turns to radar induction mode after 8 hrs steady on lighting every night)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: The user is cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
