Characteristics of the product

The smart cat nest not only has a fashionable design, but also creates an exclusive physical and mental rest space for pets.

Open design Adopting an open design, it provides pets with a more free and comfortable space.

Comfortable pet bed that is warm in winter and cool in summer. The Smart Cat Nest is warm in winter and cool in summer, with a temperature range of 10°C to 50°C between them, there are five Settings for every 10°C. ※ The temperature values described in this manual are subject to ambient conditions such as room temperature due to the influence of factors, all are reference values (not real-time precise temperature measurement).

Scene music Five types of pet-preferred music are carefully selected. The music will intelligently turn off at a set time after playing for 30 minutes.

Prevent toppling Anti-toppling accessories can be added.

Comfortable waterproof pad A comfortable waterproof tray for both winter and summer has been prepared. Sturdy and durable. And it can be washed with water. Designed specifically for pets with excretion problems.

Safety Precautions

【Read carefully before use】

*These safety precautions must be strictly followed to avoid harm and damage.

The symbol indicates mandatory steps. Symbol indicates prohibited actions.

- WARN** Failure to follow the guidelines below may result in serious injury or death (e.g., from electric shock, fire, explosion, etc.).
- This product is intended for domestic dogs or cats only and should not be used for any other purpose.
- Use this product horizontally.
- Do not use near flammable hazardous materials (including gasoline, flammable aerosols, thinners, etc.).
- Do not disassemble or modify as this may cause electric shock or cause fire.
- Do not use outdoors.
- Dedicated AC adapters are only available domestically. The original companion AC adapter must be used.
- Make sure the AC adapter plug is fully inserted.
- Prevent pets from chewing wires - risk of fatal electric shock. Use cable protectors if needed.
- Do not use a multi-plug adapter.
- Do not scratch, pull, or apply weight on the wires.
- Do not touch this product with wet hands.
- This product is not waterproof, do not wash with water, and take care to avoid moisture on the product.
- Always power off before cleaning. Refer to the manual for detailed care instructions.
- If the product fails, please do not repair it yourself, please contact the merchant for processing.
- Do not use this product on pets less than 3 months old. Because the thermoregulation function of pets under 3 months old has not yet developed, it is too affected by cooling & heating, and there are health risks.

NOTE Failure to follow the guidelines below may result in product damage.

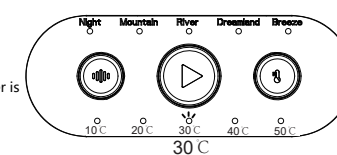

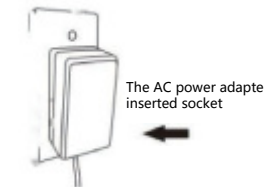

- Do not place items on top of the body.
- Adult supervision required for children's use.
- To keep the product clean and dry, make sure the mat is always dry when using.
- This product is an electrical product, please avoid falling, colliding, applying external force or scratching.
- Do not use in direct sunlight or dusty environments.
- Do not use in environments with humidity exceeding 80%.
- Keep objects away from the infrared sensor for proper operation.
- Use within 0°C~40°C ambient temperature. Keep away from heating vents.

Preparation Before Use - How To Use

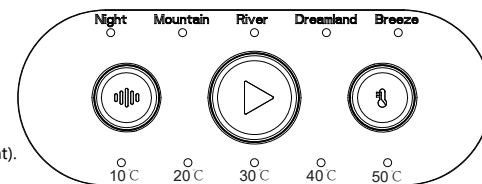

- Please install the included mat inside the main body. The accessories of the product include a waterproof pad for both summer and winter. Before using the product, first put the summer and winter shared waterproof pad into the cat nest.
- Insert the AC power adapter plug into the device interface.
- Please place the device in a horizontal position. Please install anti-toppling accessories when necessary.

- Please insert the AC power adapter into the socket. Do not use near flammable hazardous materials (including gasoline, flammable sprays, thinners, etc.). The main body will start automatically (all indicator lights will be on for 1 second). The initial temperature in the cooling and heating nests is set at 25°C.

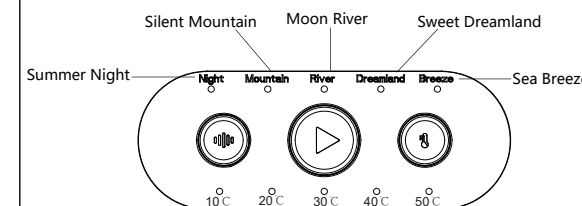

- Please set the initial temperature of the built-in "Cooling & Heating" mode of this device. The adjustable temperature range is 10°C to 50°C (50°F to 122°F) and it supports 5 Settings: 10°C, 20°C, 30°C, 40°C, 50°C (50°F, 68°F, 86°F, 104°F, 122°F). The temperature values described in this manual are subject to ambient conditions such as room temperature. Please adjust them as needed. Ⓢ Due to the influence of infrared sensors, all values are reference values (not real-time precise temperature measurement). Do not scratch, pull the wires or apply weight to them. Each time the button is pressed, the white indicator light turns on and the set temperature switches accordingly.

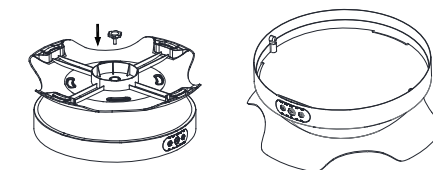

The setting method of scene music

When using scene music, press the ON/OFF button to set it. Press and hold the button for 2 seconds. The white indicator light will come on and the scene music function will be activated. It comes with 5 built-in scene music options, and the default playback is the "Summer Night". Each time you press the button, you can switch the scene music. Please select the most suitable music type according to the real-time status of your pet. The scene music will automatically stop playing after 30 minutes or press and hold the button again for 2 seconds to stop playing.

Anti-toppling function

If there is a risk of toppling, please install the anti-toppling accessories as shown in the diagram.

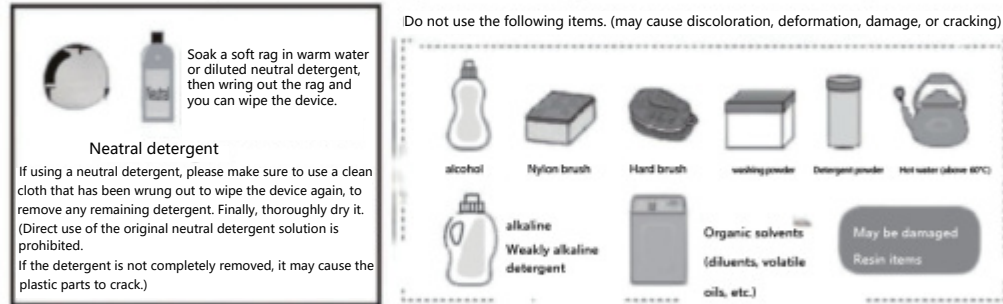

Cleaning and Maintenance Methods

device

• If you find any stains, clean them up promptly.

• Be sure to unplug the AC adapter before cleaning.

[Note] Do not directly rinse or wash the body to clean the device because there is a risk of leakage and electric shock.

Federal Communications Commission (FCC) Statement
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
•Reorient or relocate the receiving antenna.
•Increase the separation between the equipment and receiver.
•Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
•Consult the dealer or an experienced radio/TV technician for help.
Warning: Changes or modifications made to this device not expressly approved by

may void the FCC authorization to operate this device.
Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

RF exposure statement:
The transmitter must not be colocated or operated in conjunction with any other antenna or transmitter. This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a Minimum distance of 20cm between the radiator and any part of your body.
