

REMOTE CONTROLLER INSTRUCTIONS

1. Let's Get Started

Your remote allows you to pair up to 50 lights. Note that you can only pair one light at a time.

Press the  button to turn the lights ON & OFF

Press and hold the  button to change the color temperature steplessly and release the button at your desired color temperature

Press and hold the  button to increase the brightness steplessly and release the button at your desired brightness.

Press and hold the  button to decrease the brightness steplessly and release the button at your desired brightness.

Press the  button to choose the light you like best: Just spot light, ambient Light, or both at the same time.

Press the **30MIN** button to activate the 30-minute timer. The lights will automatically turn off after 30 minutes.

2. How to Pair the Remote with Your Wall Light

Step 1: Take off the plastic film from the battery on your remote.

Step 2: Press and hold the  button on your vena light for 5 seconds until it blinks.

Step 3: Press and hold the pairing button  on the remote control and wait for the lights

Step 4: That's it! Your lights are now successfully paired.

3. How to Unpair Your Light

Step 1: Press & Hold the wall lamp's  button for 15 seconds.

Step 2: Watch for the lights – they will gradually brighten, then fade out.

Step 3: Success! The lights are now unpaired.

FCC Warning Statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
