

# Official gateway Label

## Label Durability Statement

The label is designed to be permanent and will not peel off during the device's lifetime. We use the **Livasta PETWH50(A)PAT1 8LK2** label material from Lintec Corporation.

As specified in the attached technical datasheet:

- **Adhesive Type:** The label uses an acrylic-based permanent adhesive designed for general labeling applications.
- **Adhesion Strength:** Testing shows strong adhesion performance, with a peel strength of **15.5 N/25mm** after 24 hours (Lintec method) and **4.6 N/10mm** (JIS Z 0237 method).
- **Holding Power:** The material demonstrates a holding power of **NC 30000** seconds, indicating no slippage or detachment under test conditions.

These specifications ensure the label remains securely attached to the device enclosure throughout its operational life.
