

iyO One

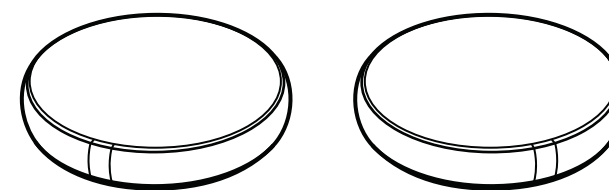

Quick Start Guide

What's in the box

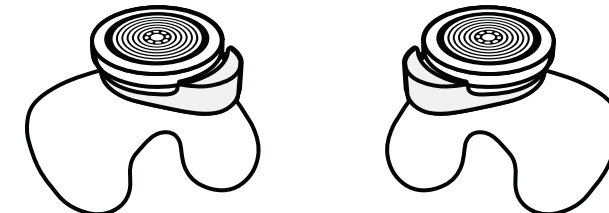

Charge case

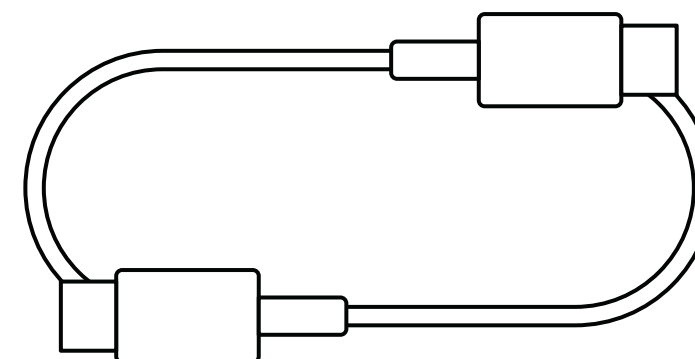

Audio computer discs

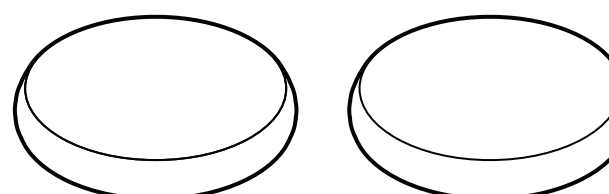

Custom in-ears

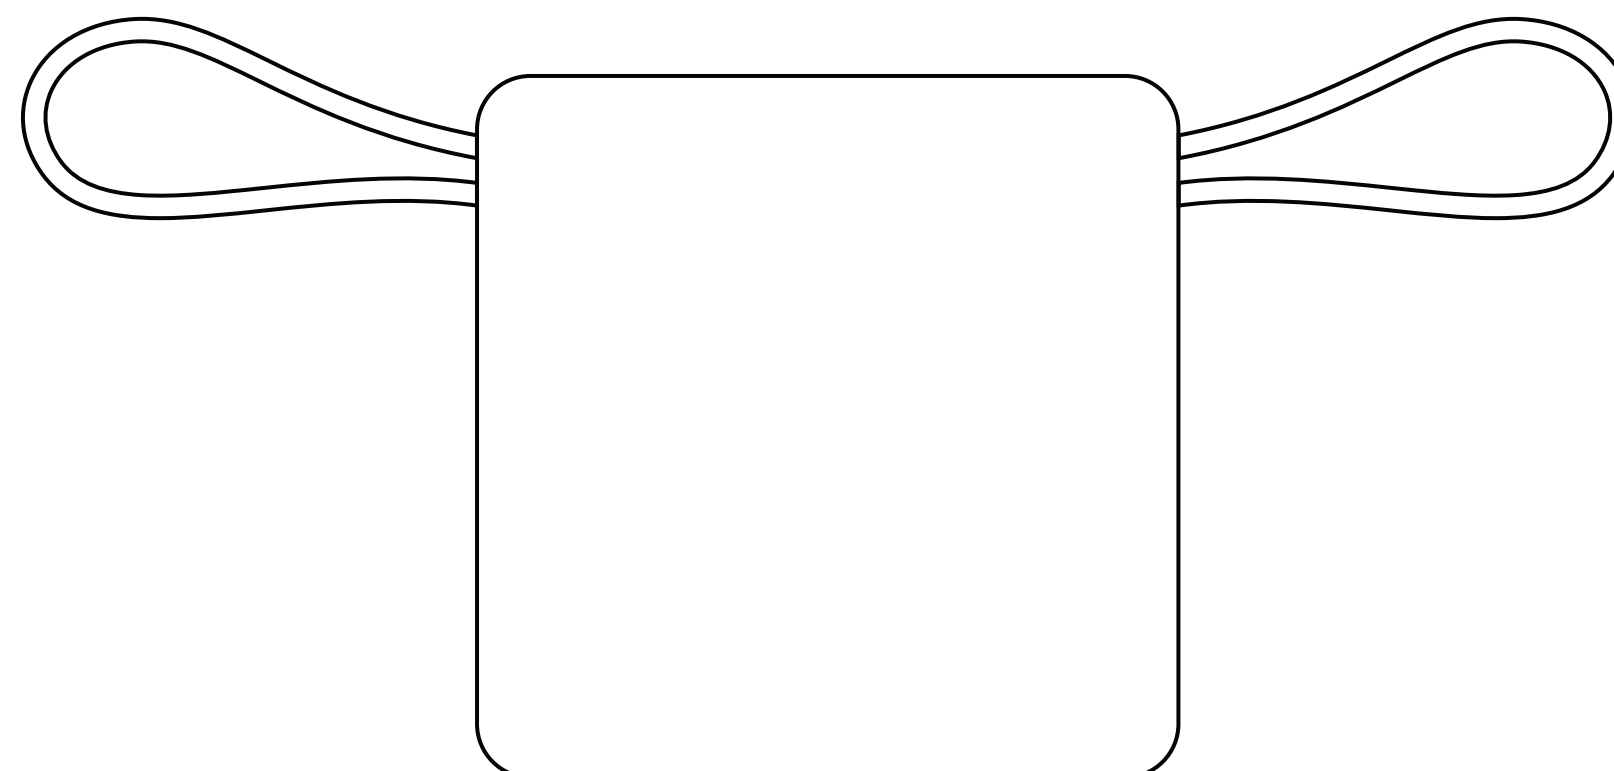

Charge cable

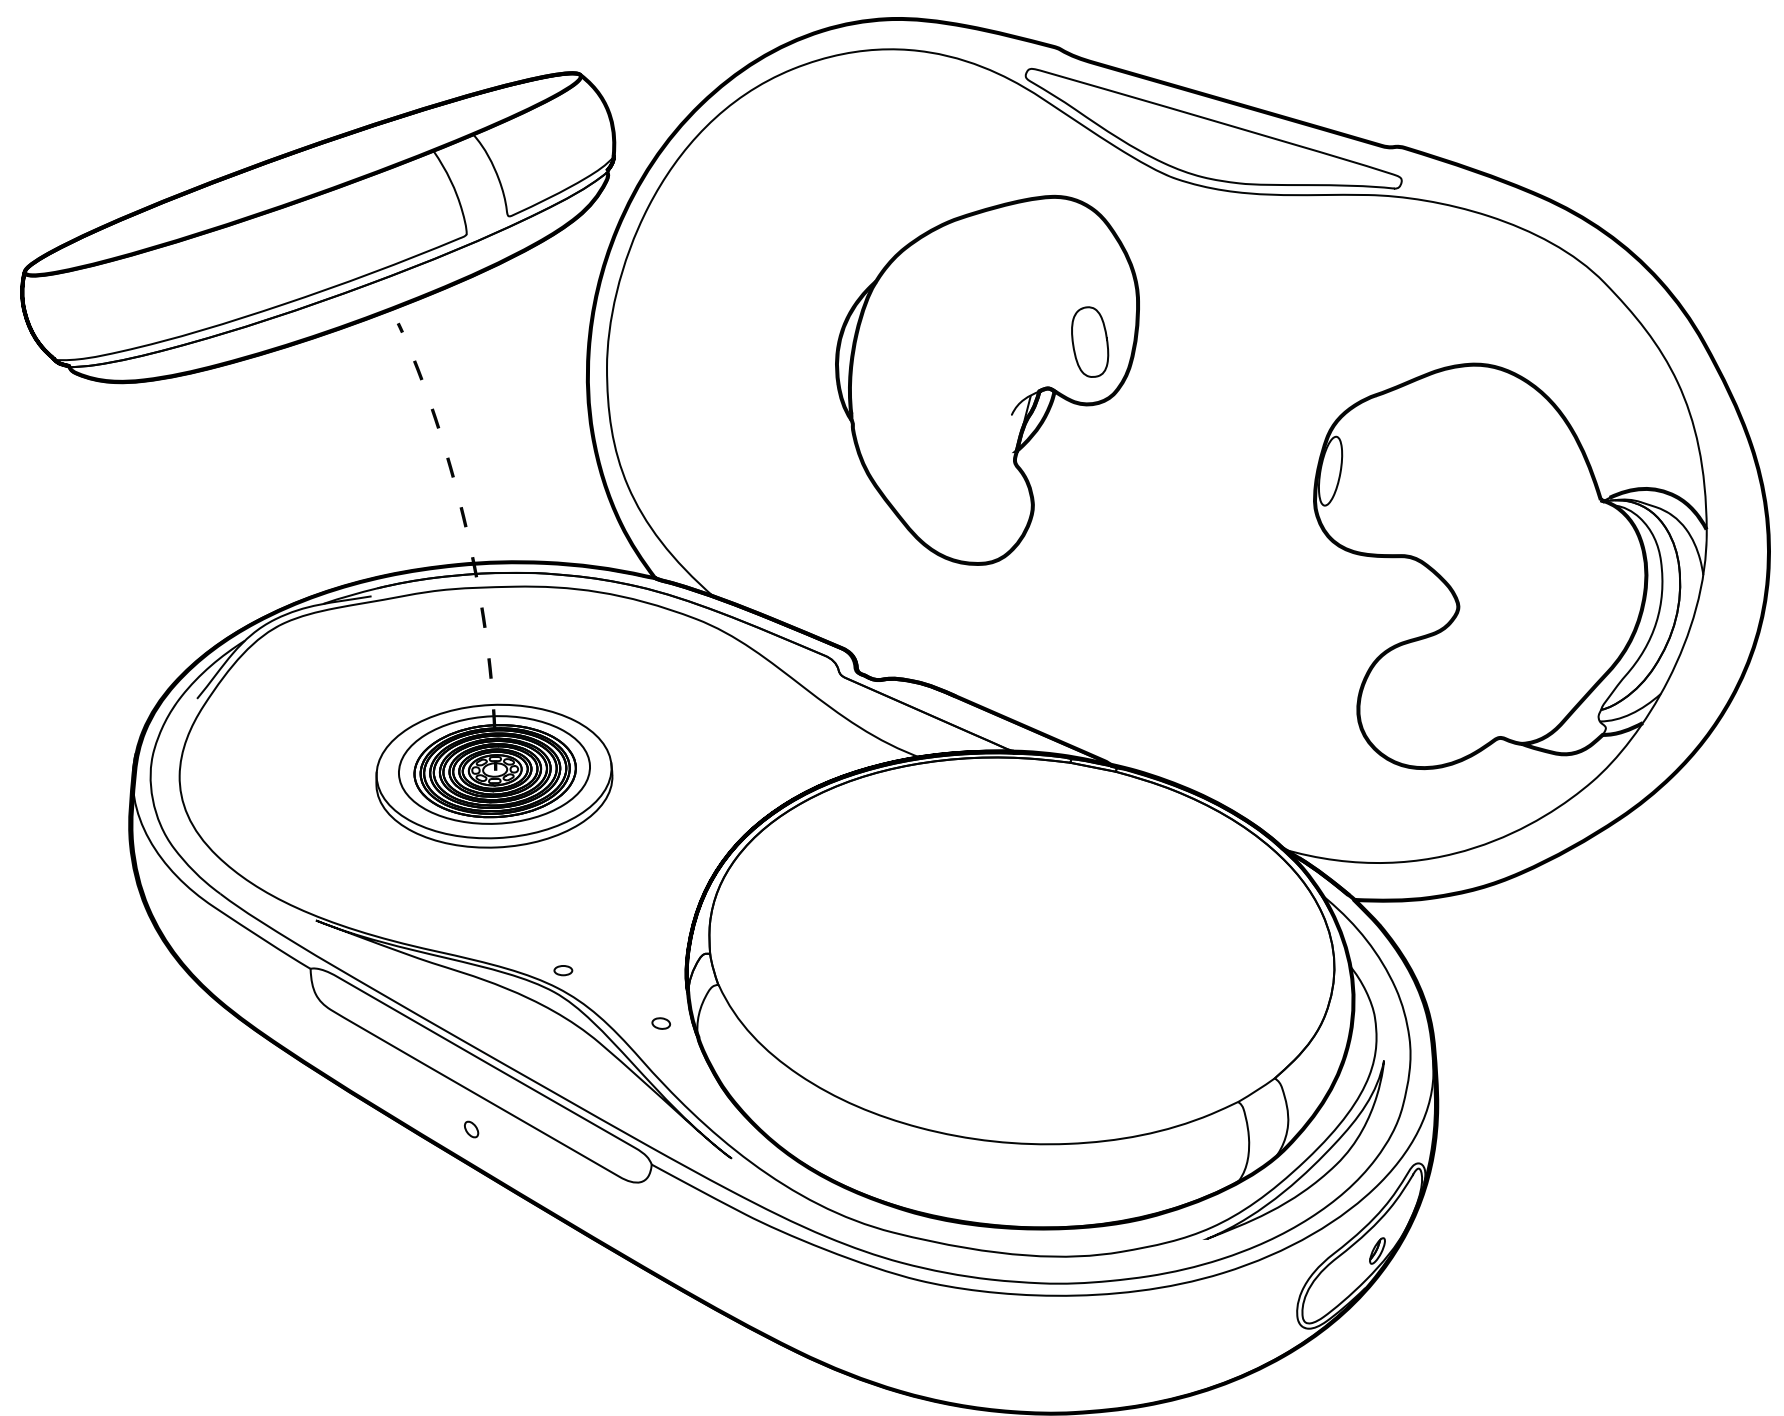

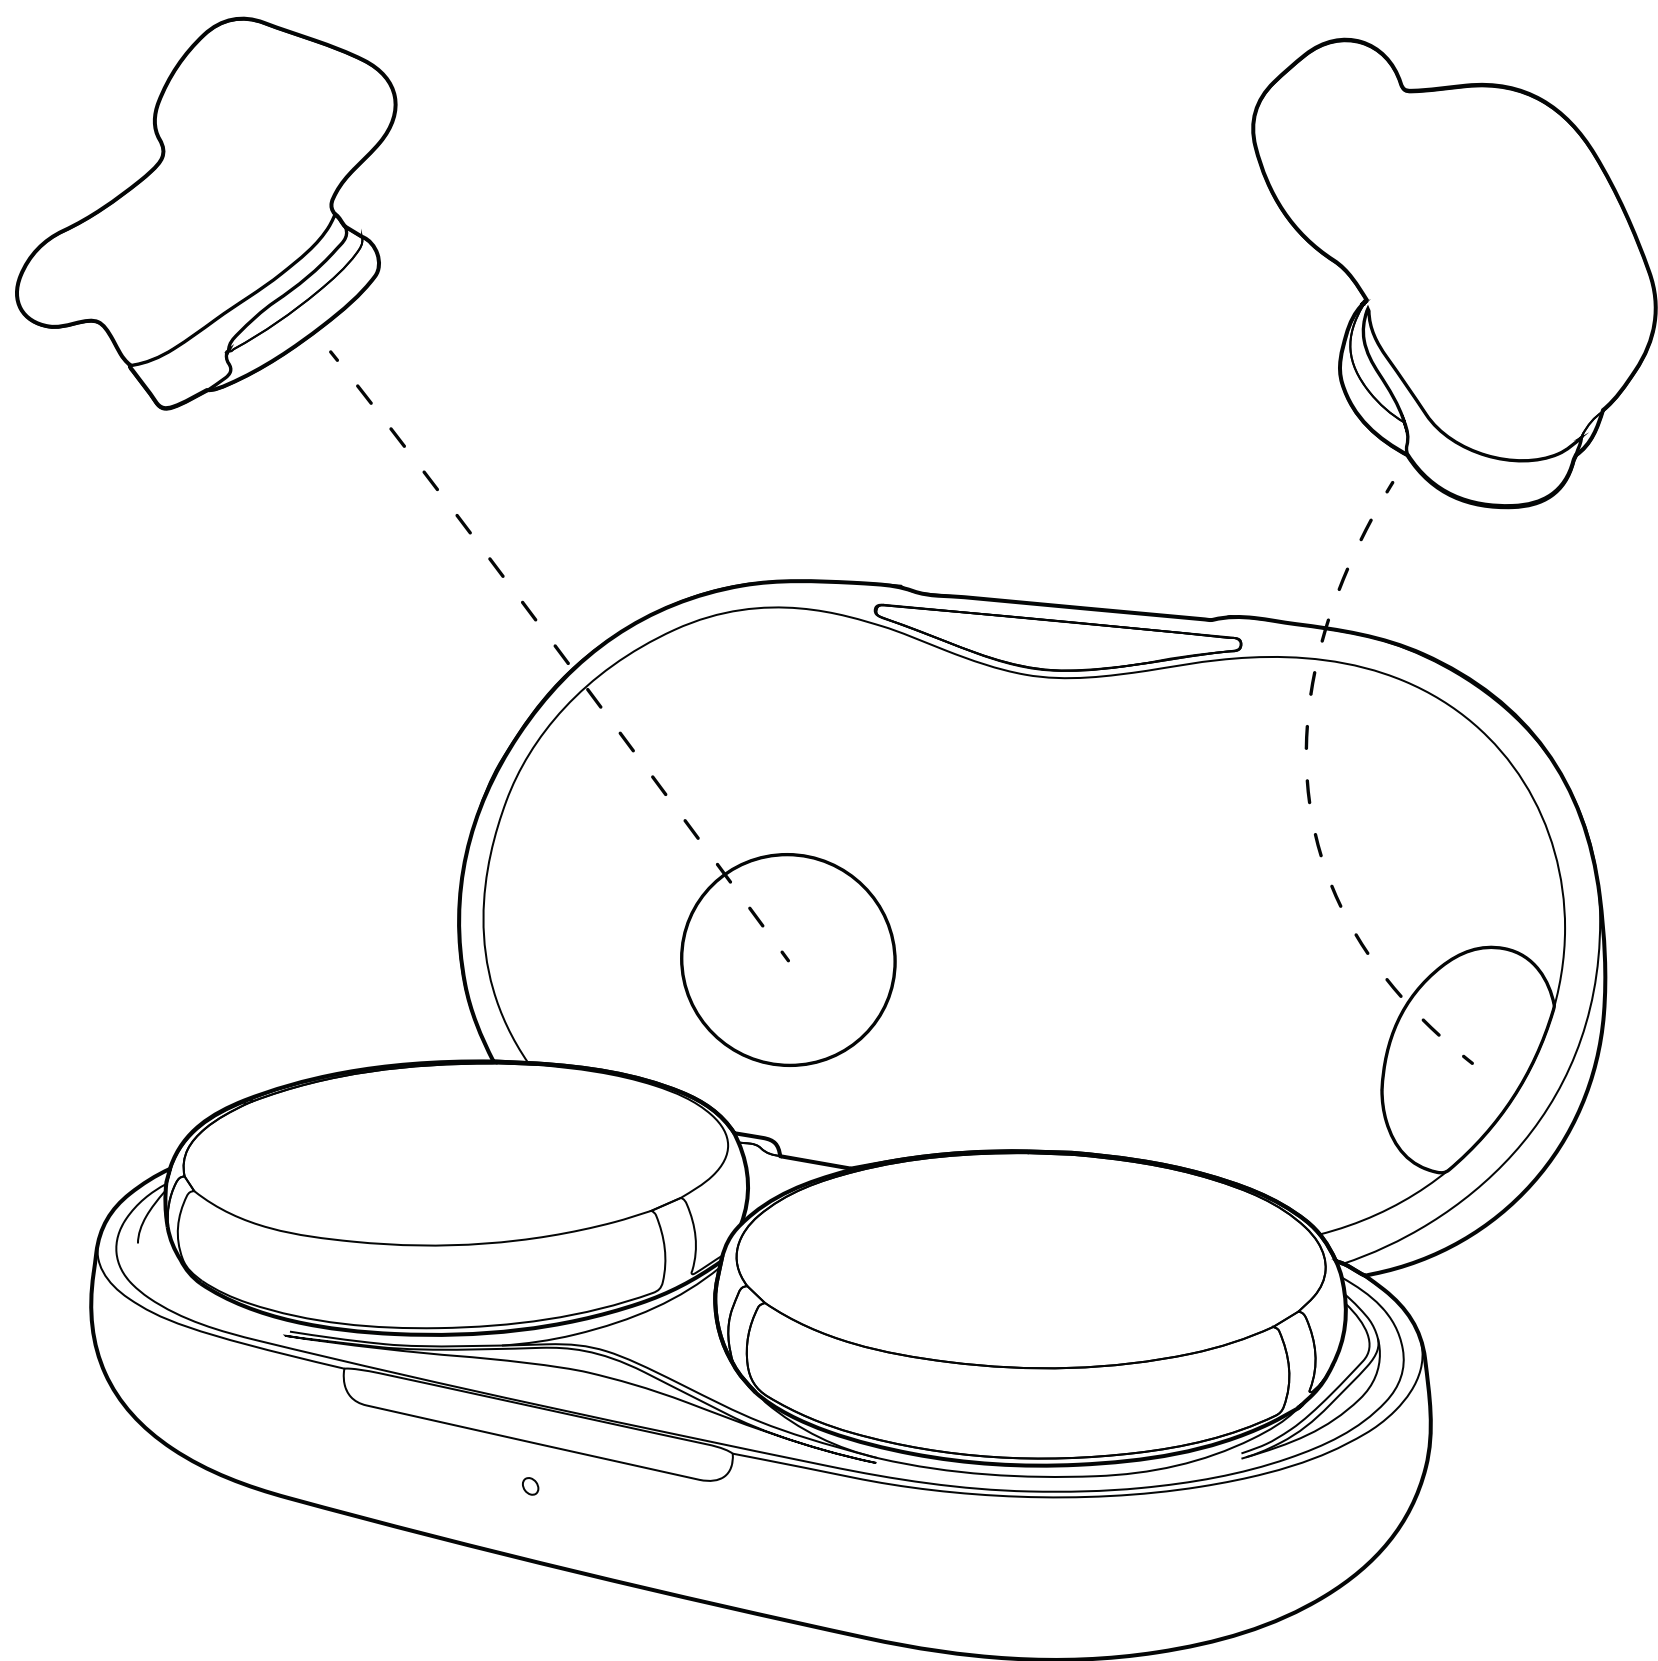

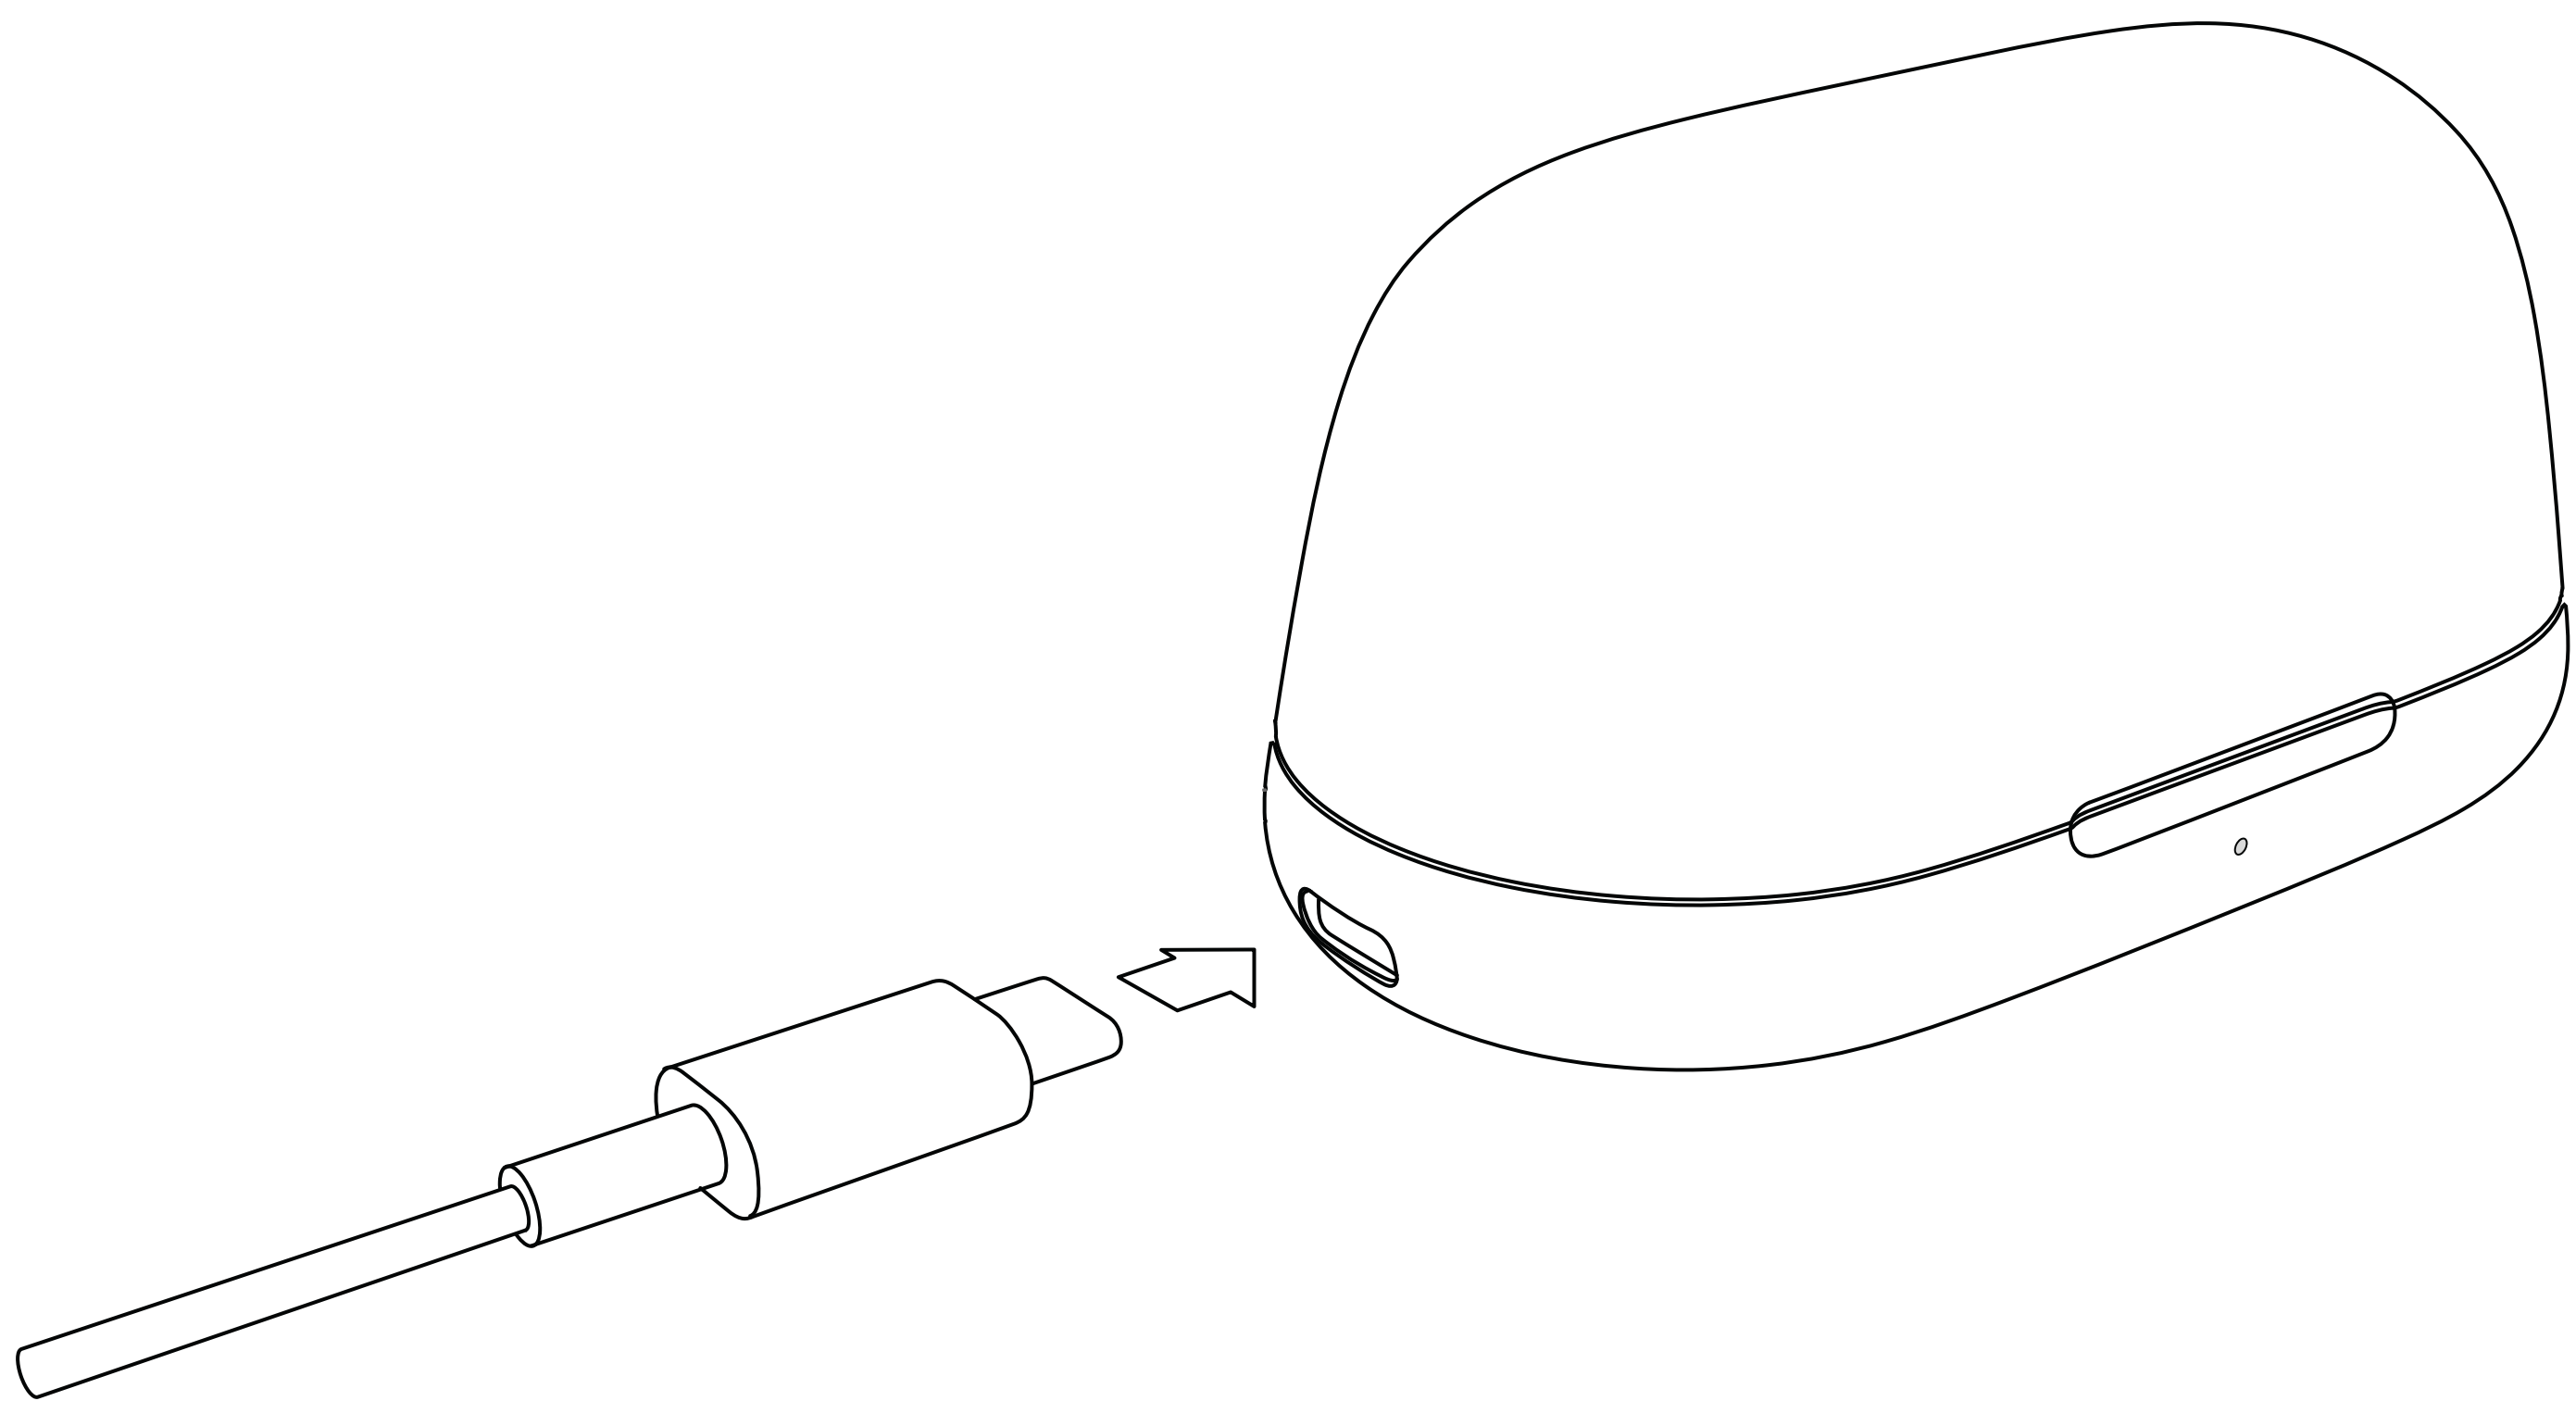

Caps

Stow pouch

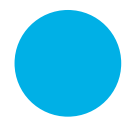

Pair

Pair **Audio Computer Discs**

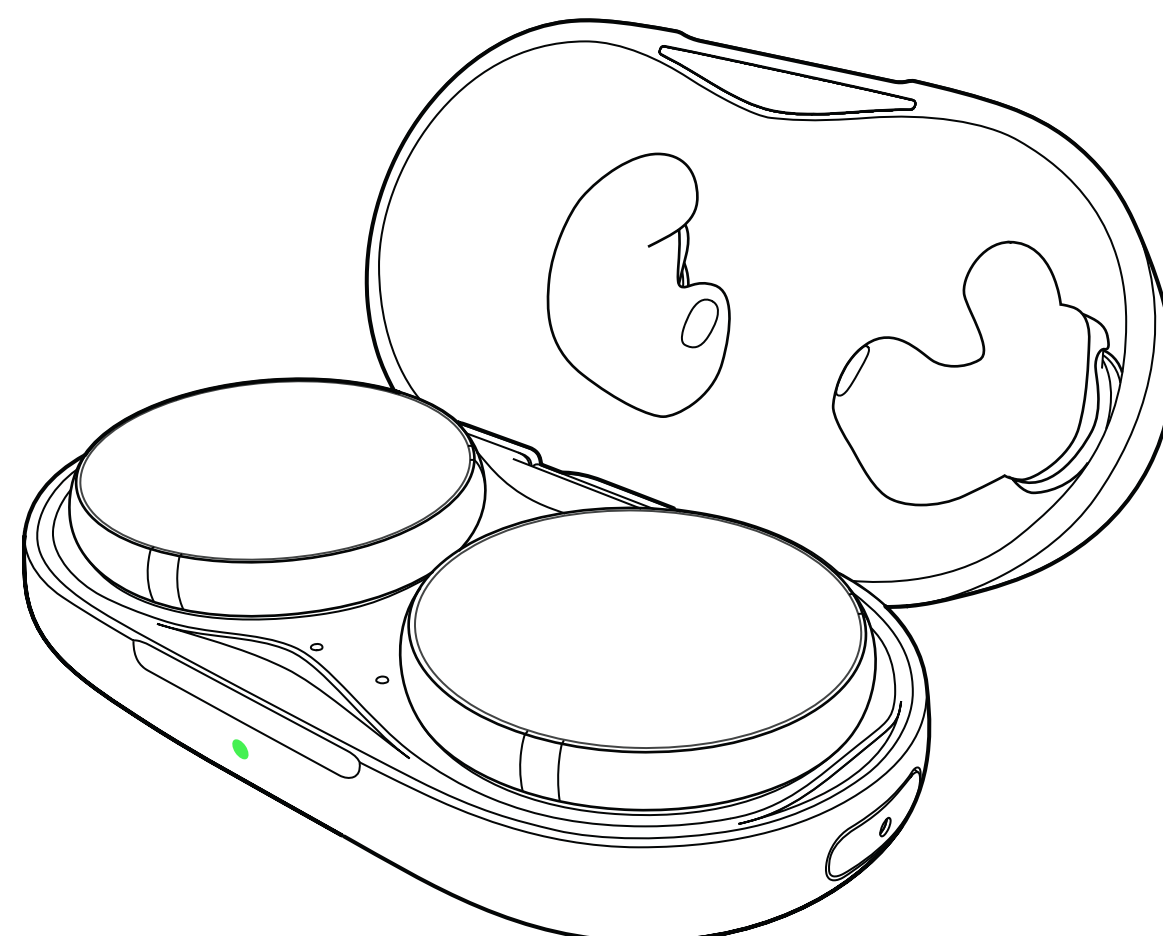

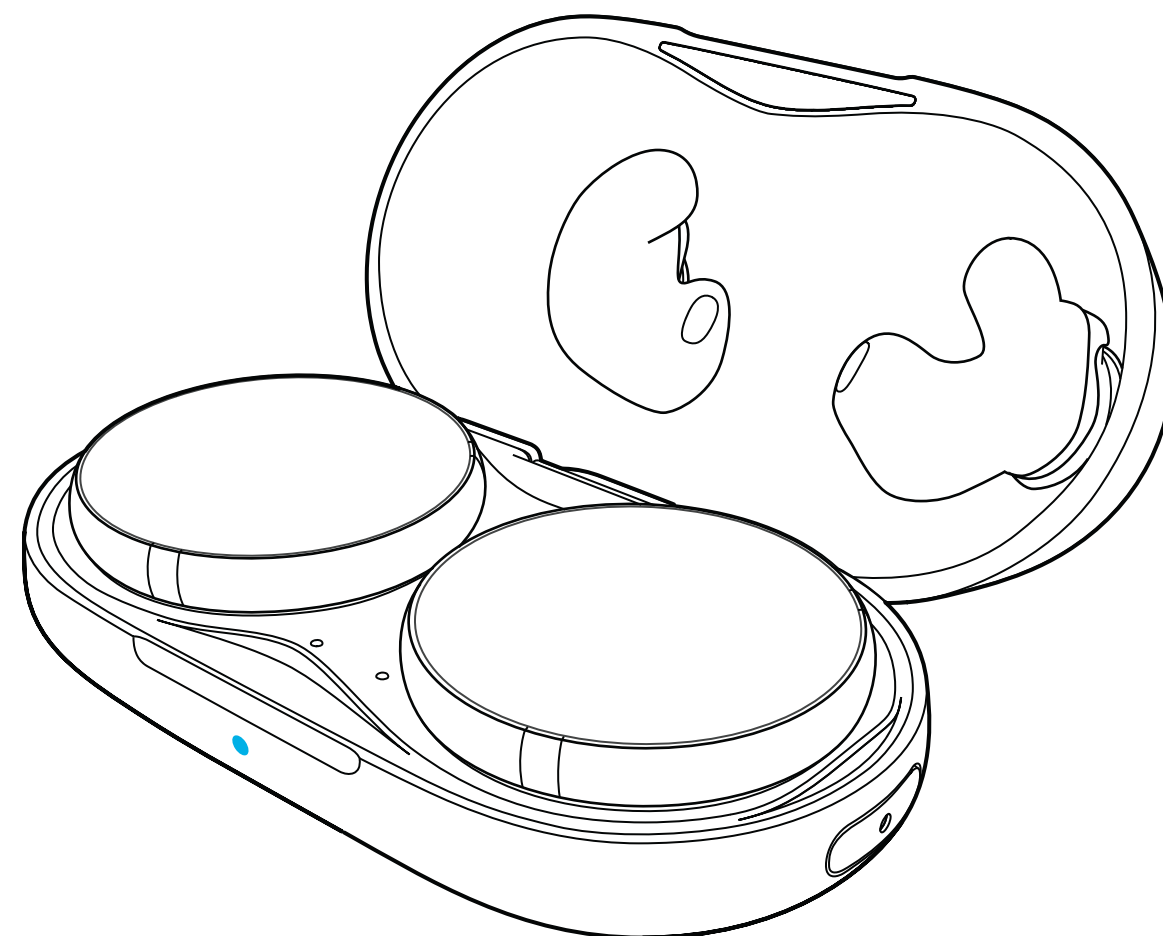

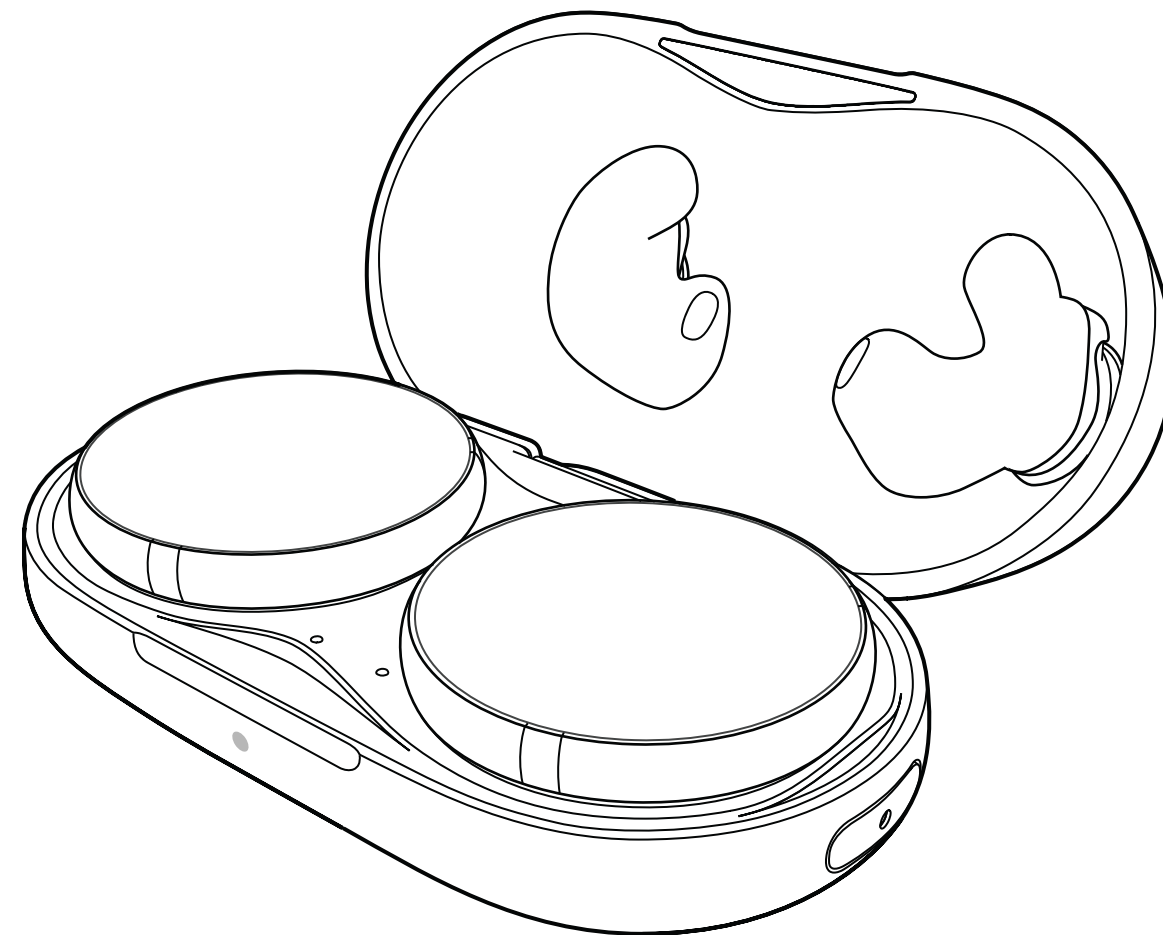

To pair the iyO Ones with a device, press and hold the button on the open charge case for three seconds and then release.

As you hold the button, the external charge case LED will turn solid blue for three seconds, and then blink blue to show pairing is in progress.

The charge case external LED will blink green once when pairing is complete.

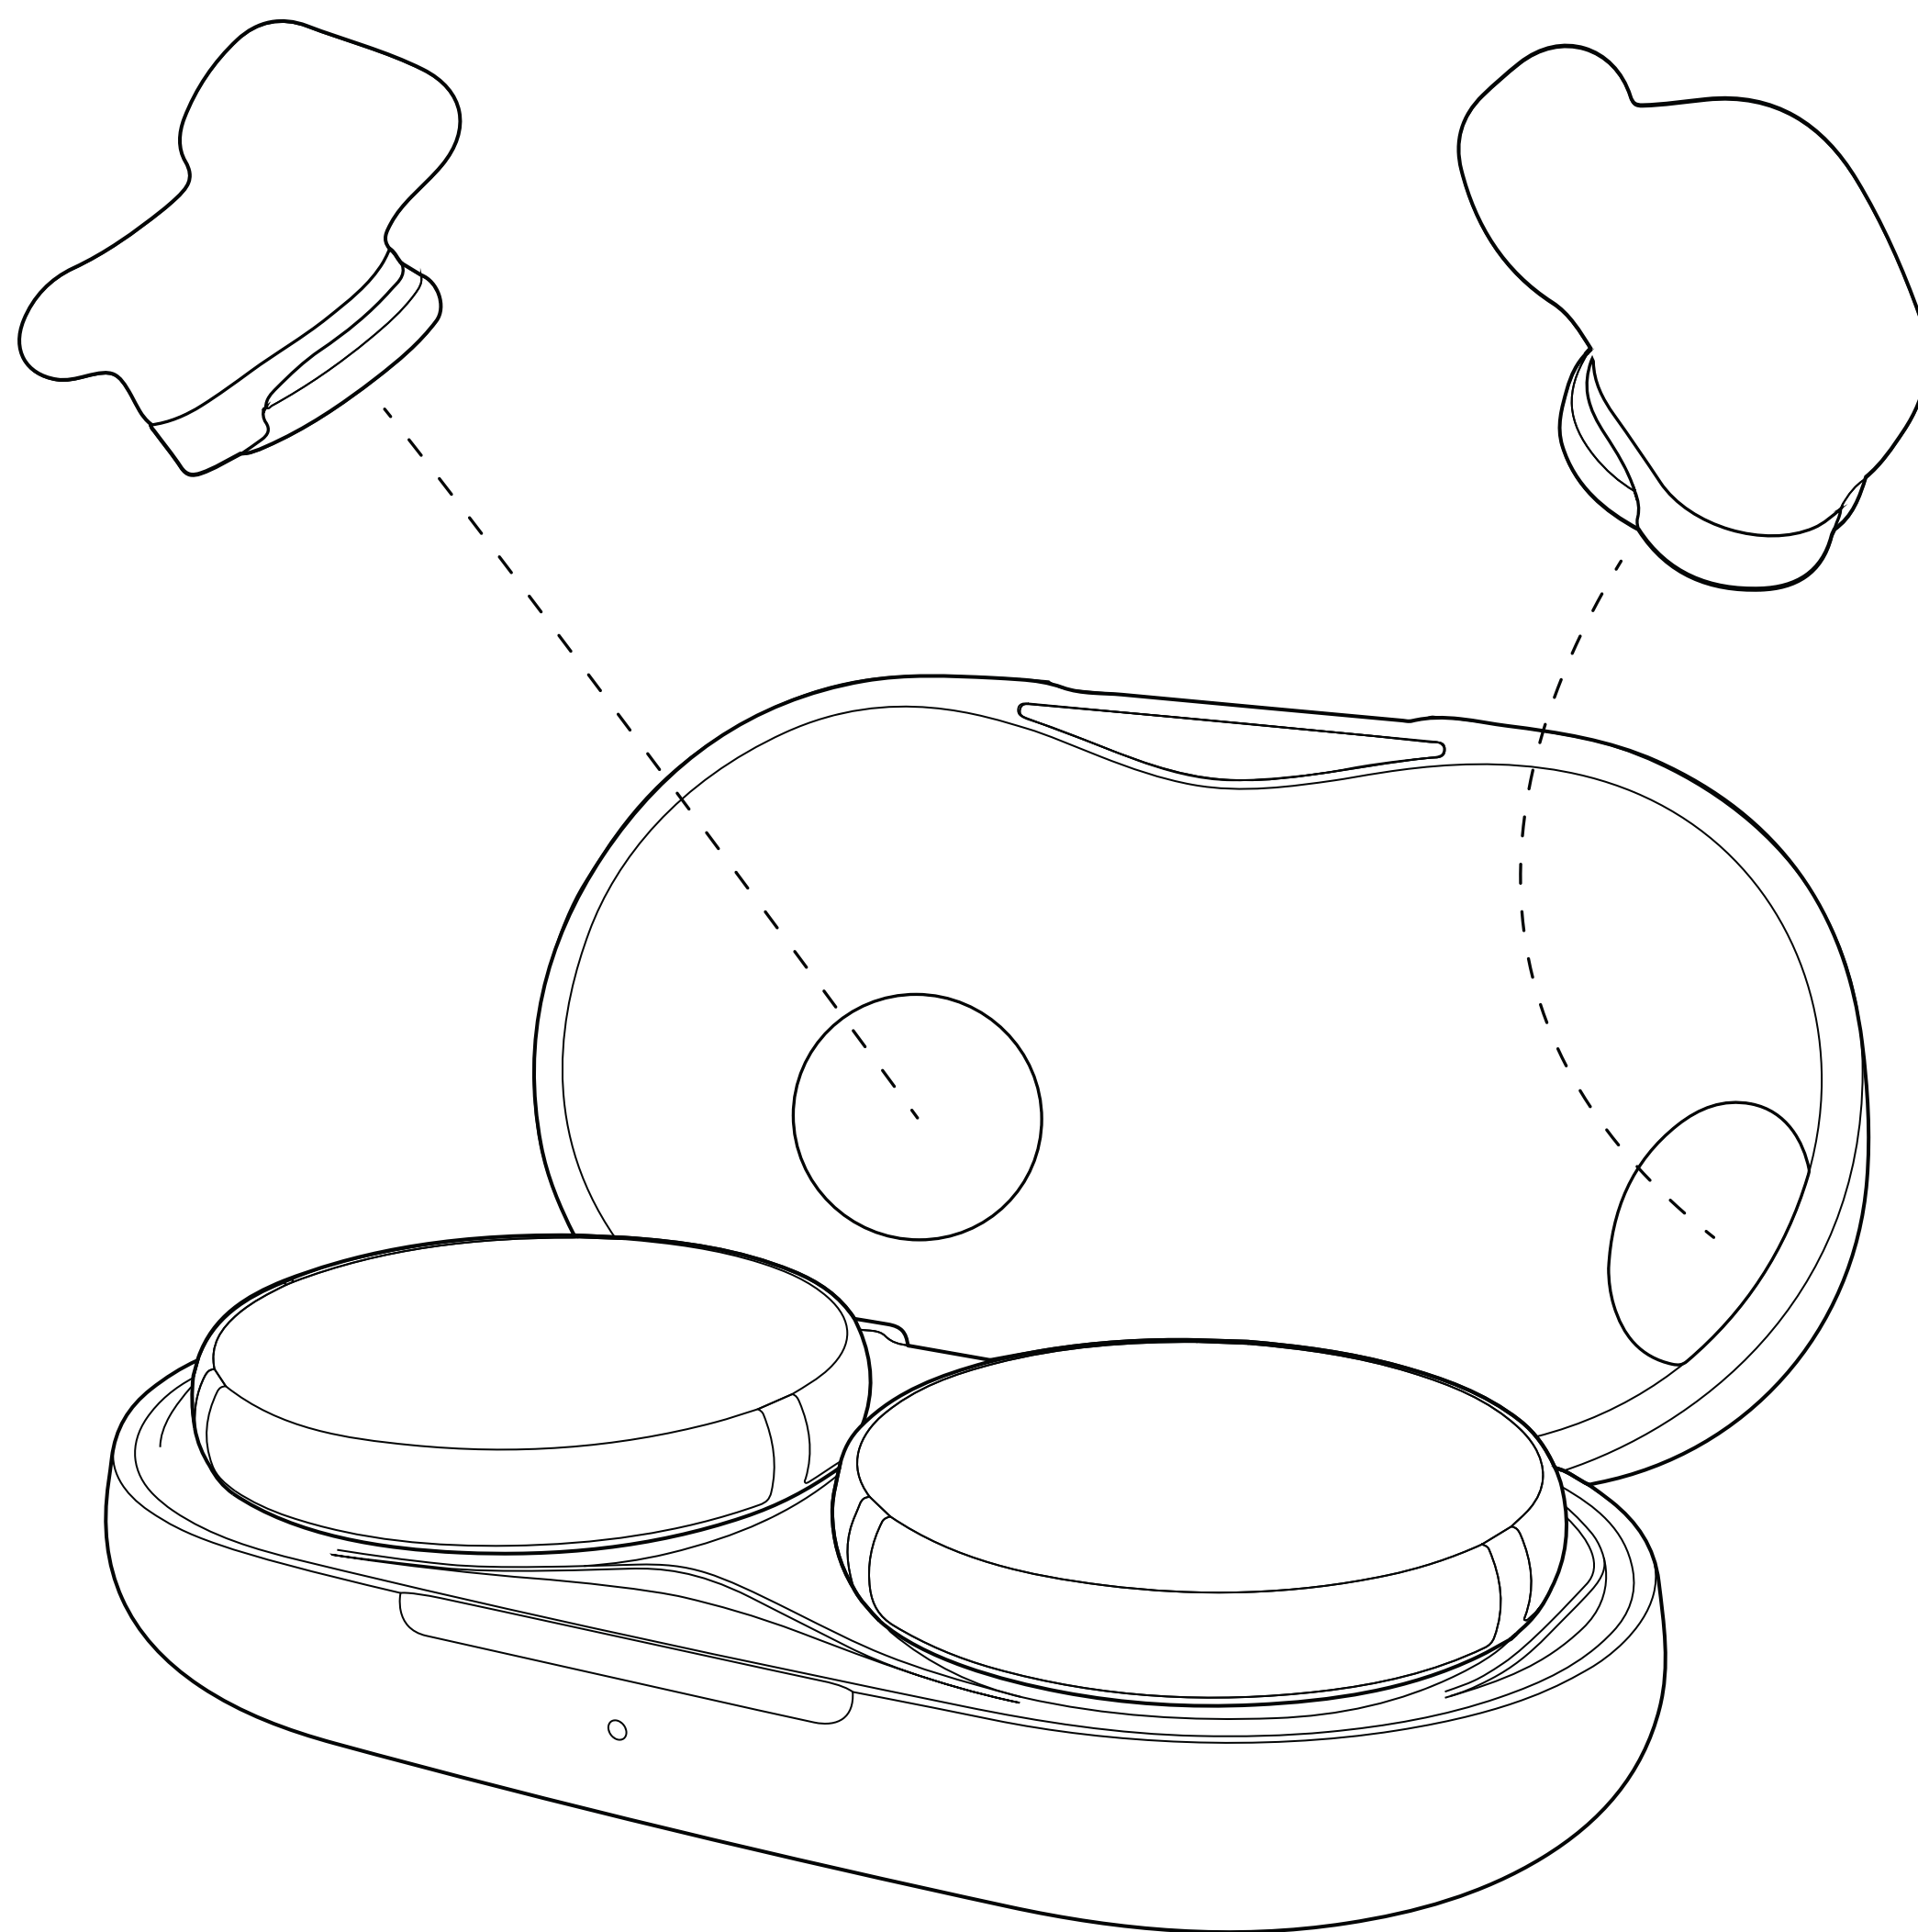

Wear

Remove the custom in-ears

Wear

Find your left vs right

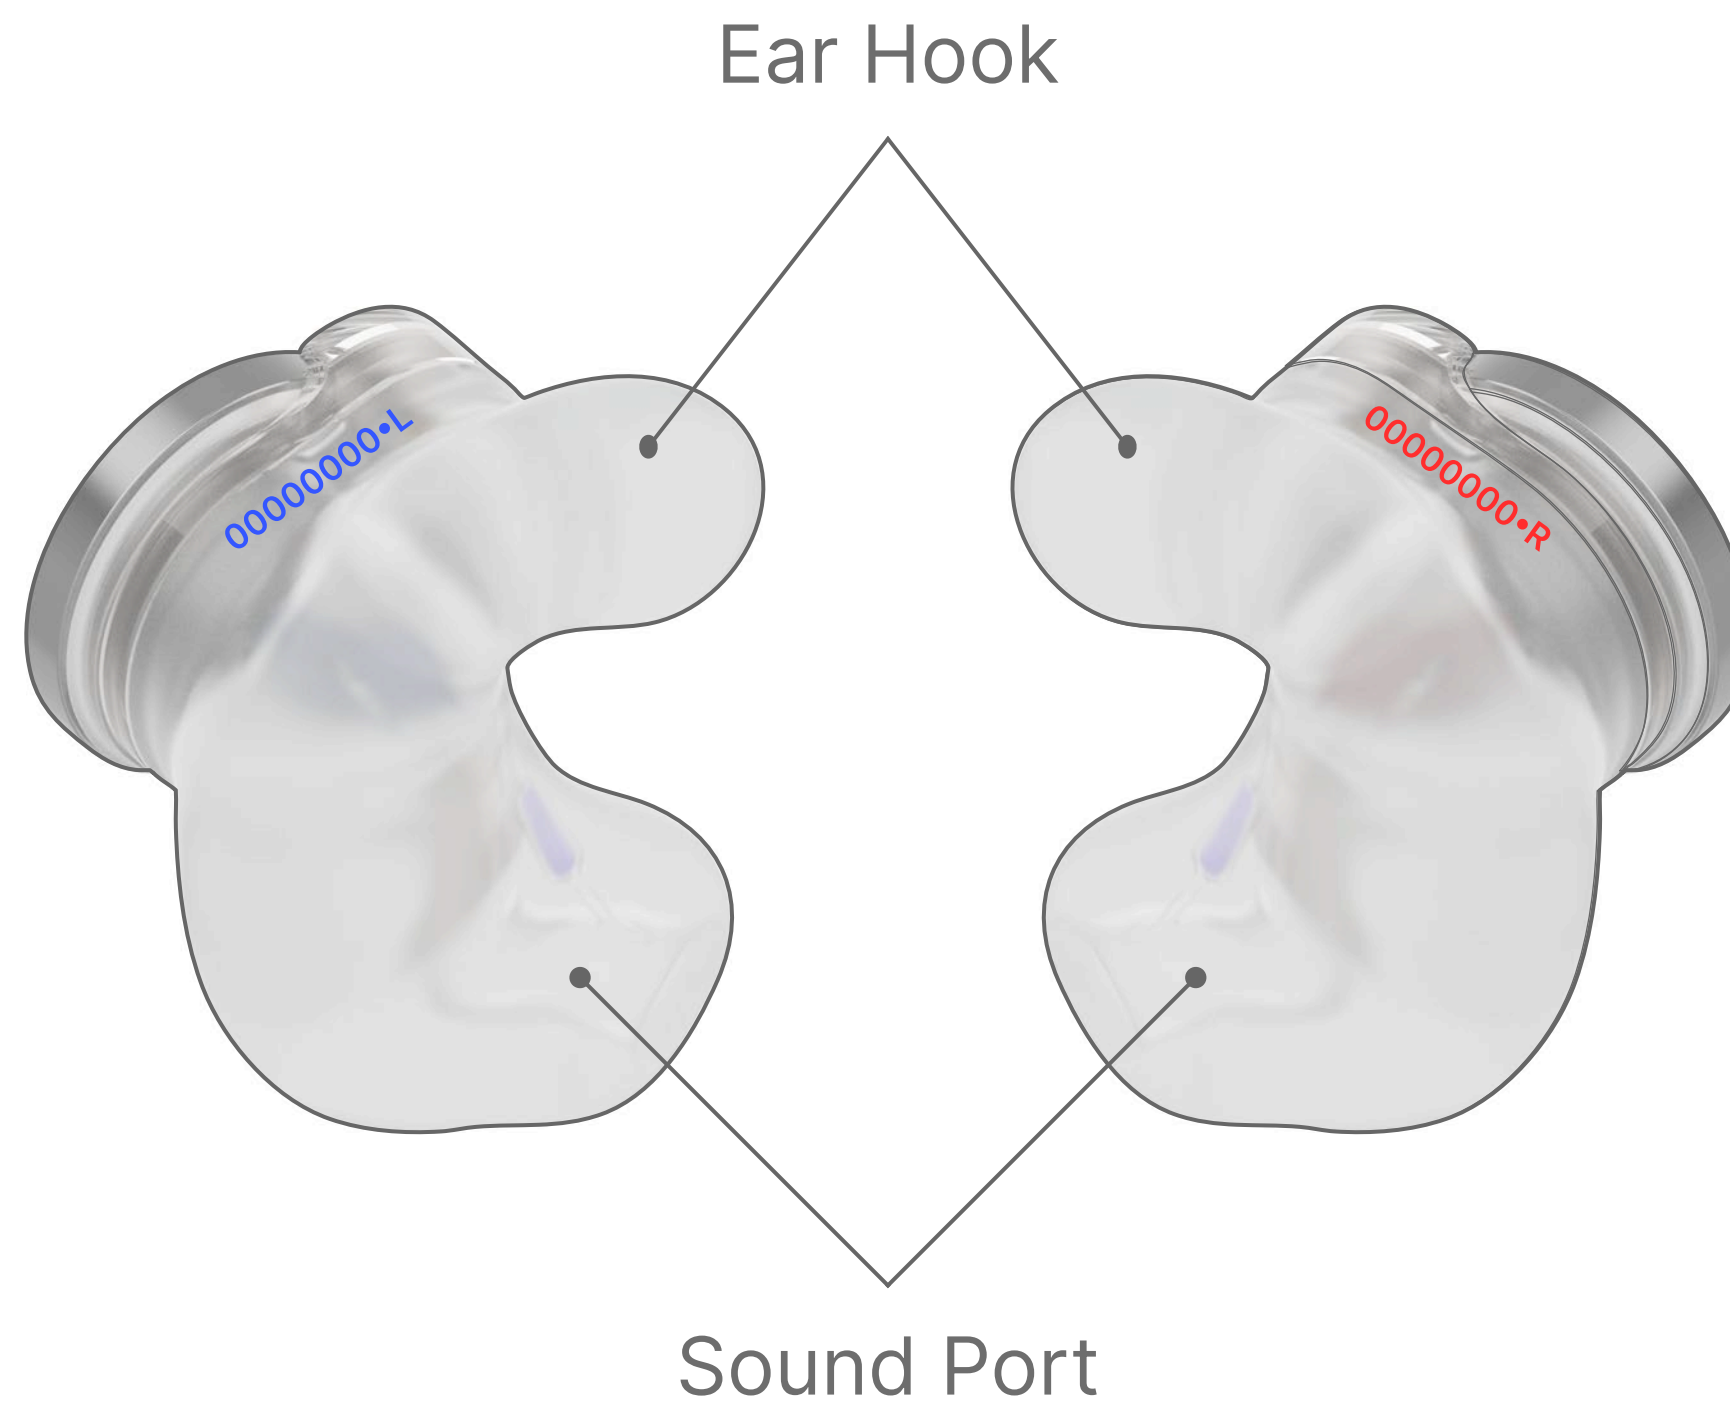

Identify your custom in-ears by the serial number. The one labeled blue “L” is for the left ear. The one labeled red “R” is for the right ear (Red=Right).

Left

Serial number
00000000•L

Right

Serial number
00000000•R

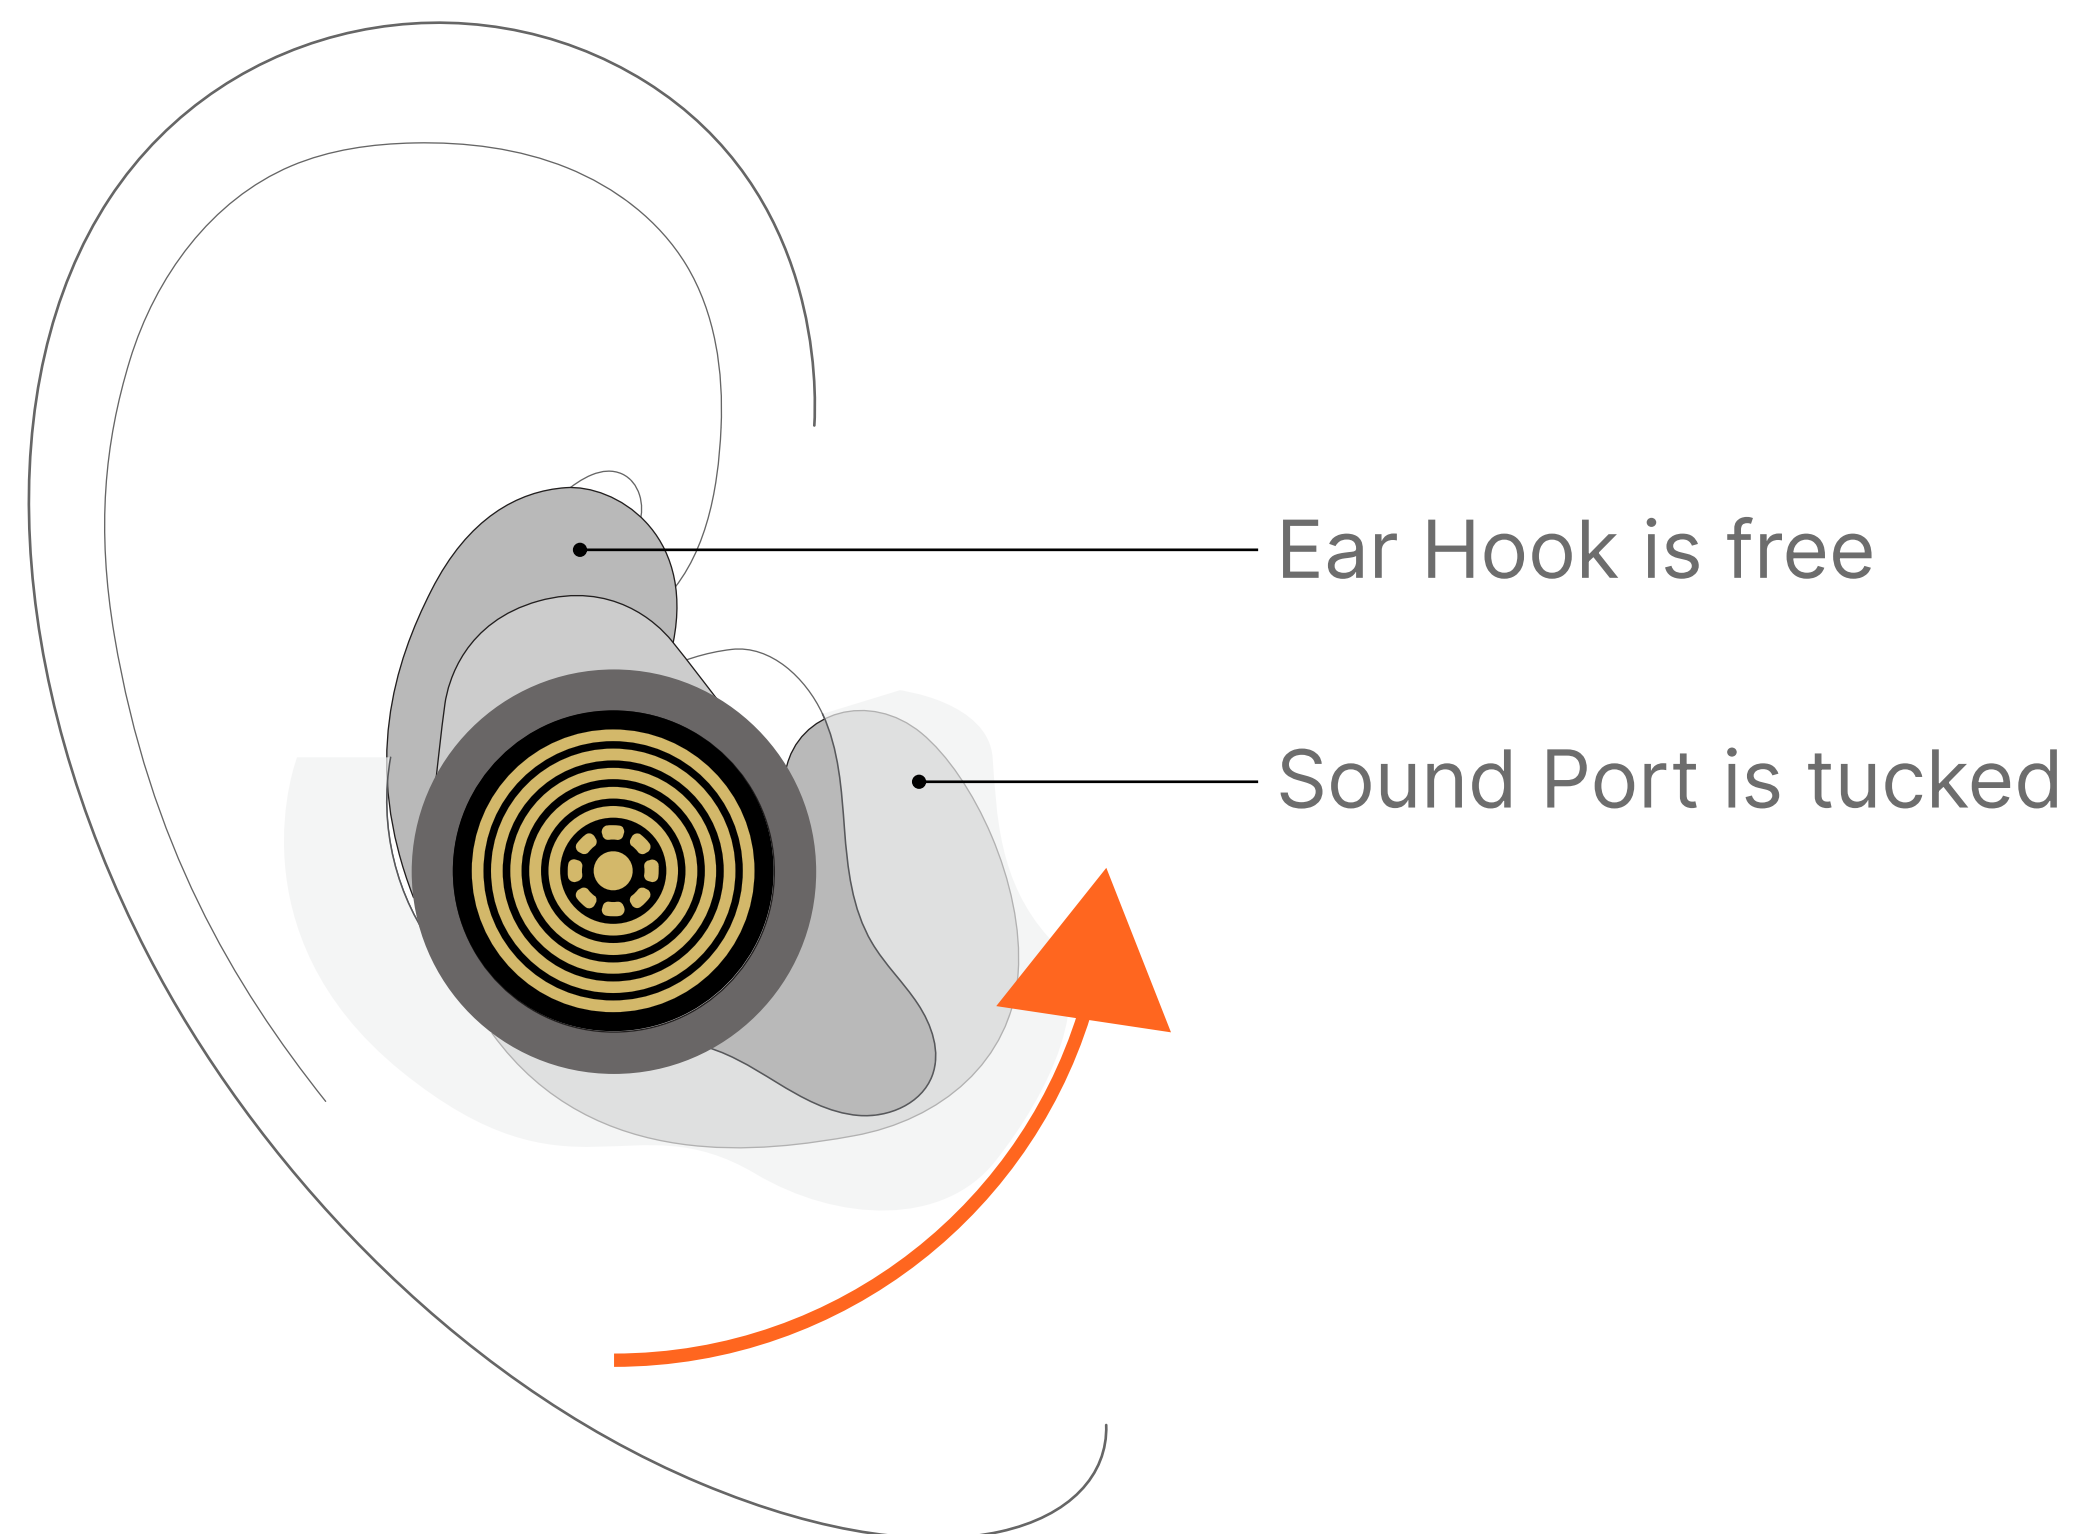

Wear

Place in ears

Locate the Ear Hook and Sound Port on the custom in-ears.

When placing them in your ears, keep the Ear Hook at the top and Sound Port at the bottom.

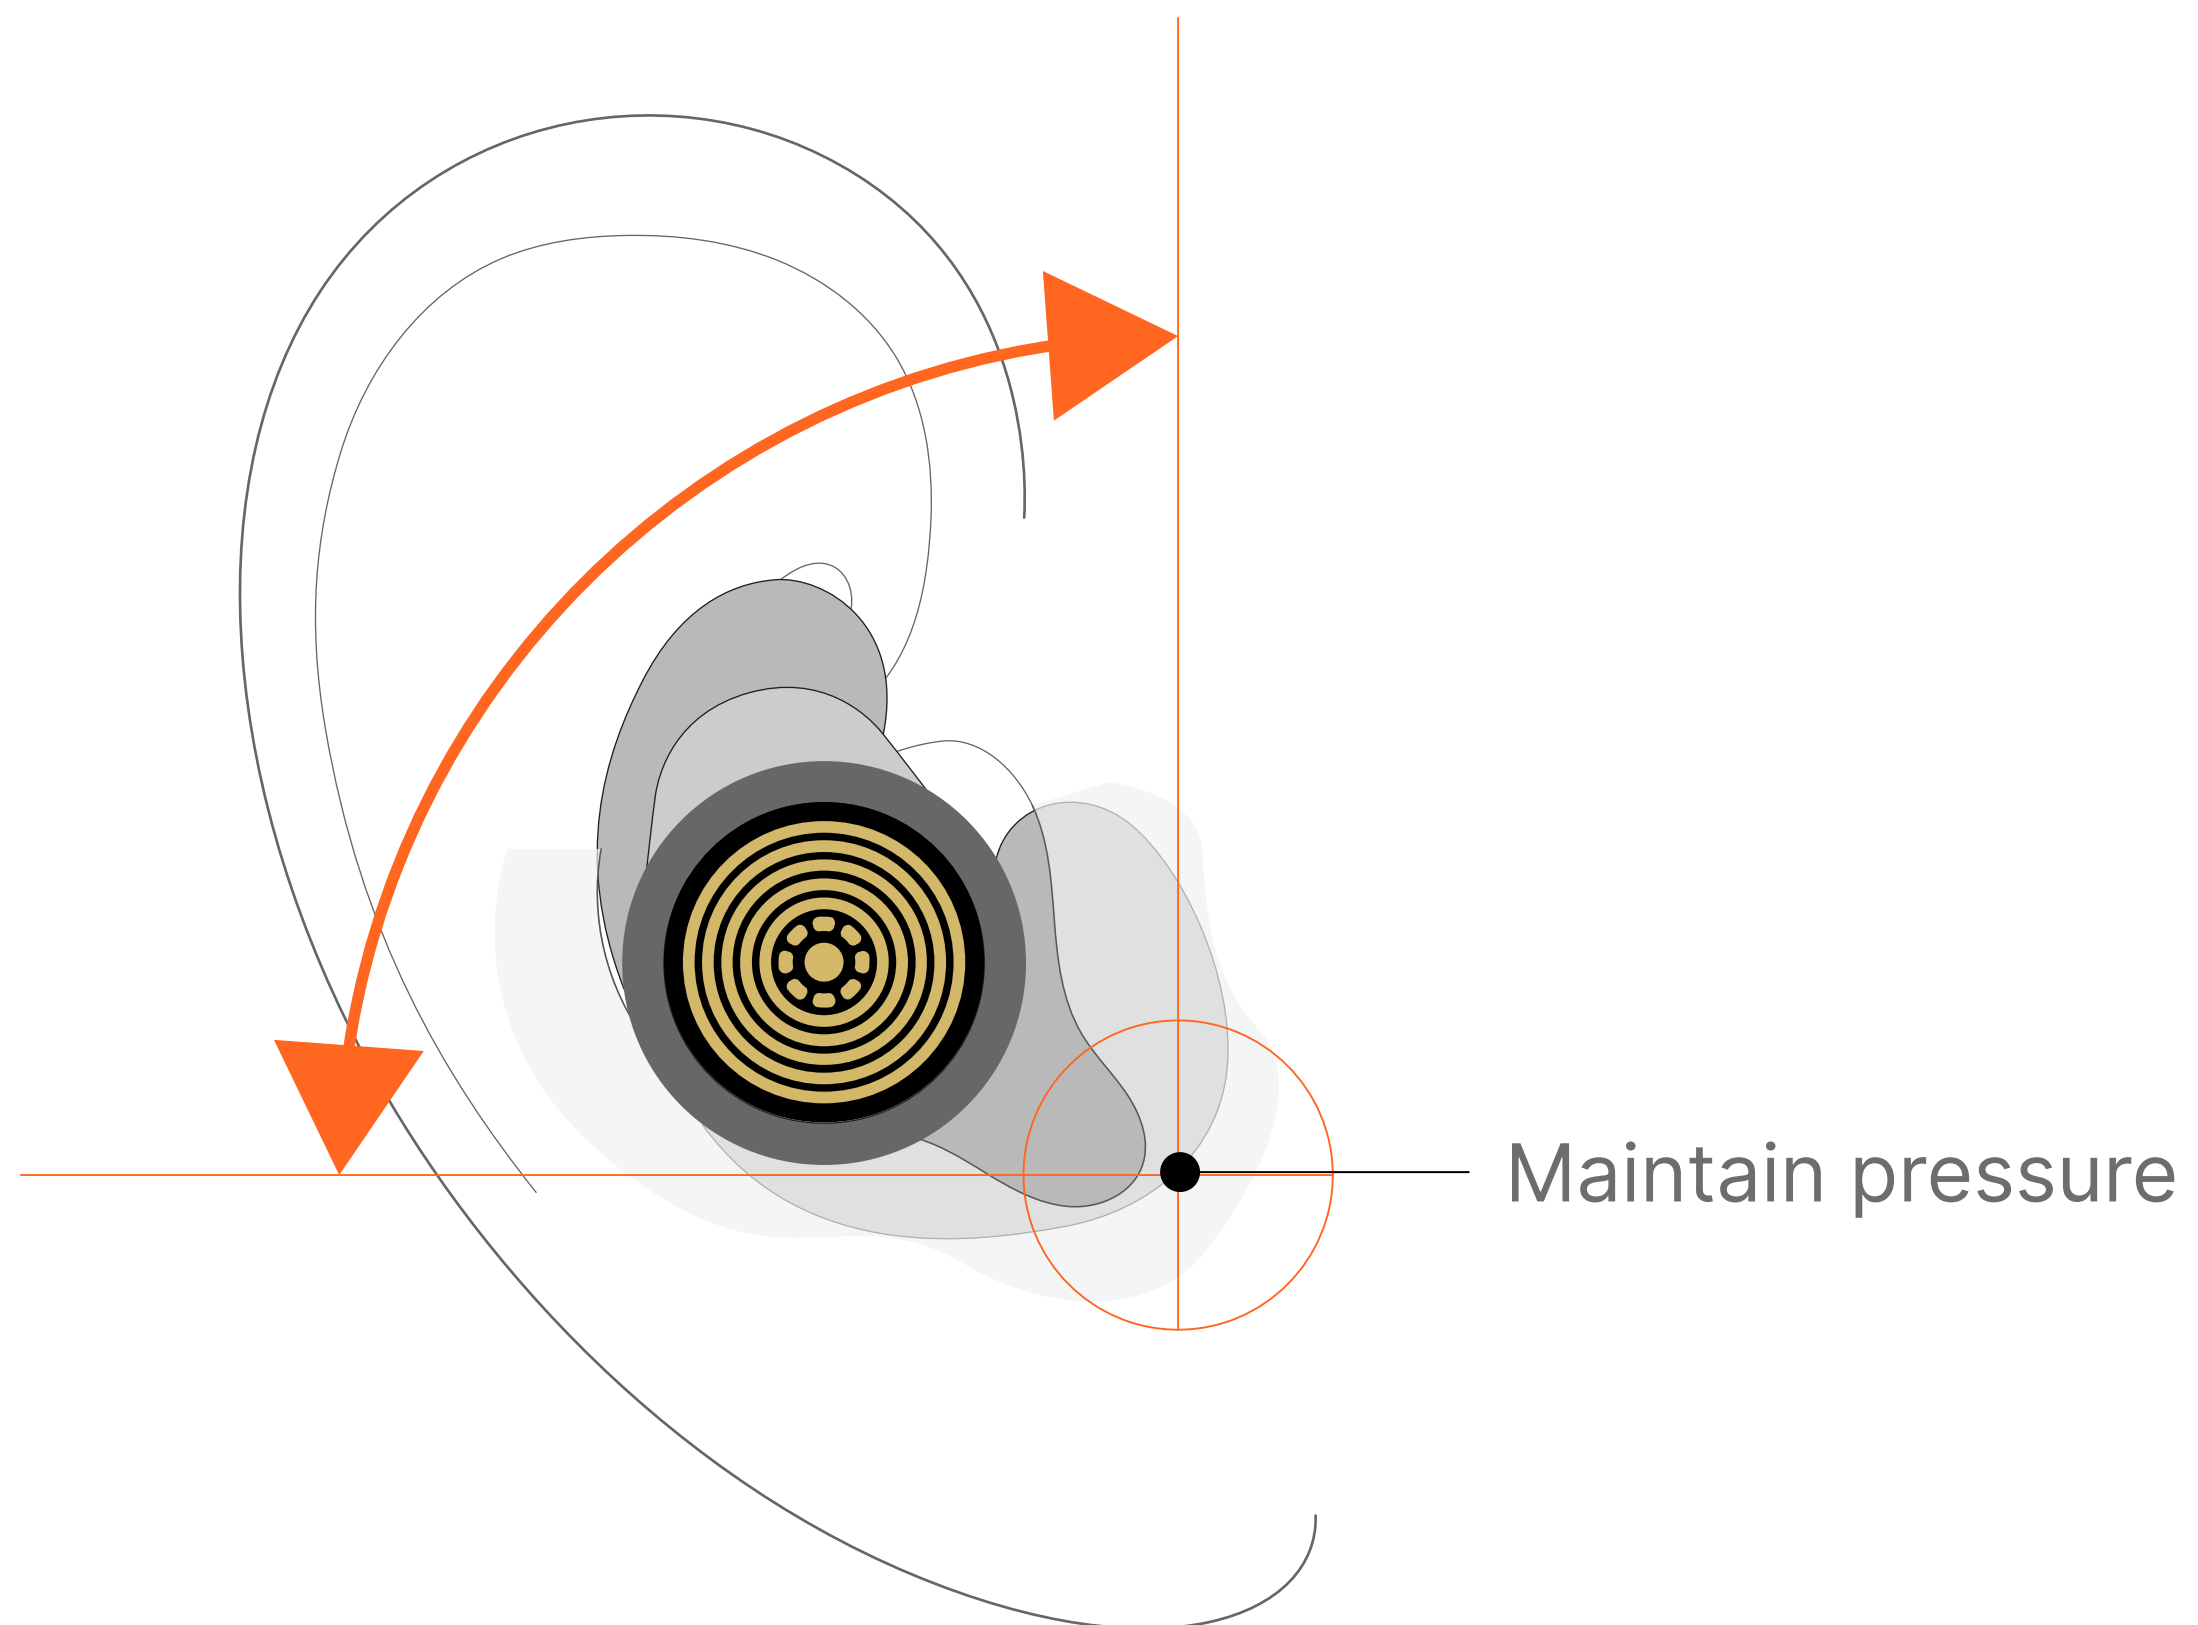

First, insert the Sound Port. Then rotate the custom in-ear as shown below.

Wear

Press and rotate

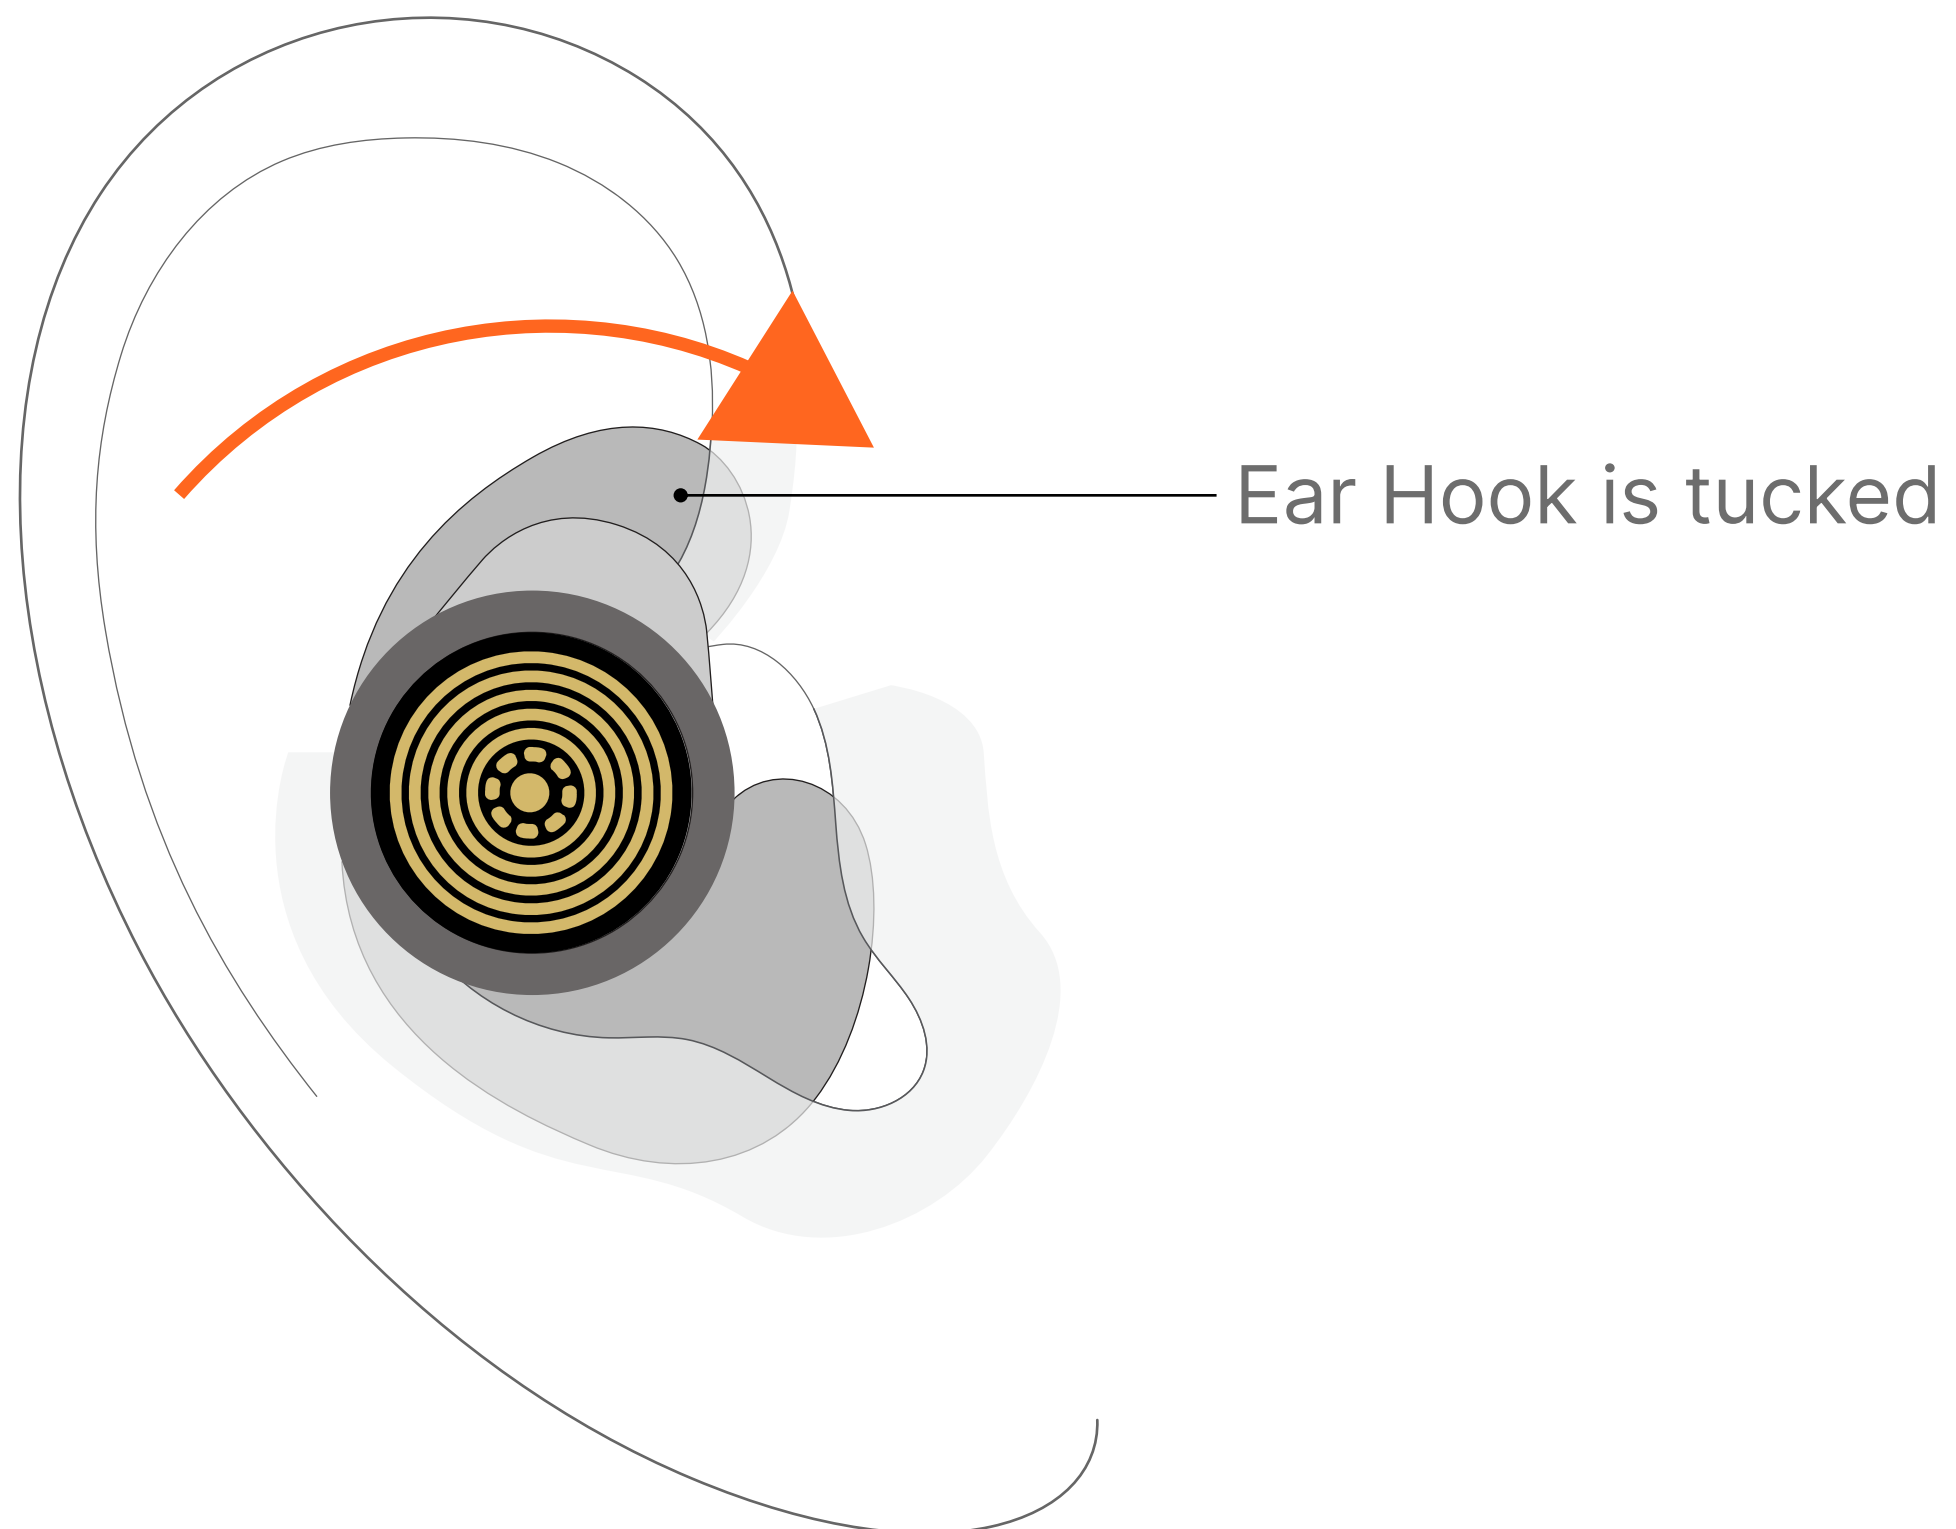

While maintaining a gentle, inward pressure to the Sound Port, rotate the custom in-ear back and forth to ensure a proper seal.

Wear

Tuck the Ear Hook

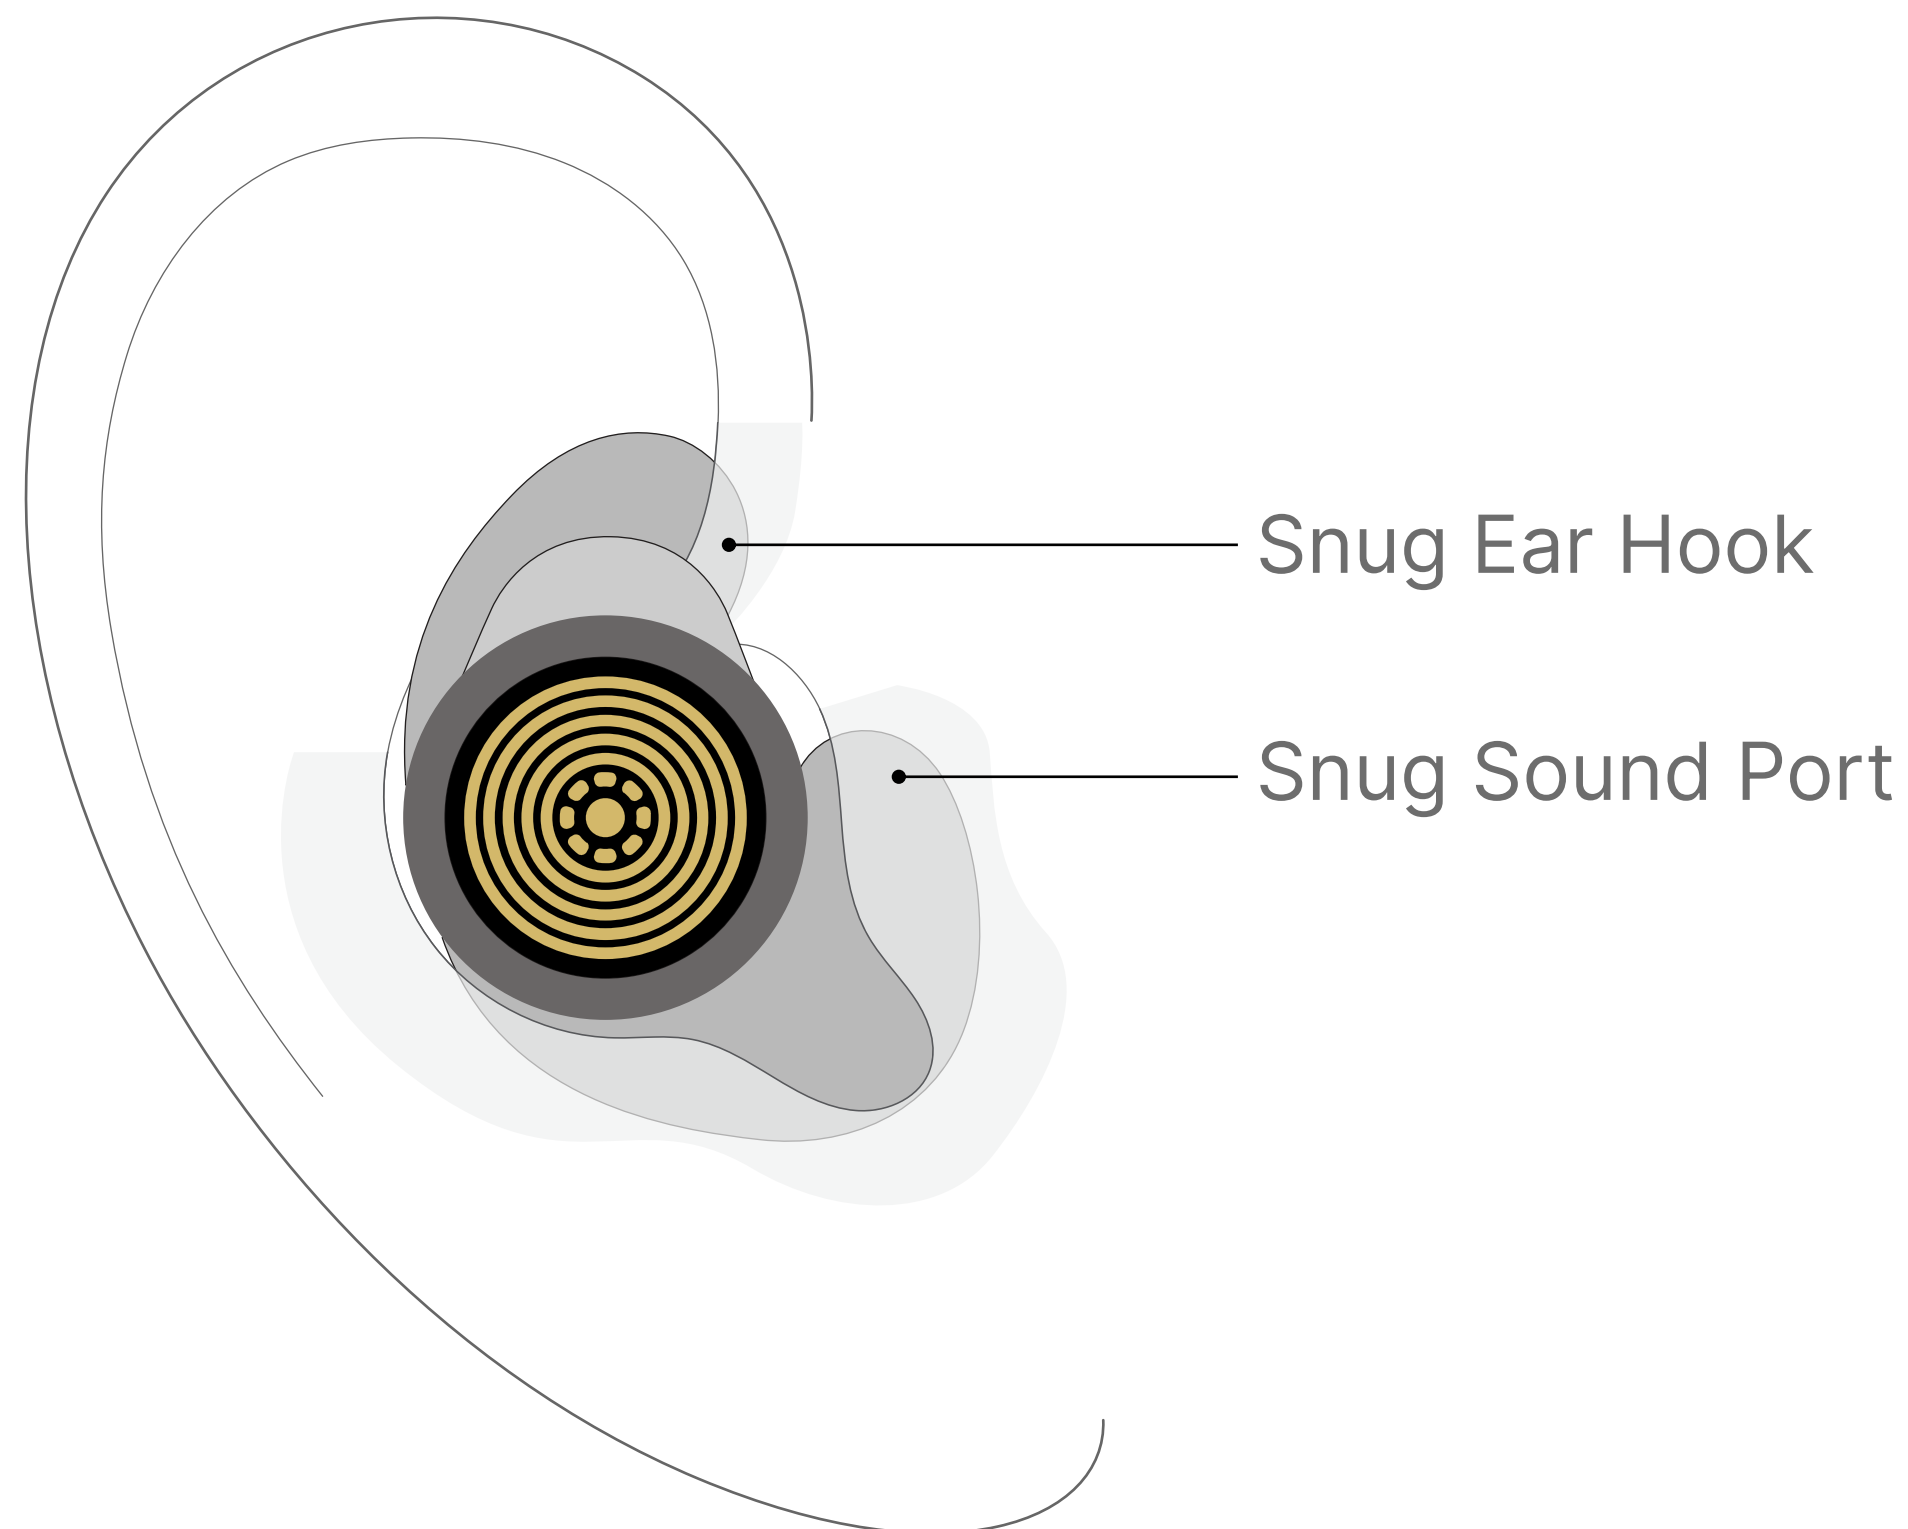

Once your environment sounds muffled, rotate the Ear Tip forward and tuck the Ear Hook behind the rear facing pocket just above your ear canal.

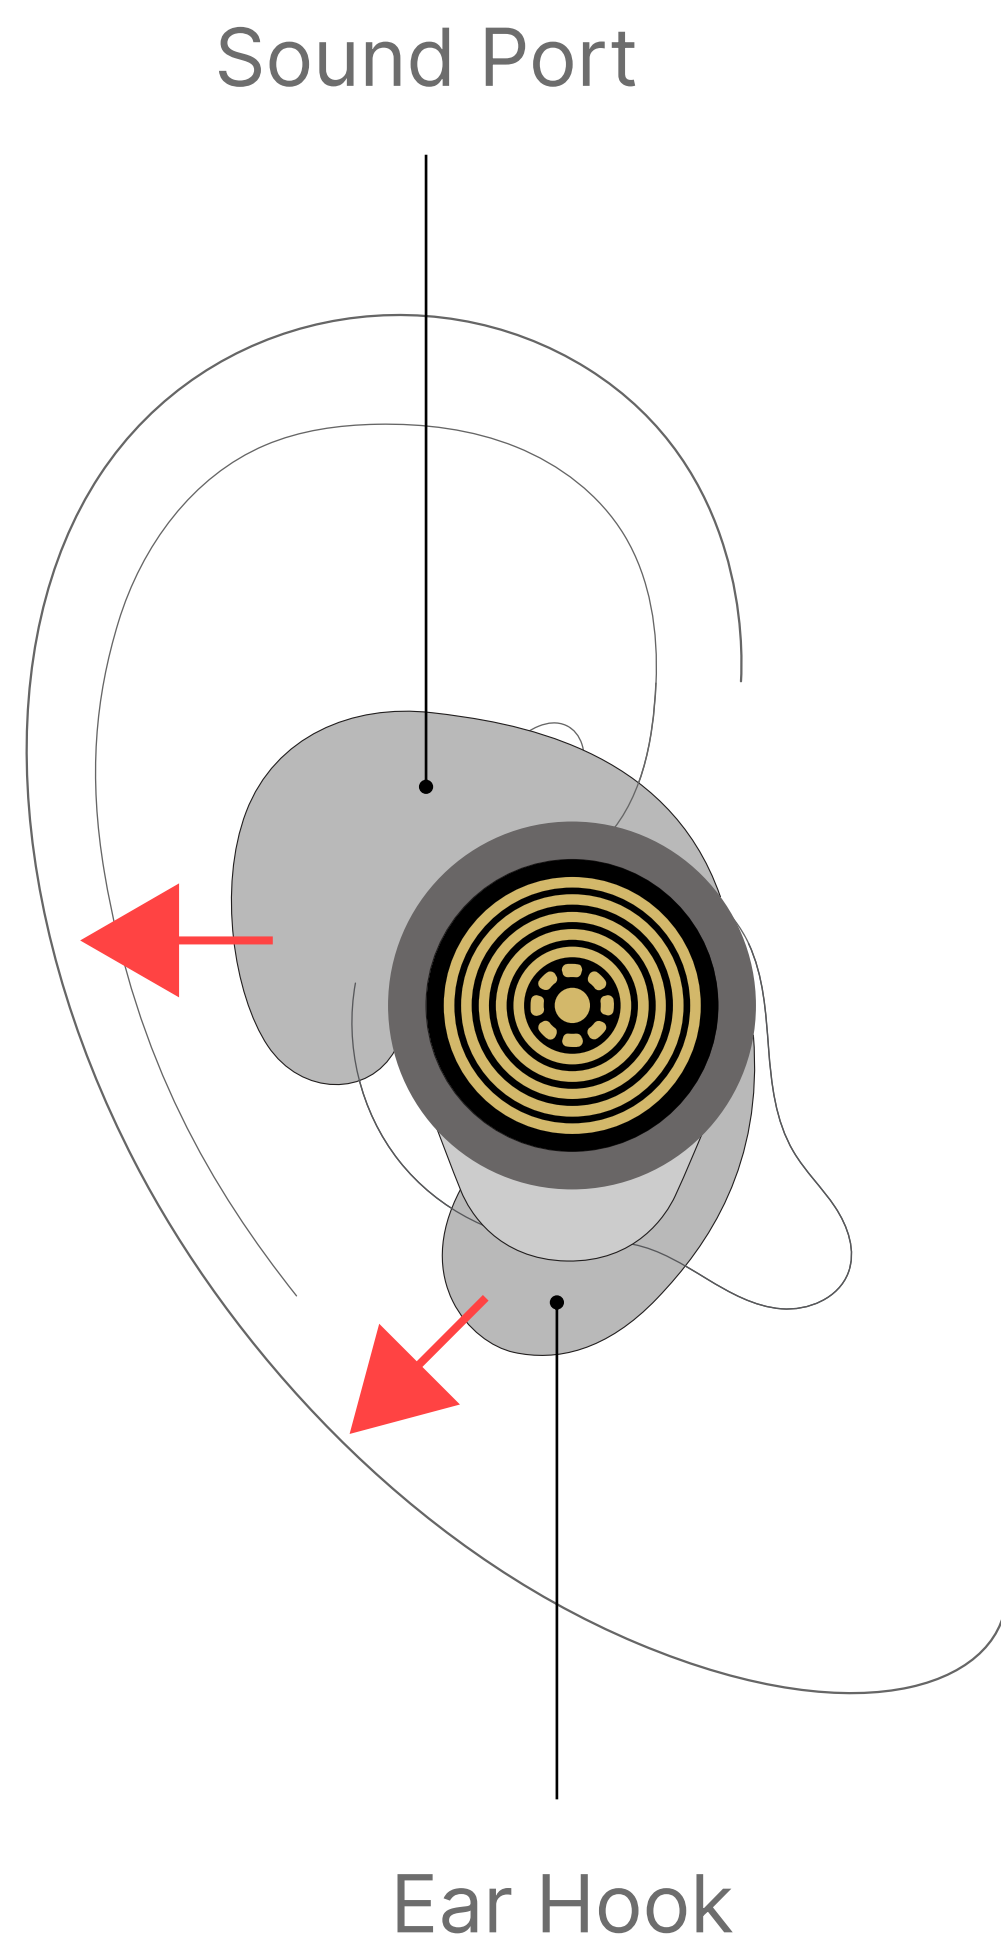

Wear

Check for a good seal

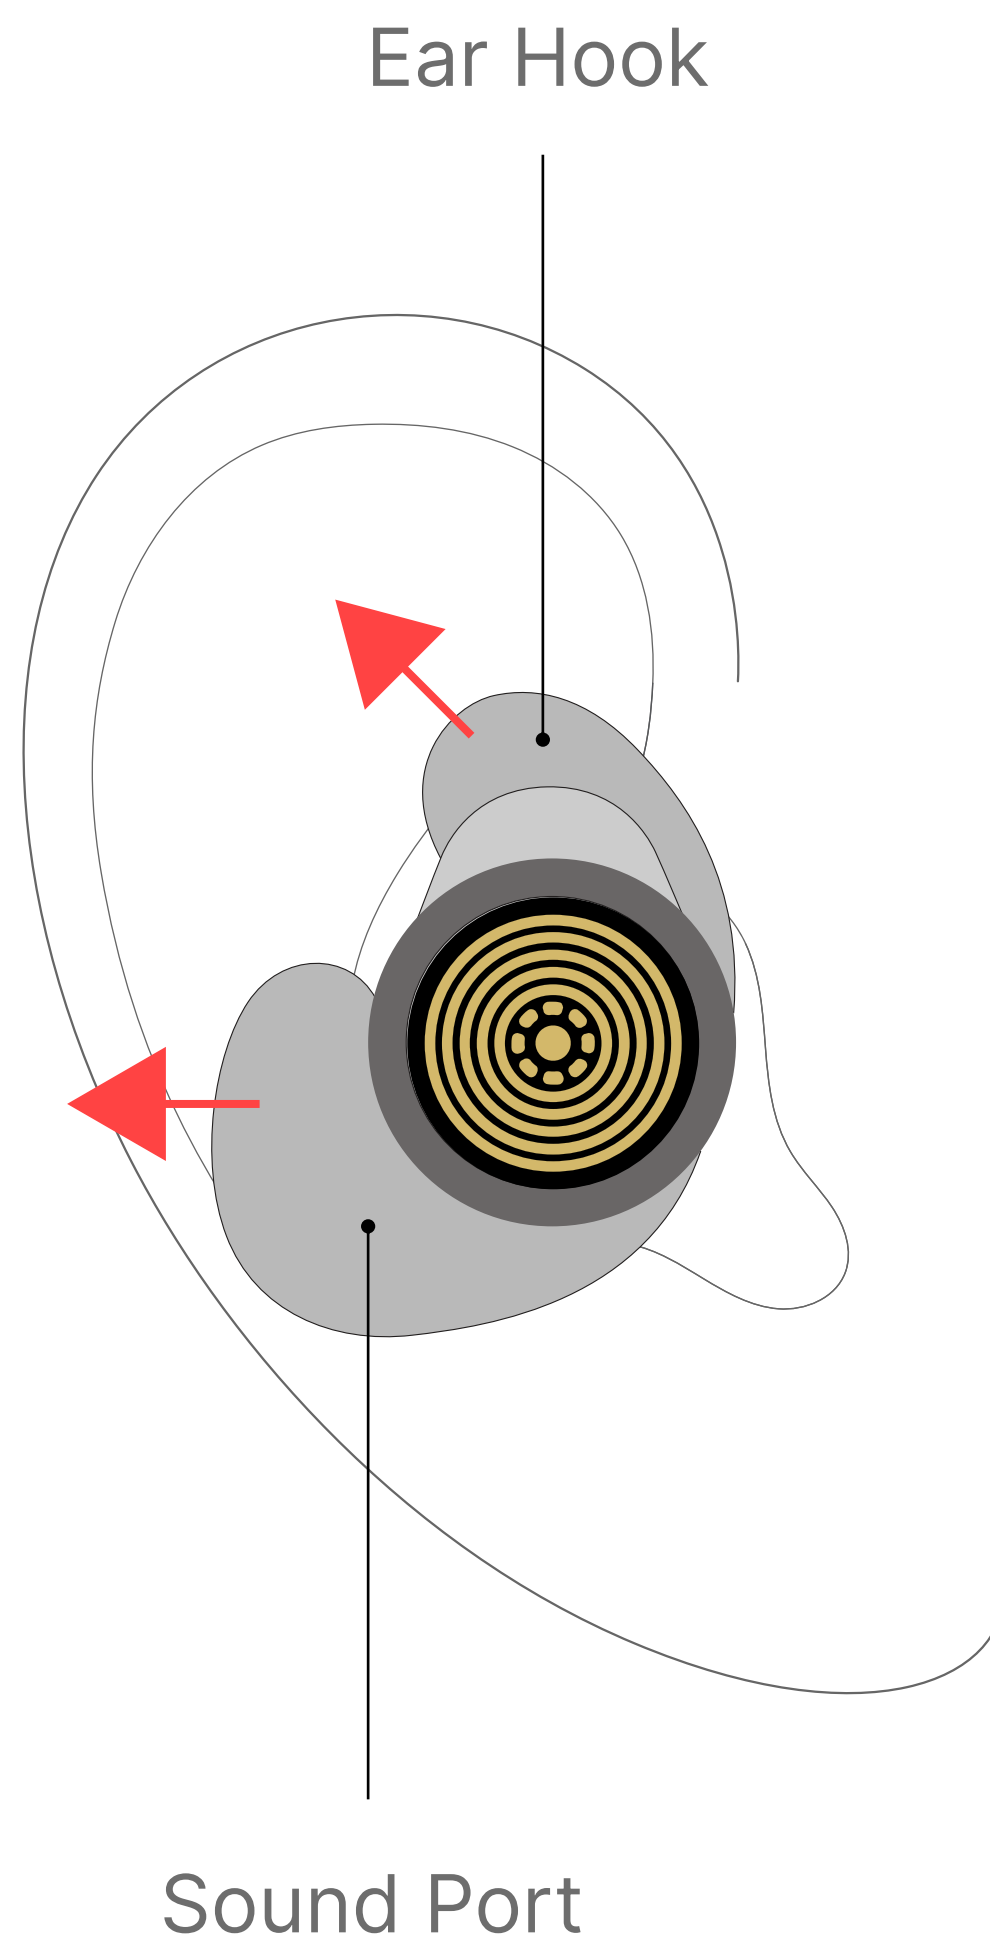

When inserted properly, your custom in-ears should rest comfortably within your ear canal and your environment should sound noticeably muffled.

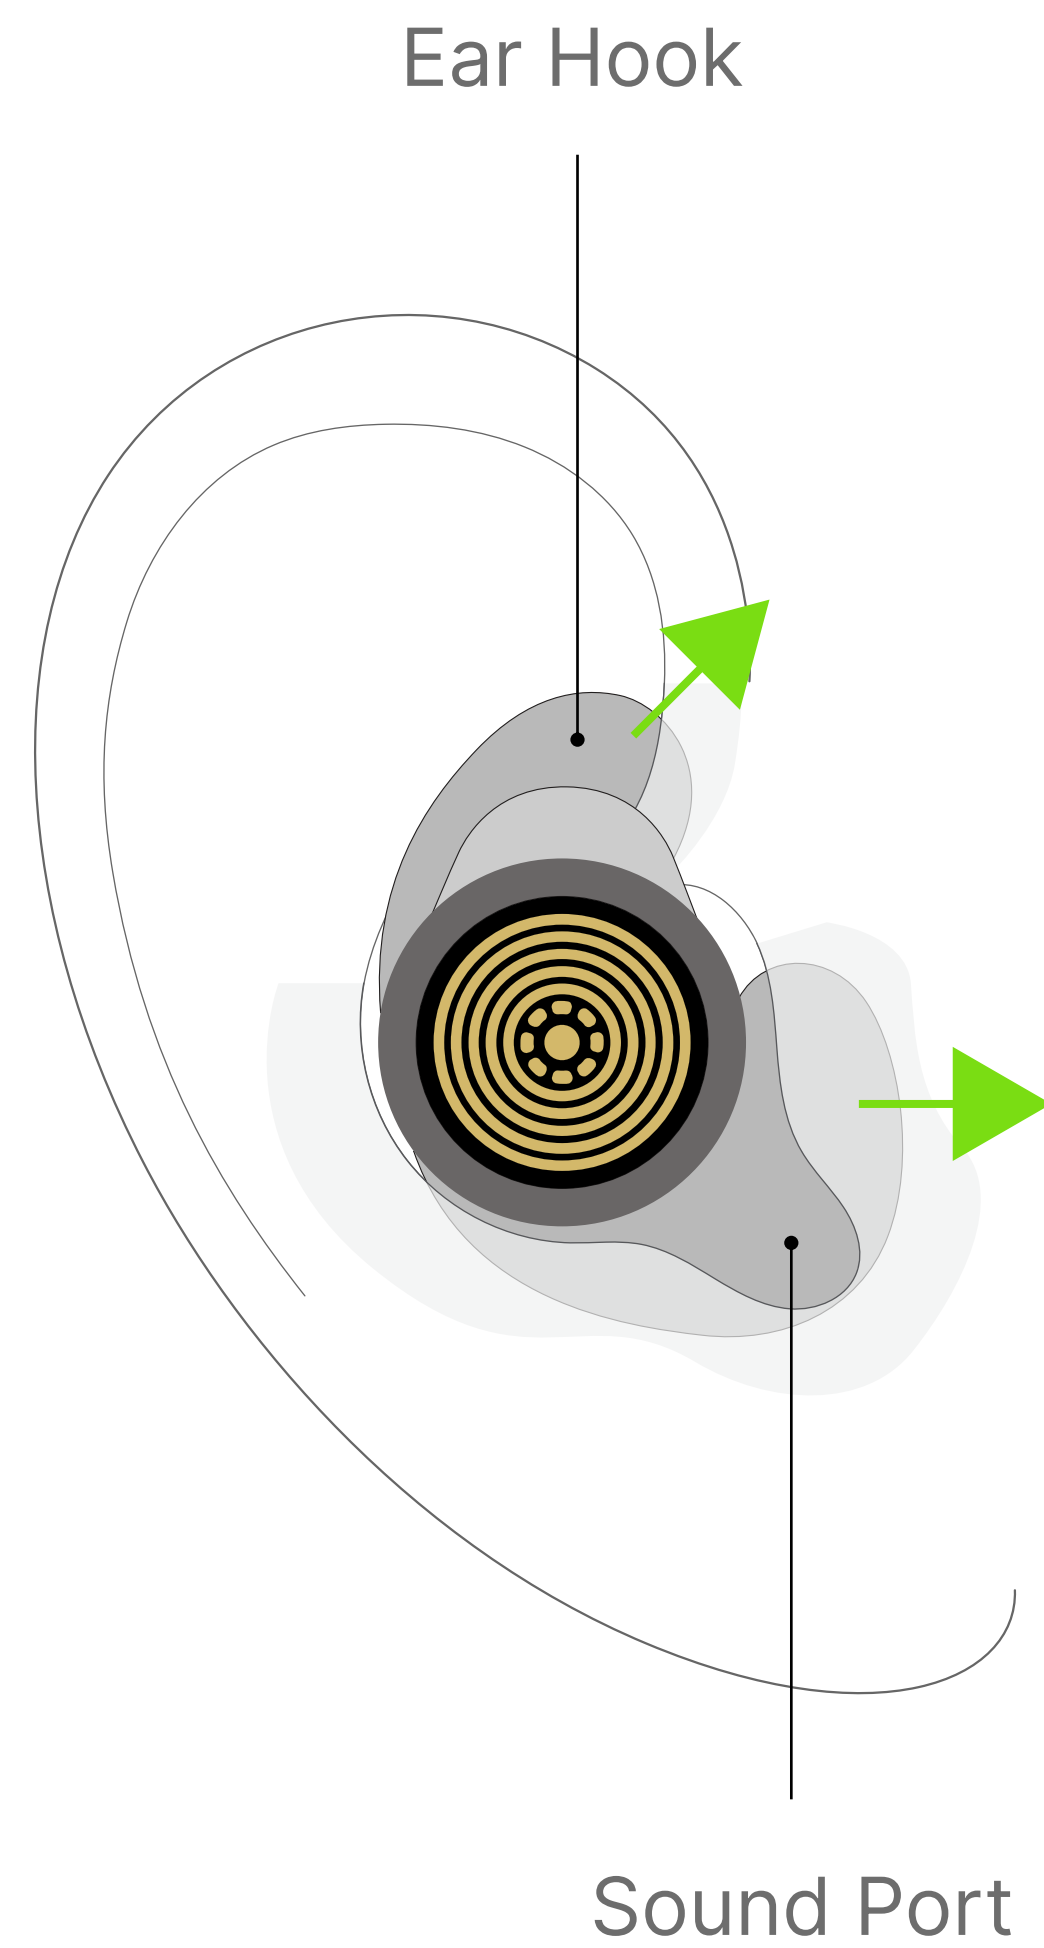

Wear Do's & Don'ts

Wear

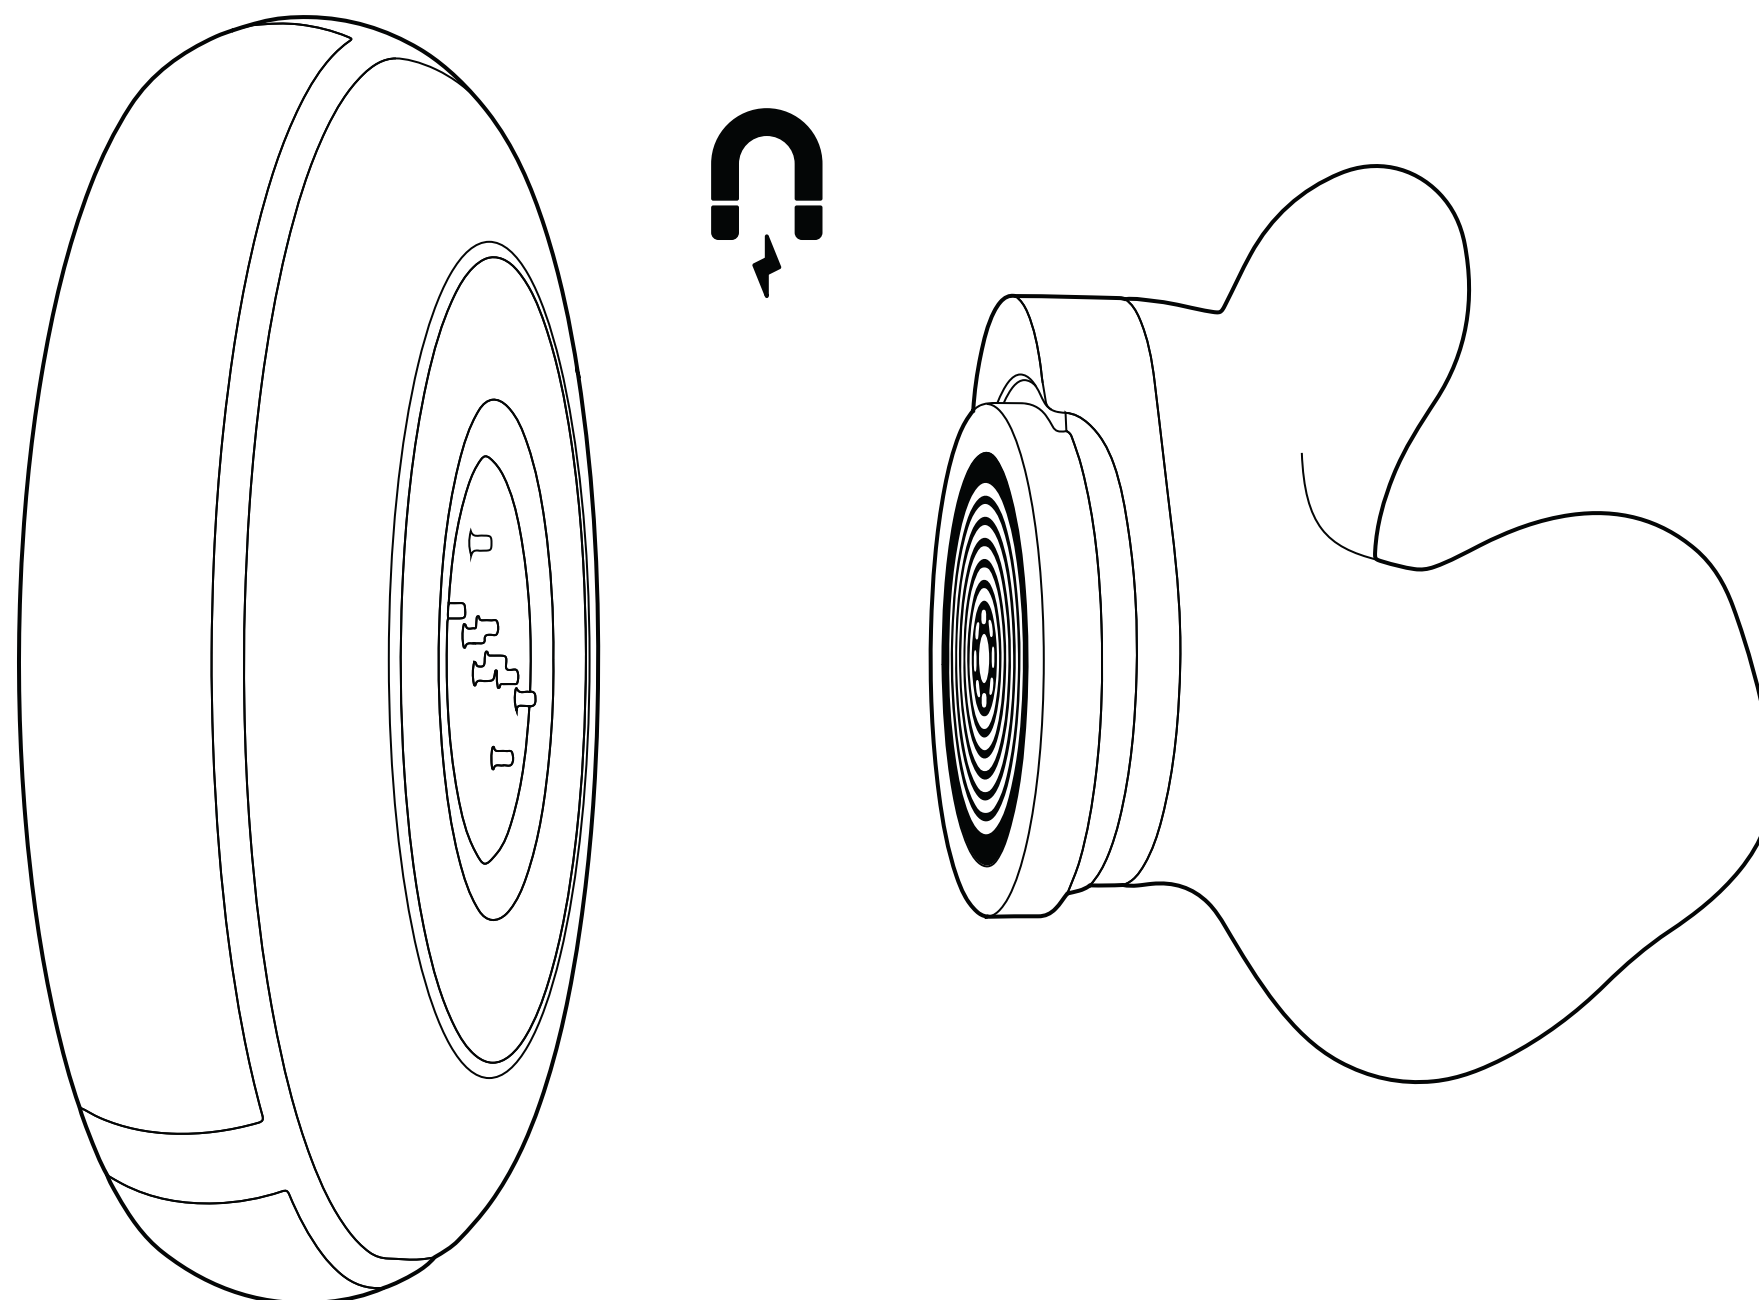

Remove the Audio Computer Discs

Wear

Audio Computer Discs

The discs attach to the custom in-ears via magnetic rings.

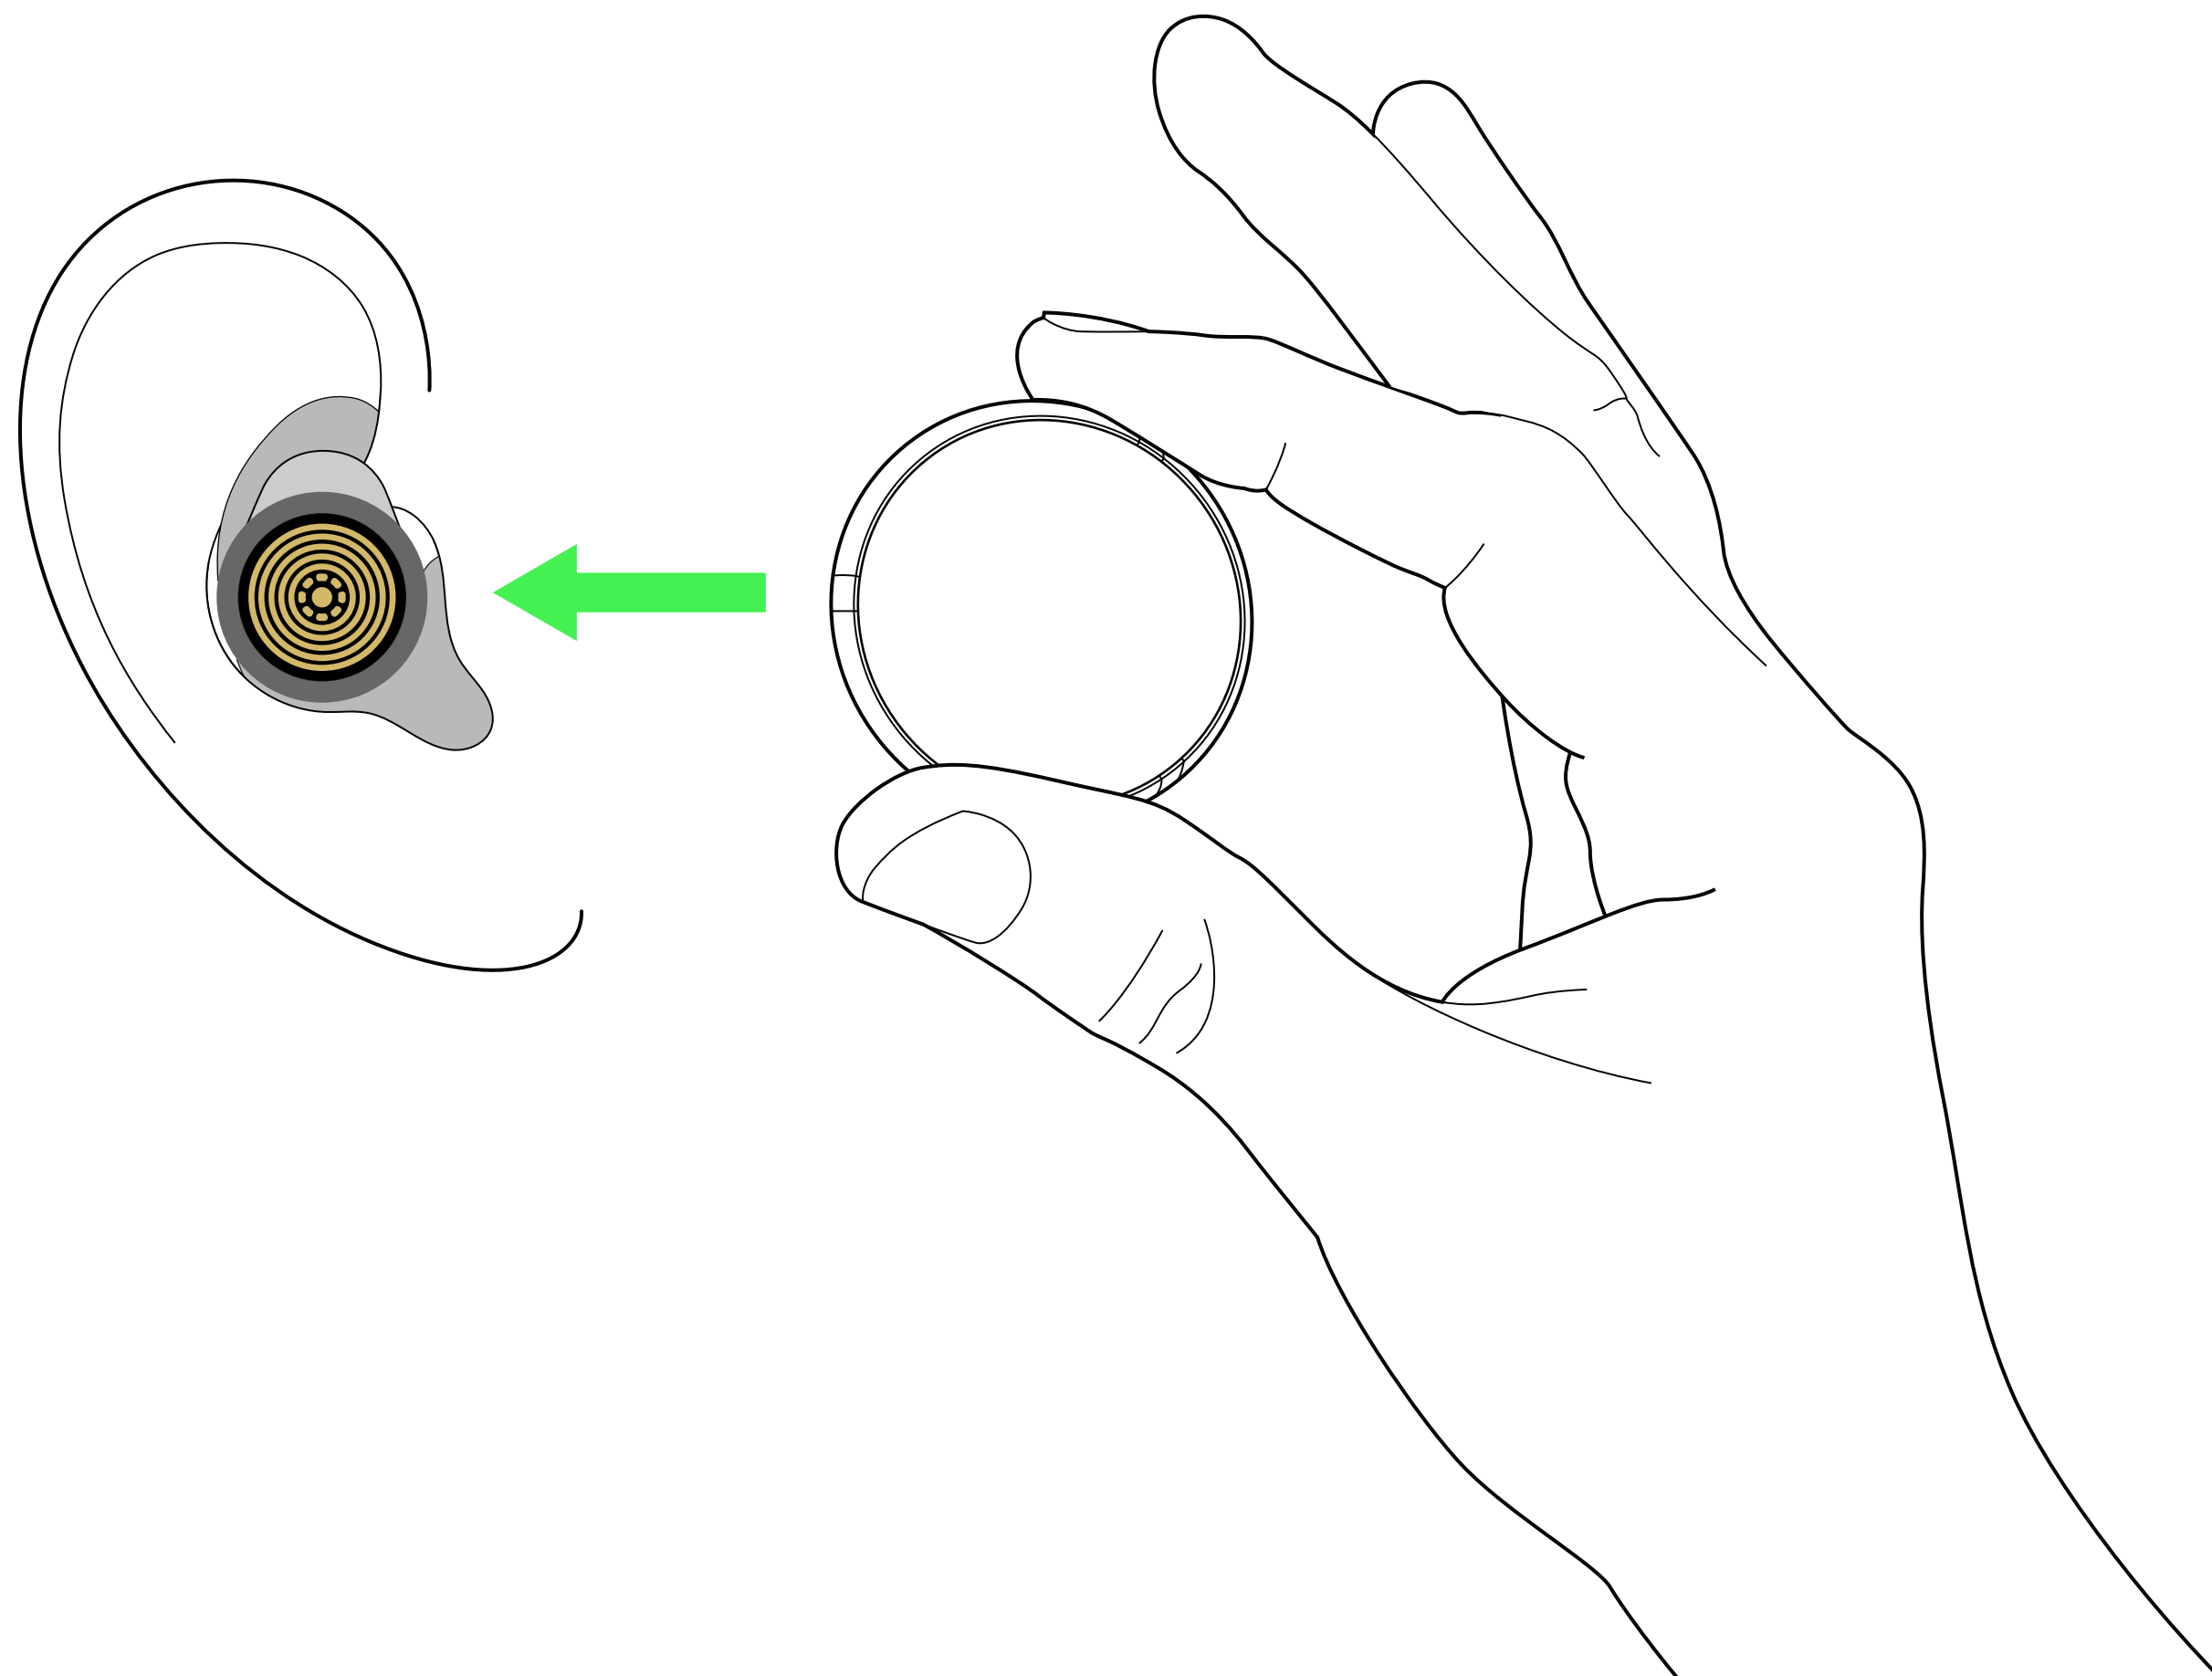

Wear

Audio Computer Discs

Place the discs on each ear, snapping them into place with the magnet.

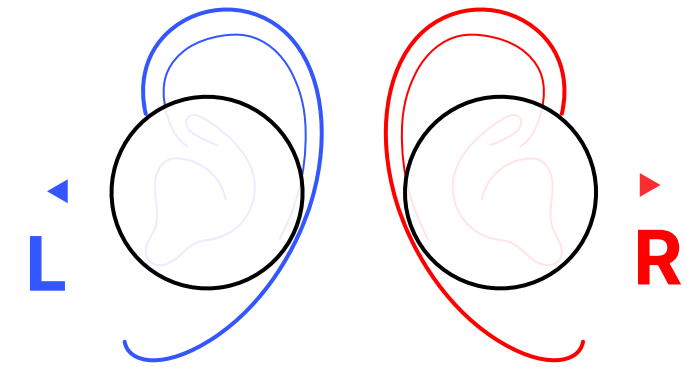

Either disc can be placed on either ear and switched from ear to ear.

Listen

Listen

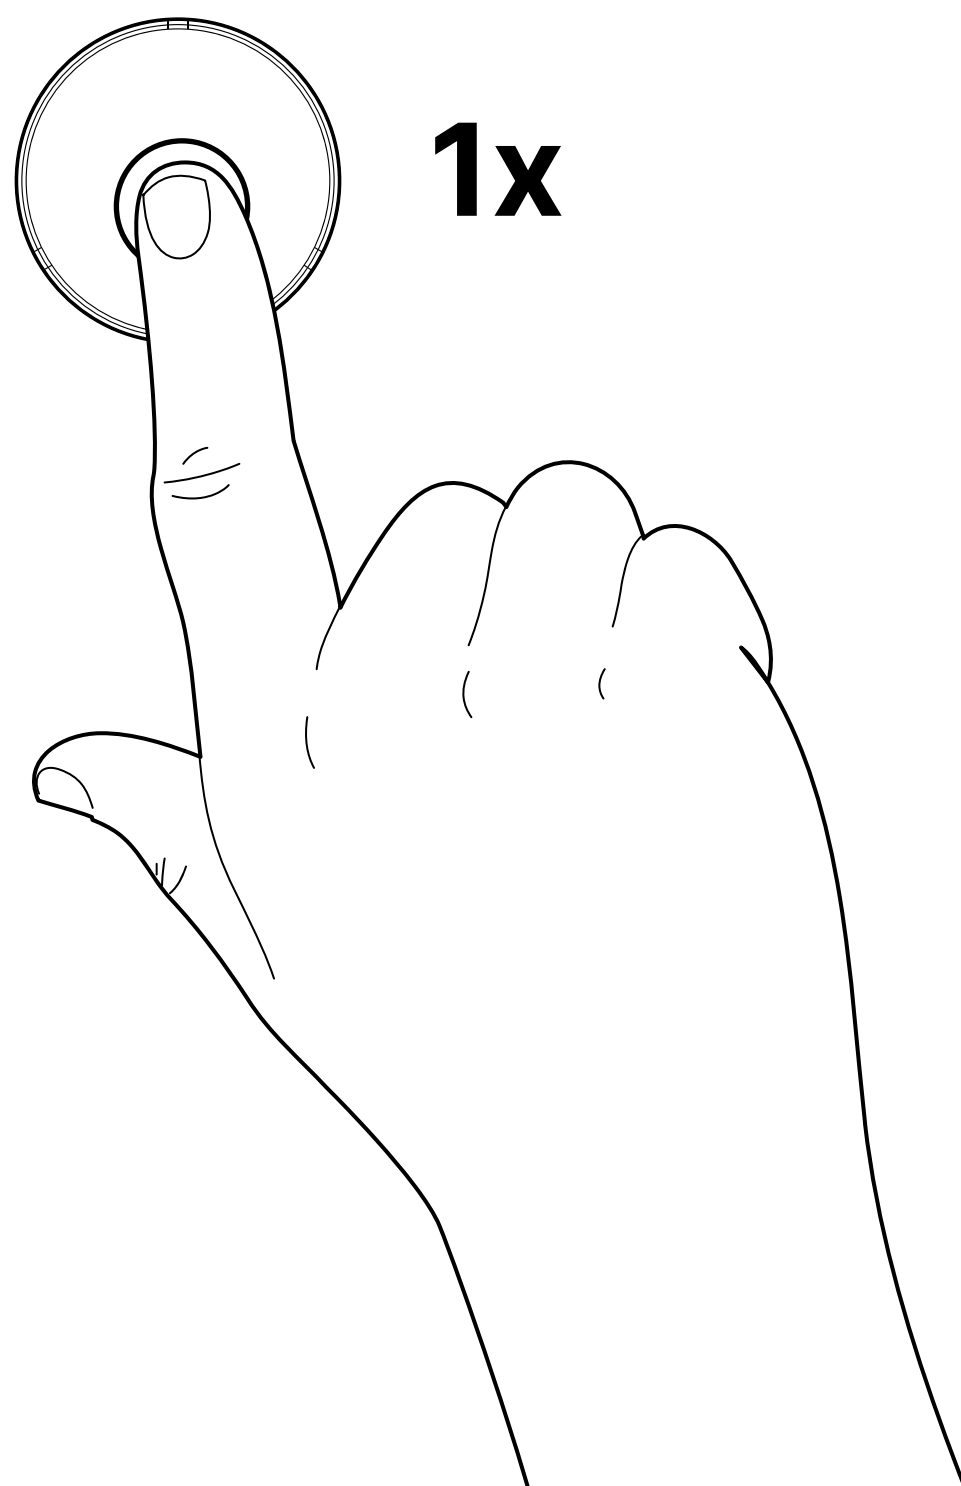

Hearing Modes

Hear the World

Single tap either disc

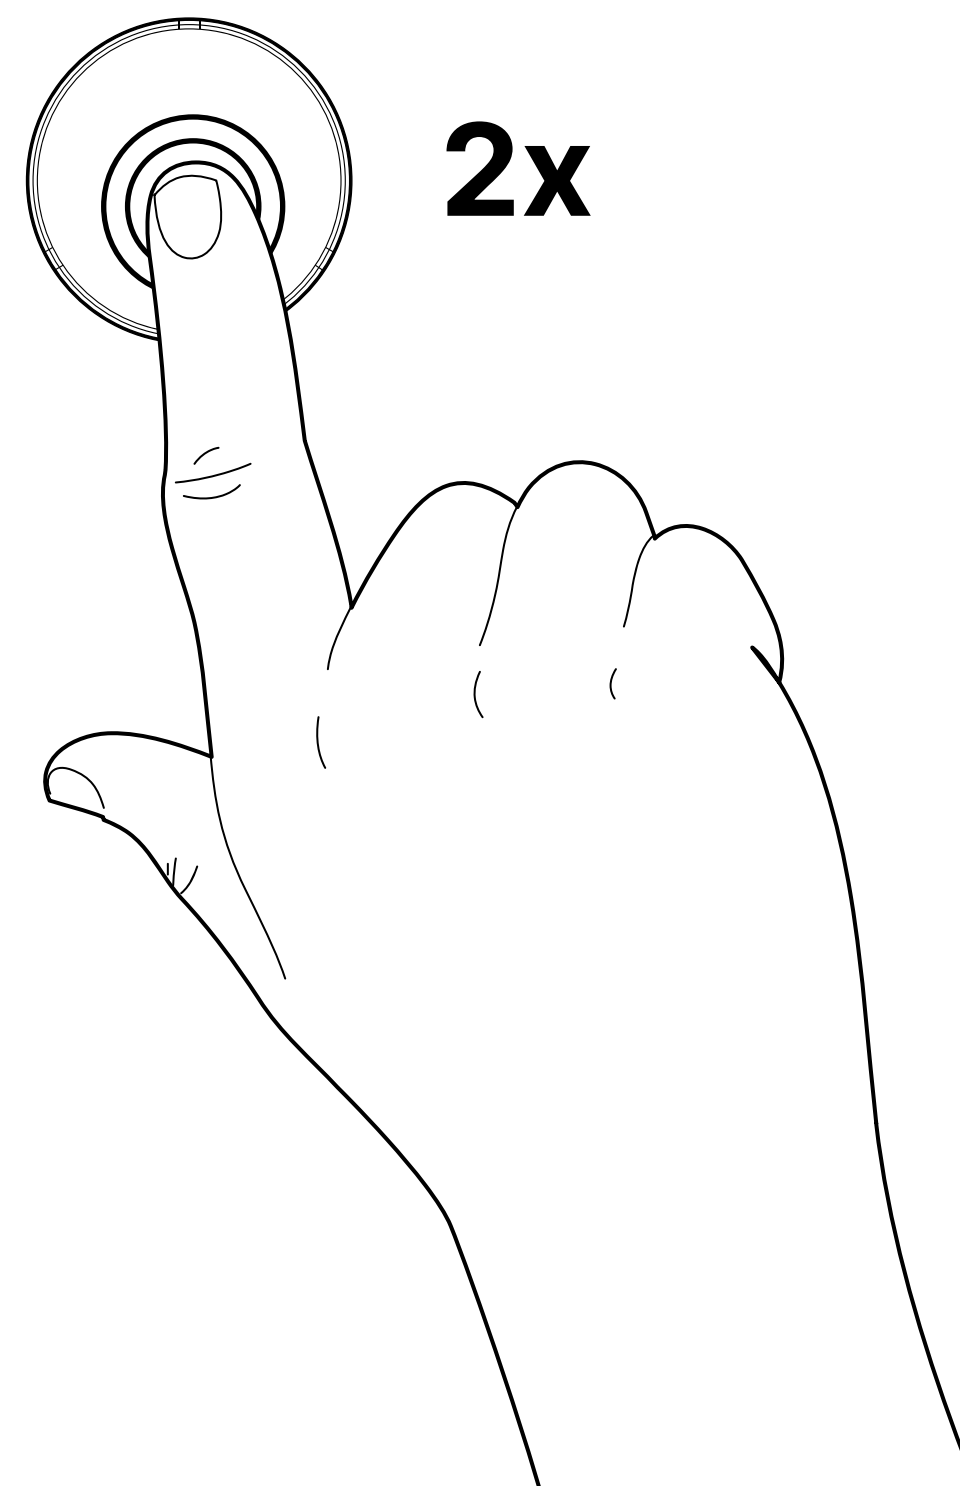

to return to the default hearing volume, pause any current media, and mute your microphone so that you can focus on being present in your external environment.

Enter Agent Space

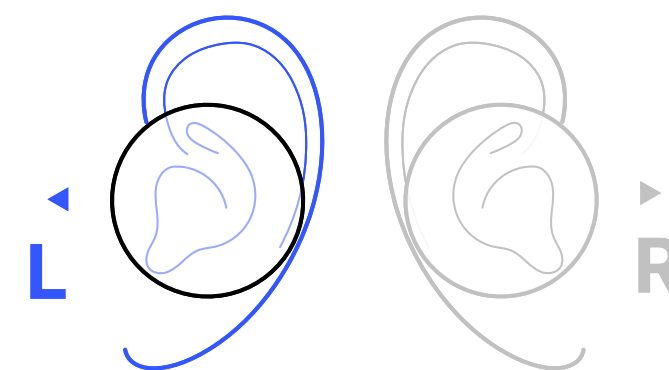

Double tap either disk

to unmute your microphone and enter agent space. This mixed audio mode layers agent space on top of your external environment so that you can interact with both at the same time.

Listen

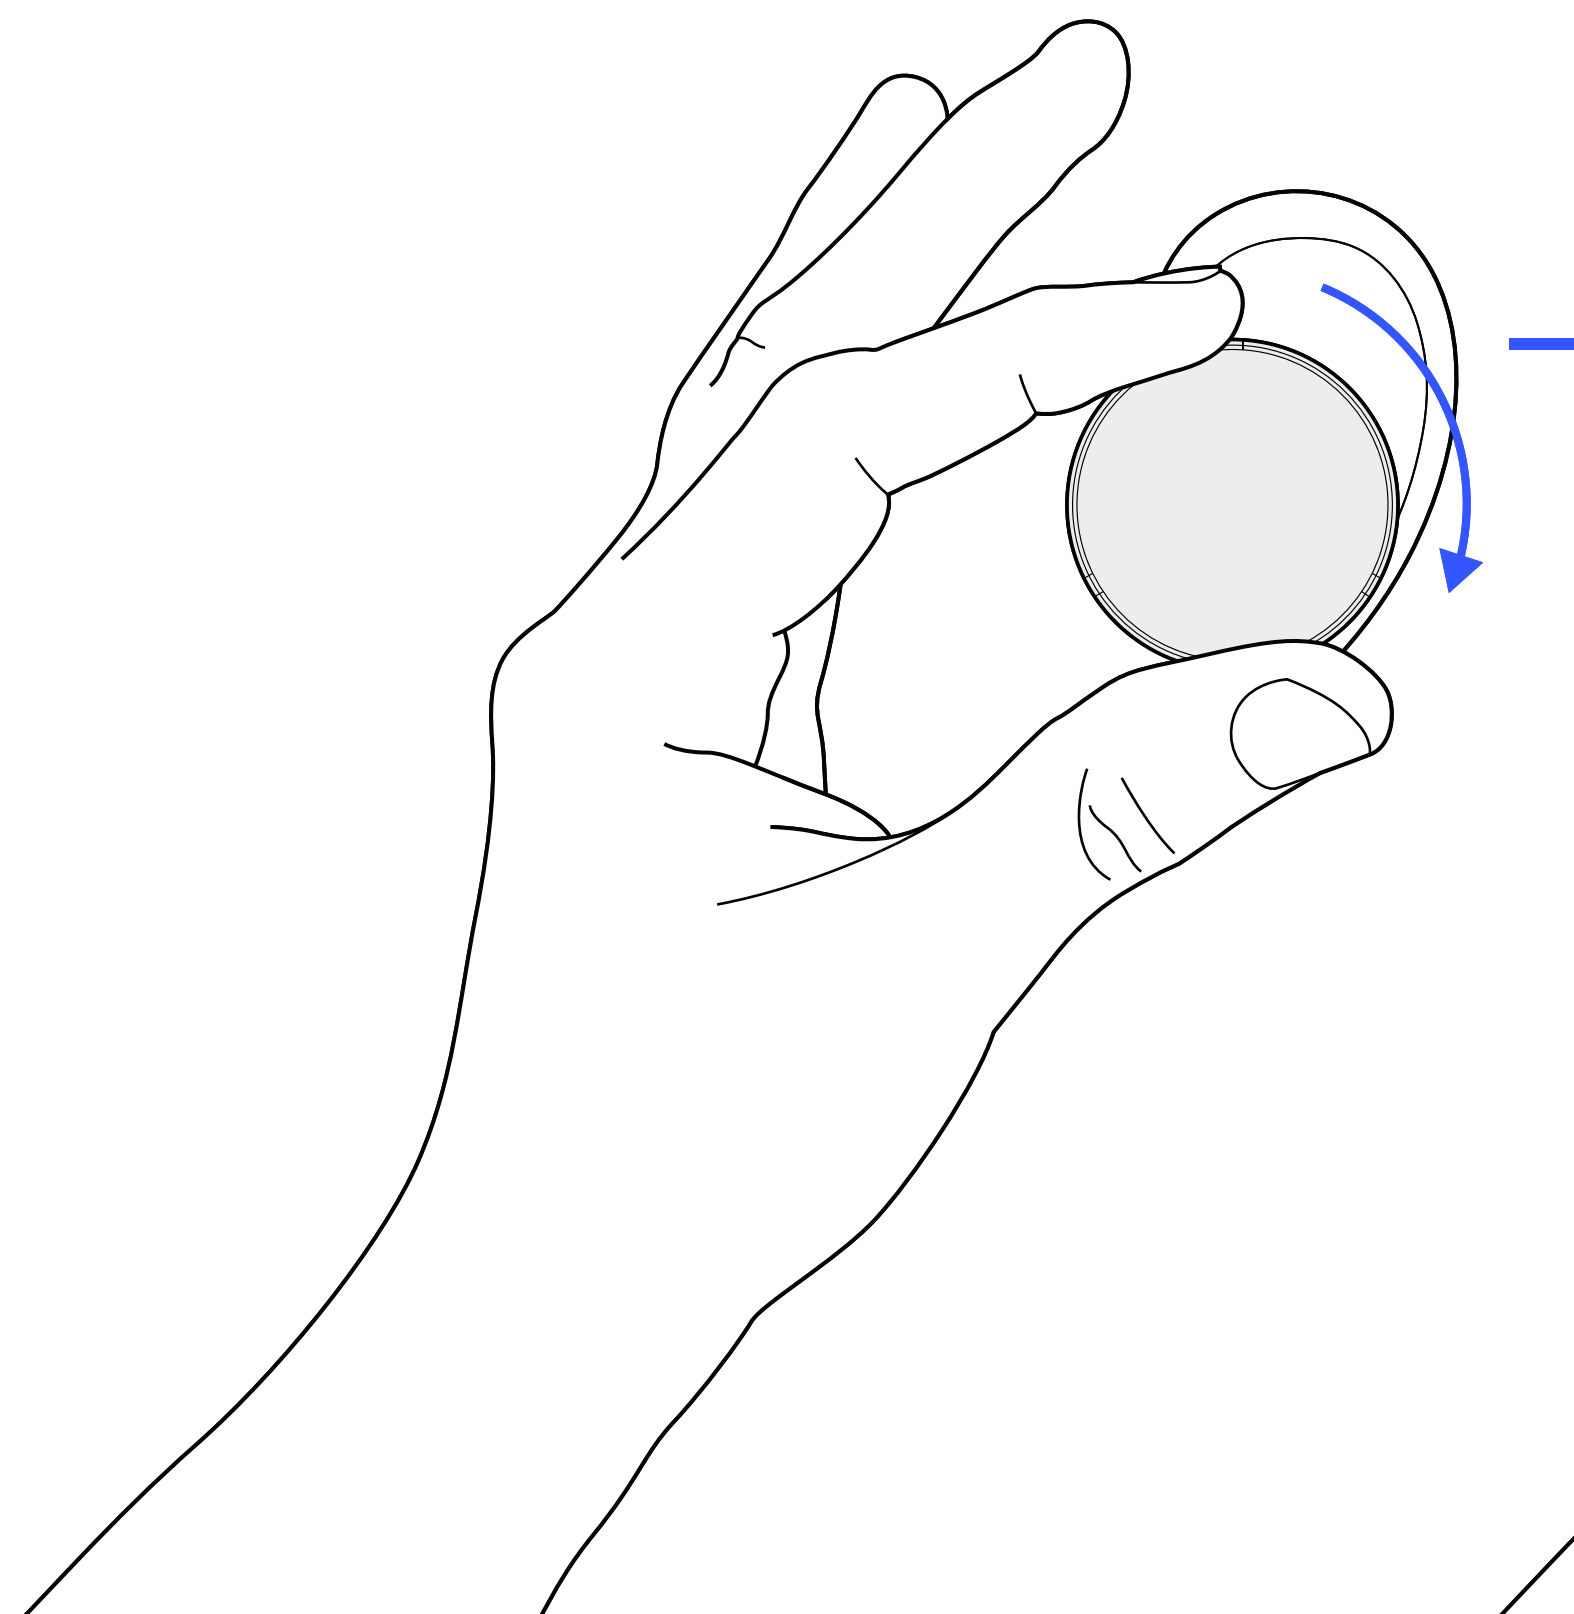

Media Volume LEFT

Turn volume down

Rotate left disc backward

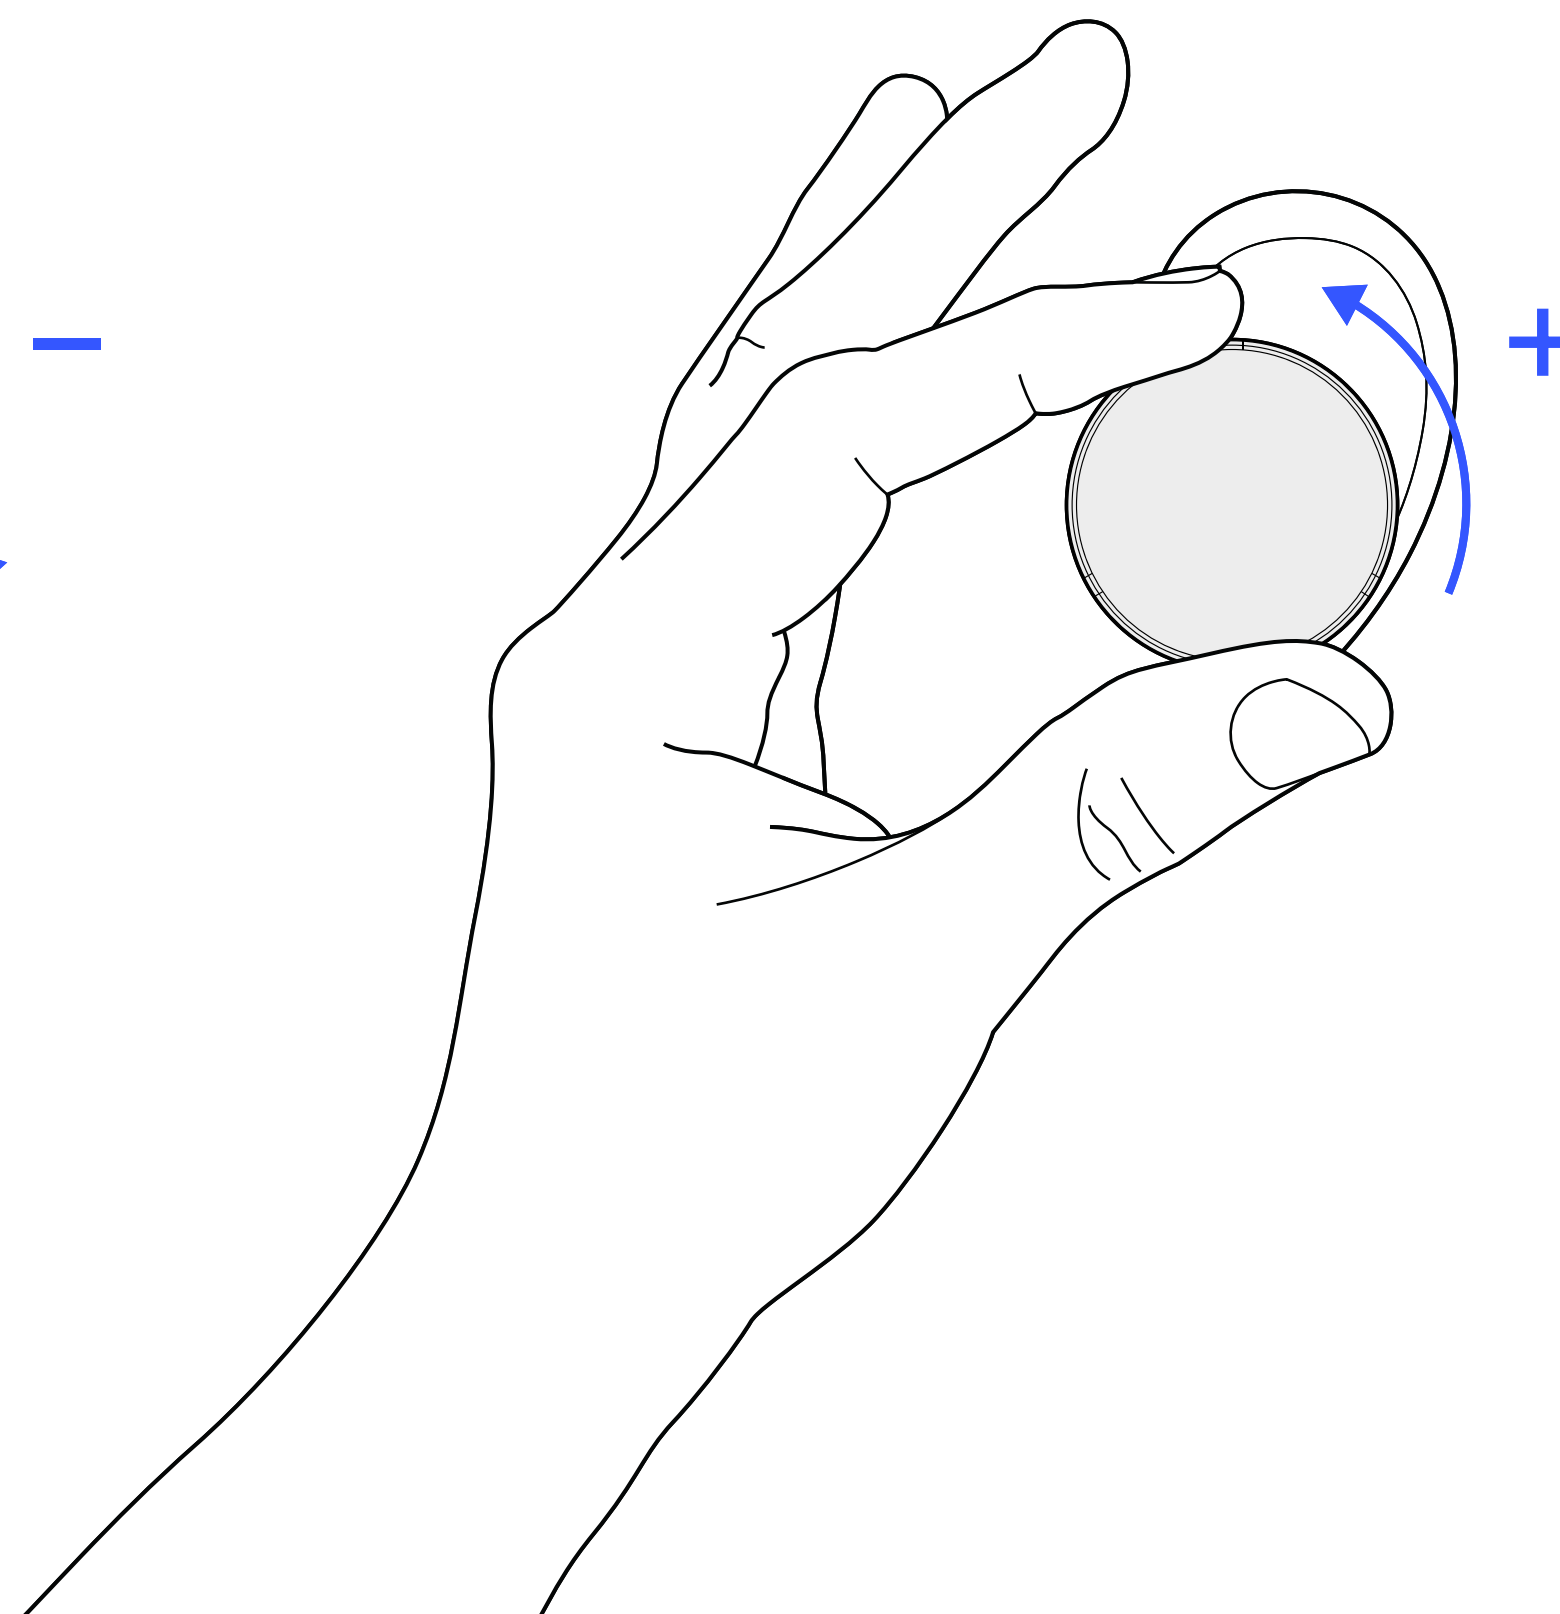

(clockwise) to decrease media volume.

Turn volume up

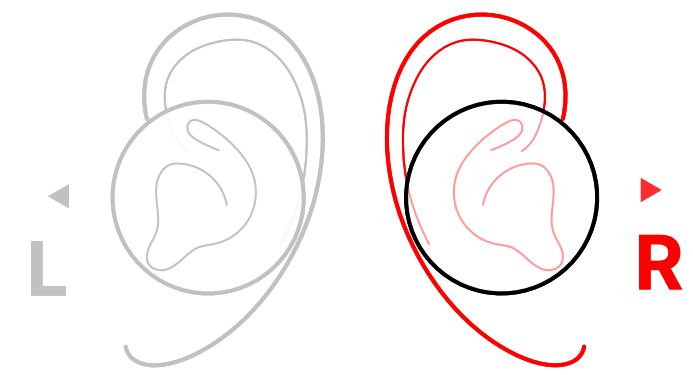

Rotate left disc forward

(counterclockwise) to increase media volume.

Listen

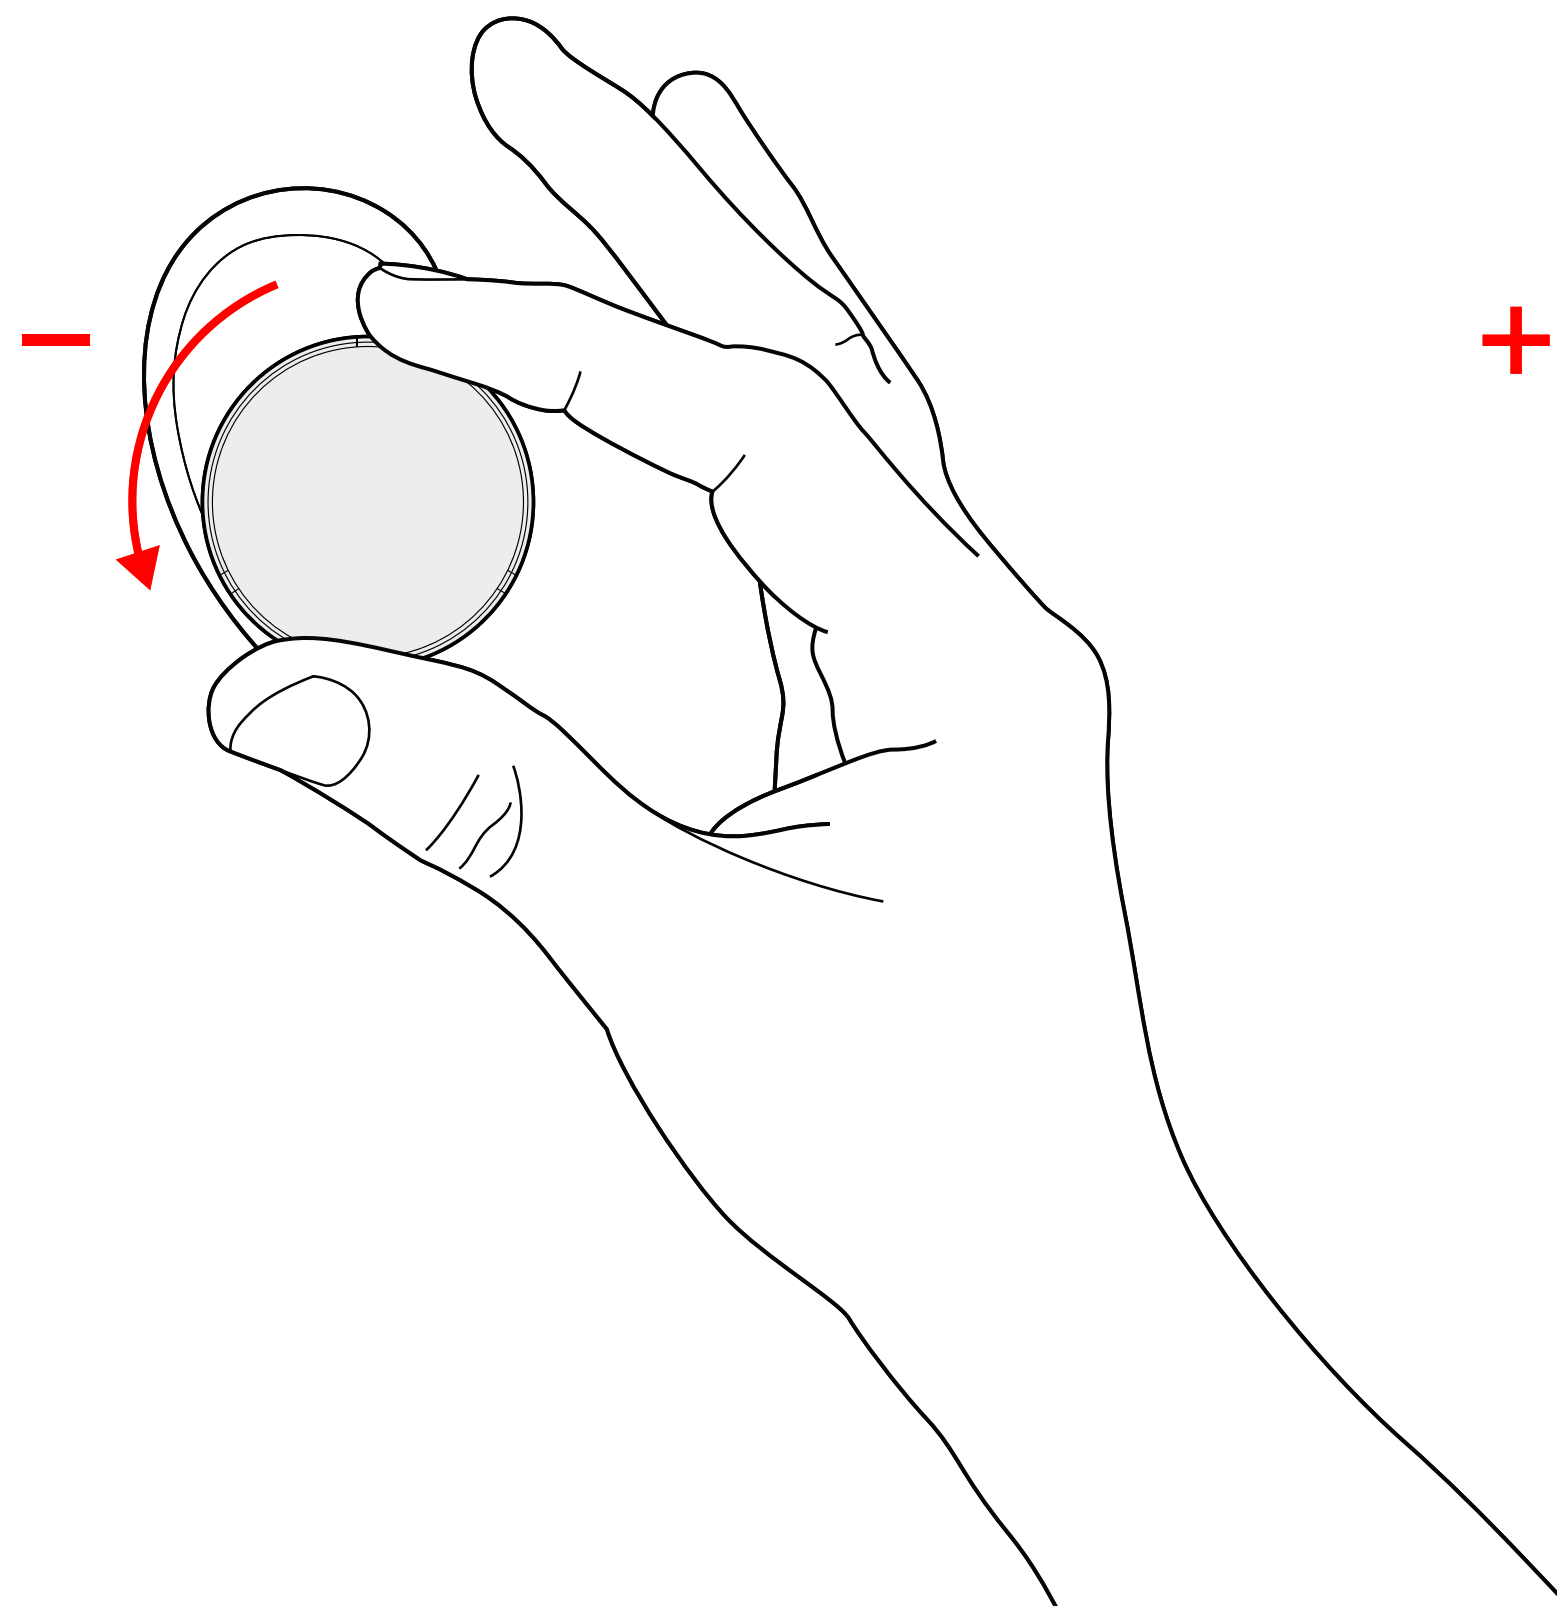

World Volume RIGHT

Turn down the world

Rotate right disc backward

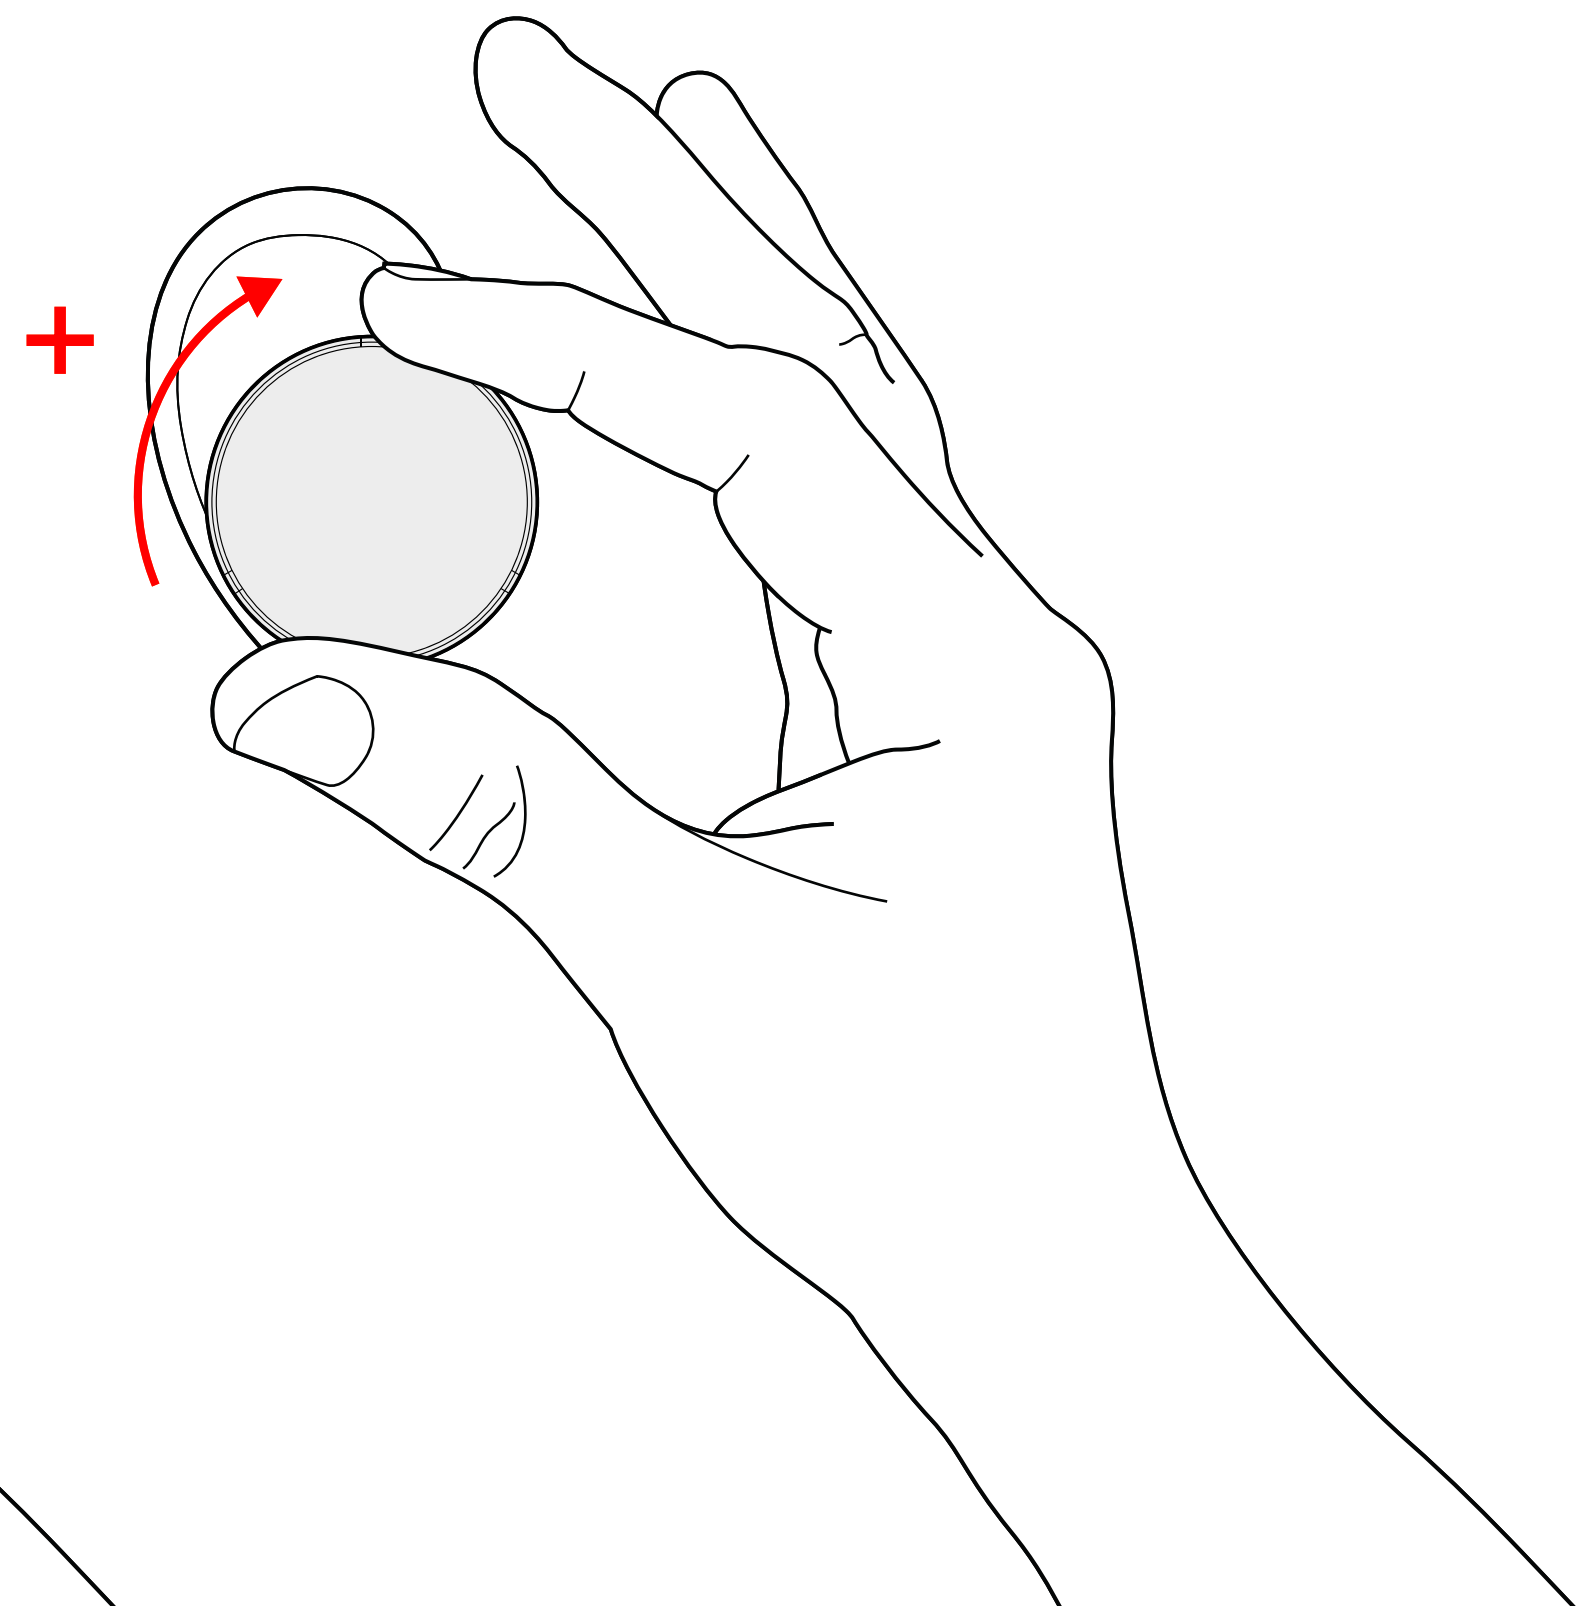

(counterclockwise) to decrease world volume.

Turn up the world

Rotate right disc forward

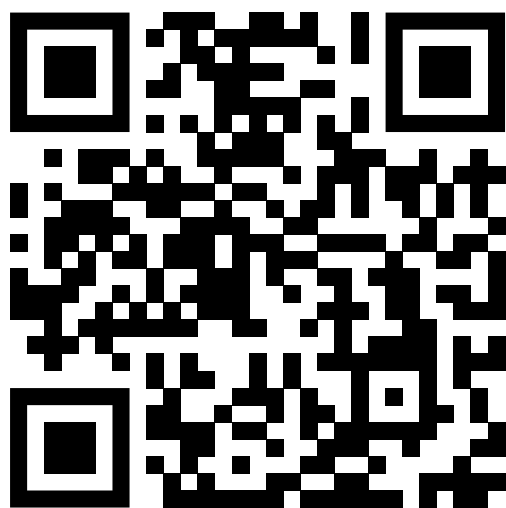

(clockwise) to increase world volume.
