| | | 6.Rotate | 12.Rotate |

Bluetooth pairing:

Pairing Bluetooth method: (Ignore this step for the infrared remote control, thank you for using it.)

1. After successful startup, wait for 5 seconds. If there is no interface pairing prompt, lightly press the voice button on the remote control to pop up the pairing prompt. Once the pairing is successful, you can use it.

2. First pairing, place the remote control near the set-top box, follow the interface prompts to pair, and once the pairing is successful, you can use it.

Pairing process: Follow the interface prompts, wait quietly, and according to the pop-up window below the interface, the pairing is completed successfully.

(Note: Each machine has a different pairing interface, please follow the UI interface prompts for pairing.)

Quick Pairing Method
Press and hold the power button until the LED indicator flashes.

Pairing process:
Press and hold the power button until the LED indicator flashes, then press the pairing button.

1. After the set-top box is successfully connected, the LAN port can be connected to the wired network or WIFI. (If there is no LAN port, you can directly connect to WIFI for use)
2. After the set-top box is successfully connected, the LAN port can be connected to the wired network or WIFI. (If there is no LAN port, you can directly connect to WIFI for use)
3. After the networking is successful, multiple screens can be shared on the same network.

Click "My Apps" to view recently used programs, click program icon to switch application arbitrarily

1. Go to the main screen → Settings → Network → Select "Wi-Fi" to turn on WiFi function select "Wi-Fi": Enter password → Connect to network"
2. After the network connection is successful, you can use it normally.

Please download the required software from your computer to the USB flash drive in APK format first. Then connect the USB flash drive to the USB port of the TV BOX.

After the connection is successful, find "File Browser" in the application, press OK to enter, and select the USB device you inserted. Find the software you downloaded and click Download. The "Device is being installed" logo will be displayed on the screen.

After the installation is complete, the software icon will be displayed on the application menu.

- 1.No display after power on?
Confirm your device is connected to the TV well and set the correct HD Input from your TV configuration.
- 2.TV has images but no sound?
Make sure your TV is not in mute and low volume.
- 3.Fall to connect to the network?
Make sure the Ethernet cable is properly connected. Make sure Wi-Fi is functional and your tv stick has a strong enough signal from your router.
- 4.Remote control failure?
 - Replace the battery of the remote control with a new one, and make sure it's placed in the correct polarity.
 - Make sure the remote control is within the range of the tv stick.Go to the Setting menu to unpair and re-pair the remote control.

***Please use our accessories to avoid any risk.**

WARNING!

Under no circumstances should you try to repair the TV BOX by yourself, as this will invalidate the warranty.

- Place the device on a flat, firm and stable surface. Do not pull in scraper, rug.
- Place the device in a well-ventilated location to prevent the accumulation of internal heat.

Protect the device from high temperatures, humidity, water and dust.

Do not place any objects near your device that may damage it (e.g., liquid-filled objects or candles).

Do not mix old and new batteries and Do not mix alkaline, standard (carbon-zinc) or rechargeable (ni-cad, ni-ni, etc.) batteries.

FCI WARNING:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must not accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance with FCC regulations may void the user's authority to operate this equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used properly, it may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur when this equipment is used in a particular installation. If this equipment does cause harmful interference to radio or television reception, the user can be requested to take one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC Part 15 Equipment guidelines, this equipment must not be modified or altered in any way that increases the distance between the radiator and your body. Use only the supplied antenna.
