1. Introductions

The SPA-MW21F3-X is a high performance wireless audio transceiver module, operating in both 5.2GHz and 5.8GHz WiFi bands. It offers 10Mbps bandwidth for lossless audio data transmission and delivers a stunning audio quality, ideal for multi-channel and Hi-Res wireless audio applications.

2. Key Features

- Low audio latency
- Low audio jitter
- Lossless audio transmission
- Maximum transmission bandwidth/channels
 - ◆ 8ch@44.1/48KHz, 24bit
 - ◆ 4ch@96KHz, 24bit
 - ◆ 2ch@192KHz, 24bit
- Support 8ch I2S in/out with rich configurations
 - ◆ master/slave mode
 - ◆ 16/24 bit
 - ◆ 44.1/48/96/192KHz sampling rate
- Radio frequency: 5.2G and 5.8G WiFi bands
- Dual antenna with diversity
- Adaptive channel selection algorithm
- Link distance up to 15m (w/o PA)
- Easy to integrate with MCUs, DSPs and amplifiers
- Bi-direction control channel
- Support OTA upgrade
 - ◆ upgrading time is less than 60 seconds for 1T8R system
- Low standby power consumption
- Small foot print

3. Applications

- Multi-channel wireless audio
- Hi-Res wireless audio

4.6 Soldering Specification

Solder Paste

Vendor: SMIC(Senju Metal Industry Co.,Ltd.)

Model No.: M705-GRN360-K2-V

Composition: Sn96.5/Ag3/Cu0.5

Powder size:Type-4(20~38 μm)

Figure 8 Reflow Temperature profile:

5. Performance

5.1 Audio Specification (I2S to I2S), Fs=48KHz

Parameter	Condition	Min.	Typ.	Max.	Unit
SNR(A)	1kHz, -60dB 20kHz LPF & A-weighted		144.5		dB
THD+N	1kHz, 0dB 20kHz LPF		-141.5		dB
Frequency response	Sweep FR: 20Hz~24KHz	-0.005		+0.005	dB
Dynamic Range(A)	1kHz, -60dB 20kHz LPF & A-weighted		144.5		dB
Latency	Pink noise		20.17		ms

5.2 Audio Specification (I2S to I2S), Fs=96KHz

Parameter	Condition	Min.	Typ.	Max.	Unit
SNR(A)	1kHz, -60dB 20kHz LPF & A-weighted		147.3		dB
THD+N	1kHz, 0dB 20kHz LPF		-141.5		dB
Frequency response	Sweep FR: 20Hz~48KHz	-0.005		+0.005	dB
Dynamic Range(A)	1kHz, -60dB 20kHz LPF & A-weighted		147.5		dB
Latency	Pink noise		20.15		ms

5.3 Audio Specification (I2S to I2S), Fs=192KHz

Parameter	Condition	Min.	Typ.	Max.	Unit
SNR(A)	1kHz, -60dB 20kHz LPF & A-weighted		150.3		dB
THD+N	1kHz, 0dB 20kHz LPF		-141.5		dB
Frequency response	Sweep FR: 20Hz~96KHz	-0.005		+0.005	dB
Dynamic Range(A)	1kHz, -60dB 20kHz LPF & A-weighted		150.5		dB
Latency	Pink noise		20.13		ms

5.4 Channel Synchronization

Parameter	Condition	Min.	Typ.	Max.	Unit
Channel synchronization	1T8R, 1KHz sine tone, Tx EVM Line-in to Rx EVM Line-out	-1	-	+1	°
Audio jitter	1T8R	-2.78	--	+2.78	μs

6. Electrical Characteristic

6.1 Operation Condition

Symbol	Parameter	Min.	Typ.	Max.	Unit
V _{DD}	External supply voltage	2.97	3.3	3.63	V
T _a	Ambient operating temperature	0	-	70	°C
T _a	Storage temperature	-40	25	85	°C

6.2 Digital IO DC Characteristic

Symbol	Parameter	Condition	Min.	Typ.	Max.	Unit
V _{IL}	I/O input low level voltage	V _{IO} =3.3V±10%	-0.3	-	0.8	V
V _{IH}	I/O input high level Voltage	V _{IO} =3.3V±10%	2	-	-	V
V _{OL}	I/O output low voltage	V _{IO} =3.3V±10%	-	-	0.15*V _{IO}	V
V _{OH}	I/O output high voltage	V _{IO} =3.3V±10%	0.85* V _{IO}	-	-	V

6.3 WLAN 5G band RF Characteristic

Parameter	Condition	Min.	Typ.	Max.	Unit
Frequency Range	Center channel frequency	5180	-	5825	MHz
Rx Sensitivity	HT20, MCS 7, 64-QAM rate 5/6	-	-74	-	dBm
	HT40, MCS 7, 64-QAM rate 5/6	-	-70.5	-	dBm
Tx Power	HT20, MCS 7, 64-QAM rate 5/6	-	15	-	dBm
	HT40, MCS 7, 64-QAM rate 5/6	-	15	-	dBm

6.4 BLE 2.4G band RF Characteristic

Parameter	Condition	Min.	Typ.	Max.	Unit
Frequency Range	Center channel frequency	2402	-	2480	MHz
Rx Sensitivity	PER < 30.8%	-	-99	-	dBm
Tx Power	At max. power output level	-	8	-	dBm

6.5 Power Consumption

Operating mode	Condition	Min.	Typ.	Max.	Unit
Tx module active	Tx EVM v1.1, 1T8R	-	370	-	mA
Rx module active	Rx EVM v1.1, 1T8R	-	65	-	mA
Tx module sleep	Tx EVM v1.1, 1T8R	-	3	-	mA
Rx module sleep	Rx EVM v1.1, 1T8R	-	3	-	mA

7. AC Characteristics

7.1 I2C Characteristics

Symbol	Parameter	Standard mode (Cb=400pF max.)		Fast mode (Cb=400pF max.)		Unit
		Min.	Max.	Min.	Max.	
F _{SCL}	SCL clock frequency	-	100	-	400	kHz
t _{HD;STA}	Hold time START condition	4	-	0.6	-	μs
t _{LOW}	Low period of the SCL clock	Programmable		Programmable		μs
t _{HIGH}	High period of the SCL clock					μs
t _r	Raise time of both SDA and SCL signals	-	1000	20	300	ns
t _f	Fall time of both SDA and SCL signals	-	300	12	300	ns
t _{SU;STA}	Set-up time for a repeated START condition	4.7	-	0.6	-	μs
t _{HD;DAT}	Data hold time	0	-	0	-	μs
t _{SU;DAT}	Data set-up time	0.25	-	0.1	-	μs
t _{SU;STO}	Set-up time for STOP condition	4	-	0.6	-	μs
t _{VD;DAT}	Data valid time	-	3.45	-	0.9	μs
t _{VD;ACK}	Data valid acknowledge time	-	3.45	-	0.9	μs
t _{BUF}	Bus free time between a STOP and START condition	4.7	-	1.3	-	μs

I2C timing data

I2C AC timing diagram

7.2 I2S Characteristics

Symbol	Parameter	Conditions	3.3V I/O (2.97V~3.6V)		Unit
			Min.	Max.	
T _{SCL}	I2S clock	Master	82	1953	ns
		Slave	82	1953	ns
Duty	Clock duty	Master	45	55	%
		Slave	35	65	%
t _{SU;DAT(I)}	Input data setup time	Master	8	-	ns
t _{SU;DAT(I)/t_{SU;WS}}	Input data/WS setup time	Slave	3	-	ns
t _{HD;DAT(I)}	Input data hold time	Master	0	-	ns
		Slave	3	-	ns
t _{VD;DAT(O)}	Output data valid time	Master	-5	5	ns
t _{VD;WS}	Output WS valid time	Master	-4	4	ns
t _{VD;DAT(O)}	Output data valid time	Slave	-	18	ns

	Y	Version No.
	Z	

9. Version History

Revision	Date	By	Remark
V1.0	2024/07/31	Ricky Liu	Initial
V1.01	2024/08/09	Ricky Liu	Update performance and characteristic data
V1.2	2024/08/12	Ricky Liu	Update information for new module with BLE antenna (HDK-SM721DC3-1V0)
V1.21	2024/08/26	Ricky Liu	Revised pin description
V1.22	2024/09/25	Ricky Liu	Update power consumption of standby mode
V1.23	2024/12/25	Ricky Liu	Revised module pin assignment
V1.3	2025/3/20	Ada	Add SPA-MW21M1-E information
V1.3.1	2025/4/2	Ada	Add Storage condition
V1.3.2	2025/4/29	Ada	Module part No. Description, Modify Module name
V1.3.3	2025/6/17	Cg.chen	Modify HT40 TX Power, add HT20 TX Power , RX sensitivity
V1.3.4	2025/6/27	Cg.chen	modify RX sensitivity value modify 4.1& 4.2 : module package
V1.4	2025/8/28	Ada	Add 4. 6 Soldering Specification
V1.4.1	2025/9/3	Ada	Modify Module Part No. description

warning

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged

to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful

interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

IMPORTANT NOTE:

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

This device and its antenna(s) must not be co-located with any other transmitters except in accordance with FCC multi-transmitter product procedures.

Referring to the multi-transmitter policy, multiple-transmitter(s) and module(s) can be operated simultaneously without C2PC.

This module is intended for OEM integrator. The OEM integrator is responsible for the compliance to all the rules that apply to the product into which this certified RF module is integrated.

Additional testing and certification may be necessary when multiple modules are used.

List of applicable FCC rules

This module has been tested and found to comply with 15.247,15.407 requirements for Modular Approval.

The modular transmitter is only FCC authorized for the specific rule parts (i.e., FCC transmitter rules) listed on the grant, and that the host product

manufacturer is responsible for compliance to any other FCC rules that apply to the host not covered by the modular transmitter grant of certification. If the grantee markets their product as being Part 15 Subpart B compliant (when it also contains unintentional-radiator digital circuitry), then the grantee shall provide a notice stating that the final host product still requires Part 15 Subpart B compliance testing with the modular transmitter installed.

USERS MANUAL OF THE END PRODUCT:

In the users manual of the end product, the end user has to be informed to keep at least 20cm separation with the antenna while this end product is installed and operated. The end user has to be informed that the FCC radio-frequency exposure guidelines for an uncontrolled environment can be satisfied. The end user has to also be informed that any changes or modifications not expressly approved by the manufacturer could void the user's authority to operate this equipment. If the size of the end product is smaller than 8x10cm, then additional FCC part 15.19 statement is required to be available in the users manual: This device complies with Part 15 of FCC rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

LABEL OF THE END PRODUCT:

The final end product must be labeled in a visible area with the following " Contains TX FCC ID: 2BSO7-SPAMW21XXE ". If the size of the end product is larger than 8x10cm, then the following FCC part 15.19 statement has to also be available on the label: This device complies with Part 15 of FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

Manual v01 guidance, the following conditions must be strictly followed when using this certified module:

2.2 List of applicable FCC rules

2.3 Summarize the specific operational use conditions

2.4 Limited module procedures

Not applicable.

Not applicable.

This equipment complies with FCC mobile radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. If the module is installed in a portable host, a separate SAR evaluation is required to confirm compliance with relevant FCC portable RF exposure rules.

The following antennas have been certified for use with this module; antennas of the same type with equal or lower gain may also be used with this module. The External antenna must be meet the following requirements.

Passive Test For WIFI2.4 /BT								
Freq (MHz)	Effi (%)	Effi (dB)	Gain (dBi)	Gain (dBd)	UHS (%)	DHS (%)	Max (dB)	Min (dB)

The following antennas have been certified for use with this module; antennas of the same type with equal or lower gain may also be used with this module. The PCB antenna must be meet the following requirements.

2.8 Label and compliance information

The final end product must be labeled in a visible area with the following: "Contains

FCC ID: **2BS07-SPAMW21XXE**". The grantee's FCC ID can be used only when all FCC compliance requirements are met.

2.9 Information on test modes and additional testing requirements

This transmitter is tested in a standalone mobile RF exposure condition and any co-located or simultaneous transmission with other transmitter(s) or portable use will require a separate class II permissive change re-evaluation or new certification.

2.10 Additional testing, Part 15 Subpart B disclaimer

Host manufacturer is responsible for compliance of the host system with module installed with all other applicable requirements for the system such as Part 15 B.

IMPORTANT NOTE: In the event that these conditions can not be met (for example certain laptop configurations or co-location with another transmitter), then the FCC authorization is no longer considered valid and the FCC ID can not be used on the final product. In these circumstances, the OEM integrator will be responsible for re-evaluating the end product (including the transmitter) and obtaining a separate FCC authorization.

Manual Information To the End User

The OEM integrator has to be aware not to provide information to the end user regarding how to install or remove this RF module in the user's manual of the end product which integrates this module.

The end user manual shall include all required regulatory information/warning as show in this manual.

OEM/Host manufacturer responsibilities

OEM/Host manufacturers are ultimately responsible for the compliance of the Host and Module. The final product must be reassessed against all the essential requirements of the FCC rule such as FCC Part 15 Subpart B before it can be placed on the US market. This includes reassessing the transmitter module for compliance with the Radio and EMF essential requirements of the FCC rules. This module must not be incorporated into any other device or system without retesting for compliance as multiradio and combined equipment
