

IYJOPE Smart Lamp Connection Operation Guide

1. Download the tuyu or smart life APP

2. Open the Tuya APP, click +, and then click add Device

3. Wait for the system to scan out the gateway, click the icon, enter the WIFI password, and wait for the connection to complete.

4. Connect the lamp to the power supply, Repeat "on, off, on, off"8 times. Until the lights flicker.

5. Open the Tuya APP, click +, and then click add Device

6. Wait for the system to scan, click the light, and wait for

Note: If you need to control through Alexa or Google smart speakers, a gateway must be connected. If you only need to control the lights through your mobile phone, you can skip steps 2.3.4 and directly connect the lamps

the connection to complete. This way, you can control your lights in the app.

7. Link to Alexa or Google Speaker, click on ME, then click on Alexa or Google, and finally click Link to bind.

(The picture shows an example of connecting to Alexa. To connect to Google, click on the Google icon. The operation is the same)

If you have any questions, you can watch the installation video in the Amazon sales link or contact us at ydgaobang@163.com.

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Thank you!

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
