|--|--------------------------------------------------------------------------------------------------------|
|  | <b>Power:</b> Power on/off                                                                             |
|  | <b>Input:</b> Select the input source                                                                  |
|  | <b>User Profile:</b> View or change the user profile.                                                  |
|  | <b>Google Assistant:</b> Press the Google Assistant button on your remote to talk to Google Assistant. |
|  | <b>Dashboard:</b> Access Dashboard panel                                                               |
|  | <b>Navigation Pad:</b> Move up, down, left, or right, then press the middle button to confirm          |
|  | <b>Back:</b> Return to previous screen                                                                 |
|  | <b>Home:</b> Return to home screen                                                                     |
|  | <b>Guide:</b> Open Live TV                                                                             |
|  | <b>Focus +/-:</b> Short press the focus "+/-" keys on the remote control to perform manual focusing.   |
|  | <b>Mute:</b> Mute on/off                                                                               |
|  | <b>VOL +/-:</b> Adjust the Volume                                                                      |
|  | <b>YouTube:</b> Launch YouTube                                                                         |
|  | <b>Netflix:</b> Launch Netflix                                                                         |
|  | <b>prime video:</b> Launch prime video                                                                 |
|  | <b>Shortcut key:</b> Open Projector Settings                                                           |

# Remote control

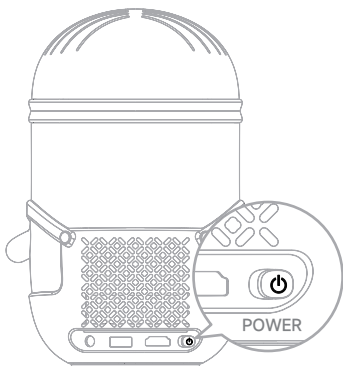

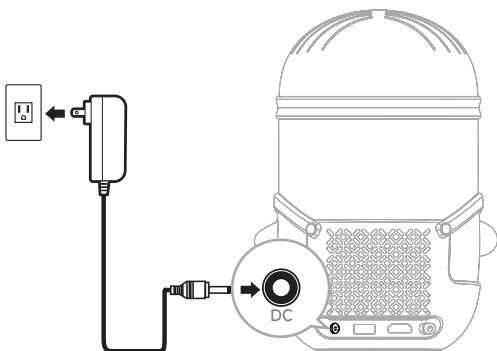

- \* Pay attention to the positive and negative poles when installing batteries in the remote control.
- \* When battery leaks, immediately wipe away any fluid with a dry cloth and replace the batteries with new ones.

# Power up

---

Connect your power cable to the projector, then plug it in to the wall outlet.

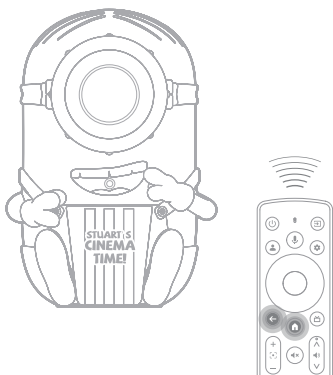

During the boot - up process, the indicator light shows white, and it turns off after entering the system.

This is the heat - dissipation outlet of the product. Do not place or stick anything to block it. A distance of more than 30 cm is recommended!

## Remote Control Pairing

---

1. Press and hold Home  and  Back buttons at the same time for 3 seconds.
2. The remote control light will flash red for 3 seconds, then release the buttons and wait for pairing.

- \* Keep the remote control within 12 inches of the projector.
- \* Press and hold the **OK** button and the **Vol +** button simultaneously for 3 seconds to cancel the Bluetooth pairing.

## Keystones & Focus

---

There are three ways to enable Autofocus on OBE Smart Projector:

1. Turn on Autofocus by going to **Settings > Projector > Focus > Auto Focus**.
2. Gently move the projector to trigger the autofocus mechanism.
3. Press and hold the Focus button on the remote to trigger autofocus.

Activate manual keystone with the following steps:

Go to **Settings > Projector > Image Correction > Manual Keystone Correction**.

- \* When you power on the projector or move it to another location, the projector automatically performs keystone correction. You can turn on Auto Keystone Correction in projector Settings.

# Bluetooth Speaker Mode

Your projector can also be used as a speaker.

1. Press  button on the remote control to enter the projector settings menu.
2. Select **Bluetooth Speaker Mode** and turn it on.
3. Following the instruction to pair with the preferred device.

\* If the Bluetooth connection is not established within the time specified, the projector will turn off the screen. You can press and hold  for more than 2 seconds to turn the screen back on to reconnect the Bluetooth device.

## Specifications

# Important Safety Instructions

---

1. Do not look directly into the projection lens during use.  
Strong light entering the eyes may damage your vision!
2. Do not block the projection lens while the product is in operation.
3. The product has ventilation and heat dissipation holes around or at the bottom. Do not block these vents; otherwise, it may cause overheating or damage to the product.
4. Do not place the product near liquids (e.g., water, seawater), heat sources (e.g., fire, heaters), or other hazardous environments to avoid risks.
5. Do not expose batteries to extreme high temperatures or low pressure. Do not throw battery packs into fire or heating furnaces, disassemble, strike, crush, cut, short-circuit, or touch batteries with sharp objects. This may cause fire, explosion, or other hazards!
6. Check the battery polarity carefully. Do not use different types of batteries together, or replace them with incorrect model battery packs. This may lead to fire, explosion, or other hazards!
7. Keep batteries out of reach of children to prevent accidental ingestion. If a child swallows a battery, seek medical help immediately.
8. Do not dispose of batteries in household garbage.  
Follow national regulations for safe disposal of used batteries.
9. If the product will not be used for an extended period, disconnect the external power supply.
10. Do not disassemble the product or touch internal components under any circumstances.
11. For all internal maintenance of the device, contact our customer service center.

# FCC Compliance

---

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## FCC Radiation Exposure Statement

For projector: This device complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20cm from all persons. For remote control: The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

## Caution!

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

For the receiver devices associated with the operation of a licensed radio service, they bear the following statement:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC ID : 2BRQF-MINIONS3
