Re: Certification for Semeq Systems Corp. AxonHD Series
FCC ID: 2BSOL-AXONHD

If necessary, we have enclosed application materials for certification of Semeq Systems Corp. AxonHD Series. It has been verified to comply with CFR Title 47, Part 15.247.

Current Variants:

There is only a single hardware variant (HVIN): AxonHD. There are a total of six sub-variants with minor firmware configuration changes as follows: AxonHD, AxonHd - Data Collector, AxonHd - External Trigger, AxonHd - Internal Trigger, SMQ EDGE - S and SMQ EDGE - C. All variants employ identical HW with the only difference being firmware configuration at the factory before shipping. The manufacturer declares the EUT provided for testing represents the worse case configuration with regards to emissions.

If there are any questions regarding the application or testing performed, please contact us at the above address or call (734) 252-9785, or e-mail info@wrtest.com.

Sincerely, 
Joseph D. Brunett
