

Wireless Temperature Tag Instructions

Device Description

This device is a wireless temperature tag designed for temperature monitoring and recording in cold chain transportation environments. Featuring a compact design, long battery life, and high-precision recording capabilities, it is widely applicable in the transportation of temperature-sensitive products such as biological products, food, and pharmaceuticals.

Equipment Operating Instructions

1. Power On

- Press and hold the button to turn on the device.
- After powering on, the device automatically begins continuous temperature monitoring, recording temperature data every 4 minutes.
- Once powered on, the device cannot be turned off to ensure data integrity and security.

2. Battery Check

- Click the button to check the current battery status. The battery indicator will light up for 5 seconds and then automatically turn off.
- Indicator Color Description:
 - Solid green: Full battery (up to 14 days of battery life);
 - Solid red: Low battery. Please replace the device immediately.

APP Operation Instructions

1. Data Viewing

- Use your phone to scan the QR code on the device to view measured temperature data through the app.
- The app displays the last seven days of data and supports filtering and reviewing data for any day.

2. Temperature Range and Specifications

- This device has a measurement range of -4°F to 140°F.

- It meets the temperature recording device requirements of most cold chain transportation regulations.

Things to Note

- Please ensure the device is fully charged before use.
- Once powered on, the device cannot be shut down. Please restart it only when you are sure you need to begin monitoring.
- This device is for single-use or limited-time use. Please dispose of it properly after completing data reading.

Operation Process

1. Go to the IOS APP store to download TempLabel app

TempLabel

2. Go to the page below and click the scan button to scan the QR code on the product label, then set the start time and end time, as well as the maximum and minimum temperature alarm according to your requirements.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide

reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement.

This equipment complies with FCC's RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna(s) must not be co-located or conjunction with any other antenna or transmitter.

The device can be used in portable exposure conditions without restriction.
