

product name:WIRELESS CHARGER

Model:XWD-002

Embedded circular desktop wireless charging

1、 Product Overview

This product adopts an embedded design, integrating the socket and USB charging module into a circular desktop base,

Realize a balance between invisibility of desktop space and convenience of electricity usage.

Suitable for office desks, conference tables

Home edge devices and other scenarios support wireless charging, USB and Type-C device fast charging.

2、 Technical parameters

Category parameter description

USB output: 5V $\pm$ 0.2V/2A Max,

Material and process shell: PC+ABS flame retardant material (V0 level fireproof)

USB interface: Nickel plated anti rust copper core

Size diameter 75mm x height 23mm (embedded installation depth 18mm)

3、 Installation steps

Step 1: Close the corresponding circuit breaker to ensure no power operation.

Step 2: Select the installation depth gear based on the thickness of the desktop and adjust the height of the buckle bracket.

Step 3: Insert the socket body into the opening and tighten the bottom fixing screw (flush with the desktop).

Step 4: Power on test to confirm that USB charging is normal.

4、 Safety precautions

Child protection to prevent foreign objects from entering.

Environmental requirements: Avoid direct sunlight or humid environments, working temperature -20 °C~45 °C.

5、 Maintenance and Warranty

Cleaning and maintenance: Wipe the surface with a dry cloth, and do not use alcohol or corrosive solvents.

Fault handling: If the protection power is triggered, wait for 10 minutes for it to cool down before resetting.

Warranty service: 1 year free replacement (excluding faults caused by human damage or non certified chargers).

6、 Accessories List

Socket body 1, including pre installed dust cover,

Note: This manual integrates embedded structure, USB fast charging solution, and security protection design. Please refer to the actual product for accuracy.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.
