FAQ

1. If you're experiencing interrupted or slow charging, check the following:

- (1) The back of your phone should not have any metal, pop sockets, or credit cards.
- (2) Put the phone in the center of the charging surface (this lets the charging coil in your phone lineup with the one inside the wireless charger).
- (3) The wireless charging coil on Sony phones is located slightly below center.
- (4) Phone cases should be no thicker than 5 mm for effective charging.
- (5) Check whether the adapter is QC3.0 fast charger.

2. If you're failing to charge your device, please try out the following:

- (1) Please restart your cell phone and test with other USB cable.
- (2) Please check whether the indicator turns on or not.
- (3) The wireless charging coil on Sony phones is located slightly below center.
- (4) Phone cases should be no thicker than 5 mm for effective charging.
- (5) Check whether the adapter is QC3.0 fast charger.

3. If you're using the recommended wireless charger with the QC3.0 Adapter and have removed any potential charging obstructions, but are still experiencing issues, try this:

- (1) Replacing the cable connecting your wireless charger.
- (2) Rebooting your phone.
- (3) Unplug the adapter and reinsert.

4. Charging is still slow.

The mobile phone itself or the external receiving coil allows the wireless charging current to be different, or the application running consumes a lot of power when the mobile phone is charging. It is recommended to reduce or close the application.

5. The phone is charging intermittently, or the indicator light flashes.

If the charging current is not enough, please use a adapter with sufficient power 9V/2A or 18W above.

6. Charging fever.

It is normal for the receiving coil or transmitter board to generate heat during wireless charging. If the wireless charger is too hot, please take your phone off it, when the wireless charger is cooled down, please charge it again.

7. The charger does not work.

Do not put metal debris or magnetic cards on the charging area. If the product does not work due to overheating, please take off the phone and charge it again when it is cooled down.

WARNING

1. Avoid using the product at places that are wet, humid or have high temperature.
2. Avoid dropping the product from high places.
3. Do not disassemble the product by yourselves. Please contact us if necessary.
4. Do not clean the product unless the unit is powered off.
5. It is recommended to use 18W or above adapter to charge 3 smart devices at the same time.

MADE IN PRC

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
