6 Settings interface

Operation Instructions

1. Bluetooth search: Click on the ⑤ Bluetooth search icon, and the instrument panel will start searching for nearby Bluetooth devices. The Bluetooth devices found will be displayed in the ② device list. During the search process:

a: Click on the instrument search area, the instrument stops searching for devices, and displays the Bluetooth devices that have already been searched in the ② list.

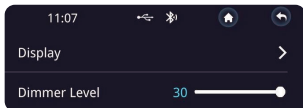

b: Without any operation, the instrument search stops after 1 minute and displays the Bluetooth devices that have already been searched in the ② list.

2- Bluetooth connection: Select the Bluetooth device you want to connect to from the Bluetooth list in search ②, and click the connection icon in ③. After connecting the instrument Bluetooth to the device, the device model will be displayed in the connected list in ①.

3- Disconnect Bluetooth: Click on the ④ disconnect icon to disconnect the currently connected device, or click on the ⑥ clear device icon to disconnect the current connection and clear all devices.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC 's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
