

Labeling Justification for FCC ID: 2BR5P-WF6SOM

Date: January 29, 2026

To: Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046-1609

To Whom It May Concern:

Regarding the application for the above-referenced FCC ID, Fulfil Solutions, Inc. provides the following justification regarding the placement of the FCC ID label:

1. The module (Model: LBES5PL2EL) is physically too small to accommodate a label with legible text (4-point font or larger) containing the full FCC ID.
2. This module is not sold to third parties or the general public. It is utilized exclusively by Fulfil Solutions, Inc. and is factory-installed into our own host system (The Shopbot) during the manufacturing process. Because the module is enclosed within the host system, it is not accessible to the end-user.
3. Since the module is installed exclusively by Fulfil Solutions, the FCC ID is permanently displayed in our Operations Manual (see Page 2). This manual serves as the primary documentation for the qualified personnel operating and maintaining the system.
4. The FCC ID is also clearly visible on the external nameplate of the host device (The Shopbot), ensuring it is identifiable without opening the enclosure.

Sincerely,
