User Manual

Names and Contents of Hazardous Substances in the Product

In accordance with China's "Marking Requirements for Restricted Use of Hazardous Substances in Electrical and Electronic Products"

Component Name	Hazardous Substances GAMBESON					
Wires/Power Supply	×	○	○	○	○	○
Circuit Boards & Electronic Component	×	○	○	○	○	○
Plastics	○	○	○	○	○	○
Metal Parts	×	○	○	○	○	○
Other Components	×	○	○	○	○	○

This table is prepared in accordance with SJ/T 11364.

○ = Indicates that the content of the hazardous substance in the homogeneous material of the component is below the limit specified in GB/T 26572.

× = Indicates that the content of the hazardous substance exceeds the limit in at least one homogeneous material of the component. All components marked with "×" comply with the EU RoHS Recast Directive 2011/65/EU. This table shows where these hazardous substances are present in the components of electrical and electronic products of "Dongguan Jiadengneng Electronics Co., Ltd." Depending on the model, the product may not include all the components listed above. Please refer to the actual product configuration.

The "Environmental Use Period" of this product is marked as shown below. According to the "Management Methods for the Restricted Use of Hazardous Substances in Electrical and Electronic Products," the Environmental Use Period refers to the duration during which, under normal use as instructed, the hazardous substances in the product will not leak or mutate, causing serious pollution to the environment or harm to persons or property.

△ The "Environmental Use Period" is not the safety use period, especially not the same as the use period limited by electrical safety or electromagnetic safety. When disposing of the product after proper use, please follow laws and regulations regarding the recycling and reuse of electronic information products.

Note: This period is the "Environmental Use Period," not the product quality warranty period.

For any product/warranty-related questions, please contact our customer service.

Warranty Terms

1. Please keep this warranty card safely when purchasing a new product.
2. This product is under warranty for one year from the date of purchase. If used normally without disassembly, and upon confirmation by warranty personnel that the issue is due to quality, repair services will be provided.
3. The following are not covered by warranty:
 - A. Warranty card without sales unit signature or seal.
 - B. Damage caused by force majeure.
 - C. Natural wear and tear.
4. For faults caused by human factors, beyond the warranty period, or force majeure, appropriate parts fees will be charged.
5. For product malfunctions, please contact the local agent for warranty service. Provide detailed information above to facilitate after-sales service.

GAMBESON®

This product is manufactured in a factory certified with ISO 9001 International Quality Management System.

Certificate of Compliance

Product Name: Wireless Charging Mouse Pad

Model: SHO-107

Inspector:

Production Date:

This product has passed inspection and is approved for 出厂 (factory release). The warranty period is one year.

Connection Method

Precautions

Overcharge Protection for Mouse

1. Charging activates automatically at around 75% battery and stops at around 96%. If the battery is above 80% and you need to check charging status, restart the power switch at the bottom of the mouse.
2. Not usable on metal desks.
3. Do not place metal objects on the charging area for extended periods to avoid damage.
4. Insert the mouse receiver module into the bottom of the mouse and restart the power switch. Place the mouse on the charging area and check in GHUB software to ensure the charging indicator is lit.

Safety Protection Mechanism

This product features multiple safety protections. Under the following conditions, the red indicator will light up or flash to activate automatic protection:

Overcurrent Protection Triggered:

When the load current exceeds the rated value, the product will automatically cut off output.

Handling Method:

- ✓ Disconnect power immediately
- ✓ Check if metal objects are placed on the charging area

Important Notes:

- ▶ Do not force restart the device while the red light is on, as it may cause component damage.
- ▶ If protection is frequently triggered, contact after-sales service for inspection.
- ▶ If the green light does not light up normally after power restoration, stop use immediately.

Manual Folding Method

Material: 80G Book Paper, Single Black Ink Double-Sided Printing

Size: 360×140mm

Finished Size: 120×140mm

Complies with RoHS and WUP034 standards.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
