FCC Attention:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Safety and Precautions:

-**Power Supply:** Use qualified sockets/power strips; do not connect excessive loads in series. Never use damaged wires or aging sockets.

- **Environment:** Indoor-only models are prohibited for outdoor use; outdoor models should avoid prolonged immersion in water. Keep away from flammable materials such as curtains and paper.

Do not dispose of it in ordinary trash; please follow the designated waste disposal guidelines.

- **Personnel:** Prevent children/pets from pulling or gnawing on the equipment. Avoid staring directly at high-brightness LED lamp beads for a long time.

- **Usage Duration:** It is recommended to use the equipment for no more than 8 hours a day. Cut off the power when unattended, and a timer can be used to prevent forgetting to turn it off.
