

Holy Sword M800

2.4G+BT5.1 dual mode mouse

Key indication:

1. Left key

2. Right key

3. Rollers

4. Forward key

5. Back key

6. DPI+

7. DPI-

Functional parameters

Production Address: Shenzhen, China
Input current :100mA
Voltage :5VDC
Mouse type: Photoelectric
Product interface :USB
Return rate :250HZ
Interface method :USB
Cable :TPC cable
Operating frequency :3000 frames per second

Instructions for Use

Bluetooth connection method :

There are three toggle switches at the bottom of the mouse:

- ① Dial up to set it to 2.4G wireless connection. Just plug our USB receiver into the computer and connect it
- ② Turning it to the middle position turns off the mouse
- ③ Scroll down to set the Bluetooth connection mode. The blue light on the scroll wheel will flash. Enter the Bluetooth connection. Find BT5.1 and Mouse to connect.

Product features :

- ①When the mouse is not in use, the light remains on for 3 minutes and then automatically goes into sleep mode.
- ② The USB receiver of the mouse is plugged into the bottom of the mouse and can be used by pulling it out.

Manufacturer: Shenzhen Kaiou Electronic Technology Co., LTD
Address: Taihongwei Industrial Park, Jiwei New Village, Bao 'an District, Shenzhen City
Official website: www.szkodz.cn (driver download website)

Warm reminder :

1. When charging a mouse, it's best not to use a mobile phone charger or socket. Just plug it directly into the computer interface for charging, as some The voltage of the charging head is too high, which may cause problems with the mouse.
2. To charge the mouse, first turn the switch at the bottom of the mouse to the off position. When the mouse enters the charging mode, the sound is emitted from the gap of the scroll wheel
The red light, full of lights, goes out.

FCC WARNING :

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. Such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement.

This equipment complies with FCC's RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna(s) must not be co-located or conjunction with any other antenna or transmitter.
