

S28 MAX smartwatch Manual

Thank you for choosing our company's smartwatch.

You can fully understand the use of the device by reading this manual. This device is primarily used by connecting to a mobile phone via Bluetooth for pairing. It offers a variety of practical functions and services to facilitate your operation of the phone and includes many features developed for human exercise and health.

Our company reserves the right to modify the content of this manual without any prior notice.

This product is not a medical device. The health data and suggestions provided are for reference only and should not be used as a basis for diagnosis or treatment.

Charging Instructions

Please charge using the standard charger provided by our company. Our company is not responsible for any malfunctions caused by using a non-standard charger.

Operating Instructions

Button Functions: Long press to power on/off. Single press to enter the menu interface. When in other application interfaces, single press returns to the previous level. Double press in the menu interface to switch menu styles.

Touch Gestures: Swipe left to switch to the quick function widget interface. Swipe down to enter the application bar. Swipe up to enter messages. Within each function, swipe right to go back.

Connecting the Watch to a Phone

Download and install the "FereFit" APP on your phone.

1. For IOS/Android Phone Users

Scan the QR code below with your phone's browser or WeChat 'Scan'. Open the interface and select Android/iOS, then open the download link with your phone's browser.

The QR code below is for downloading the FereFit APP.

[Placeholder for QR code image description: FereFit APP Download]

Android/iOS

2. Alternatively: Search for "FereFit" and download it from the App Store (iOS), Google Play, or various phone application stores (Android). On Android phones, you can also use app stores like Tencent MyApp.

After downloading, during installation, click 'Agree' to all permission prompts. The watch needs to connect to the phone via two Bluetooth connections: 3.0 and 5.4 to enable all functions.

Bluetooth 5.4 Connection Method: After installation, open "FereFit" and turn on phone Bluetooth. FereFit will prompt to enable notifications; click OK. Click 'More' at the bottom right,

enter 'Scan for Devices', search for the Bluetooth address, and click connect. Some Android phones may require GPS to be turned on to find the watch's Bluetooth name.

Bluetooth 3.0 Connection Method: 1. Turn on the watch's 3.0 Bluetooth. 2. Turn on the phone's Bluetooth, click on the watch's Bluetooth name to connect, and follow the prompts. The phone should show "Connected".

How to Verify Successful Bluetooth Connection: On the watch's standby interface, pull down the status bar. If the icons for both Bluetooth 3.0 and 5.4 are blue + green, the connection is successful. If the Bluetooth icons are gray, they are not connected.

Simple Troubleshooting for Common Issues: Due to inconsistencies in Bluetooth protocols across different phone brands, connection instability may occur. Try turning the phone's Bluetooth off and on again, or reset the watch to factory settings.

How to Set Up Message Notifications

On your phone, go to Settings -> App Management, find "FereFit" -> Permission Management, and turn all permissions on. Then go to Notification Management -> find "FereFit" and turn all notification permissions on.

What to Do If You Don't Receive Notifications?

First, the watch's notification function only syncs with the phone's notifications (e.g., calls, messages, QQ, WeChat, WhatsApp alerts). If your phone doesn't receive a notification, the watch won't either. Ensure 'Allow Notifications' is turned on for the corresponding apps in your phone's Settings -> Notifications.

Feature Introduction

Sports: The watch features a variety of sports modes, such as running, indoor running, cycling, walking, hiking, yoga, basketball, soccer, badminton, baseball, table tennis, volleyball, spin bike, rowing machine, golf, Tai Chi, jump rope, elliptical machine, and free workout.

Call Menu: After syncing contacts with the app, users can view contacts, dial, and check call logs directly from the watch.

Activity Data: Displays daily step count, historical steps, calories burned, and walking distance. Data resets to zero at midnight each day.

Exercise Records: View data from past workouts.

Female Health: Connect to the app to set reminders for female health tracking.

Messages: View notifications pushed from the phone.

Alarm: The watch can set up to 3 alarms.

Music: Connect to the watch to control music playback on the phone.

Weather: After connecting to the app, the watch displays weather conditions for the next 3 days.

Camera: When the phone is unlocked, activate Bluetooth photography on the watch to enter the phone's camera interface. Press the watch to take a photo, which will be saved in the phone's album.

Find Phone: When connected via Bluetooth, tap "Find Phone" on the watch to make the phone

ring.

Stopwatch: Start single or multiple timing sessions.

Timer: Set a short countdown.

Games: Includes a list of casual mini-games.

Voice Assistant: After connecting via Bluetooth 3.0/5.4, tap the voice assistant on the watch for simple Q&A interactions.

Calculator: Perform basic calculations.

Digital Business Card: Use the app to set up QR code name cards for WeChat, QQ, WhatsApp, Twitter, Facebook, etc.

Payment QR Codes: Use the app to set up payment QR codes for WeChat, Alipay, PayPal, etc.

Calendar: View the monthly calendar.

Location Information: After connecting to the app and enabling location permissions on the phone, the watch can display the current location.

Altitude & Barometer: After connecting to the app, view current altitude and barometric pressure on the watch.

Settings: Access system settings.

Thank you for your purchase and for reading.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
