Label draft / example pictures for FCC (USA) & IC (Canada) // 28. October 2025

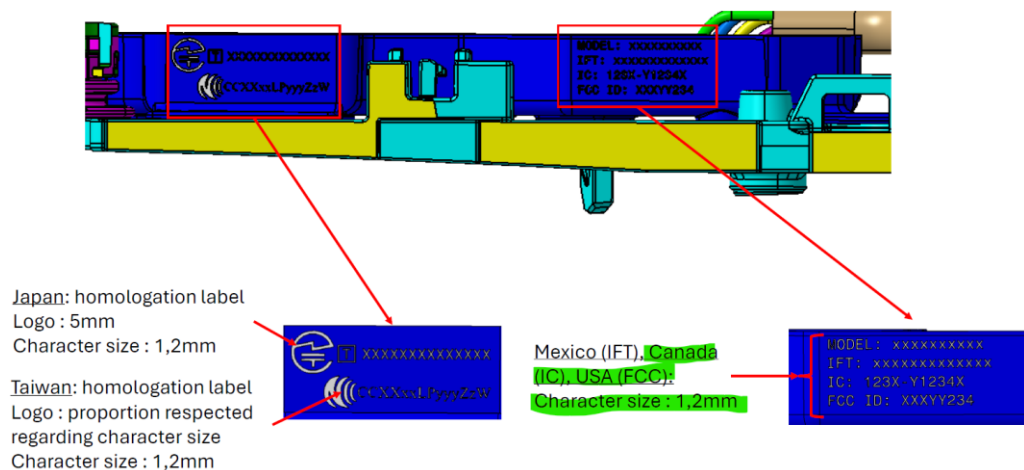

1. Label requirements:

Label Size - Feedback BMW & IB-Lenhardt

Country	Label Size
Mexiko	The prefix "IFT" in capital letters + the homologation certificate number, in a single line. It must be legible without the aid of magnification.
Argentinien	the minimum dimensions of the isotype (the R in the square) are 2 mm x 2 mm, followed by the certificate number in ARIAL font and a minimum size of 5 points (approximately 1.76 mm).
Brasilien	not specified / There are minimum information that must be visualized when reading the QR CODE. If adopted this identification by QR CODE, the ACT also requires that ANATEL ID is added on the product package, as well.
Taiwan	There is no size restriction on the Mark, but the Mark shall be affixed to the body of the product in appropriate proportion.
Russland/Kazachstan	EAC marking minimum size: 5 mm
Südkorea	The vertical height of certification mark cannot be less than 5mm
Japan	The size shall be 3 mm or more in diameter / The label must be at least 2 cm high in the standard version. For devices with limited space, it is alternatively possible to use a smaller label with a minimum height of 5 mm.
EU, USA, Canada	EU: 5 mm, USA: 4-6 points, Canada: not specified
