Smart Pet Feeder (All information is subject to the actual product.)

Specifications & Functions of WIFI Version Smart Feeder

Product Specifications

1. Product Name: Smart Wet Feeder
2. Product Model: MV25002
3. Voltage & Current: 12V 10A
4. Power: 120W
5. Network Frequency: 2.4G/5G BL
6. Power Supply: DC Adapter
7. Product Size: 300300230mm
8. Product Weight: 5kg
9. Main Materials: ABS, SUS304
10. Product Capacity: 5 Portions, 150g X5

Function Description

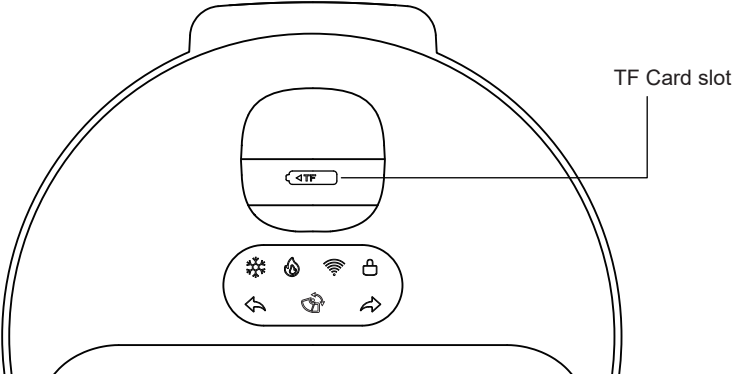

- 1. Remote Control via Smart Life APP
- 2. Low-temperature Refrigeration and Fresh-keeping
- 3. Feeding with Constant Temperature Heating
- 4. Fully Anti-pinch Feeding
- 5. Food Dispensing Reminder
- 6. Feeding Record
- 7. Voice Recording
- 8. Feeding Voice Broadcast Reminder
- 9. Manual Feeding
- 10. Automatic Feeding with Customizable Feeding Plans
- 11. Device Sharing
- 12. Remote Video and Voice Interaction
- 13. Remote Shooting, Recording, and Playback
- 14. Automatic Living Object Movement Detection
- 15. TF Card Storage (Supports up to 128G)
- 16. Intelligent Camera Tracking
- 17. Automatic Locking Function for Button Panel

Automatic feeding:

- 1. Feeding plan: Please align the 1st position of the feeding turntable with the outlet, and then click the feeding plan reset button on the APP or long press the device ⬅️or ➡️button for 5 seconds before setting the feeding plan. The feeding plan will be set based on this as the 1st plate Feed in order.
- 2. Feeding process: When the meal is served, the owner will play a recorded short voice call for food. The manual feeding time is 15 minutes, and the automatic feeding time can be set from 15 minutes to 4 hours.
- 3. Feeding heating: The equipment will automatically heat the food before serving, and after heating is complete, the food will be automatically served. Set automatic feeding schedule Please set a new feeding plan 30 minutes after the completion of the previous feeding plan.

Manual feeding:The default time for the manual feeding outlet to remain open is 15 minutes. If the pet is still eating after 15 minutes, the outlet will remain open and be monitored every 5 minutes until the device detects that the pet is no longer present, at which point the outlet will close completely.

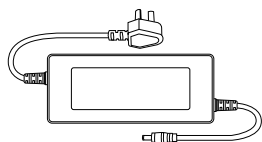

Button Operation Guide

	Refrigeration Button
	Heating Button
	Network Configuration Button

Instructions

Network Configuration Operation Guide

1. Scan the QR code to download the Smart Life APP.

2. Power on the device and long press the network configuration button  for 3 seconds to configure the network.
3. Keep the Bluetooth and WiFi connections enabled on your phone.
4. The APP will intelligently identify nearby devices—just tap "Add Device" to proceed.
5. After connecting the adapter, the device will automatically turn on and perform a 10-second self-check. Once the camera is aligned, the device will emit a "beep beep" sound and begin network configuration, while the WiFi light will flash. To reset the device to factory settings and reconfigure the network, press and hold the WiFi button for 3 seconds when replacing the network control device. Note: Locking the child lock does not affect normal network configuration of the device. Translated with DeepL.com (free version)

Light Indication

1. Snowflake icon❄️: The cooling on icon stays on, while the cooling off icon goes off.
2. Flame icon🔥: Breathing during the heating process, the indicator light for not heating or heating completion is off.
3. Network icon📶: Wait for the distribution network icon to flash, the icon breathes

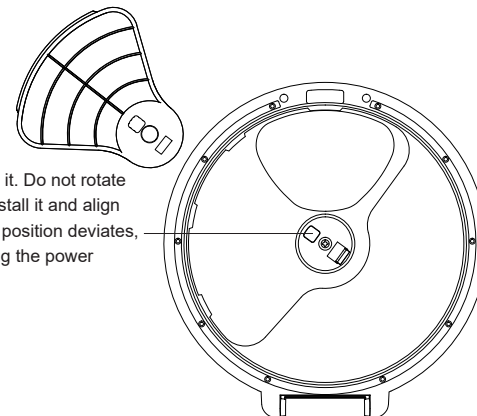

5.

during the distribution process, and the distribution network completion icon stays on.

4. Child lock icon🔒: If the panel is not operated for 20 seconds, it will automatically lock and remain on. Press and hold for 3 seconds to unlock and turn off.

Maintenance and Maintenance

- Cleaning the Food Tray: Regularly disassemble the food tray and wash it with warm water and a neutral detergent.
- Cleaning the Feeding Port: Food residues easily accumulate at the feeding port. Regularly clean it with a towel or tissue. Do not rinse with water.
- Cleaning the Refrigerated Compartment: Regularly wipe off standing water in the refrigerated compartment with a towel or tissue. Do not rinse with water.

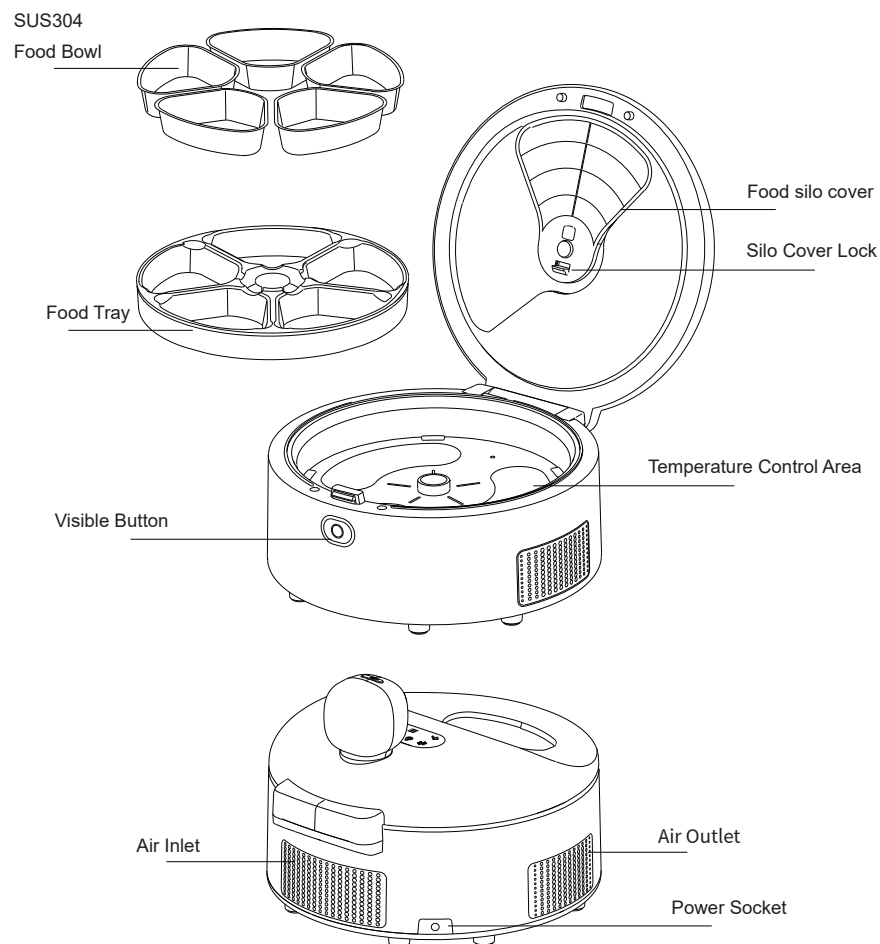

Remove the food cover and clean it. Do not rotate the food cover. After cleaning, reinstall it and align it with the hole position. If the hole position deviates, you can repeatedly plug and unplug the power supply to move the hole position.

Device Precautions

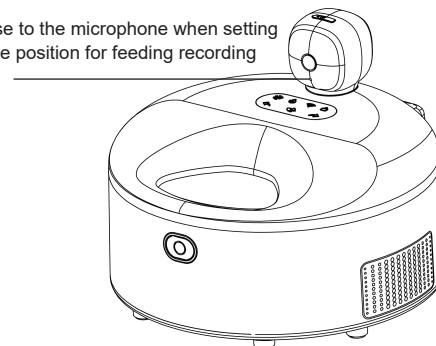

- Do not rinse the exterior of the device. Prevent water from entering to avoid damaging the device.
- The food tray of the device is detachable and can be rinsed. It must be air-dried before being reinstalled into the device.
- If you replace the network control equipment at home, please long-press the left and right buttons simultaneously for 5 seconds, then reconfigure the network.
- When powered solely by batteries, the device will not activate cooling, but it will still feed according to the pre-set feeding plan (this function consumes significant power and is not recommended for long-term use).
- The entire machine is covered by a one-year warranty. Damage caused by human error or damage to appearance parts is not covered by the warranty.

6.

Internal Structure

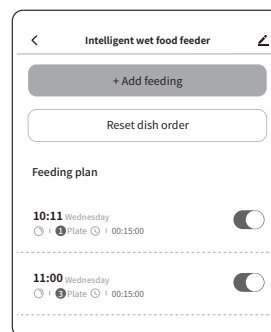

Please be close to the microphone when setting the microphone position for feeding recording

APP precautions

1. The feeding plan must be set at least 30 minutes after the completion time of the previous feeding plan.
2. After setting the feeding plan, please do not manually shuffle the dishes, otherwise it will disrupt the order of serving.
3. If the device does not serve according to the feeding schedule, please click the reset feeding tray order button.
4. Pressing the reset tray sequence button will recalibrate the feeding tray at the outlet as tray 1. Before setting, please align tray 1 with the outlet.
5. Manual heating: Click on heating, turn on heating and then turn off cooling. The heating time is 10 minutes, and after heating is complete, let it stand for 5 minutes before automatically serving. After heating is completed, cooling will automatically start 10 seconds later. Note: Heating cannot be turned on when the dining outlet is open.

Smart Life App

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
