FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

Button function operation - pairing

common problem:

Q1: This product cannot be paired with my phone.

1. Please turn off Bluetooth on other devices and ensure that the earphones are in pairing mode.
2. Clear the pairing history of the phone. Turn off Bluetooth, then turn it on, and try again.

Q2: Poor Bluetooth range or sound quality

1. Bluetooth signals can be blocked by surrounding objects, which can affect audio quality. If there are no obstacles between the product and the phone, the range and sound quality will be better.
2. Stay away from other Bluetooth devices, microwave ovens, wireless routers, and other electronic devices.

Q3: Why is there a delay?

There is a data transmission process from the phone to the product, so sometimes you may feel delayed. This is a common issue for all Bluetooth devices, and Bluetooth V5.4 has made it better than the old version.

Q4: Why can't the charging case charge the earphones, or will the earphones not shut down after being placed back in the charging case?

If there is no power in the charging compartment, the above problem may occur. Please charge the charging compartment and it will work normally after being powered on.

If there is a charging insulation label on the metal contact of the earphone, please make sure to remove it before charging.

Q5: Why can't people hear my voice on the phone?

Please make sure to wear 2 headphones when making phone calls and check if the microphone is clogged with dirt.

Q6: Does my phone only have one earphone with sound?

You need to pair your left and right earphones first, and then turn on your phone's Bluetooth to pair with the earphones. Orange and white lights flash alternately.

Q7: The sound is very low.

1. Please ensure that you have turned up the volume of your phone to the maximum level
2. Choose the most suitable headphone size for your ears and ensure that the headphones fit your ears well.
