

SEAN Product Instruction Manual

FCC ID: 2BR7U-SEAN

Product Name: Spatial camera

Model Name: SEAN

Product Introduction

SEAN is a portable smart camera that supports 2.4GHz 5GHz wireless local area network and Bluetooth functions. It is widely applicable to scenarios such as life recording, travel photography, professional creation, and industrial applications.

Warning:

Not for use by children under 12 years old. Avoid placing it in areas easily accessible to children.

Individuals aged 13 to 18 must use this product safely under the full supervision and accompaniment of a guardian.

I. Basic Operations

1. Power On/Off

- Power on: Press and hold the third button from the top on the right side of the device until it starts up.
- Power off: When the device is on, press and hold the same button for about 2 seconds to turn it off.

2. Start and Shutdown of the Camera

- Start the camera: After powering on, swipe up on the screen to find the "Slam Camera" icon and tap to launch it.
- Turn off the camera: When the camera is on, swipe up from the bottom of the screen and tap the "Back" button on the left to close it.

3. Bluetooth Activation and Pairing

- Enable Bluetooth:
 - Swipe down the notification bar on the desktop and tap the "Bluetooth" icon.
- Bluetooth pairing:

- Press and hold the "Bluetooth" icon in the notification bar, then select the device to connect to;

- Or go to "Settings > Connected devices" to connect.

4. Activation and Connection of WIFI

- Enabling Wi-Fi:

- Pull down the notification panel, tap the "Internet" icon, and turn on the Wi-Fi switch after entering;

- Or go to "Settings > Network & internet > Internet" and turn on the Wi-Fi switch.

- Connecting to a network: Select an available network and enter the password to complete the connection.

5. Unlocking the Device

- Enter the device password when the screen is locked.

II. Product Usage Scenarios

1. Daily Recording and Family Life

It is suitable for recording family gatherings, parent-child time, and other occasions. Equipped with the ability to restore facial expressions and color gradations, it also supports scene recognition and automatic light adjustment, making it convenient to build a family image archive.

2. Travel Photography

- High Dynamic Range (HDR) processing, suitable for complex lighting environments;
- Dustproof and waterproof design, ideal for harsh conditions such as snow-capped mountains and rainforests;
- Lightweight and portable, suitable for occasions like hiking, trekking, and mountaineering.

3. Professional Creation

- Manual control: Supports adjustment of parameters such as aperture, ISO, and white balance;
- Real-time preview and composition optimization;
- Suitable for commercial photography, advertising shooting, artistic creation, and time-lapse photography.

4. Industry Applications

- Educational scenarios: Supports high-definition video live streaming and recording, enhancing the remote teaching experience;
- Cultural and tourist attractions: Dual fisheye lenses enable immersive 180-degree panoramic recording;
- Museums/exhibitions: Captures high-precision images for digital archives, academic research, and virtual exhibitions.

III. Precautions

- This device is a precision electronic product; please avoid dropping it or subjecting it to strong collisions.
- When using it outdoors for an extended period, pay attention to the battery level and take protective measures.
- For further technical support, please contact the customer service of Shanghai Shilai Technology Co., Ltd.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
